7. Overview of the new Apps area and what you need to know about apps
 - Demo of the new Mock-ups app
 - Demo of the enhancer app
 - Demo of the translate app
 - Demo of Instagram app

Overview of AI in Canva

Canva have introduced a huge number of Mock-ups AI features for image and video creation.

Some of these are free features but other are Pro features. However, most of them can be used by Free users a certain number of times you can try them out.

Magic design for images: Upload an image and it will auto populate templates

The screenshot shows the Canva website interface. At the top, there is a navigation bar with the Canva logo and various menu items like 'Design spotlight', 'Business', 'Education', 'Plans and pricing', and 'Learn'. A 'Create a design' button is visible in the top right corner. Below the navigation bar, there is a search bar with a dropdown menu. The dropdown menu is open, showing a search bar and a list of suggested design types: Doc, Whiteboard, Instagram Reel, Instagram Post (Square), Facebook Cover, YouTube Thumbnail, Video, and Mobile Video. Below the suggested design types, there is a section titled 'Start creating from your media' with two options: 'Custom size' and 'Import file'. A red arrow points from the 'Create a design' button to the first step of the instructions, and another red arrow points from the 'Import file' option to the second step of the instructions.

1. Click on Create a design
2. Click import file and select the image from your PC

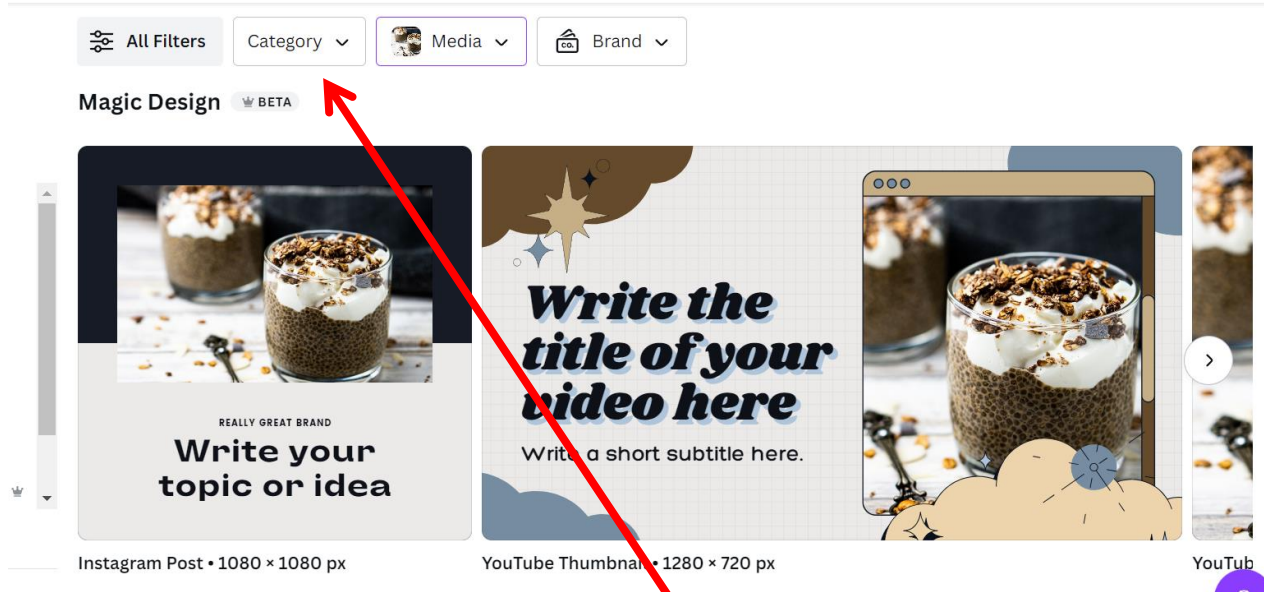

This is a Pro feature
However, free accounts can use it 10 times for free

Magic design for images: Upload an image and it will auto populate templates

1. Click use in a template

Magic design for images: Upload an image and it will auto populate templates

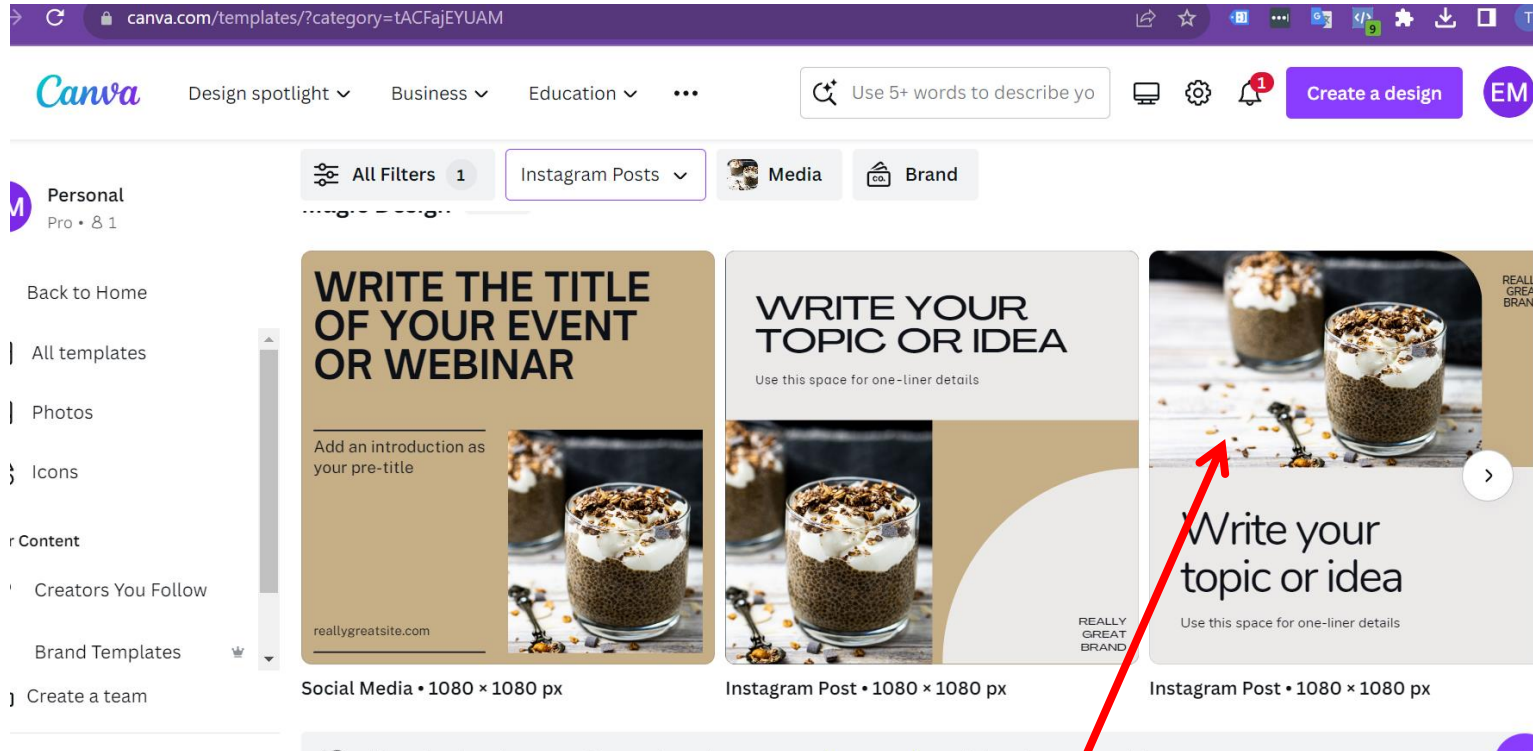

You are now shown lots of template designs that contain your image

To just see square or portrait designs click on category and choose the one you want under Social Media

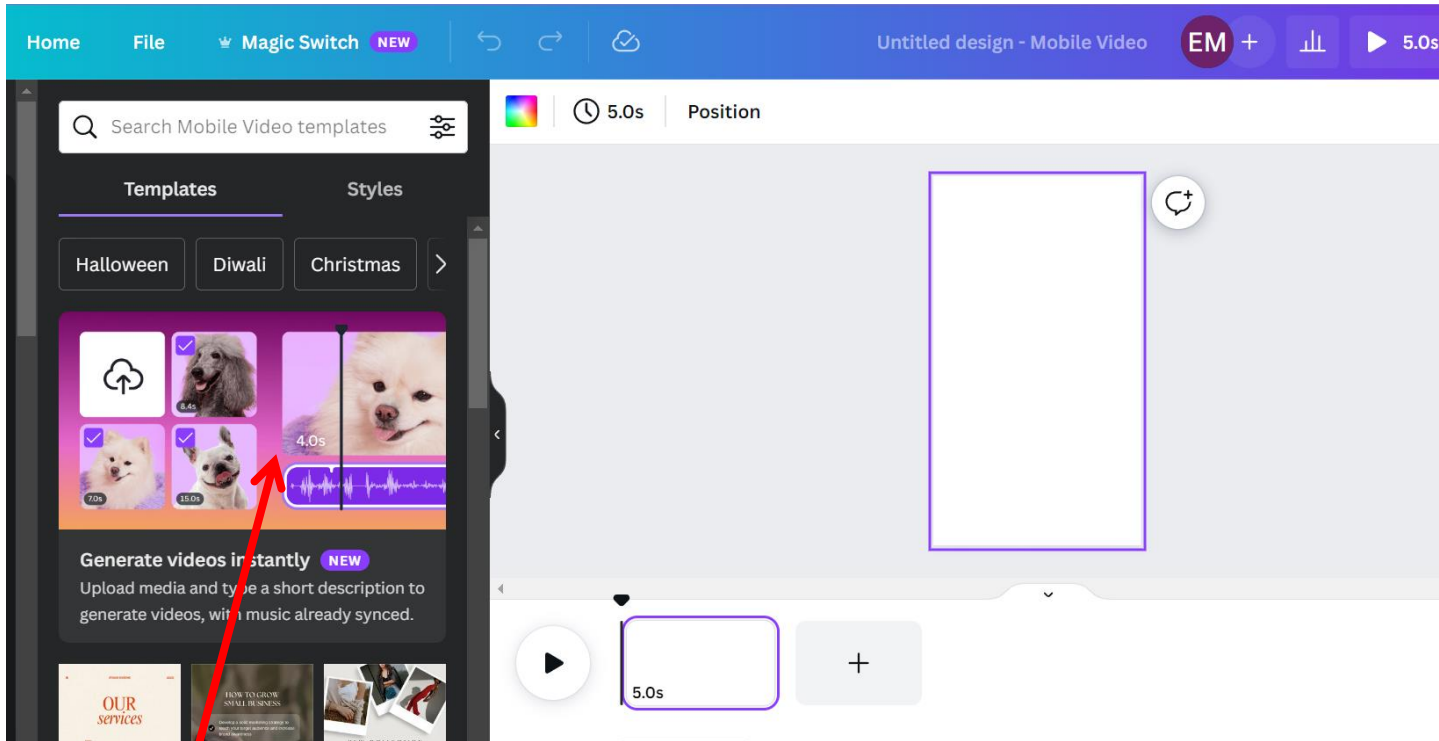

If you have the Pro version of Canva click Brand and you will see the design with your brand colours.

Magic design for images: Upload an image and it will auto populate templates

To choose the one you like, click on it and then select customise template

Magic design for videos: Upload 3+ videos / images and Canva will generate a video

Choose a video project (16:9 , 1:1 or 9:16)
On the left hand side look for the option
“Create videos instantly”

This is a Pro feature
However, free accounts can
use it 10 times for free

Magic design for videos: Upload 3+ videos / images and Canva will generate a video

If your files are not already uploaded, upload them
Choose a minimum of 3 videos and or images from your PC. Max is 10

Then write a description. The AI will use this description to generate text headlines and captions on your video.
Then click the generate button

Magic design for videos: Upload 3+ videos / images and Canva will generate a video

Within 10 seconds the AI will generate the video for you, including text headlines

You can then if you wish

- Change the text
- Adjust any colours (text, shapes, background)
- Change the music

Magic edit: Highlight part of an image and type what you want to replace it with

Canva now utilises AI to let you change or add things to your image by selecting an area and typing what you want.

