# Overview of AI in Canva

Canva have introduced a huge number of Mockups AI features for image and video creation.

Some of these are free features but other are Pro features. However, most of them can be used by Free users a certain number of times you can try them out.

# Magic design for images: Upload an image and it will auto populate templates

The screenshot shows the Canva website interface. At the top, there is a navigation bar with the Canva logo and various menu items like 'Design spotlight', 'Business', 'Education', 'Plans and pricing', and 'Learn'. A 'Create a design' button is visible in the top right corner. Below the navigation bar, there is a search bar with a dropdown menu. The dropdown menu is open, showing a search bar and a list of suggested design types: Doc, Whiteboard, Instagram Reel, Instagram Post (Square), Facebook Cover, YouTube Thumbnail, Video, and Mobile Video. Below the suggested design types, there is a section titled 'Start creating from your media' with two options: 'Custom size' and 'Import file'. A red arrow points from the 'Create a design' button to the 'Import file' option. Another red arrow points from the 'Import file' option to the first step of the instructions.

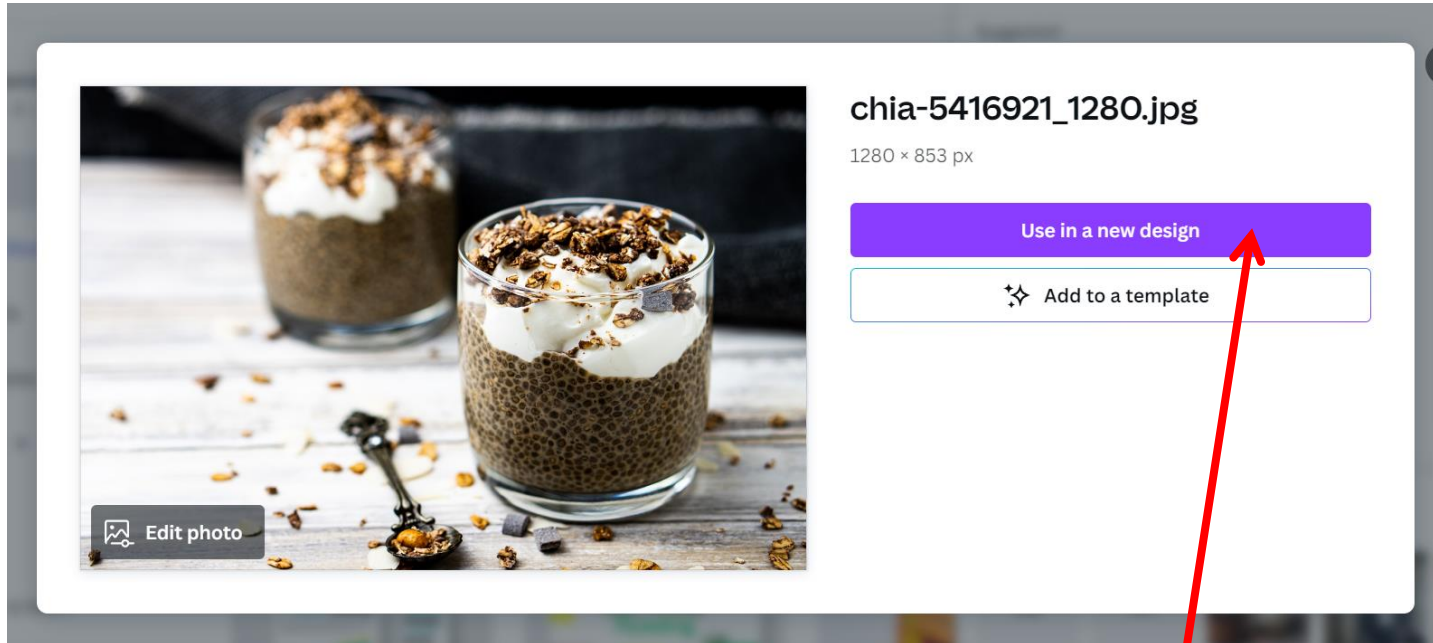

1. Click on Create a design
2. Click import file and select the image from your PC

**This is a Pro feature**

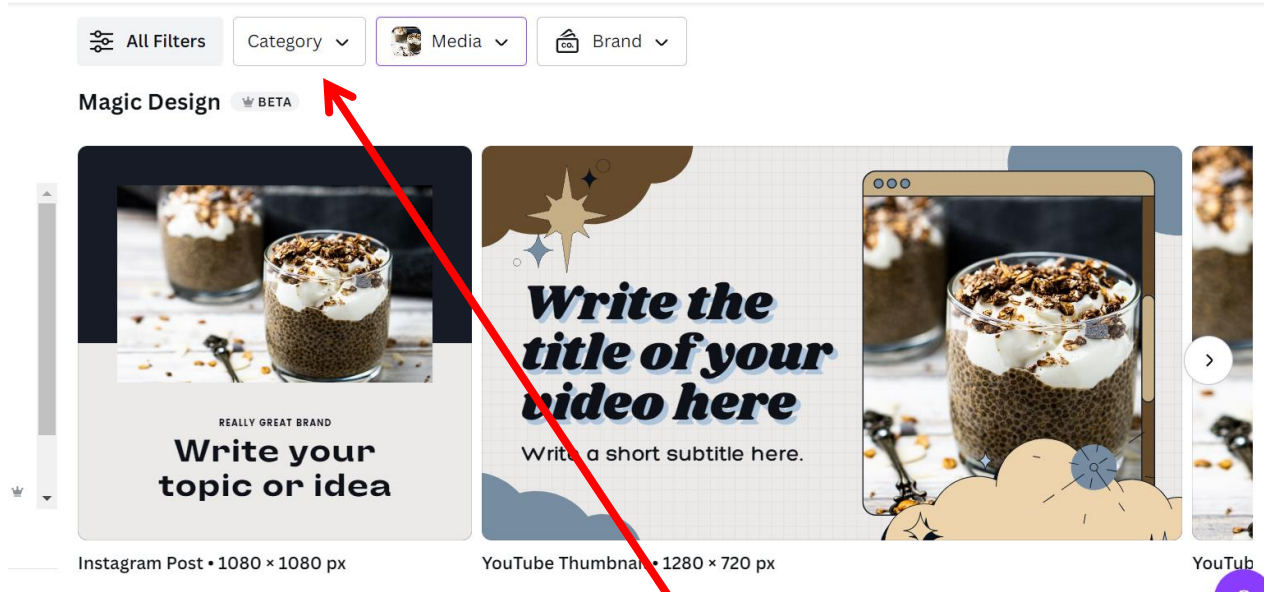

However, free accounts can use it 10 times for free

# Magic design for images: Upload an image and it will auto populate templates

1. Click use in a template

# Magic design for images: Upload an image and it will auto populate templates

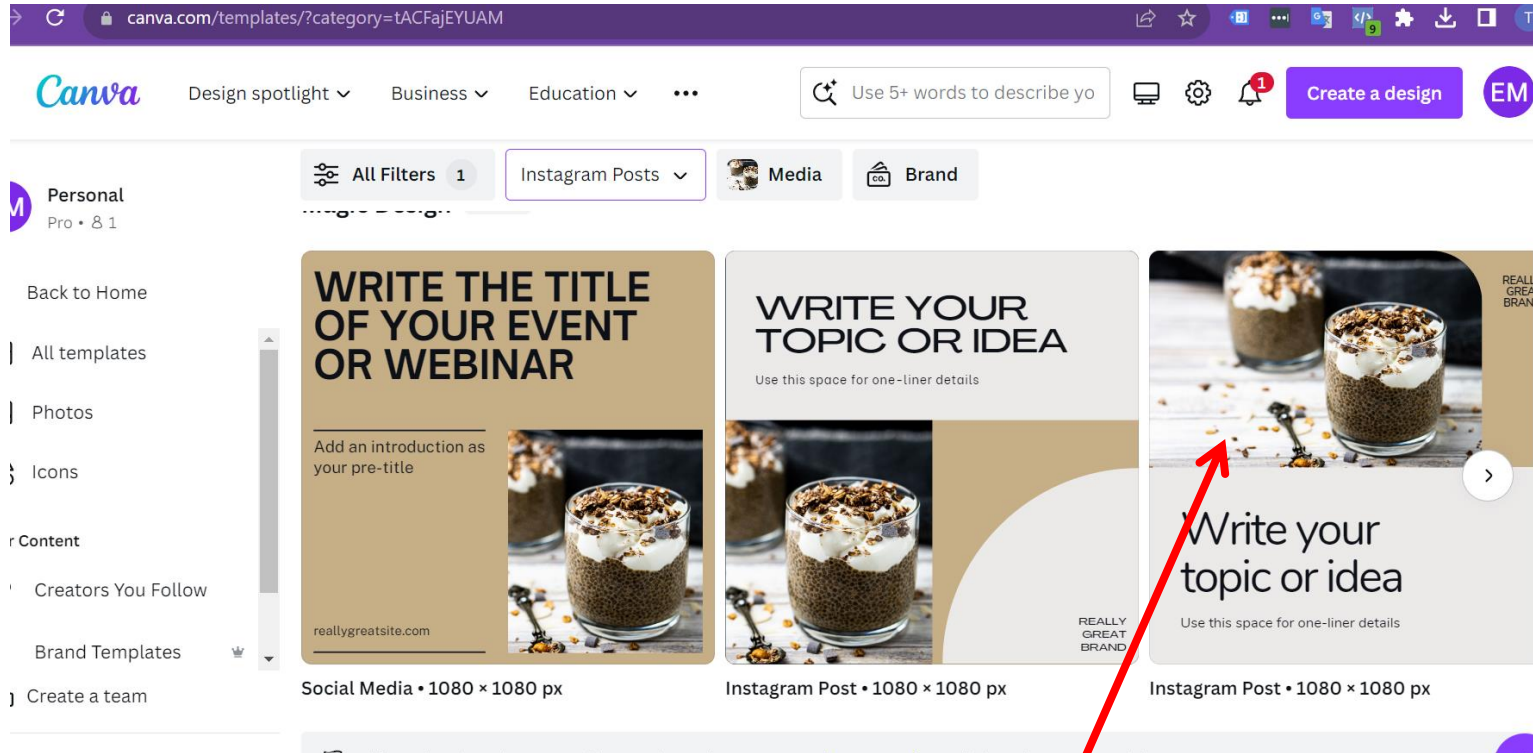

You are now shown lots of template designs that contain your image

To just see square or portrait designs click on category and choose the one you want under Social Media

If you have the Pro version of Canva click Brand and you will see the design with your brand colours.