Add your image to a canvas
Click edit photo

Click Magic edit

Use the brush to highlight the area that you want to replace

Then click continue

FREE

This is a Free feature
It can be used by Free and Pro accounts

Magic edit: Highlight part of an image and type what you want to replace it with

Type what you would like to replace it with e.g. Skyscrapers

You can then choose from different options

Click save

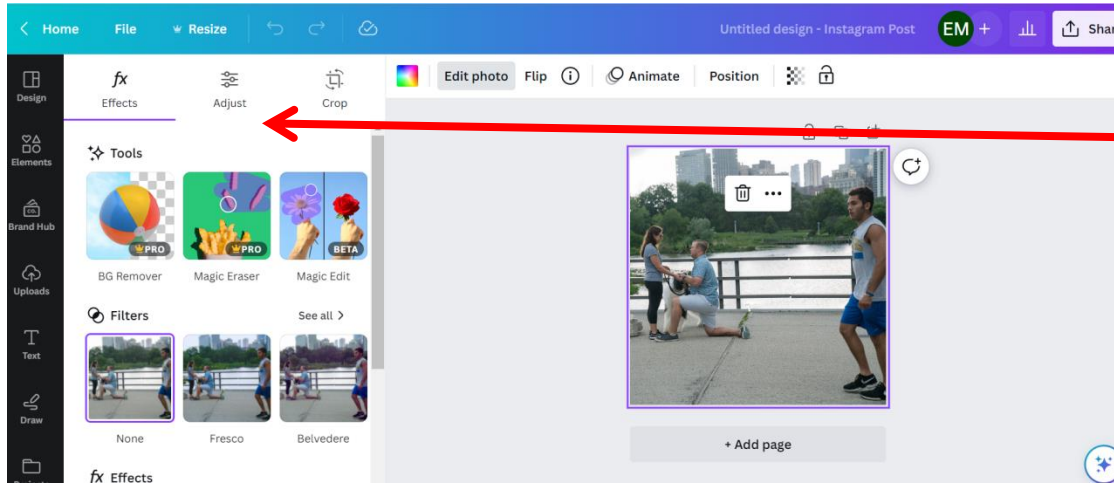

You could use this tool to

- Add things to your image that are not in it
- Replace things that are in it with something different
- Change the colour of someone's hair

Plus lots more.

Magic eraser: Highlight people or objects in an image and it will erase it

Note – you need the Pro version to use this tool

Add your image to the canvas

Click on edit image

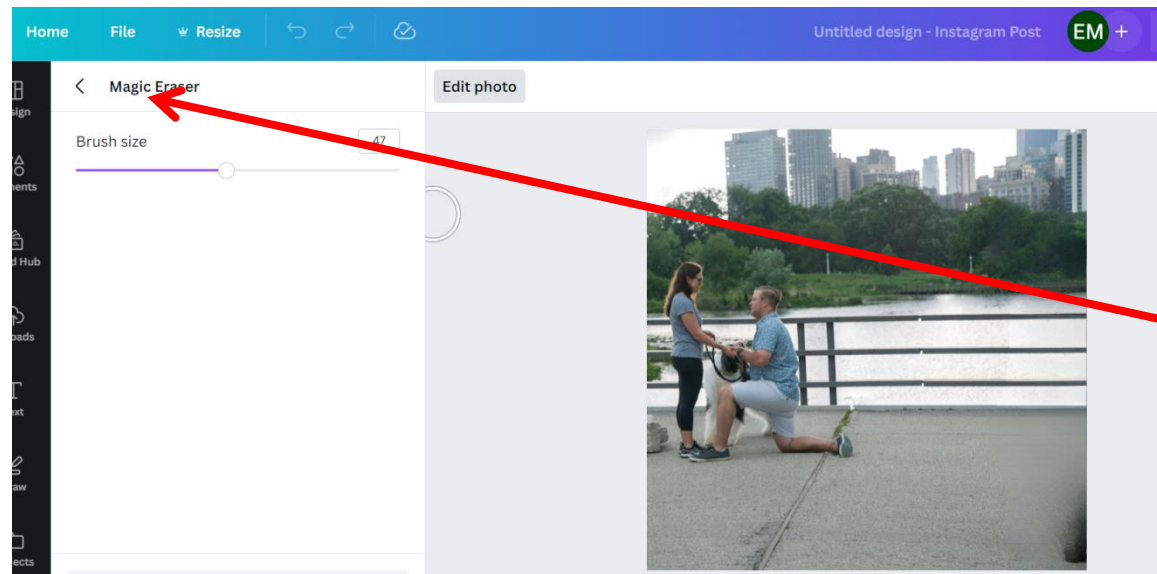

Click on magic eraser

Highlight with the brush what you want to erase

This is a Pro feature
It cannot be used by Free accounts (But I have a free alternative)

Magic eraser: Highlight people or objects in an image and it will erase it

It will now be erased

If you are not happy with the results
click reset erasings

Try a larger or smaller brush –
depending on how big or small the
object is

Then click on the arrow to progress

Magic eraser: Highlight people or objects in an image and it will erase it

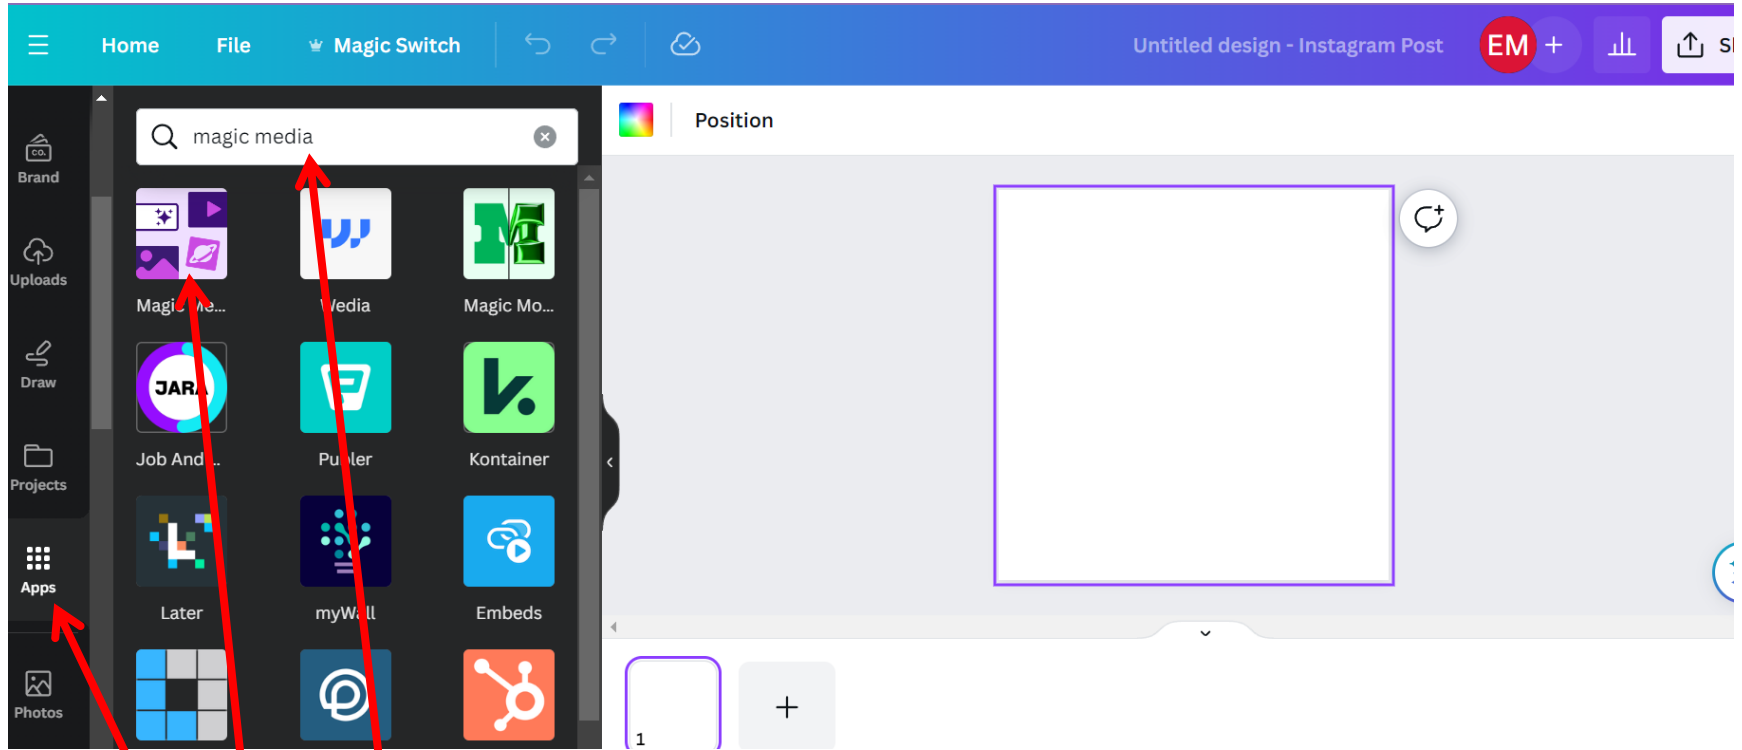

A free alternative to this eraser tool is the website

Cleanup.pictures

Magic media – Text to image generator

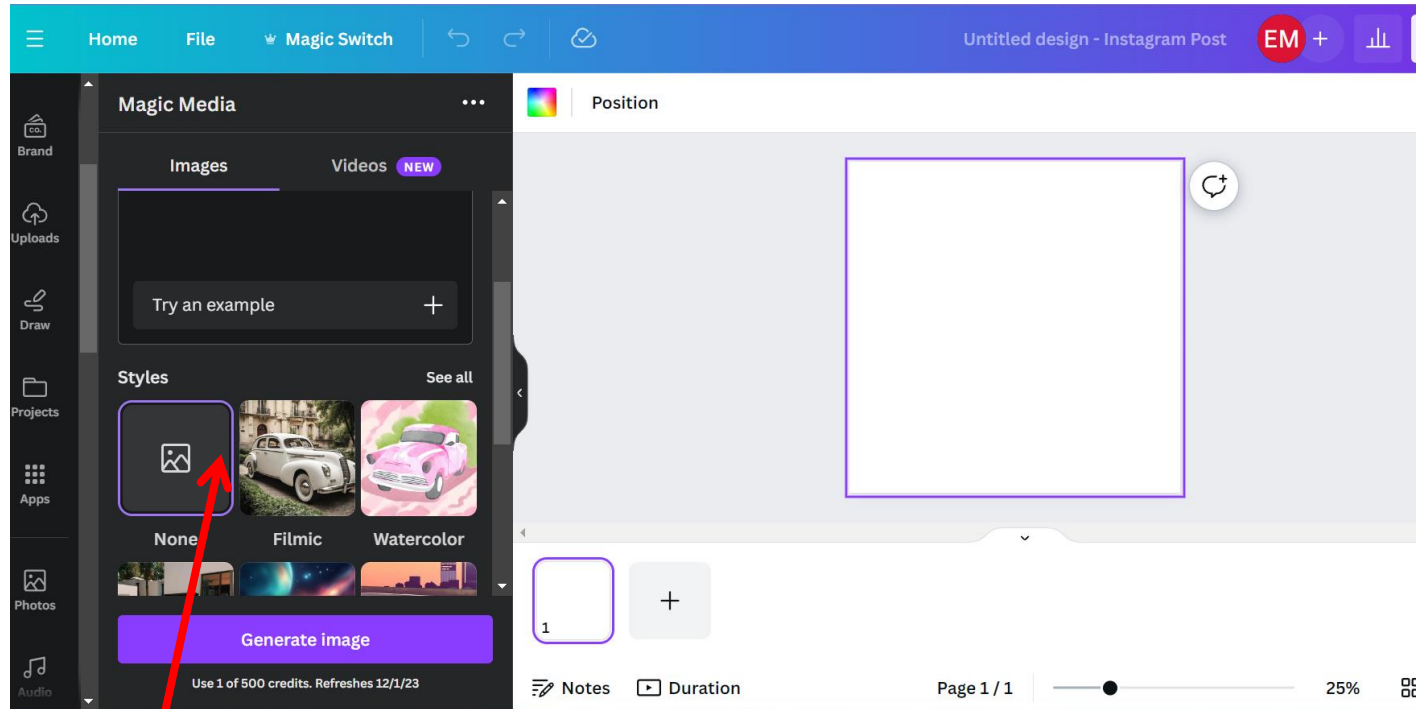

Create an image by describing it:

- Select your canvas shape
- On the left menu click on Apps
- Search for Magic Media
- Click on Magic media

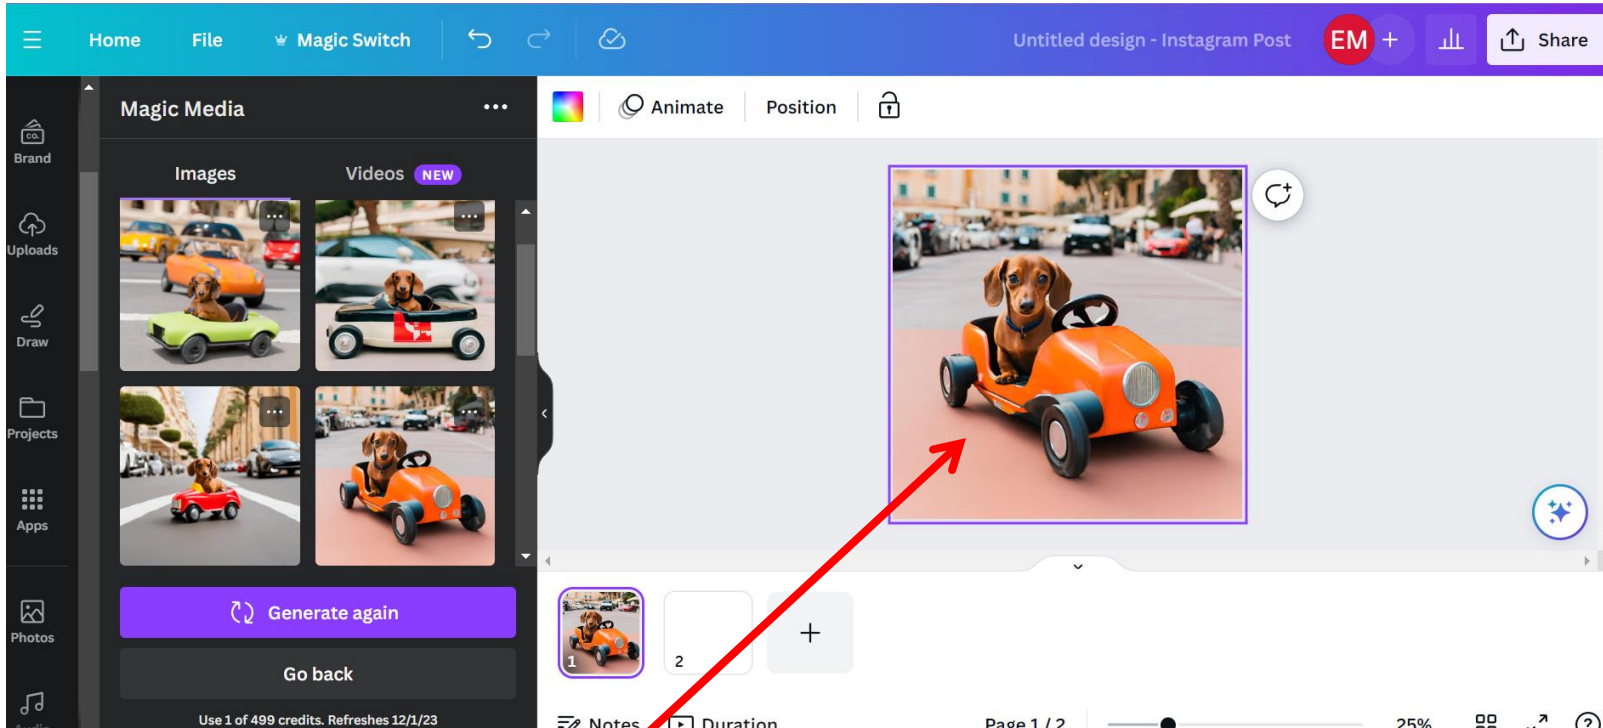

This is a Pro feature
However, free accounts can use it 50 times for free

Magic media – Text to image generator

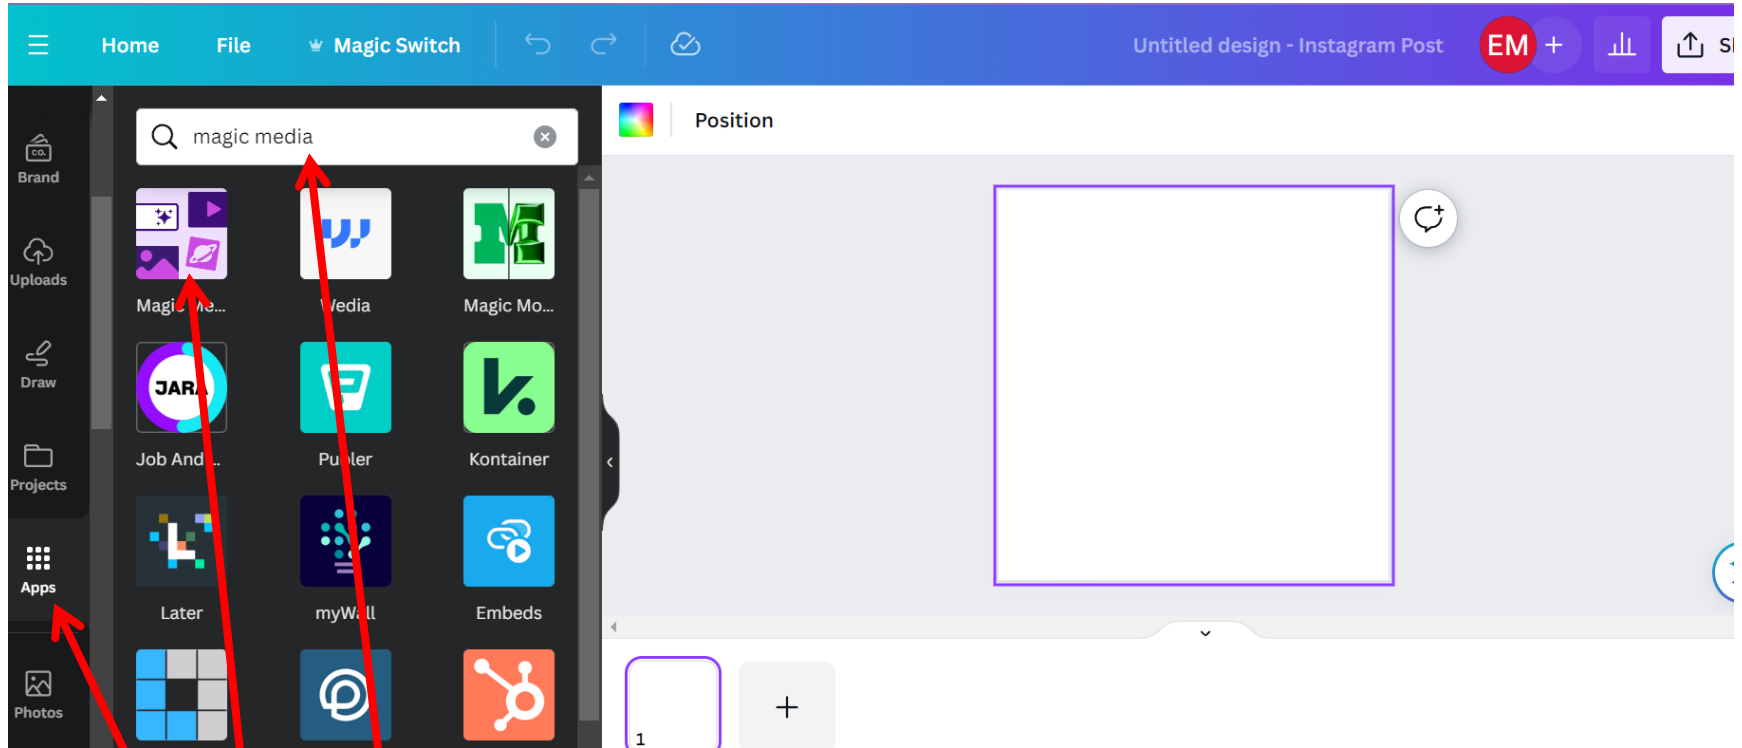

Type in your description. Be as descriptive as possible
Then choose the style of your image e.g. Photo, anime, dreamy
Also choose the shape of your image e.g. 1:1, 9:16, 16:9

Magic media – Text to image generator

If you want more options click Generate again
Click on one of the 4 images to add to your design

Magic media – Text to video generator

Create a short video by describing it

- Select your canvas shape
- On the left menu click on Apps
- Search for Magic Media
- Click on Magic media

This is a Pro feature

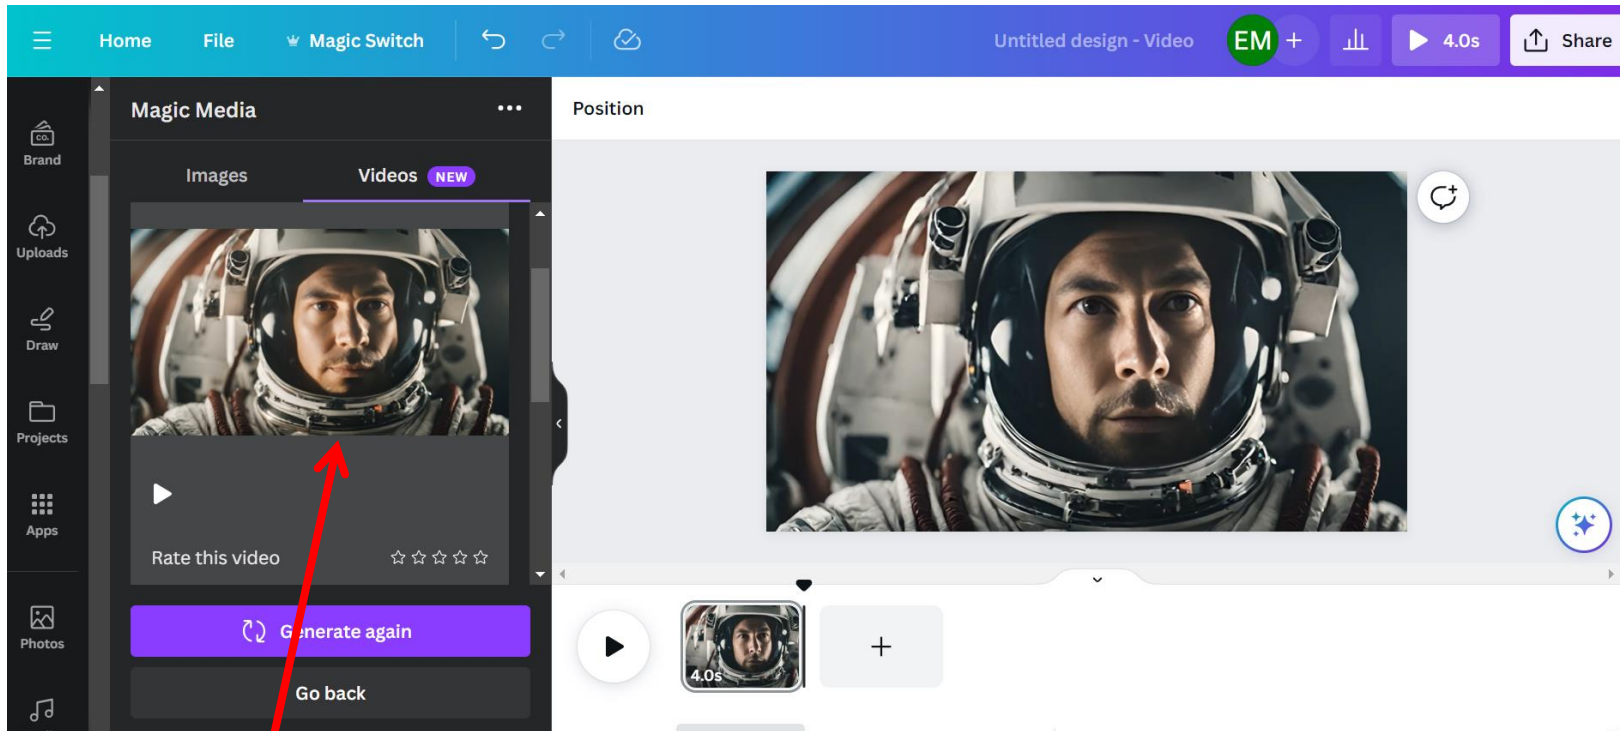

However, free accounts can use it 5 times for free

Magic media – Text to video generator

Click on Video to indicate you want to create a video
Type in your description. Be as descriptive as possible
Click generate