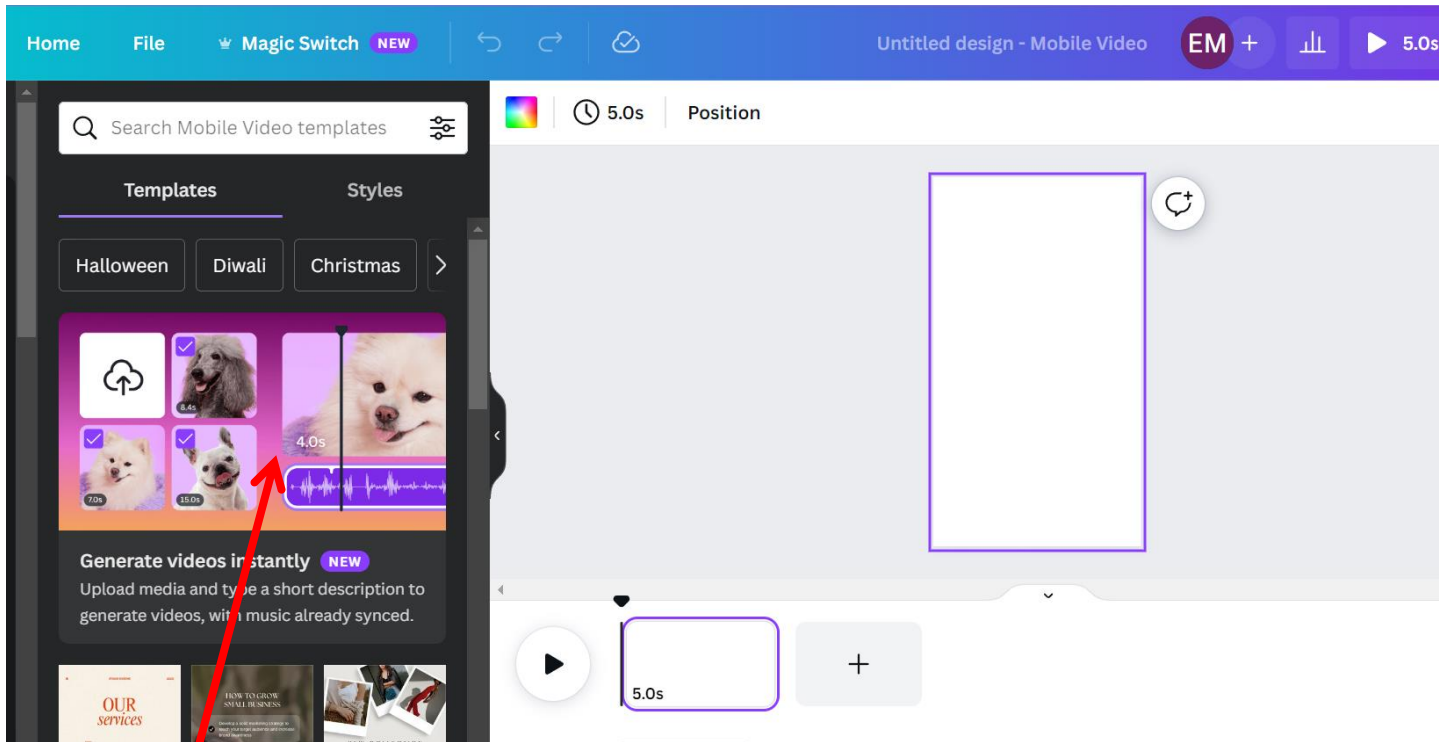

# Magic design for images: Upload an image and it will auto populate templates

To choose the one you like, click on it and then select customise template

# Magic design for videos: Upload 3+ videos / images and Canva will generate a video

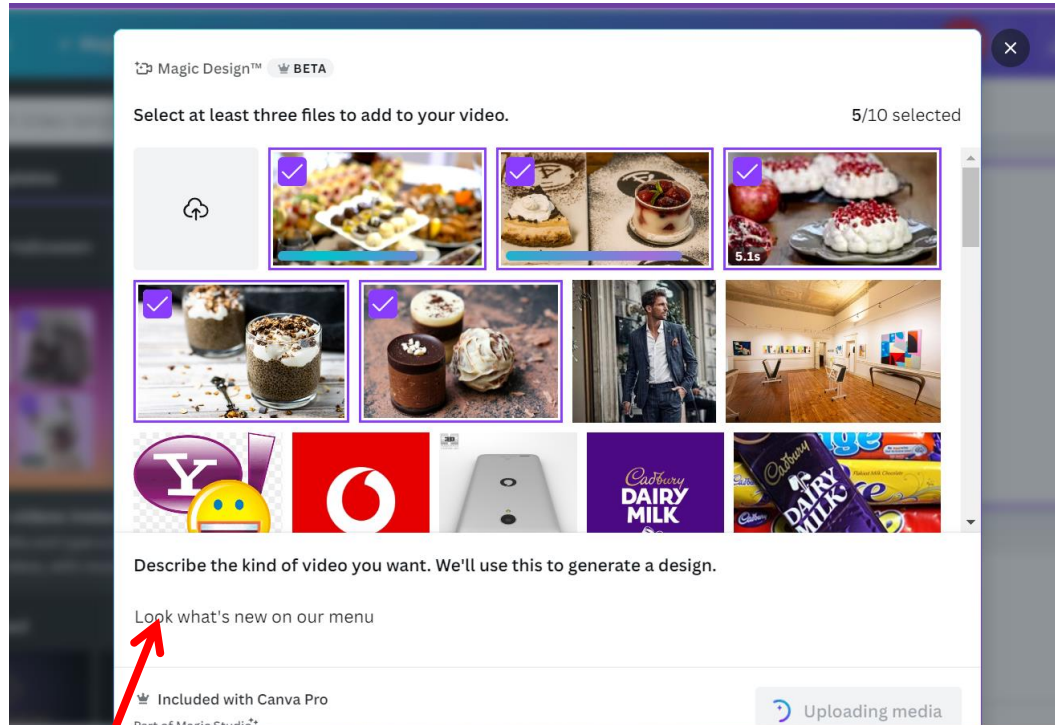

Choose a video project (16:9 , 1:1 or 9:16)  
On the left-hand side look for the option  
“Create videos instantly”

**This is a Pro feature**  
However, free accounts can  
use it 10 times for free

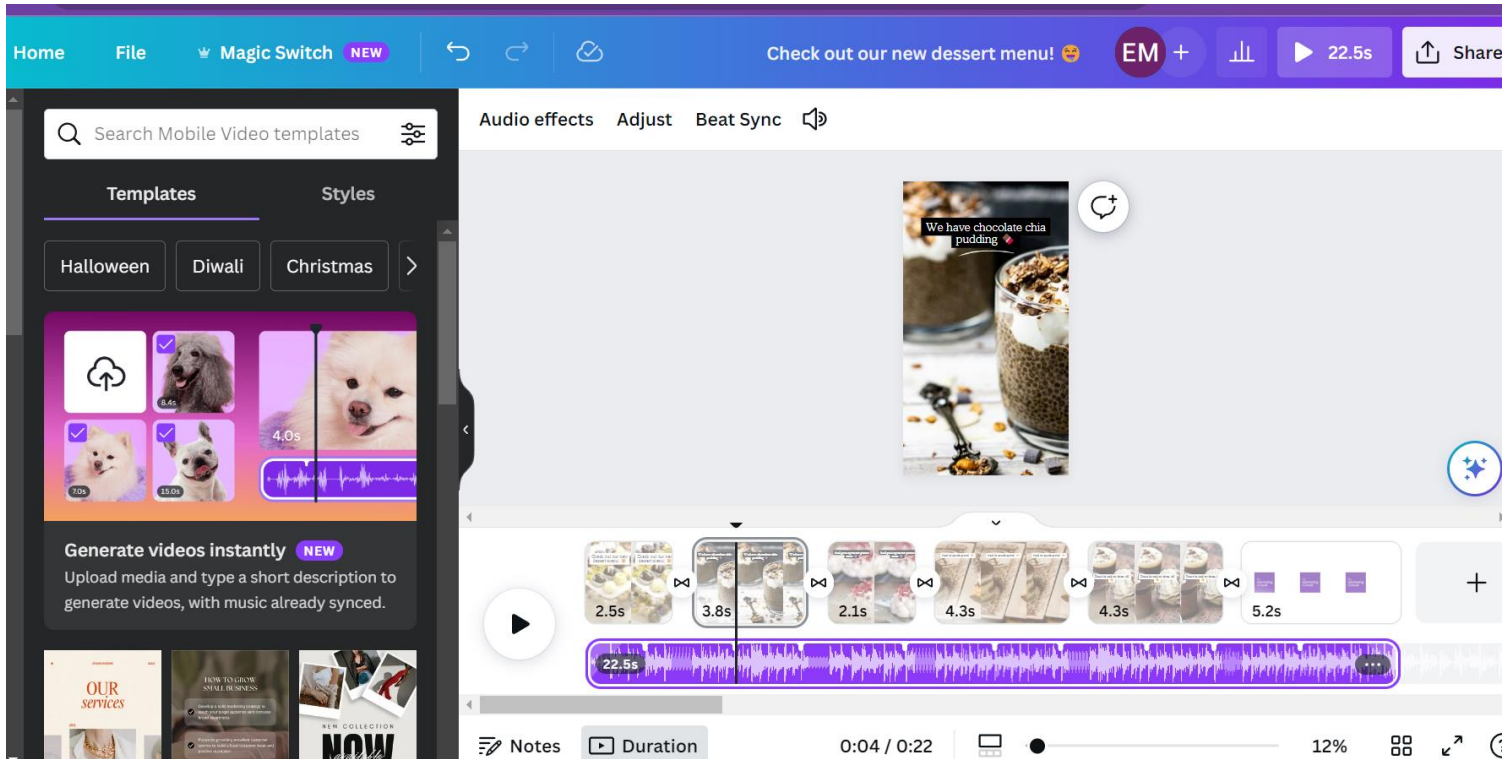

# Magic design for videos: Upload 3+ videos / images and Canva will generate a video

If your files are not already uploaded, upload them  
Choose a minimum of 3 videos and or images from your PC. Max is 10

Then write a description. The AI will use this description to generate text headlines and captions on your video.  
Then click the generate button

# Magic design for videos: Upload 3+ videos / images and Canva will generate a video

Within 10 seconds the AI will generate the video for you, including text headlines

You can then if you wish

- Change the text
- Adjust any colours (text, shapes, background)
- Change the music

# Magic edit: Highlight part of an image and type what you want to replace it with

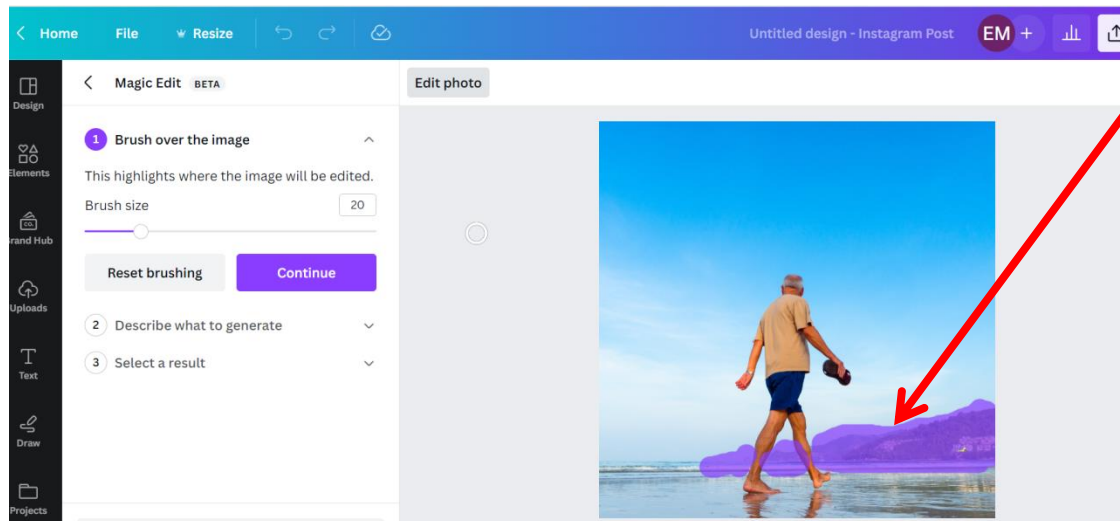

Canva now utilises AI to let you change or add things to your image by selecting an area and typing what you want.