Magic media – Text to video generator

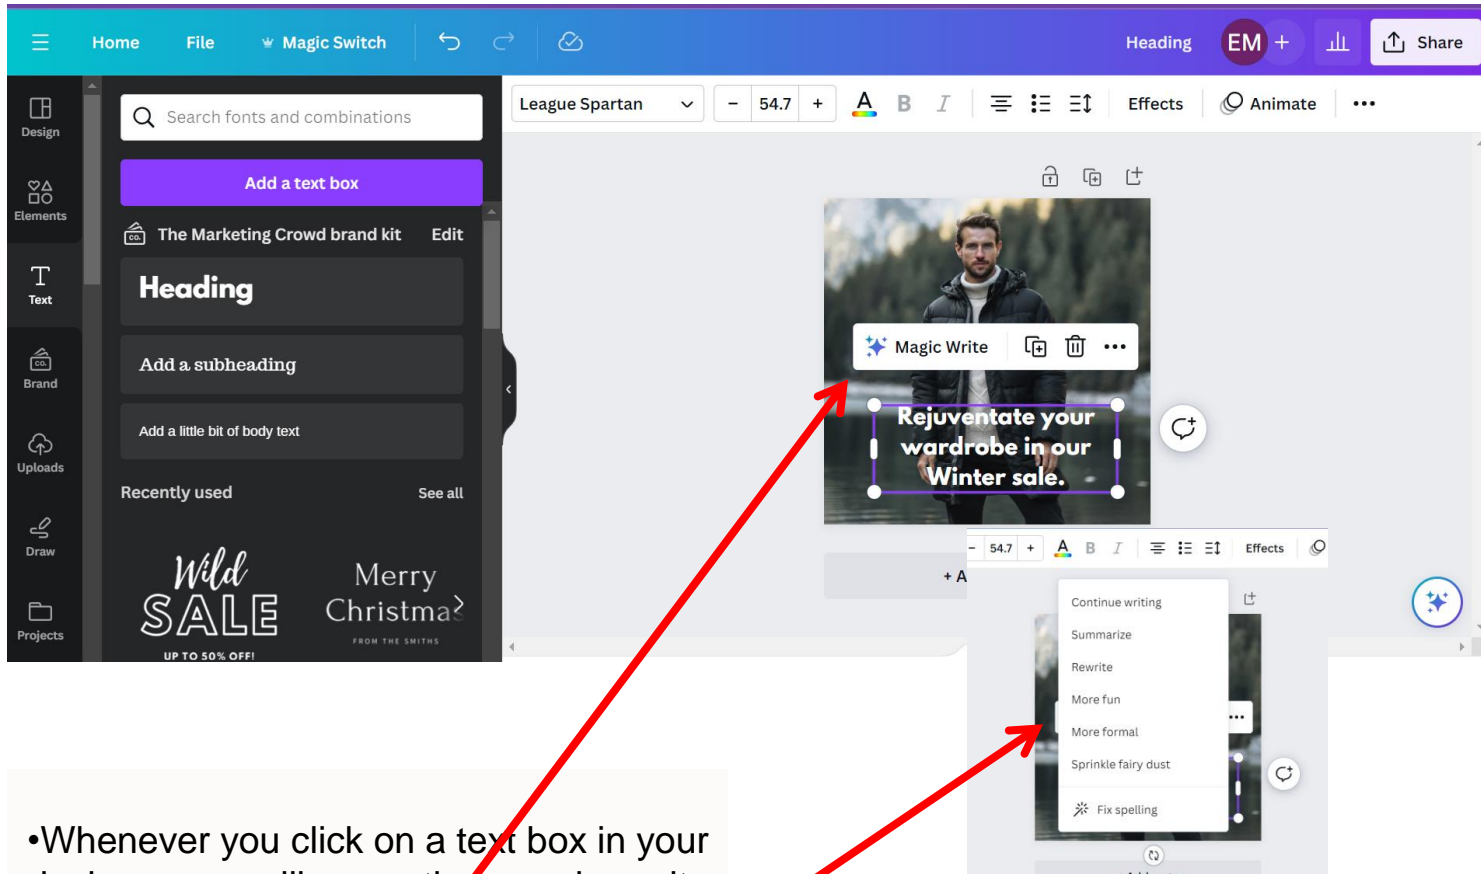

When your video is generated simply drag it down onto the timeline

Your video will be 5 seconds long

Click generate again if you want a different version. When you do it uses one of your credits

Magic write – generate initial drafts of text and other copy options

- Whenever you click on a text box in your design you will see the magic write option
- Write your text
- Then click on magic write
- You now have these options. Click each option to see their suggested text

This is a Pro feature
However, free accounts can use it 50 times for free

Magic grab – isolate and move anything within an image

Add your image to your design
Click on your image
Click edit photo
Then click on Magic Grab

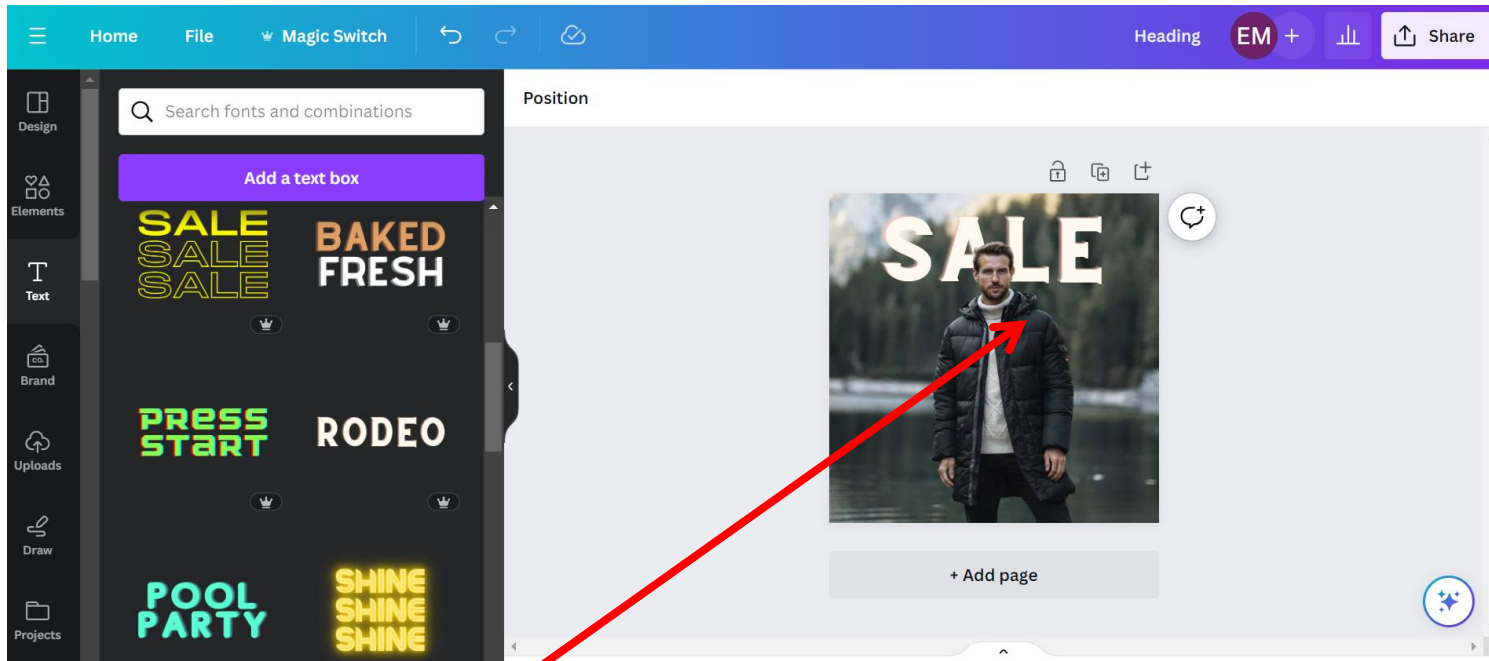

This is a Pro feature
It cannot be used by Free
accounts

Magic grab – isolate and move anything within an image

It then identifies the main element in the image
You can then move that element left or right or make it bigger or smaller– ideal if you want to add text beside a person

Magic grab – isolate and move anything within an image

It also means that you can easily place text behind the person or object which is an eye catching effect

1. Add text
2. Right click on the text and select layer – send backward

Or click on the option for “Position” above the image and then drag the text under the person or object in the list of elements

Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

Choose your canvas shape e.g. Portrait
Choose your image – egg it is square

If you make the image fill the area it will simply zoom / crop in

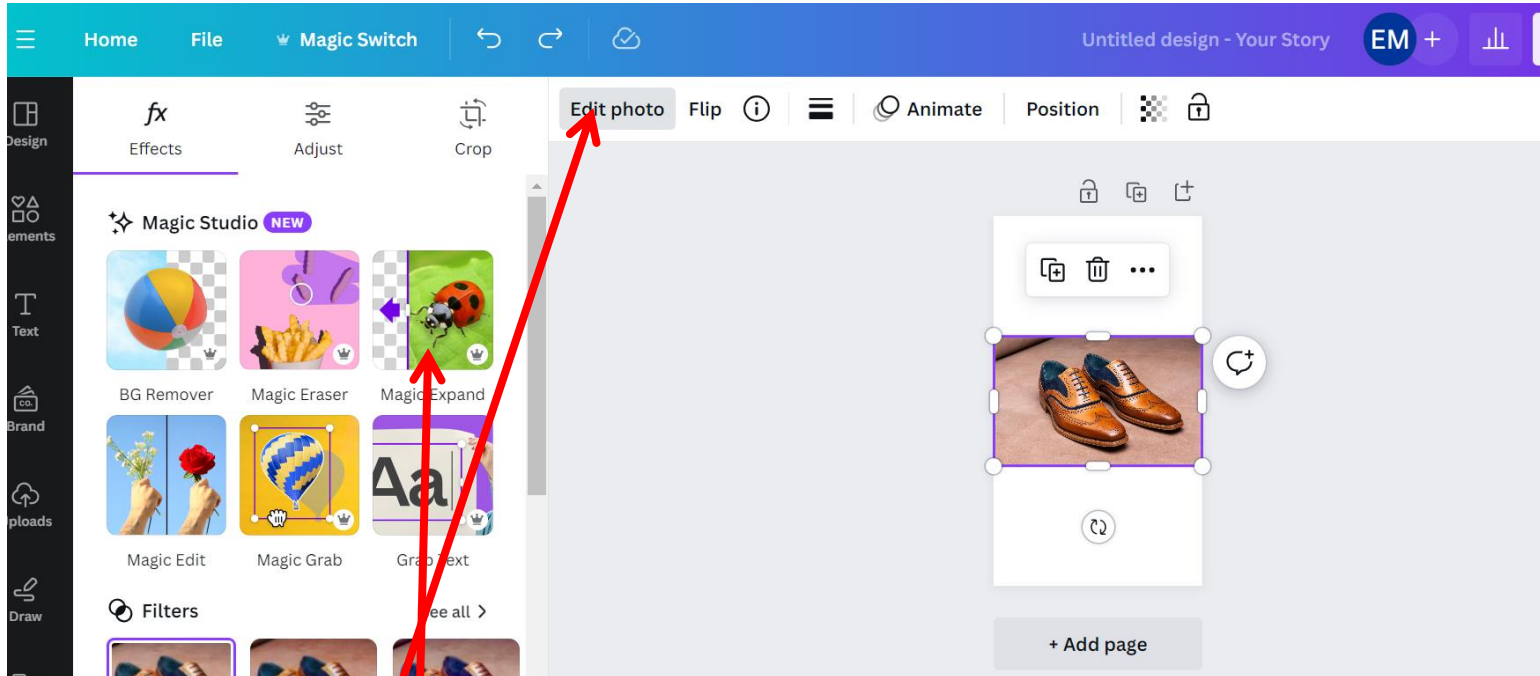

If you want to keep the main object the same size you can use magic expand

Click on image, click on edit photo and select magic expand

This is a Pro feature
It cannot be used by Free accounts

Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

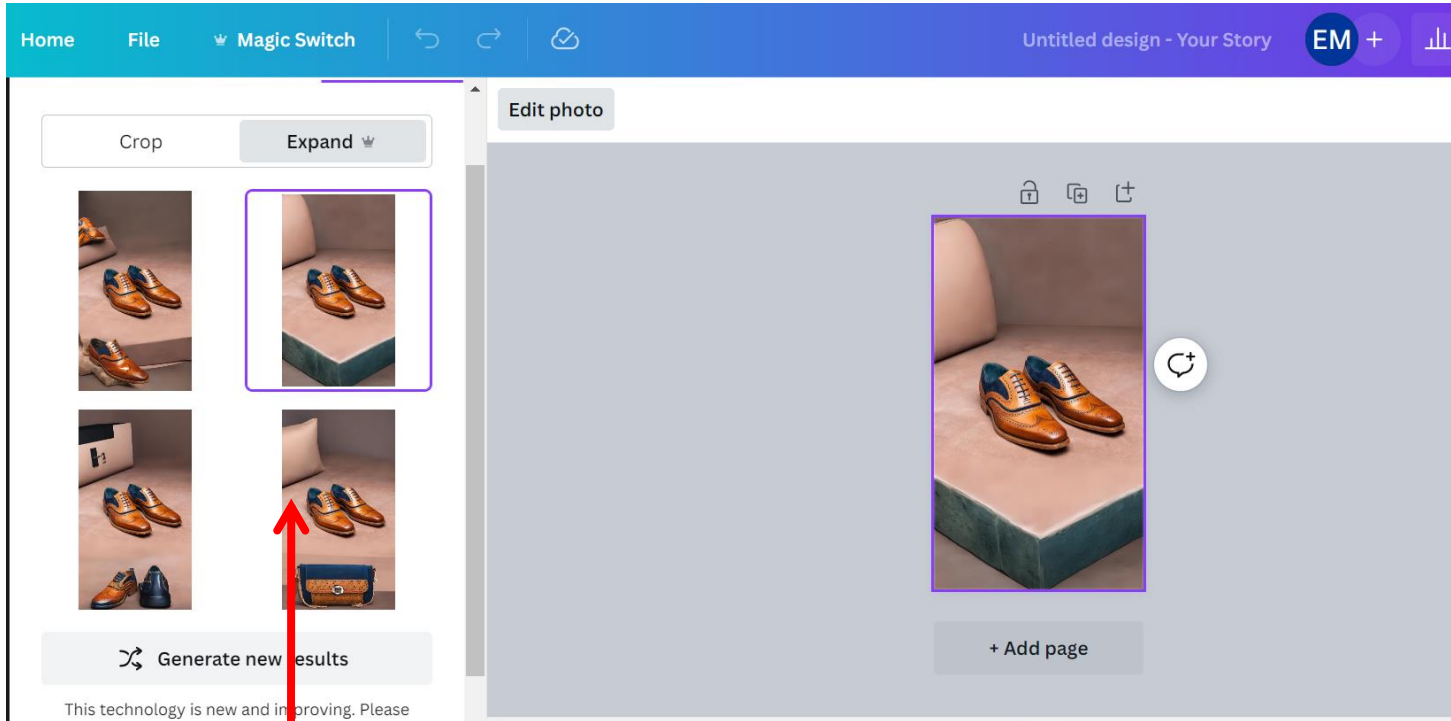

If you want to keep the main object the same size you can use magic expand
Click on image
Click on edit photo
and select magic expand

Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

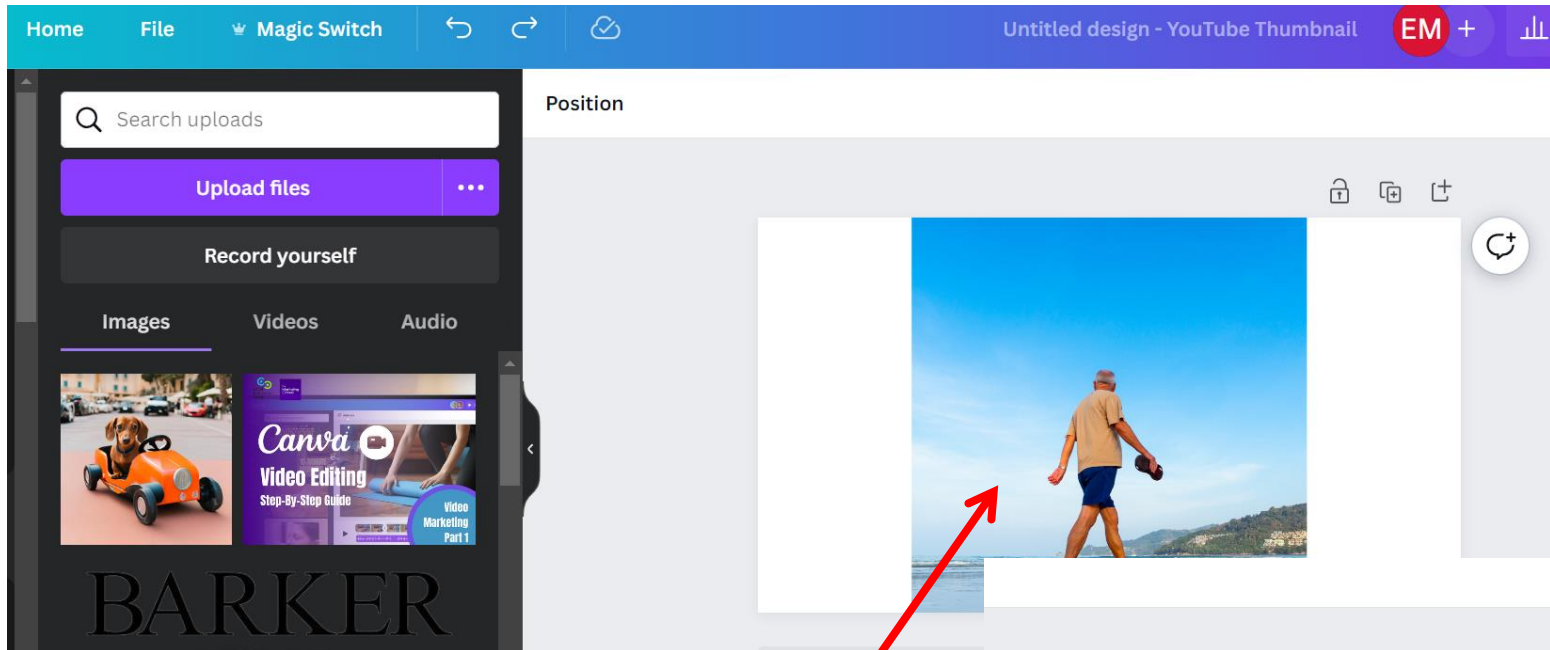

You can now choose whether you want the image to expand to fill the area in page or a different size.

Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

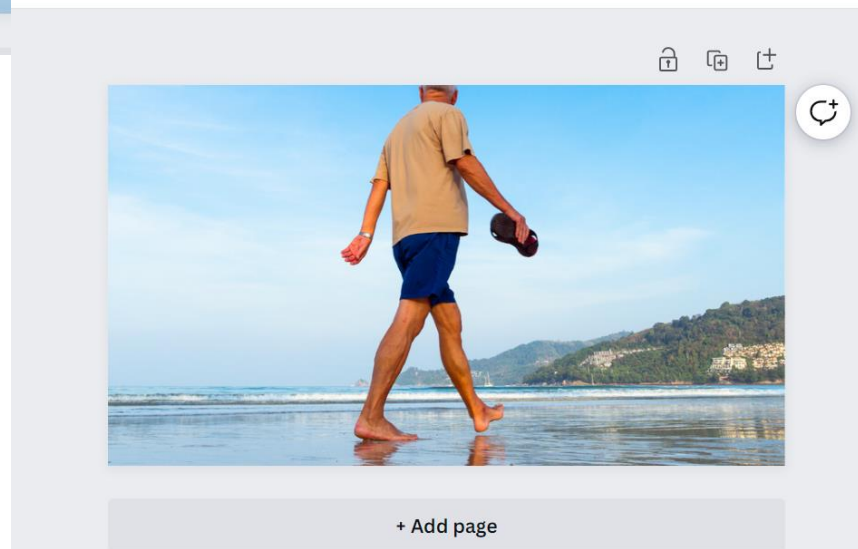

It now gives you 4 options to choose from

Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

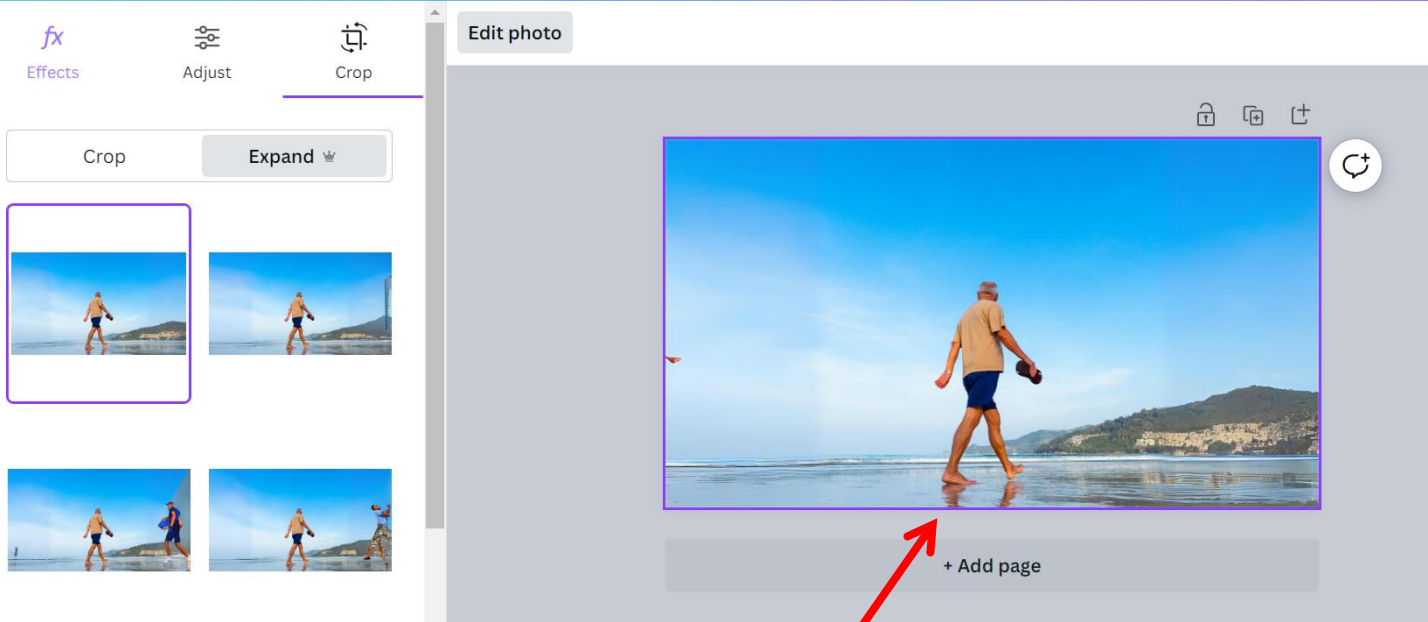

Similarly, you might have a square image that you want to expand to fit a wider area e.g. 16:9