Add your image to a canvas  
Click edit photo

Click Magic edit

Use the brush to highlight the area that you want to replace

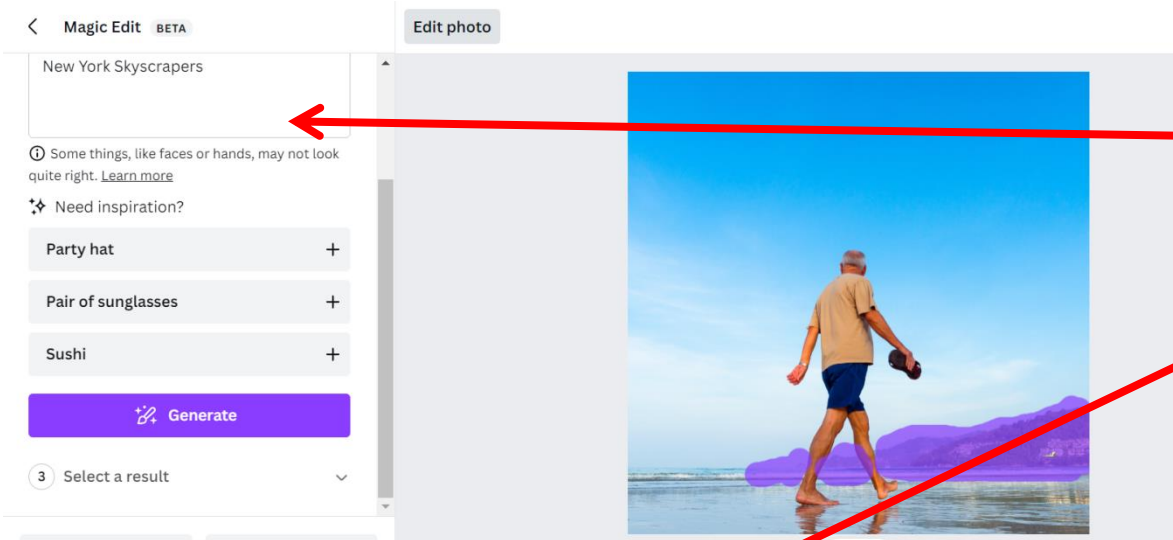

Then click continue

**FREE**

**This is a Free feature**  
It can be used by Free and Pro accounts

# Magic edit: Highlight part of an image and type what you want to replace it with

Type what you would like to replace it with e.g. Skyscrapers

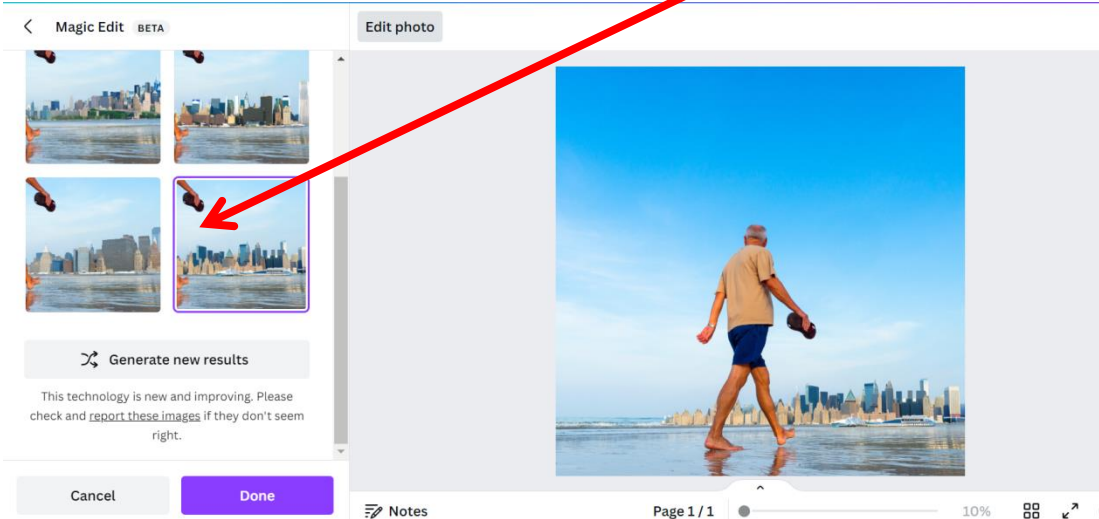

You can then choose from different options

Click save

You could use this tool to

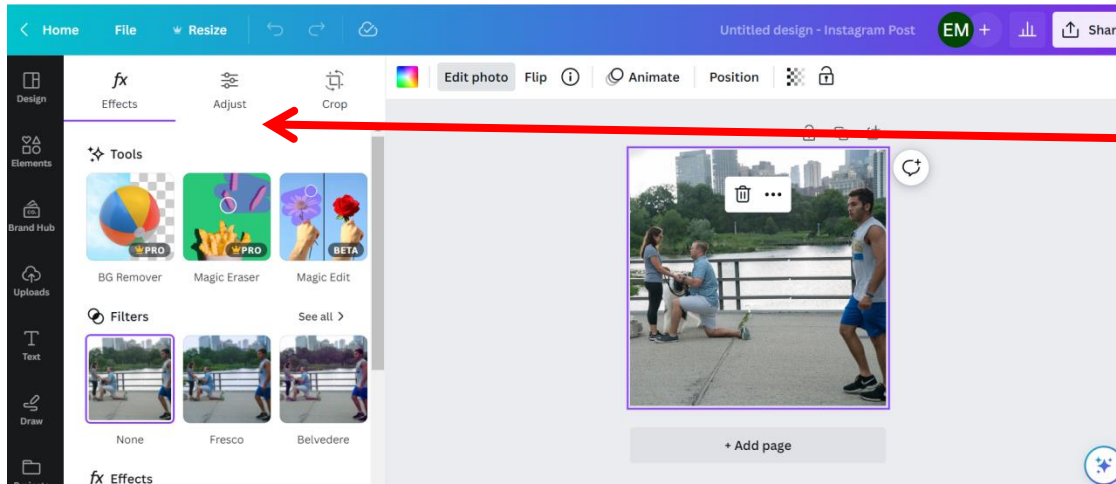

- Add things to your image that are not in it
- Replace things that are in it with something different
- Change the colour of someone's hair

Plus lots more.

# Magic eraser: Highlight people or objects in an image and it will erase it

Note – you need the Pro version to use this tool

Add your image to the canvas

Click on edit image

Click on magic eraser

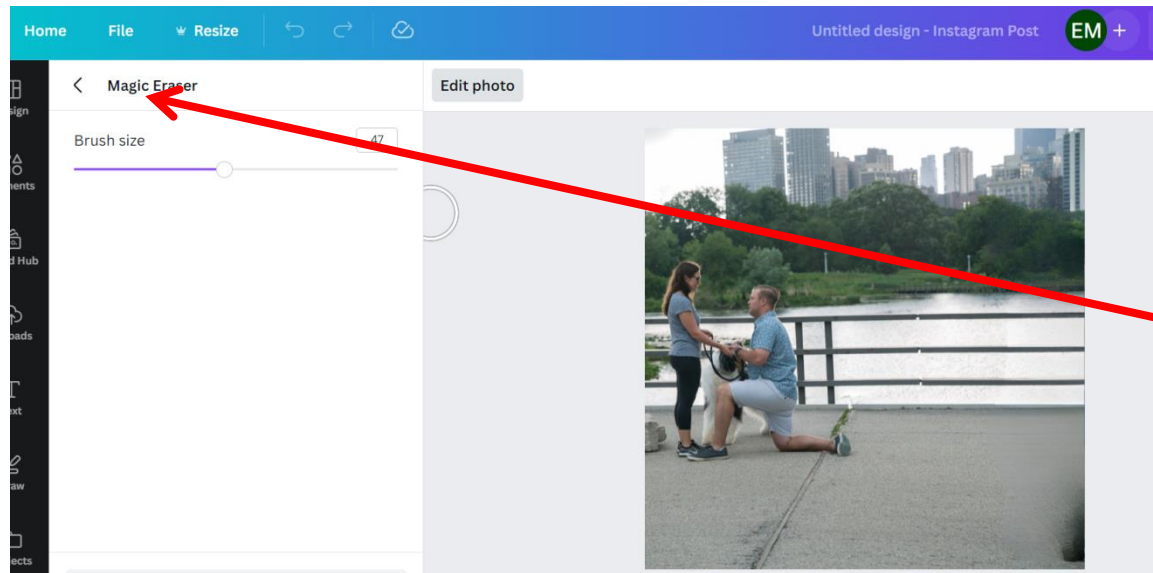

Highlight with the brush what you want to erase

**This is a Pro feature**

It cannot be used by Free accounts (But I have a free alternative)

# Magic eraser: Highlight people or objects in an image and it will erase it

It will now be erased

If you are not happy with the results  
click reset erasings

Try a larger or smaller brush –  
depending on how big or small the  
object is

Then click on the arrow to progress

# Magic eraser: Highlight people or objects in an image and it will erase it

**A free alternative to this eraser tool is the website**

Cleanup.pictures

# Magic media – Text to image generator

## Create an image by describing it:

- Select your canvas shape
- On the left menu click on Apps
- Search for Magic Media
- Click on Magic media

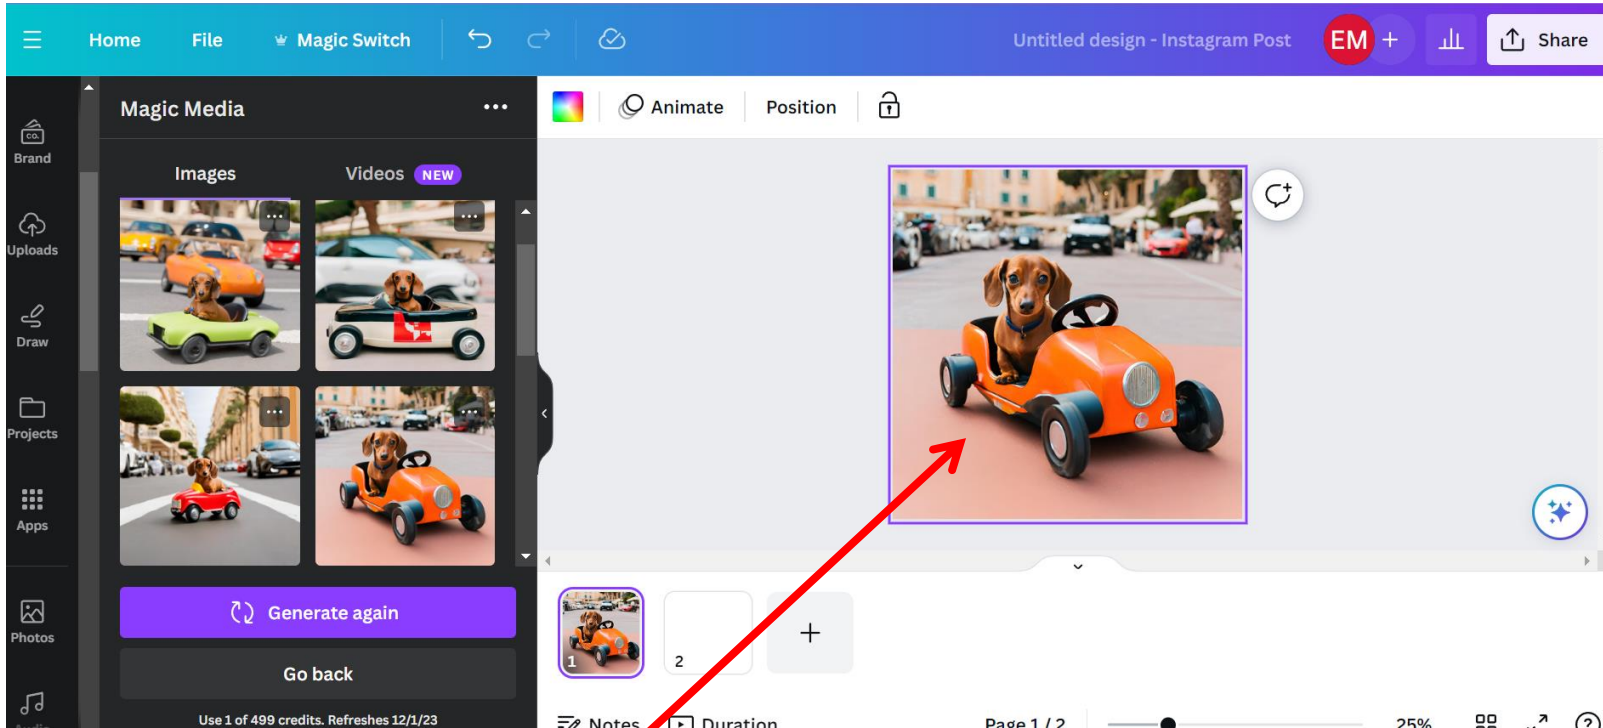

**This is a Pro feature**  
However, free accounts can use it 50 times for free

# Magic media – Text to image generator

Type in your description. Be as descriptive as possible  
Then choose the style of your image e.g. Photo, anime, dreamy  
Also choose the shape of your image e.g. 1:1, 9:16, 16:9

# Magic media – Text to image generator

If you want more options click Generate again  
Click on one of the 4 images to add to your design

# Magic media – Text to video generator

## Create a short video by describing it

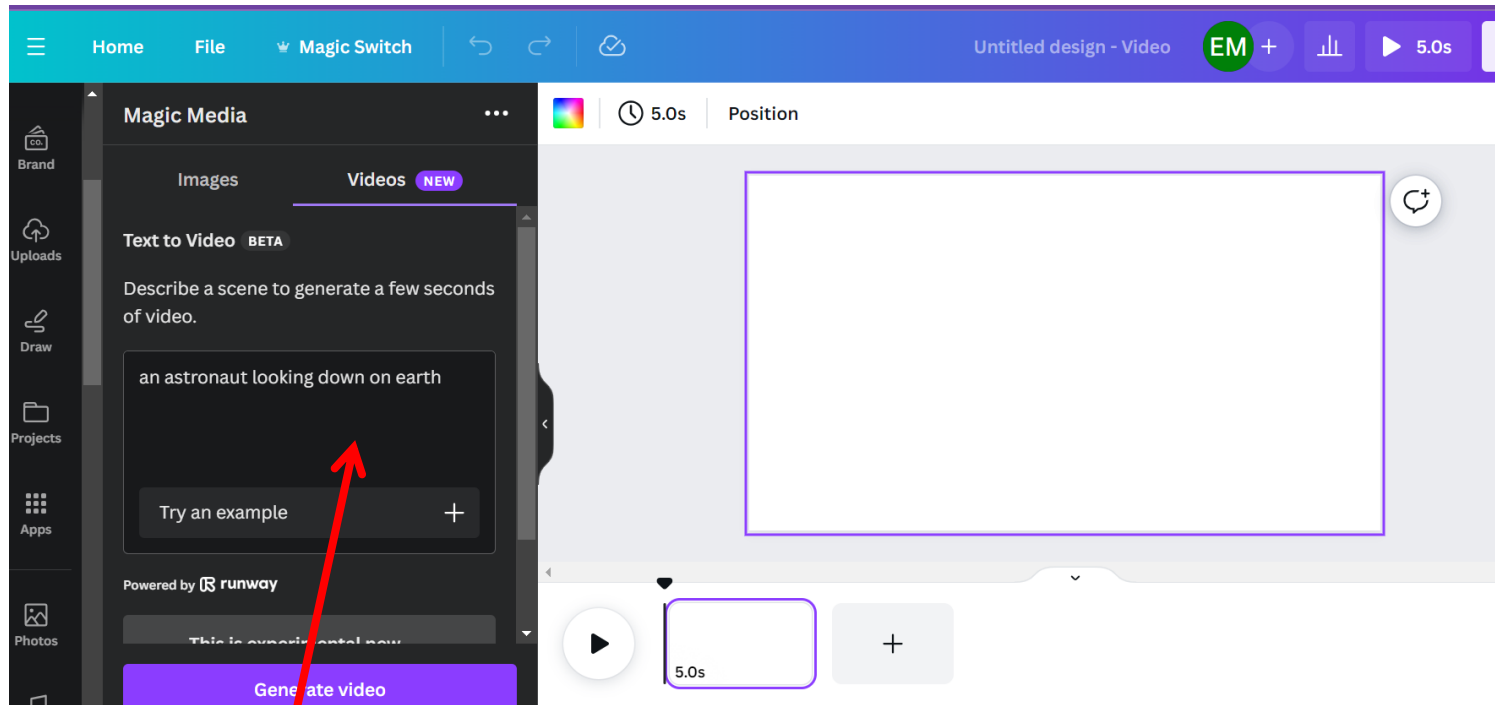

- Select your canvas shape
- On the left menu click on Apps
- Search for Magic Media
- Click on Magic media

**This is a Pro feature**

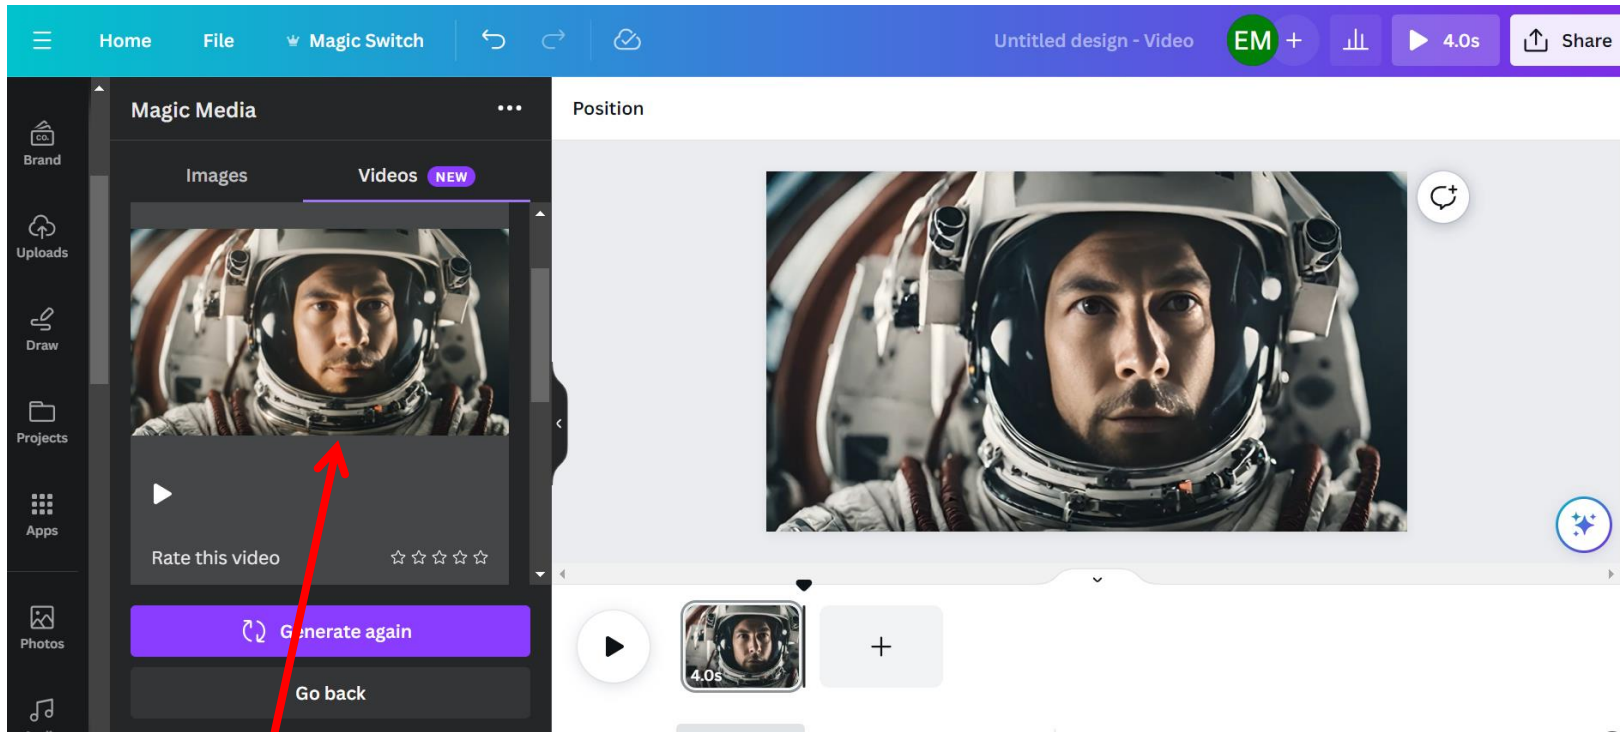

However, free accounts can use it 5 times for free

# Magic media – Text to video generator

Click on Video to indicate you want to create a video  
Type in your description. Be as descriptive as possible  
Click generate

# Magic media – Text to video generator

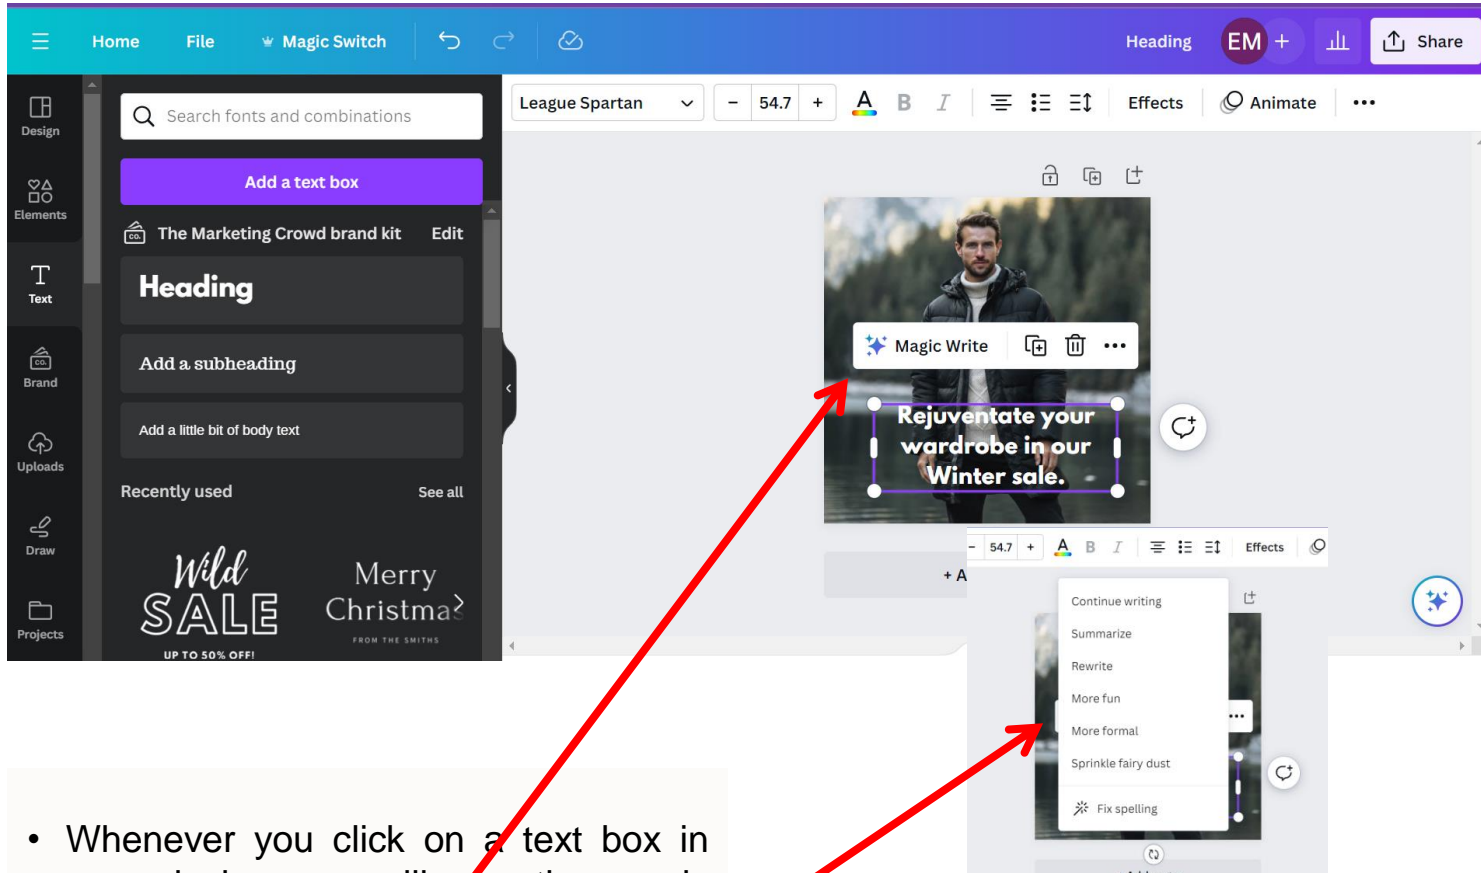

When your video is generated simply drag it down onto the timeline

Your video will be 5 seconds long

Click generate again if you want a different version. When you do it uses one of your credits

# Magic write – generate initial drafts of text and other copy options

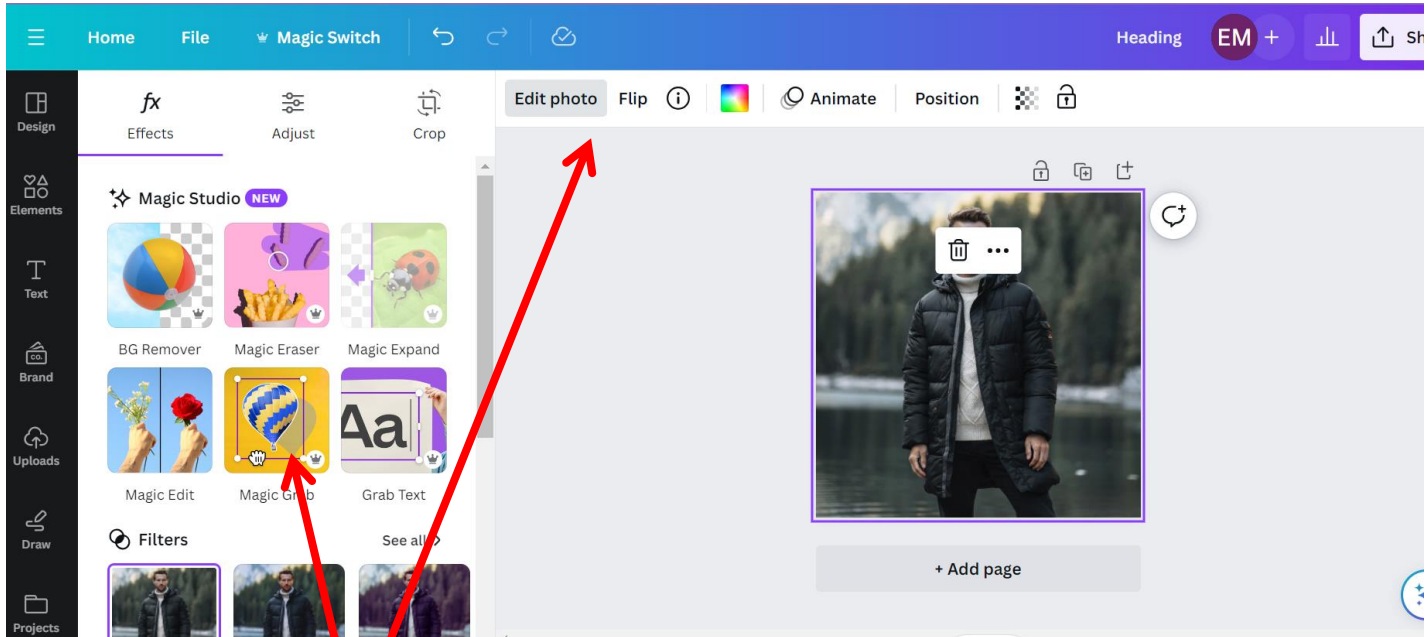

- Whenever you click on a text box in your design you will see the magic write option
- Write your text
- Then click on magic write
- You now have these options. Click each option to see their suggested text

**This is a Pro feature**  
However, free accounts can use it 50 times for free

# Magic grab – isolate and move anything within an image

Add your image to your design  
Click on your image  
Click edit photo  
Then click on Magic Grab

**This is a Pro feature**  
It cannot be used by Free  
accounts

# Magic grab – isolate and move anything within an image

It then identifies the main element in the image  
You can then move that element left or right or make it bigger or smaller– ideal if you want to add text beside a person