If you simply set the image as background it becomes too cropped in

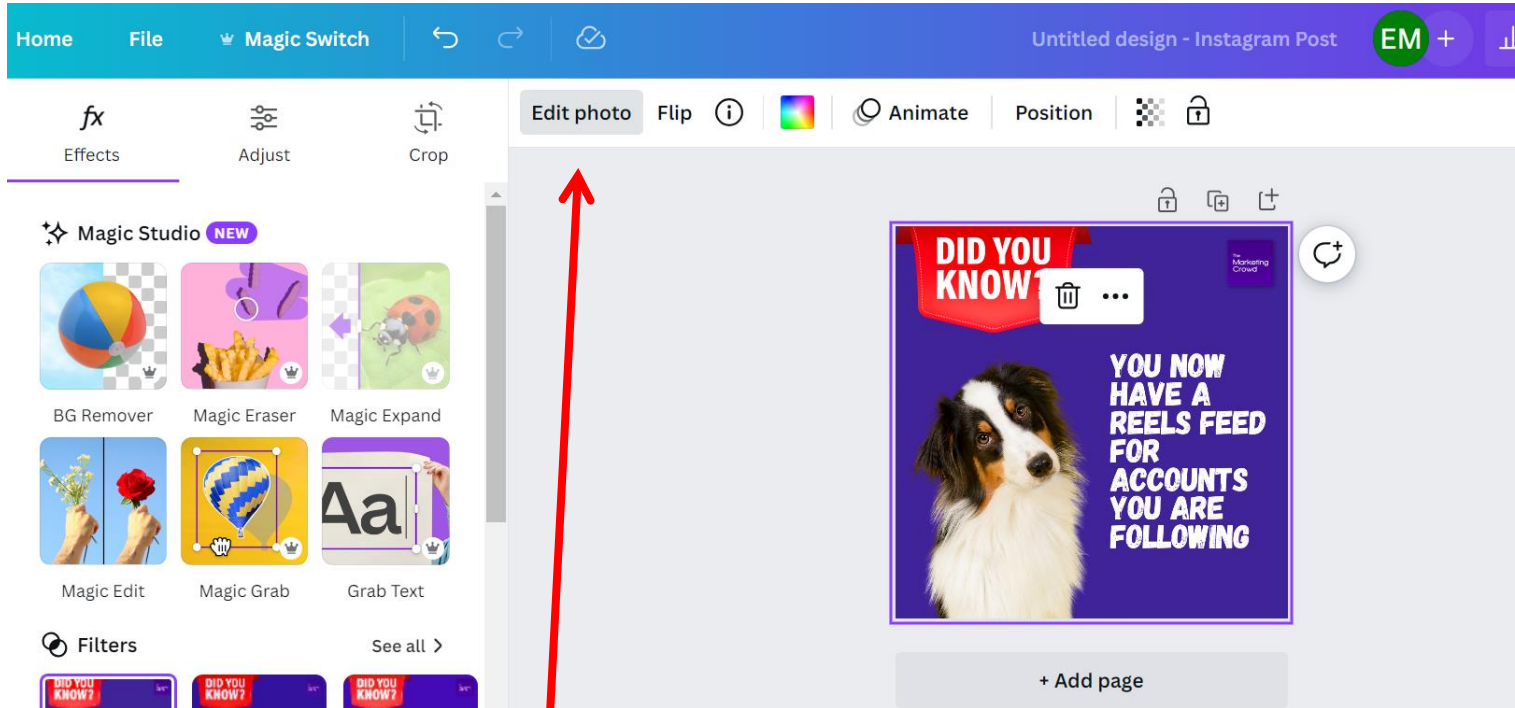

Magic expand: Ask Canva to recreate parts of an image to make it wider or taller

Using magic expand it e.g. is now a landscape image with everything in proportion

Grab text – isolate and manipulate any text that is in an image

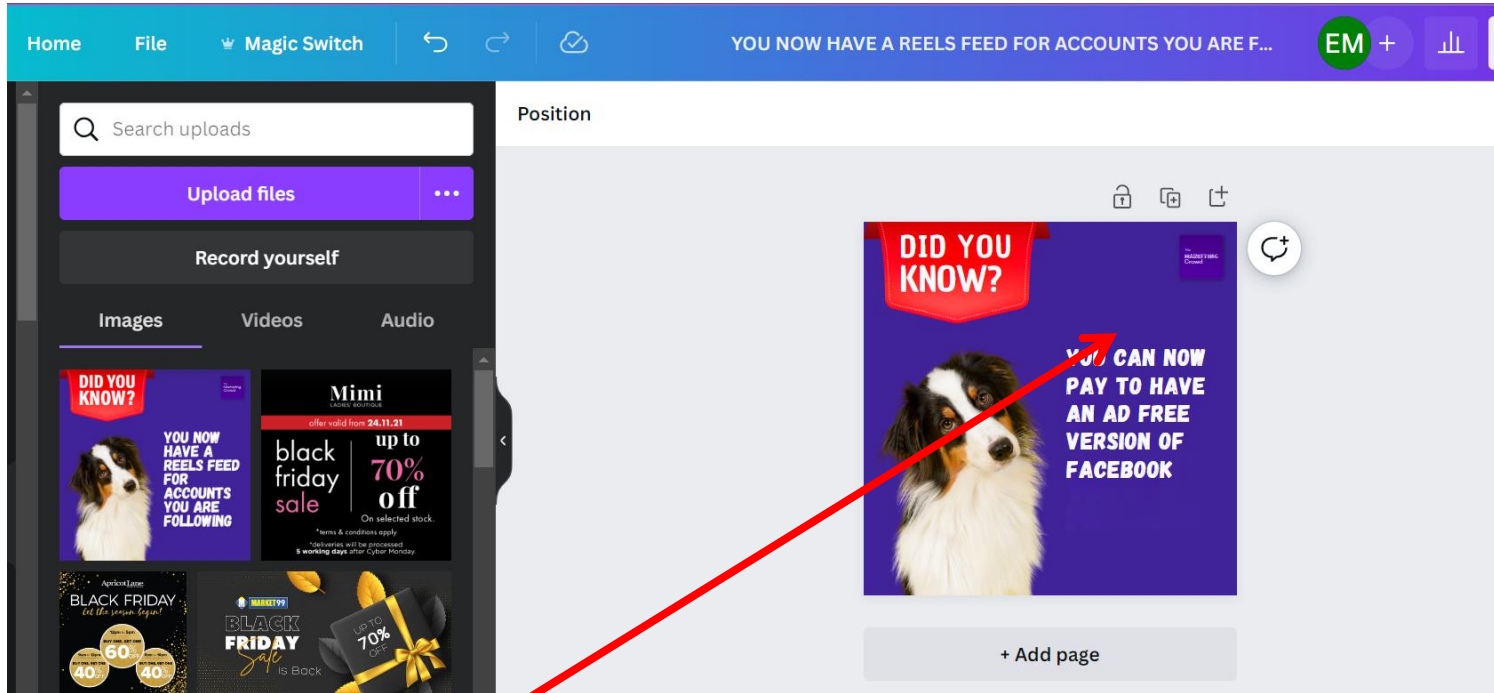

Perhaps you have an image that was designed for you in the past and you now want to reuse it and change some of the text. Normally you cannot edit / change text in an image unless you have the original design file

Now with Canva Grab text you can.
Click on your image, then click edit photo and then Grab text

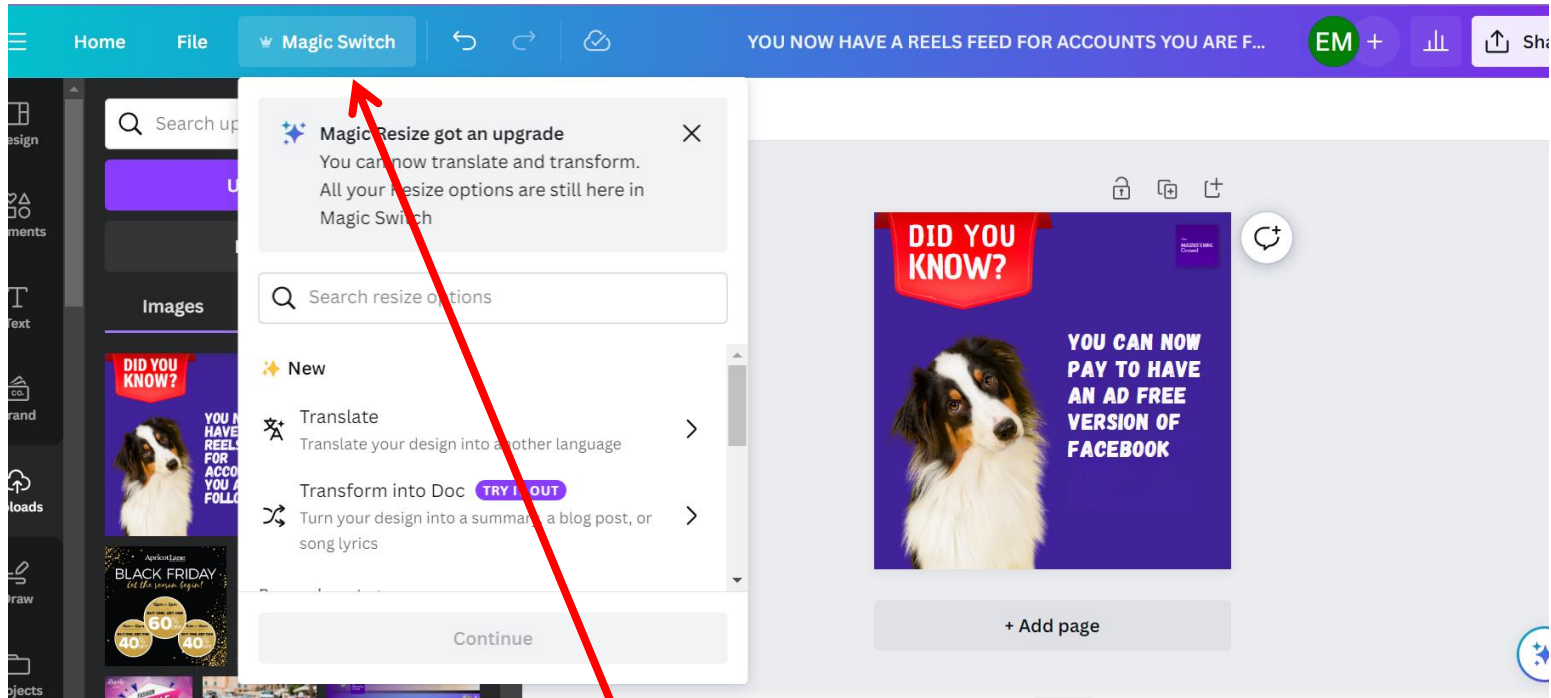

This is a Pro feature
It cannot be used by Free accounts

Grab text – isolate and manipulate any text that is in an image

You can now edit the text boxes, change font, colour etc.

Magic switch – an upgrade to the resize feature for Pro users

- After you create a design you might want a version of it in a different size e.g. You want a portrait version for Stories.
- The resize tool has been rebranded as “magic switch” and it has new features such as translate.
- To convert to a story simply choose the option for social media and then story

This is a Pro feature
It cannot be used by Free accounts

What We Will Cover

Other new features

1. How to easily upload images / videos from your phone
2. How to use the new Canva Assistant
3. How to use the new Modal image editor
4. How to use the new colour gradient tool
5. How to use the photo outline feature
6. How to use the new layers feature
7. Overview of the new Apps area and what you need to know about apps
 - Demo of the new Mock-ups app
 - Demo of the enhancer app
 - Demo of the translate app
 - Demo of Instagram app

How to easily upload images / videos from your phone

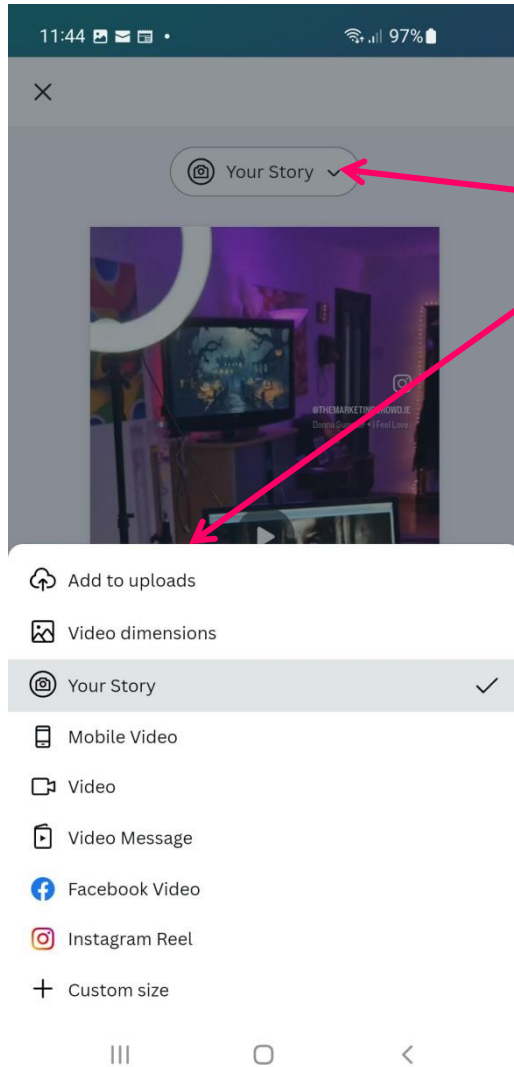

- Open the Canva App.
- Ensure you are logged in with the same account as you are on desktop
- Tap the camera icon top right
- Tap on upload icon
- Select the images or videos you want to upload
- Tap Add