# Magic grab – isolate and move anything within an image

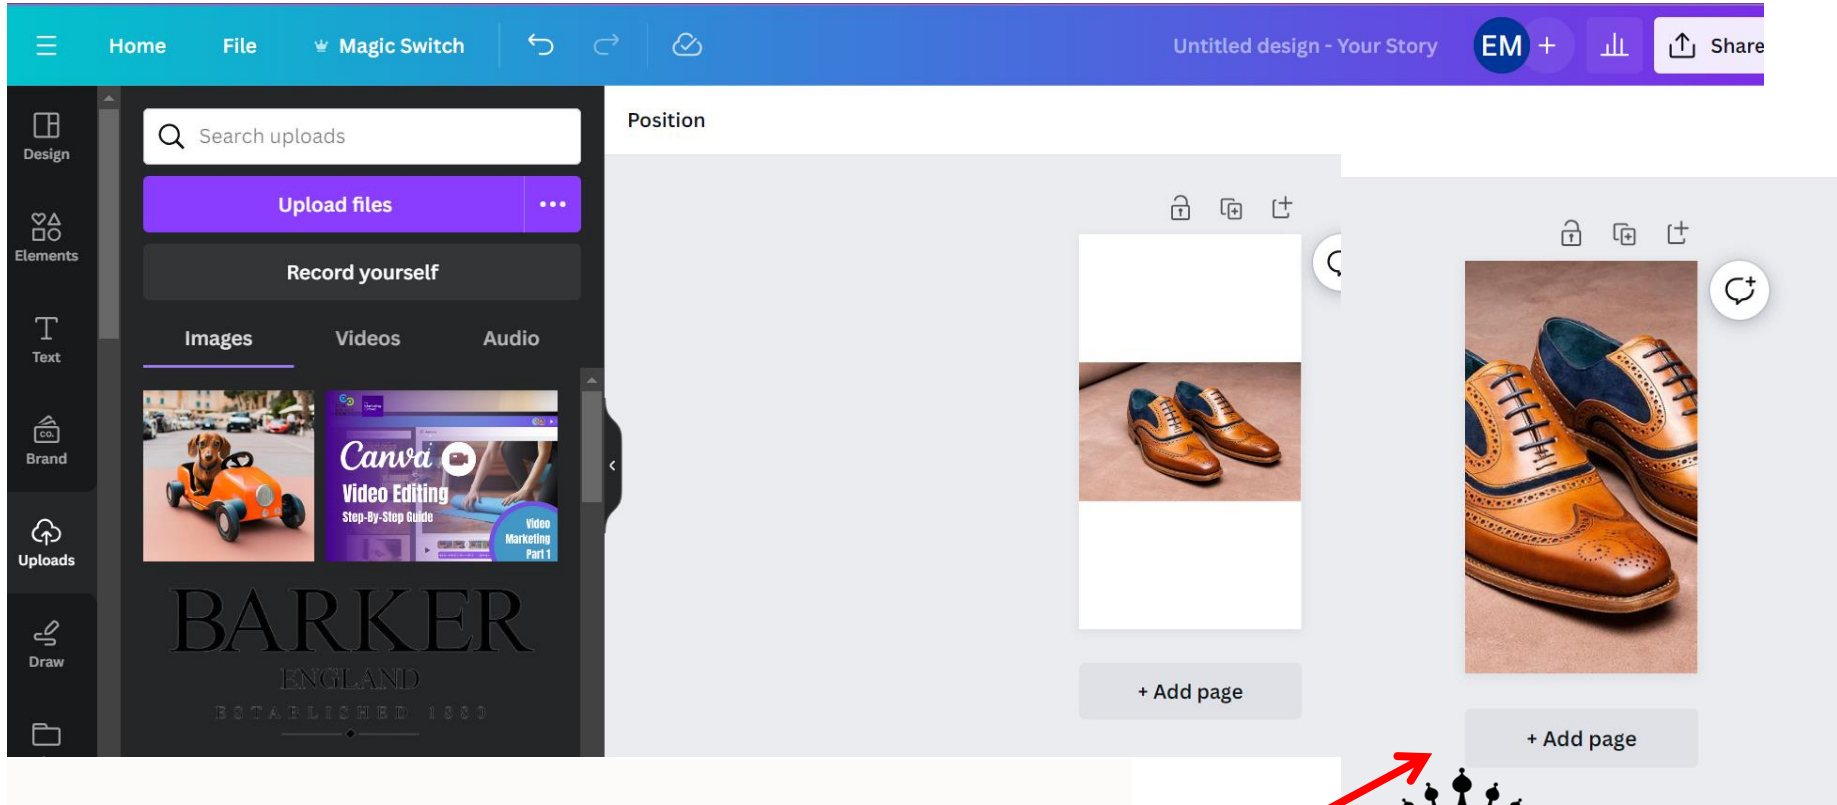

It also means that you can easily place text behind the person or object which is an eye catching effect

1. Add text
2. Right click on the text and select layer – send backward

**Or click on the option for “Position” above the image and then drag the text under the person or object in the list of elements**

# Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

Choose your canvas shape e.g. Portrait  
Choose your image – e.g. it is square

If you make the image fill the area it will simply zoom / crop in

If you want to keep the main object the same size you can use magic expand

Click on image, click on edit photo and select magic expand

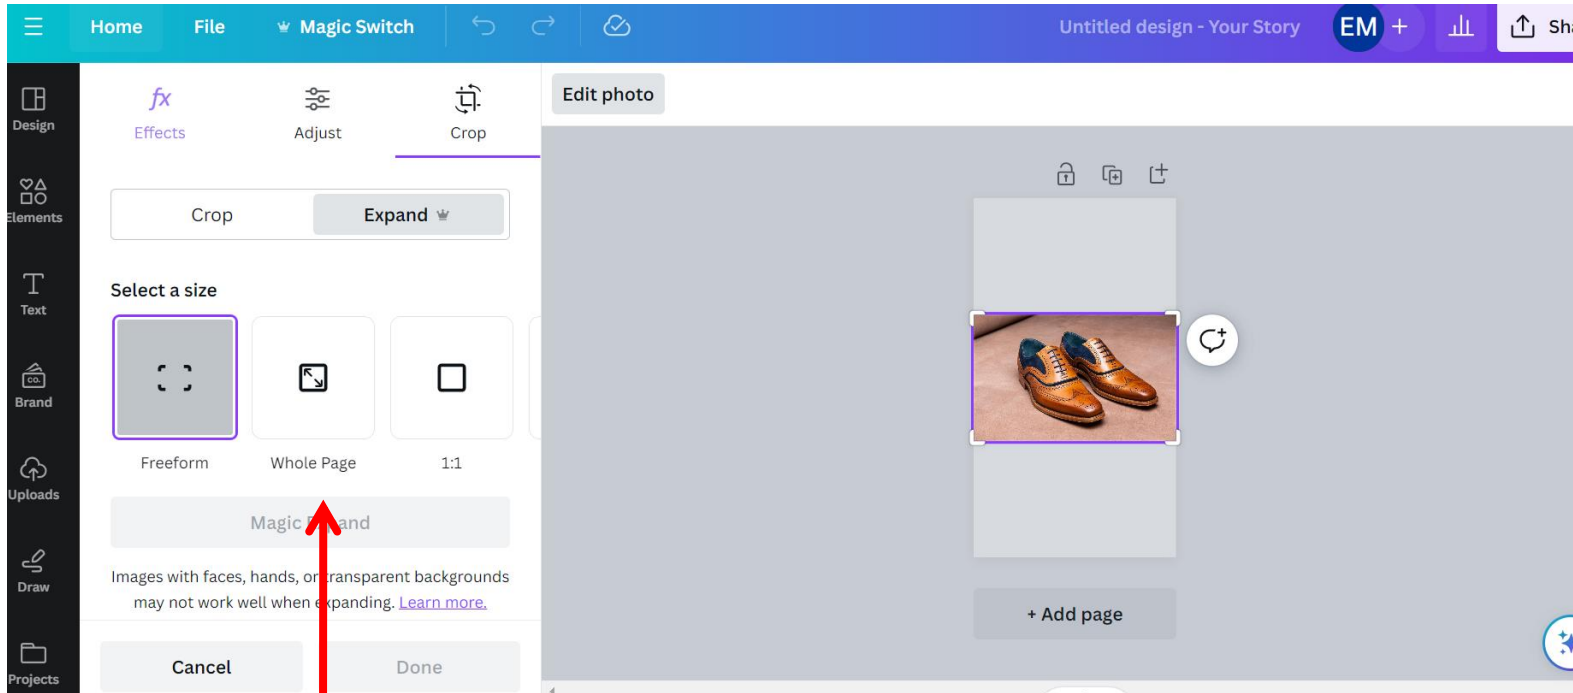

**This is a Pro feature**  
It cannot be used by Free accounts

# Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

If you want to keep the main object the same size you can use magic expand  
Click on image  
Click on edit photo  
and select magic expand

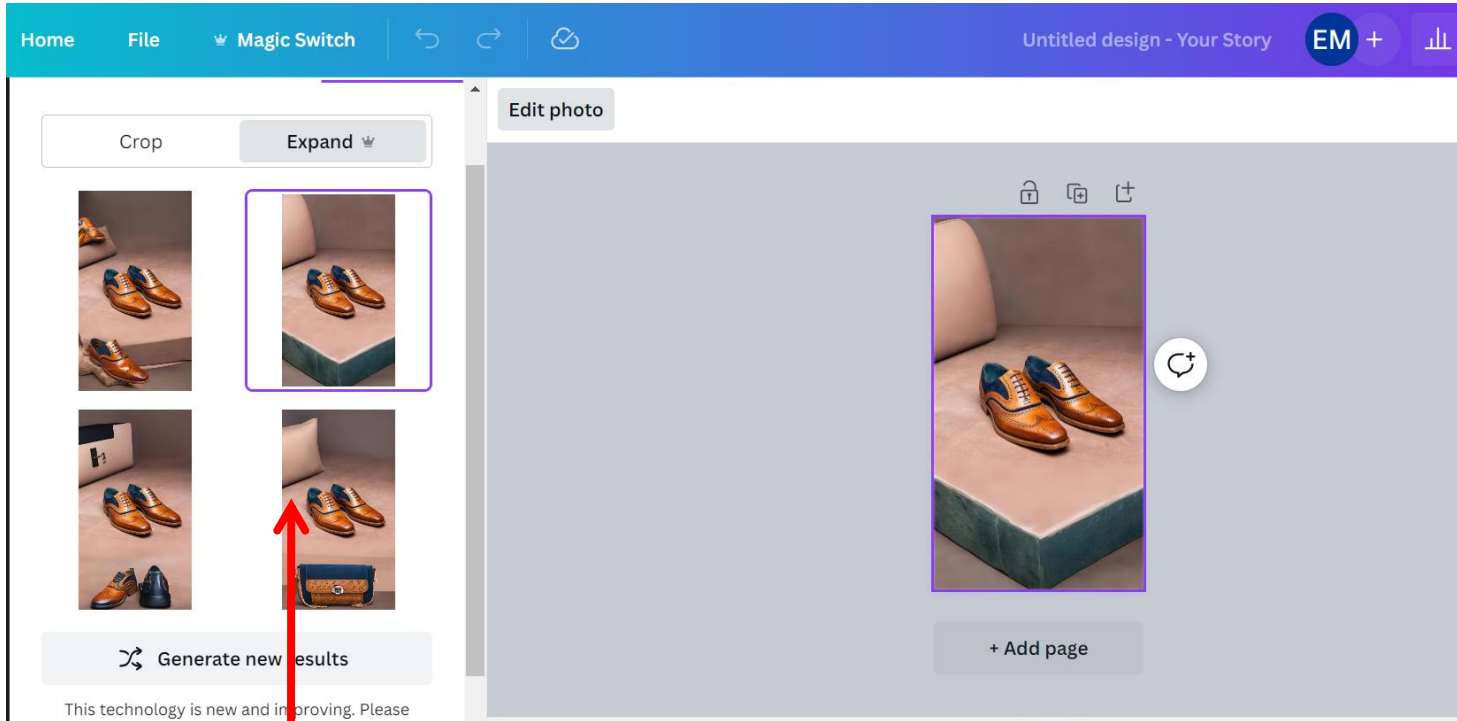

# Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

You can now choose whether you want the image to expand to fill the area in page or a different size.

# Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

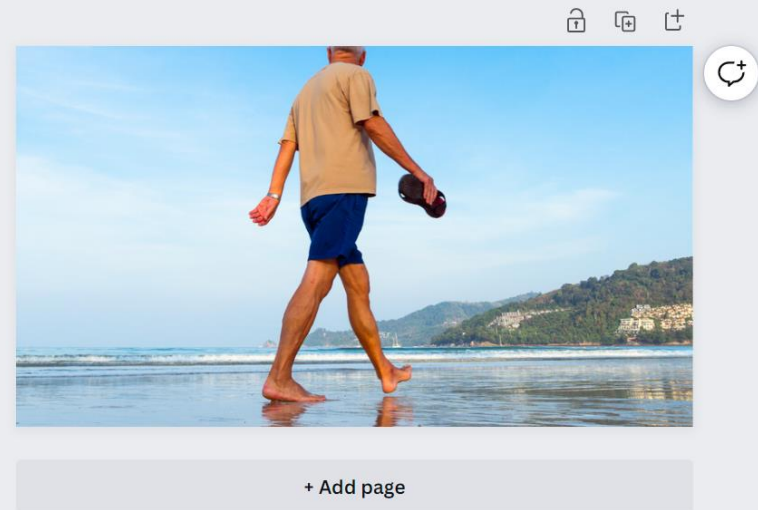

It now gives you 4 options to choose from

# Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

Similarly, you might have a square image that you want to expand to fit a wider area e.g. 16:9

If you simply set the image as background it becomes too cropped in

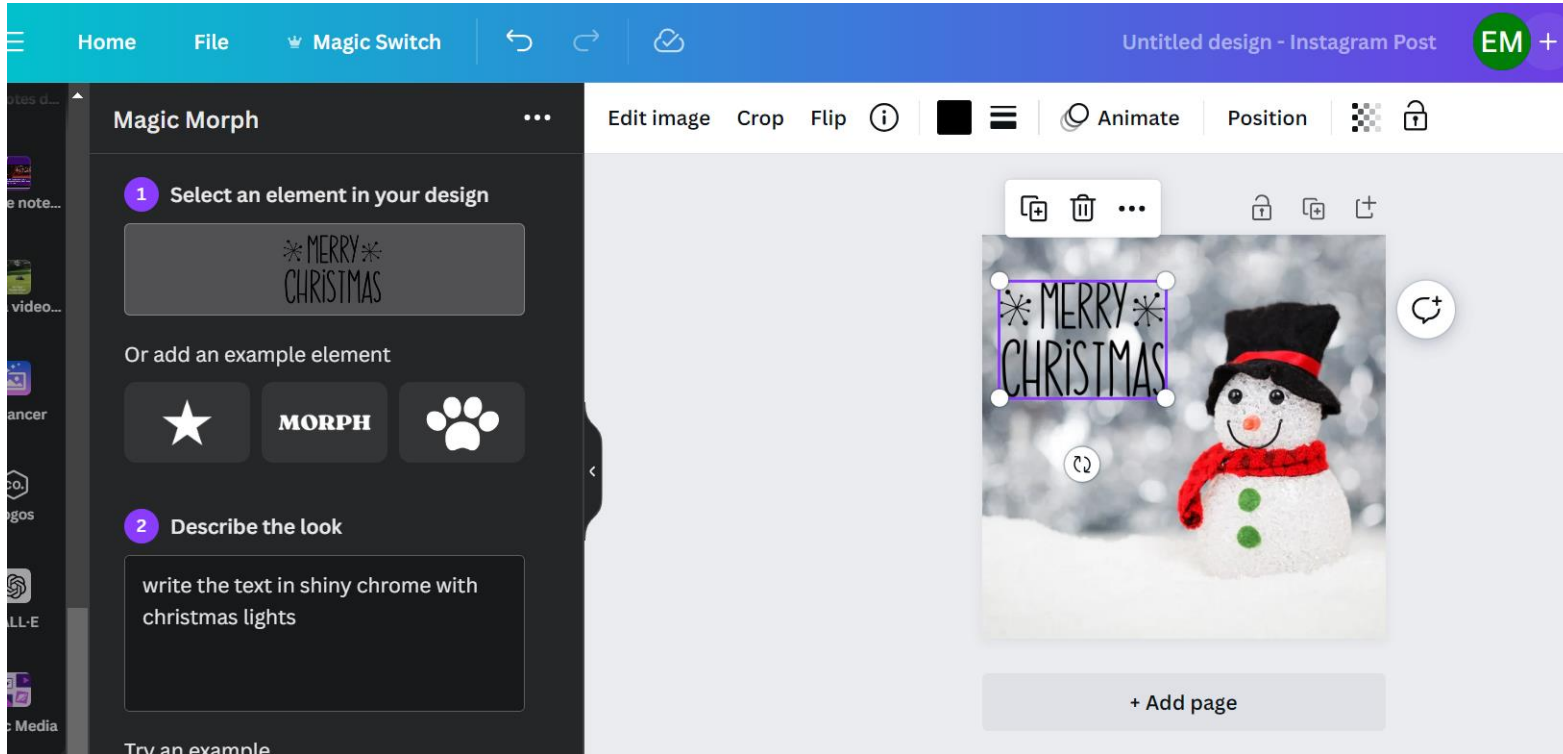

# Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

Using magic expand it e.g. is now a landscape image with everything in proportion

# Magic Morph – turn elements (graphics and text) into something better

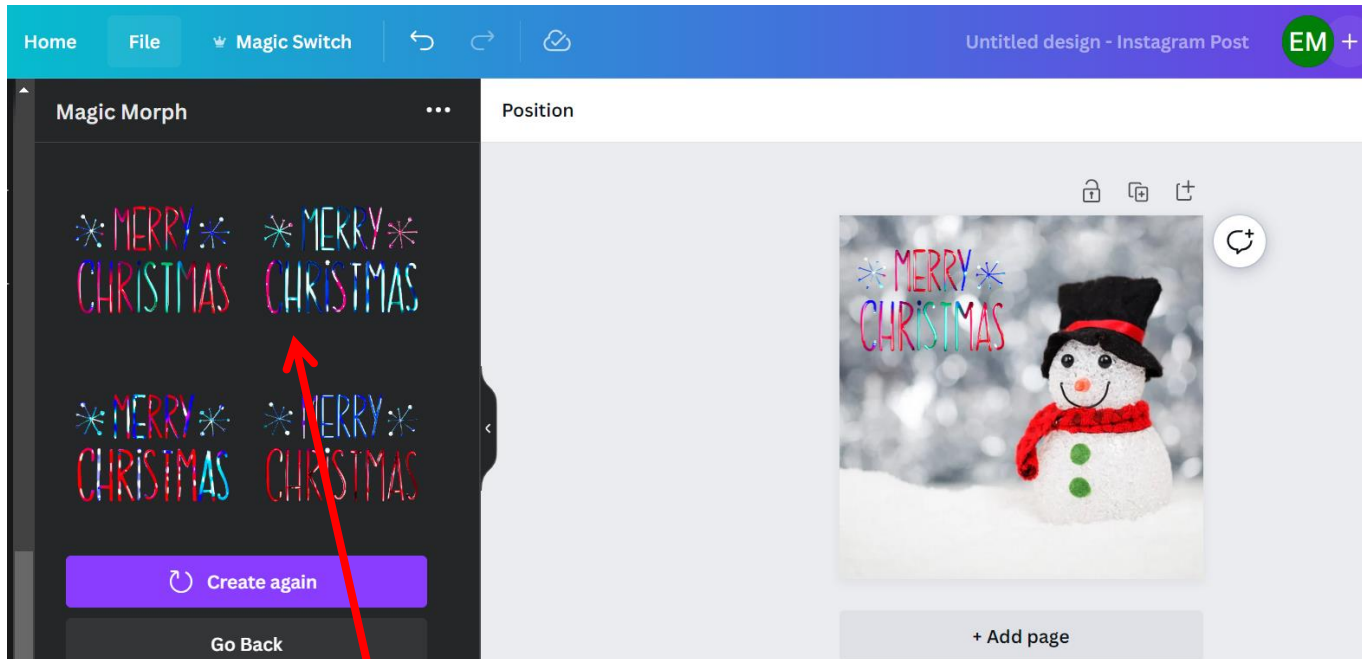

Add your image to the design  
Then go to elements and search for an element e.g. Christmas  
Add the element  
Then go to Apps and search for Magic Morph  
Select your element  
Type in what you want to change it to

**This is a Pro feature**  
It cannot be used by Free accounts

# Magic Morph – turn elements (graphics and text) into something better

It will then give you 4 options to choose from

# Grab text – isolate and manipulate any text that is in an image

Perhaps you have an image that was designed for you in the past and you now want to reuse it and change some of the text. Normally you cannot edit / change text in an image unless you have the original design file

Now with Canva Grab text you can.  
Click on your image, then click edit photo and then Grab text

**This is a Pro feature**  
It cannot be used by Free accounts

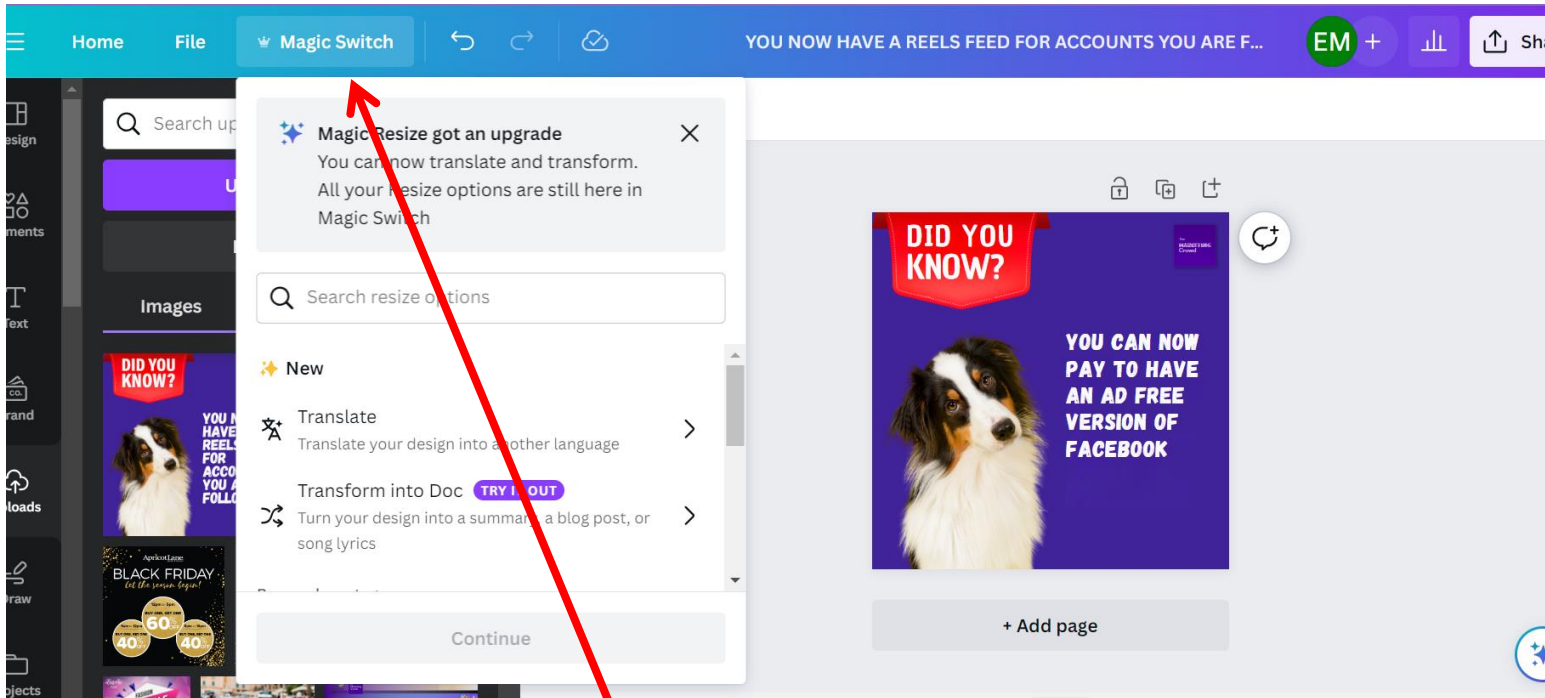

# Grab text – isolate and manipulate any text that is in an image

You can now edit the text boxes, change font, colour etc.

# Magic switch – an upgrade to the resize feature for Pro users

- After you create a design you might want a version of it in a different size e.g. You want a portrait version for Stories.
- The resize tool has been rebranded as “magic switch” and it has new features such as translate.
- To convert to a story simply choose the option for social media and then story

**This is a Pro feature**  
It cannot be used by Free accounts

# What We Will Cover

## **Other new features**

1. How to easily upload images / videos from your phone
2. How to use the new Canva Assistant
3. How to use the new Modal image editor
4. How to use the new colour gradient tool
5. How to use the photo outline feature
6. How to use the new layers feature
7. Overview of the new Apps area and what you need to know about apps
  - Demo of the new Mockups app
  - Demo of the enhancer app
  - Demo of the translate app
  - Demo of Instagram app

# How to easily upload images / videos from your phone

- Open the Canva App.
- Ensure you are logged in with the same account as you are on desktop
- Tap the camera icon top right
- Tap on upload icon
- Select the images or videos you want to upload
- Tap Add

**FREE**

**This is a Free feature**  
It can be used by Free and Pro accounts

# How to easily upload images / videos from your phone

- Tap on this and change to Add to uploads

Then tap upload

**FREE**

**This is a Free feature**  
It can be used by Free and Pro accounts

# How to use the new Canva Assistant

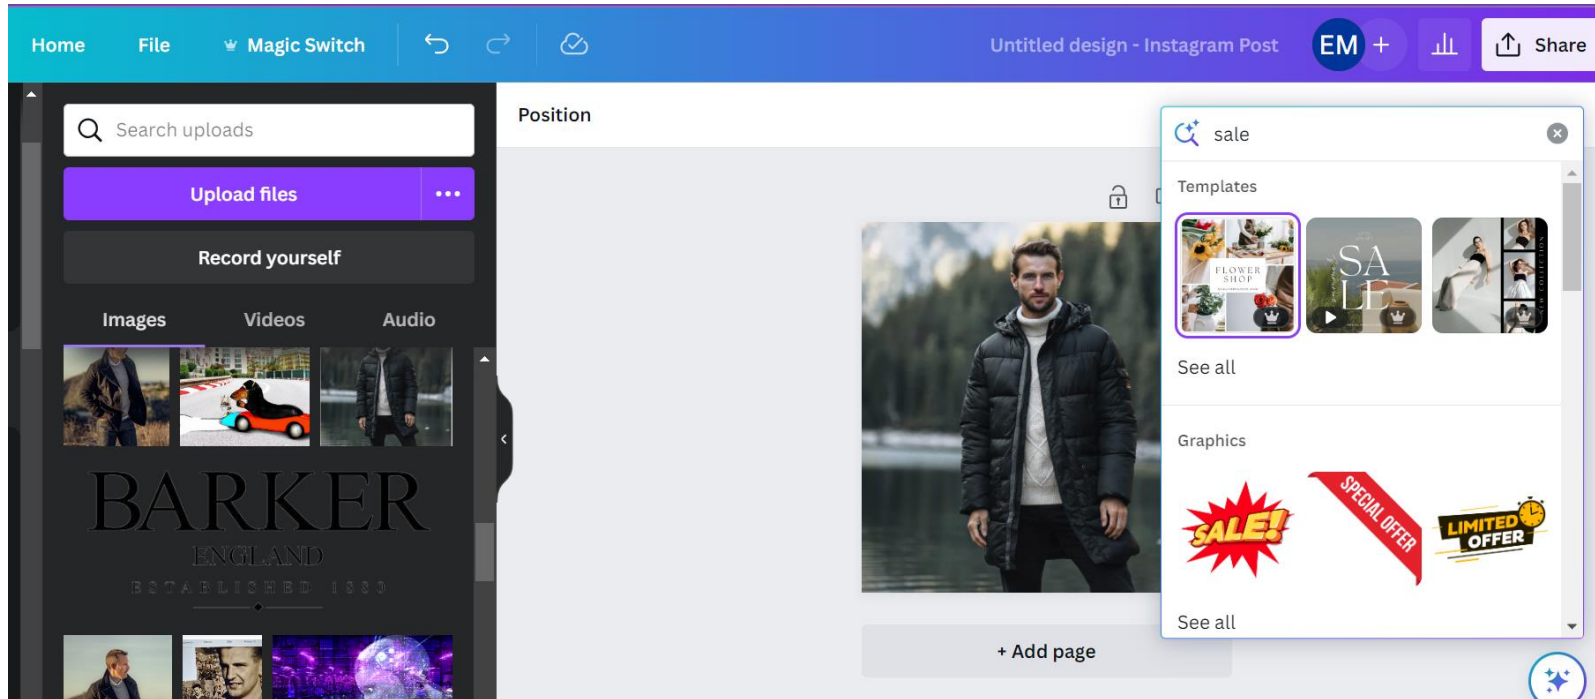

When you are creating a design there is an icon for Canva assistant in the bottom right. You can use this to 1) search 2) get suggestions 3) Open a specific project 4) Find elements / templates

**Click and you see search box plus 3 options. Click show more for more**

**FREE**

**This is a Free feature**  
It can be used by Free and Pro accounts

# How to use the new Canva Assistant

I searched for Sale and it now gives me sale related templates, graphics, photos, videos and designs. Very easy to find what you need

# How to use the new Modal image editor

There are some very powerful image editing tools within their new image editor.

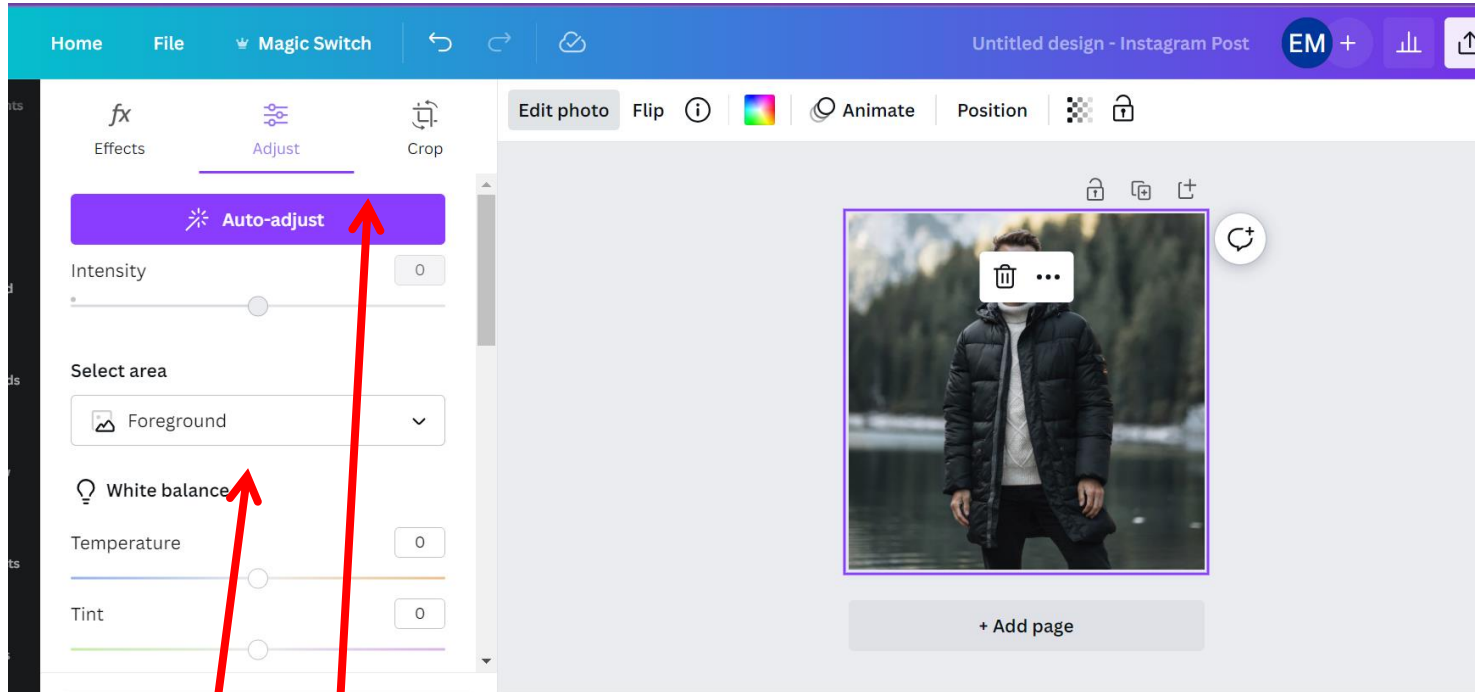

**Click on your image, click edit photo  
You can now see Adjust and Crop.**

**FREE**

**This is a Free feature**  
It can be used by Free and Pro accounts

# How to use the new Modal image editor

Try clicking on Auto enhance – it will then use AI to enhance your image. Normally it does an excellent job

**You can adjust brightness, warmth, saturation, brightness**

Also – what is brilliant is that you can select foreground or background and just increase the brightness etc in that part of the image

# How to use the new Modal image editor

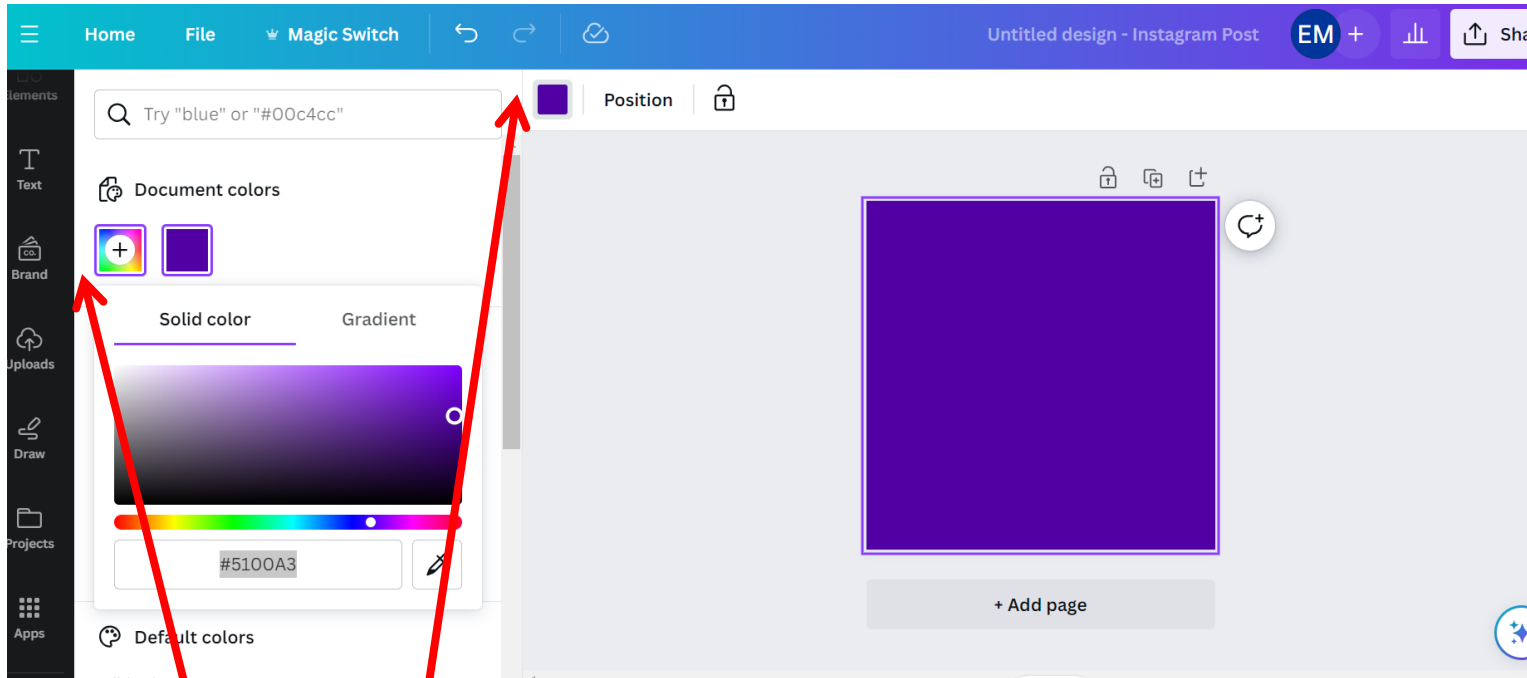

Click on Crop

You can then try Autocrop – this will use AI to choose what it thinks is the best crop in terms of composition so you have a more interesting image

You can also drag the corners of the image to manually crop

If your image isn't level you can also tilt / rotate your image

# How to use the new colour gradient tool

Previously if you wanted to add a colour gradient as a background you had to find a gradient under elements but the best ones were not free. Now you can easily create a graduated colour background using their gradient tool.

1. Start with a blank canvas
2. Click on Background colour and choose your main colour for the background – the one you want to add a gradient to
3. Then click on the + icon
4. Then click on gradient

**FREE**

**This is a Free feature**  
It can be used by Free and Pro accounts

# How to use the new colour gradient tool

1. It will automatically give you a second colour as part of the gradient
2. Click on the 2<sup>nd</sup> colour to change it to what you want.
3. You can add a 3<sup>d</sup> colour if you want.
4. You can also choose different styles e.g. Have the gradient top to bottom or side to side

# How to use the photo outline feature

Do you want to have a white outline around a person like you see in YouTube Thumbnail images

Add a transparent image of a person to a coloured background – this will not work if it is simply an image of a person

Click on your image

Click edit photo

Then click on Shadow

**FREE**

**This is a Free feature**

It can be used by Free and Pro accounts

# How to use the photo outline feature

Then click on Outline  
Then change the colour to white  
You can also change the size / thickness

# How to use the new layers feature

- When you add multiple elements to a design some will be on top of each other
- Previously you only had the option to right click on one, and under layer choose move backward or forward
- Now you can click on position
- And then drag a layer on top or below another

**FREE**

**This is a Free feature**  
It can be used by Free and Pro accounts

# Overview of the new Apps area: What you need to know about apps

The screenshot shows the Canva user interface. At the top, there's a navigation bar with the Canva logo, menu items like 'Design spotlight', 'Business', 'Education', 'Plans and pricing', and 'Learn', and a 'Create a design' button. Below the navigation bar, there's a search bar for apps and several filter buttons: 'For you', 'AI-powered', 'Productivity', 'Design essentials', and 'Share and publish'. The main content area is titled 'Trending apps' with the subtitle 'The latest and greatest apps we think you'll love'. It displays a grid of app cards. The first card is for 'DALL-E AI Image Generator by OpenAI' with a thumbnail of a teddy bear on a skateboard. The second card is for 'Imagen AI image generator by Google' with a thumbnail of a Tuscan landscape and the text 'Turn your text into photorealistic AI images >' and a search input field containing 'Farmland art Tuscany'. The third card is for 'Shade Generate color palettes' with a thumbnail of a color palette and the text 'Create dynamic palettes to enhance your designs >'. There are also other app cards partially visible, such as 'Content Planner', 'Mockups', 'Product Photos', 'Create a team', and 'Trash' in the left sidebar.