FREE

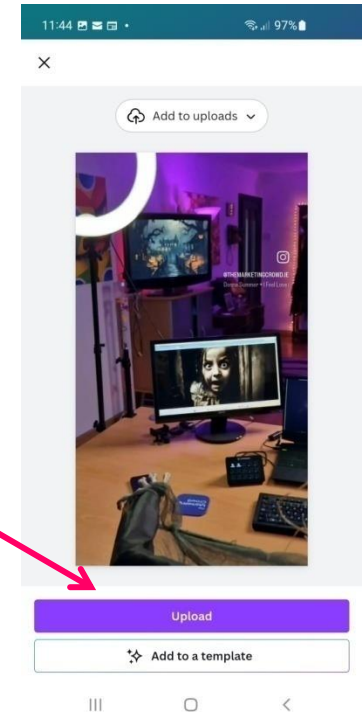

This is a Free feature
It can be used by Free and Pro accounts

How to easily upload images / videos from your phone

•Tap on this and change to Add to uploads

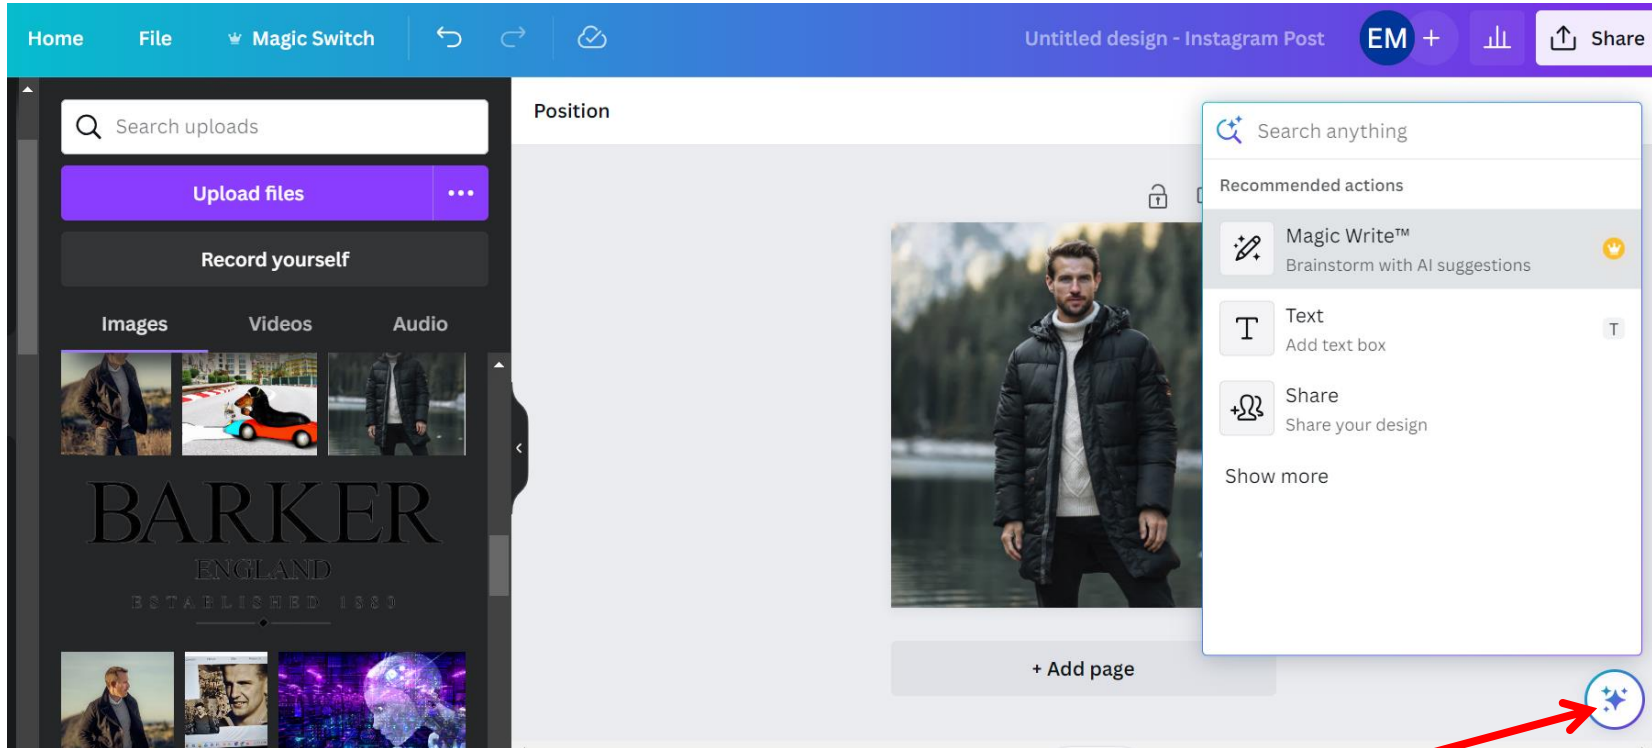

Then tap upload

FREE

This is a Free feature
It can be used by Free and Pro accounts

How to use the Canva Assistant

When you are creating a design there is an icon for Canva assistant in the bottom right. You can use this to 1) search 2) get suggestions 3) Open a specific project 4) Find elements / templates

Click and you see search box plus 3 options. Click show more for more

FREE

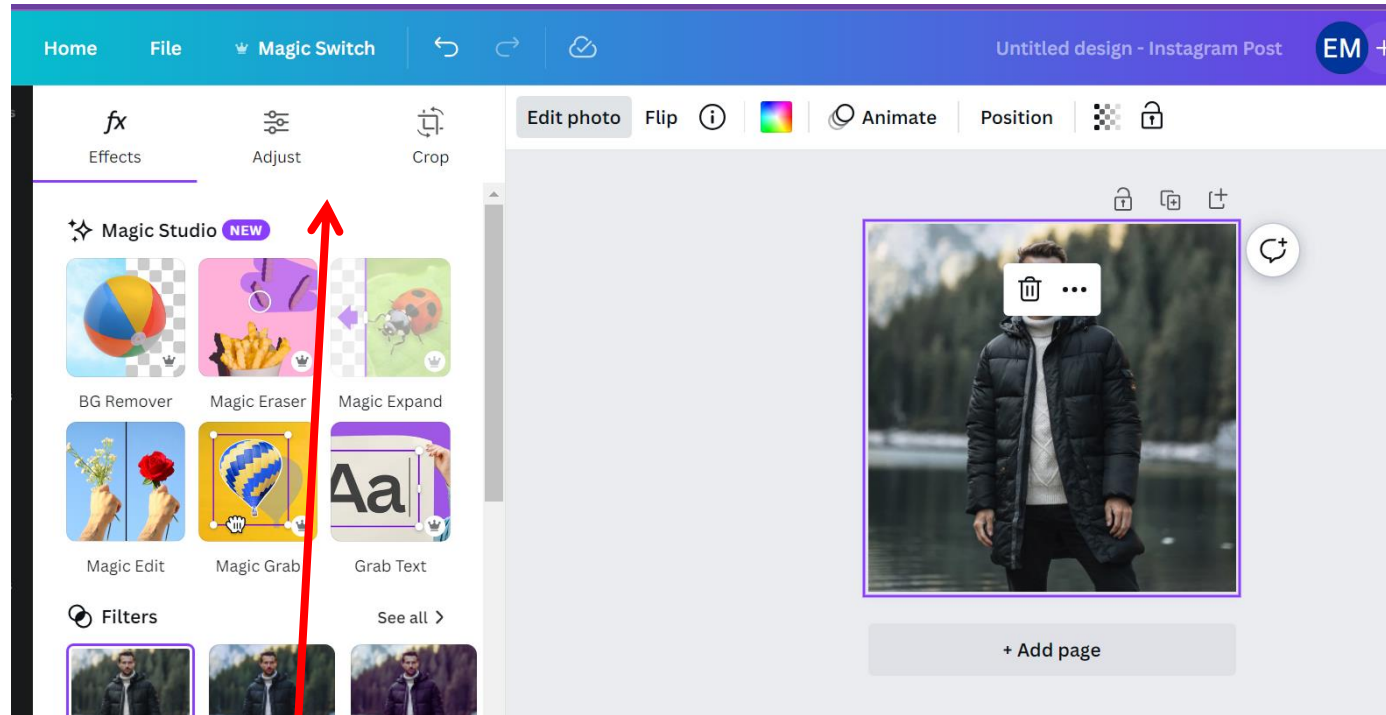

This is a Free feature
It can be used by Free and Pro accounts

How to use the Canva Assistant

I searched for Sale and it now gives me sale related templates, graphics, photos, videos and designs. Very easy to find what you need

How to use the Modal image editor

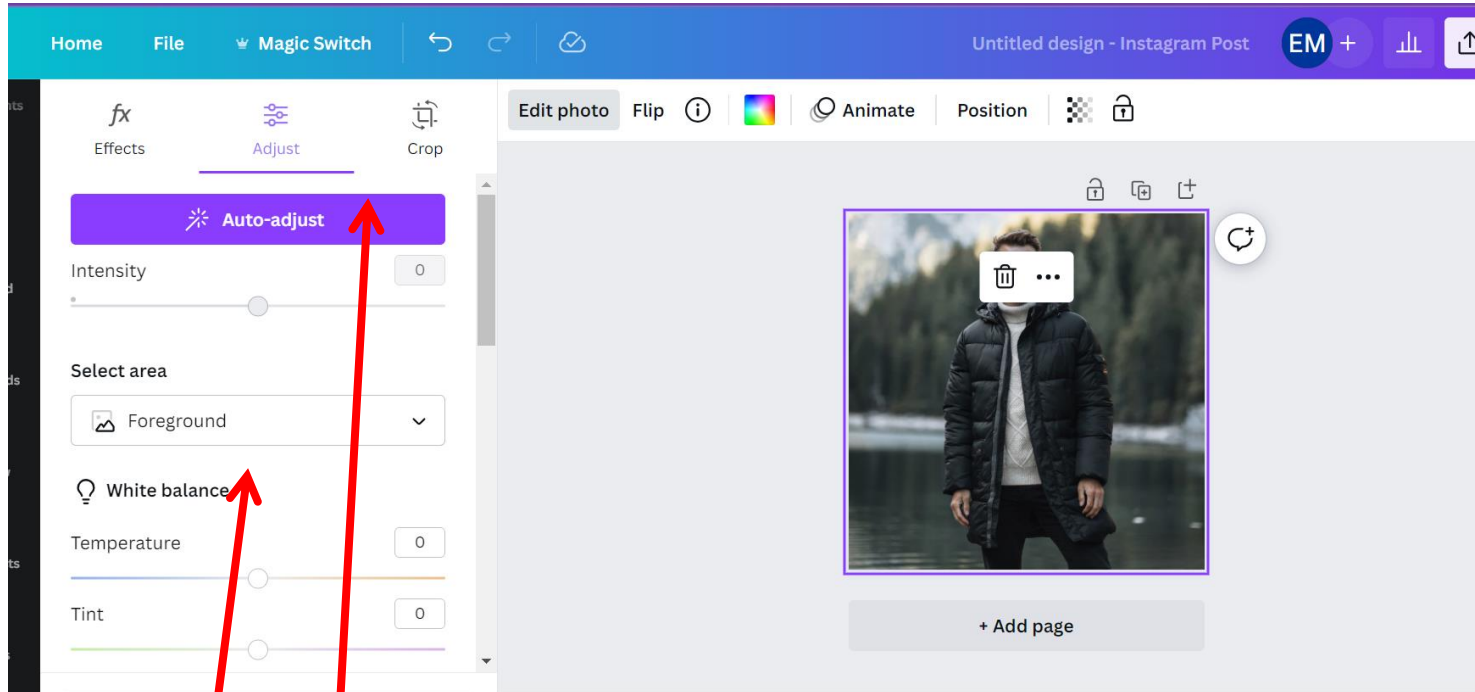

There are some very powerful image editing tools within their new image editor.