- Apps allow you to do a lot more with Canva. They are like extra tools you can use
- Recently Canva opened up it's API to 3<sup>rd</sup> party companies so now you can use 3<sup>rd</sup> party apps as well as Canva's own apps

There are 2 ways to find apps. The first its to click on Apps on the left menu of homepage and then browse though the latest apps, trending apps etc

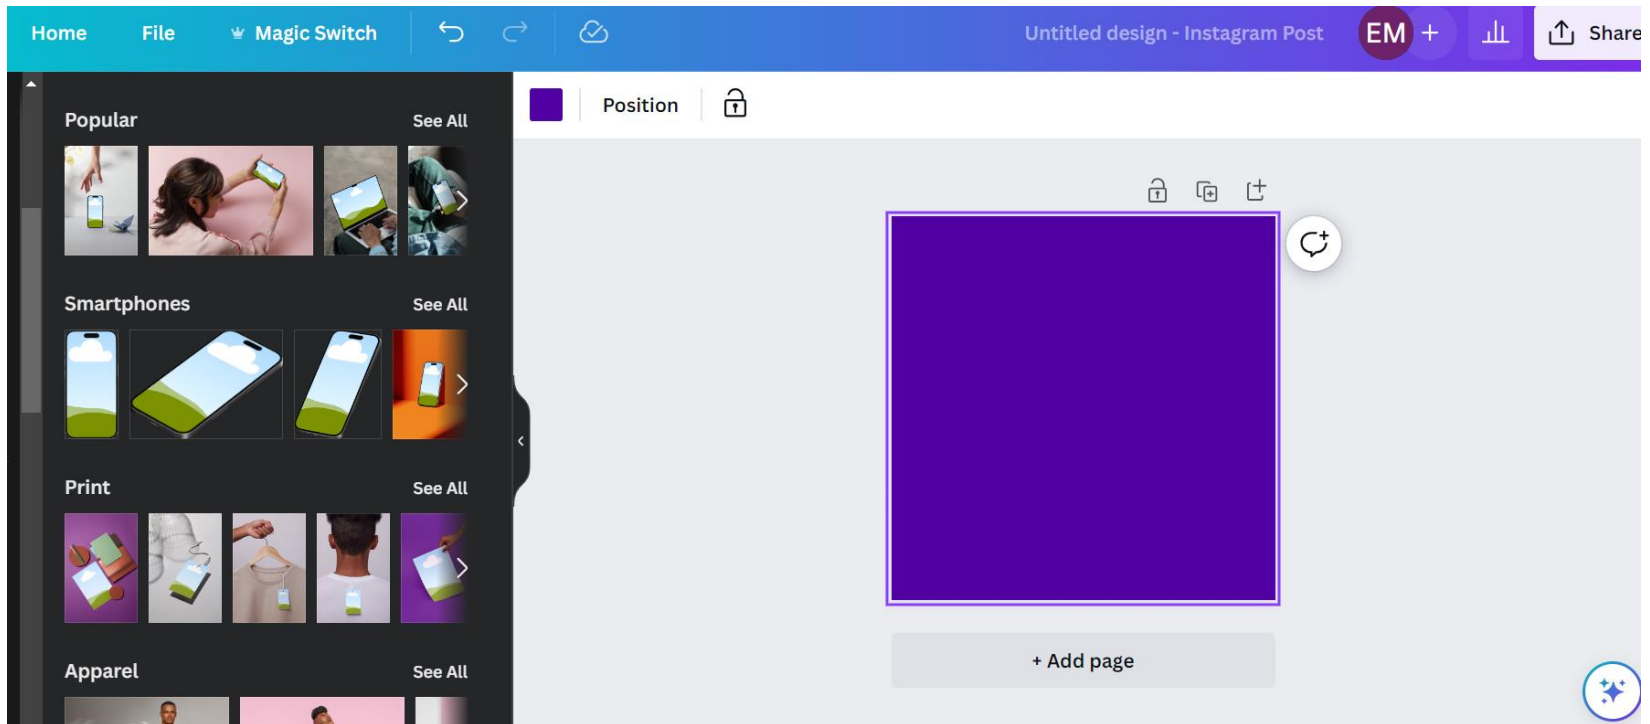

# Overview of the new Apps area: What you need to know about apps

The 2<sup>nd</sup> way to access apps is when you are creating a design  
Click on apps on the left hand menu  
Then browse through the apps

To use one simply click on one and then Install

# Demo of the new Mockups app

Would you like to have your image appear in a phone. Computer screen, T shirt etc?

Go to apps  
Search for Mockups  
Then browse through all the options. Click on the one you want

**FREE**

**This is a Free feature**  
It can be used by Free and Pro accounts

# Demo of the new Mockups app

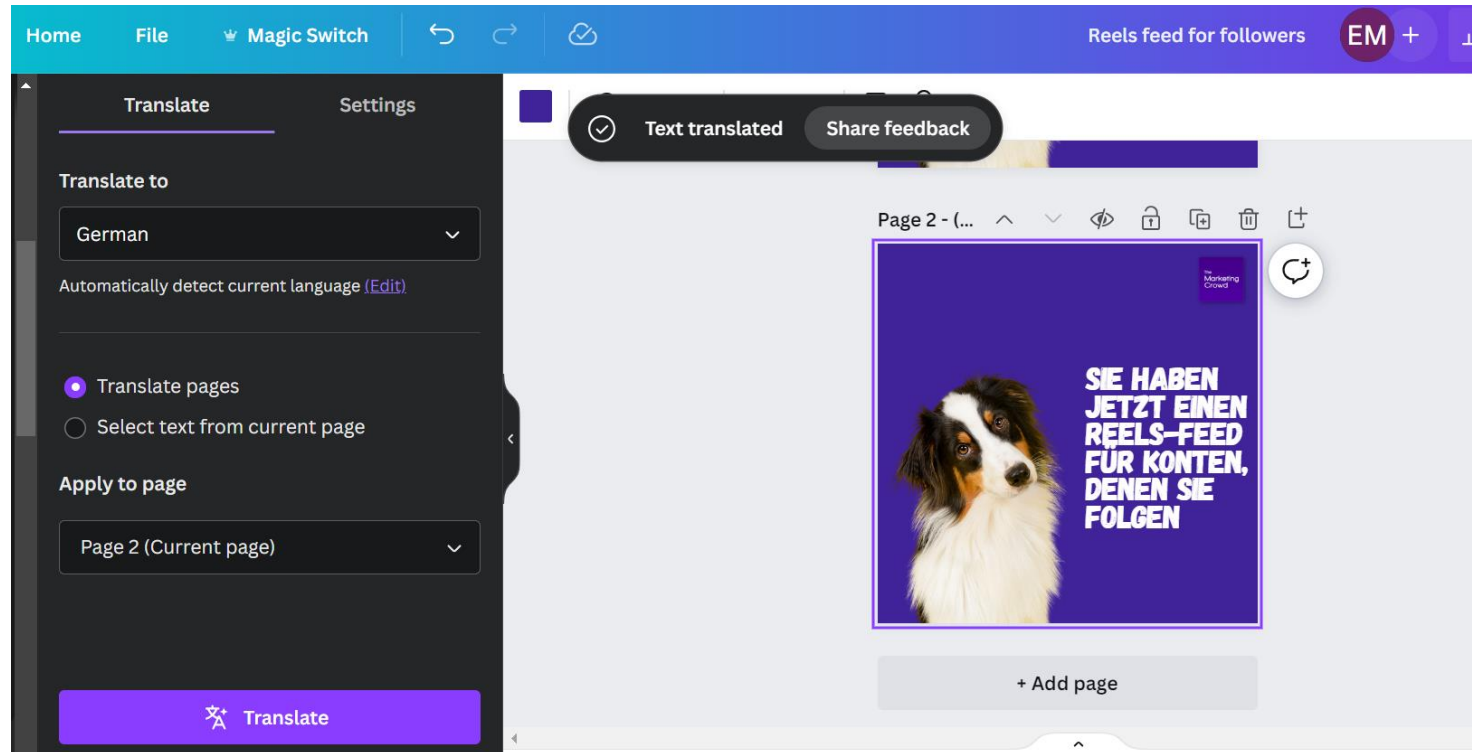

Then drag a photo from your upload into the mockup and it will appear

# Demo of the new Mockups app

Then drag a photo from your upload into the mockup and it will appear

# Demo of the translate app

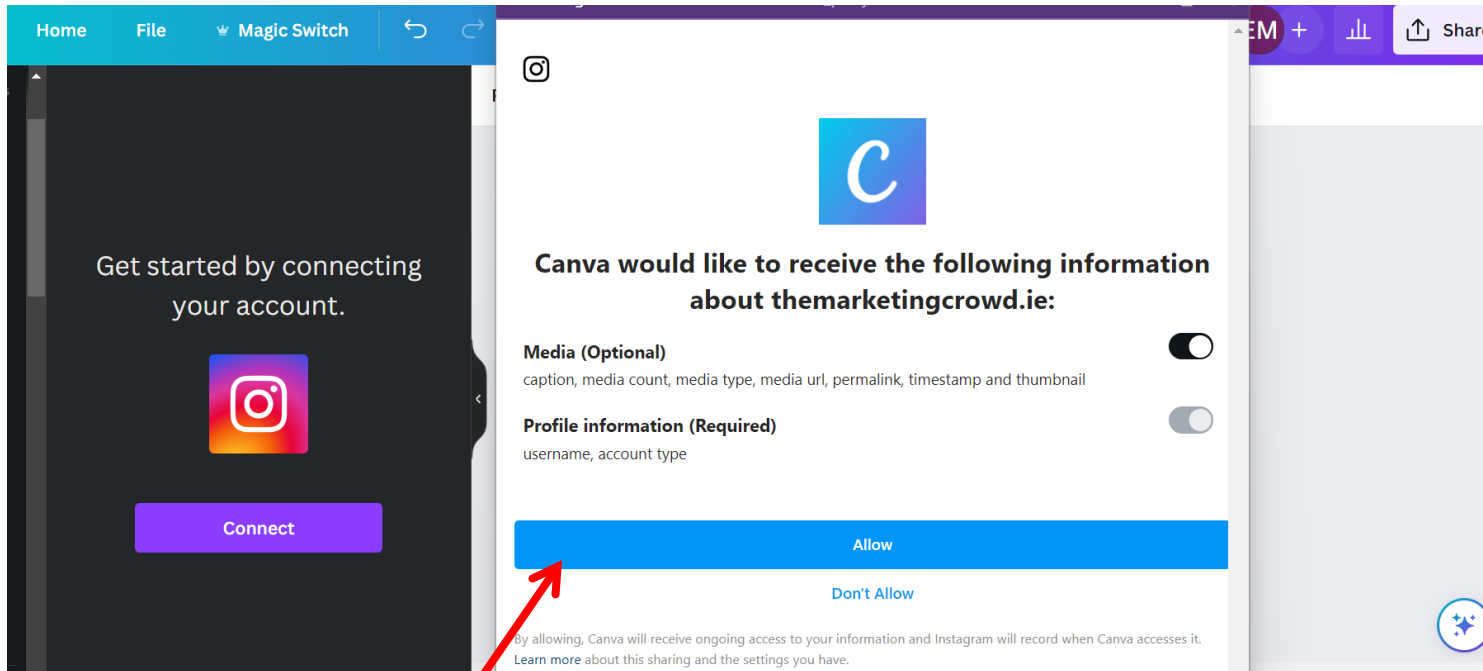

**You can easily translate any text into any language**

Go to apps and search for Translate  
Then click Translate To and choose your language

**FREE**

**This is a Free feature**  
It can be used by Free and  
Pro accounts

# Demo of the Instagram app

**Would you like to pull your Instagram Reels and photos into Canva? You could then use them in your designs**

Go to apps and search for Instagram  
Click on it and then click connect – you will need to give permission

**FREE**

**This is a Free feature**  
It can be used by Free and Pro accounts

# Demo of the Instagram app

All your Instagram photos and videos are now in the gallery on the left

You can add any of these to your designs

Note – when you install an app it will then appear on the left-hand menu near the bottom. In the future simply scroll down, click on Instagram and all the files will be in that gallery