Click on your image, click edit photo
You can now see Adjust and Crop.

FREE

This is a Free feature
It can be used by Free and Pro accounts

How to use the Modal image editor

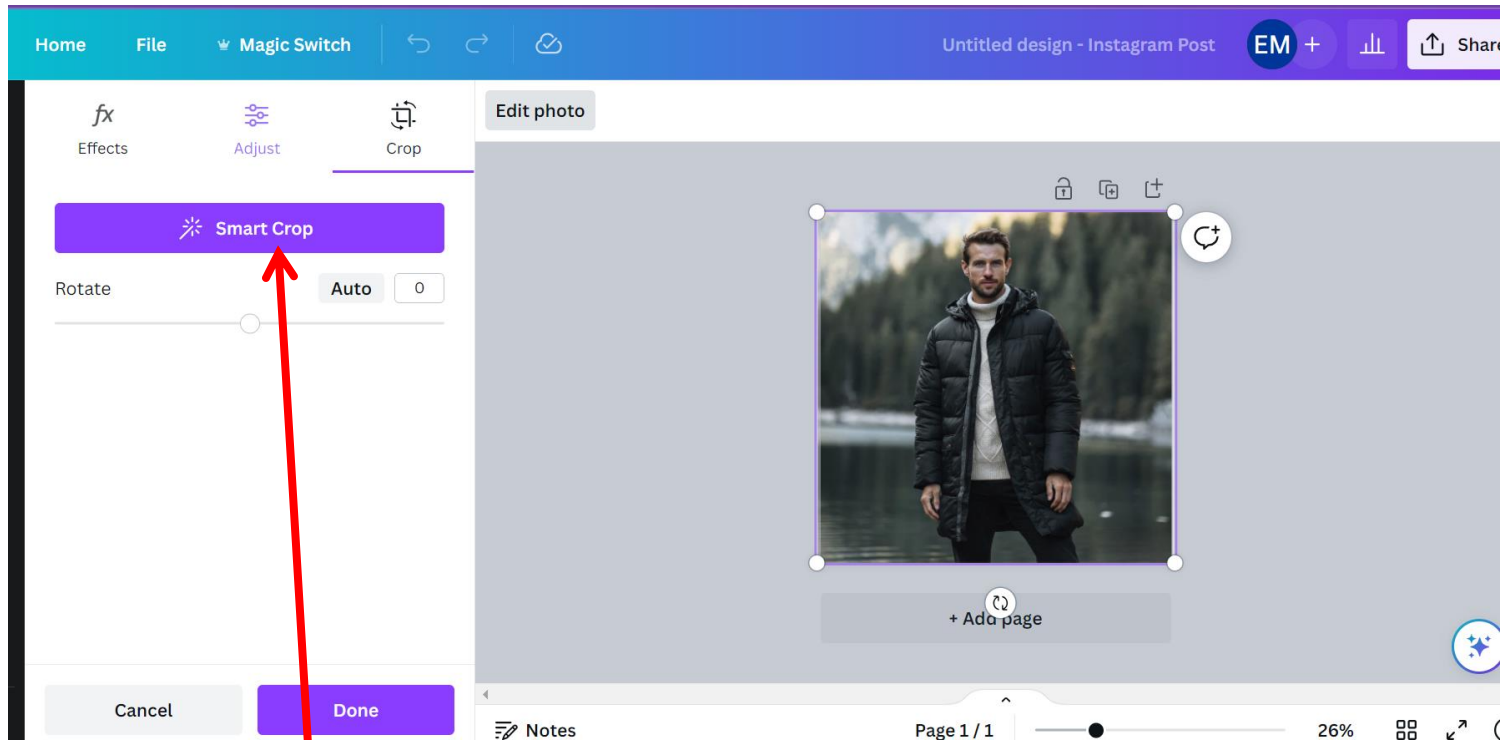

Try clicking on Auto enhance – it will then use AI to enhance your image. Normally it does an excellent job

You can adjust brightness, warmth, saturation, brightness

Also – what is brilliant is that you can select foreground or background and just increase the brightness etc in that part of the image

How to use the Modal image editor

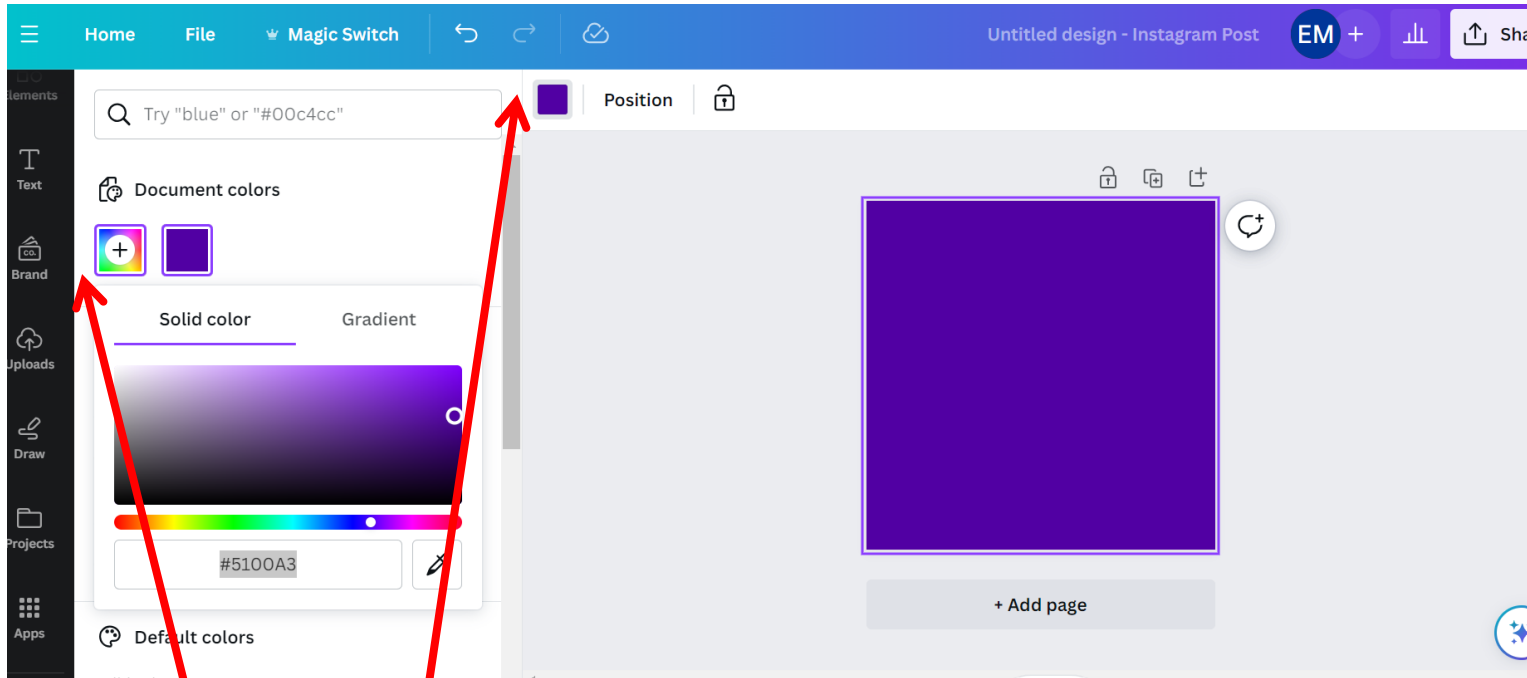

Click on Crop

You can then try Autocrop – this will use AI to choose what it thinks is the best crop in terms of composition so you have a more interesting image

You can also drag the corners of the image to manually crop

If your image isn't level you can also tilt / rotate your image

How to use the colour gradient tool

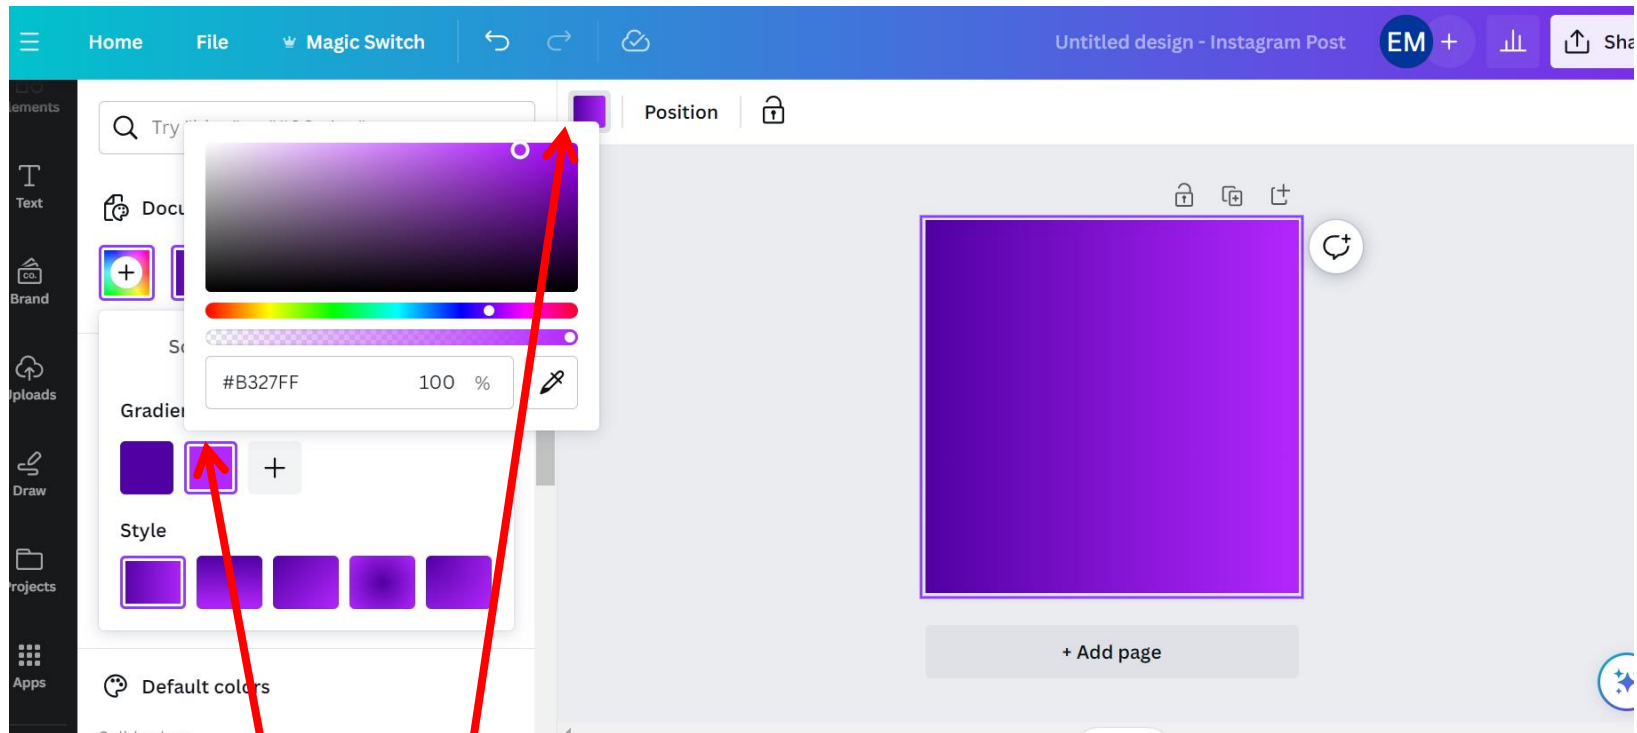

Previously if you wanted to add a colour gradient as a background you had to find a gradient under elements but the best ones were not free. Now you can easily create a graduated colour background using their gradient tool.

1. Start with a blank canvas
2. Click on Background colour and choose your main colour for the background – the one you want to add a gradient to
3. Then click on the + icon
4. Then click on gradient

FREE

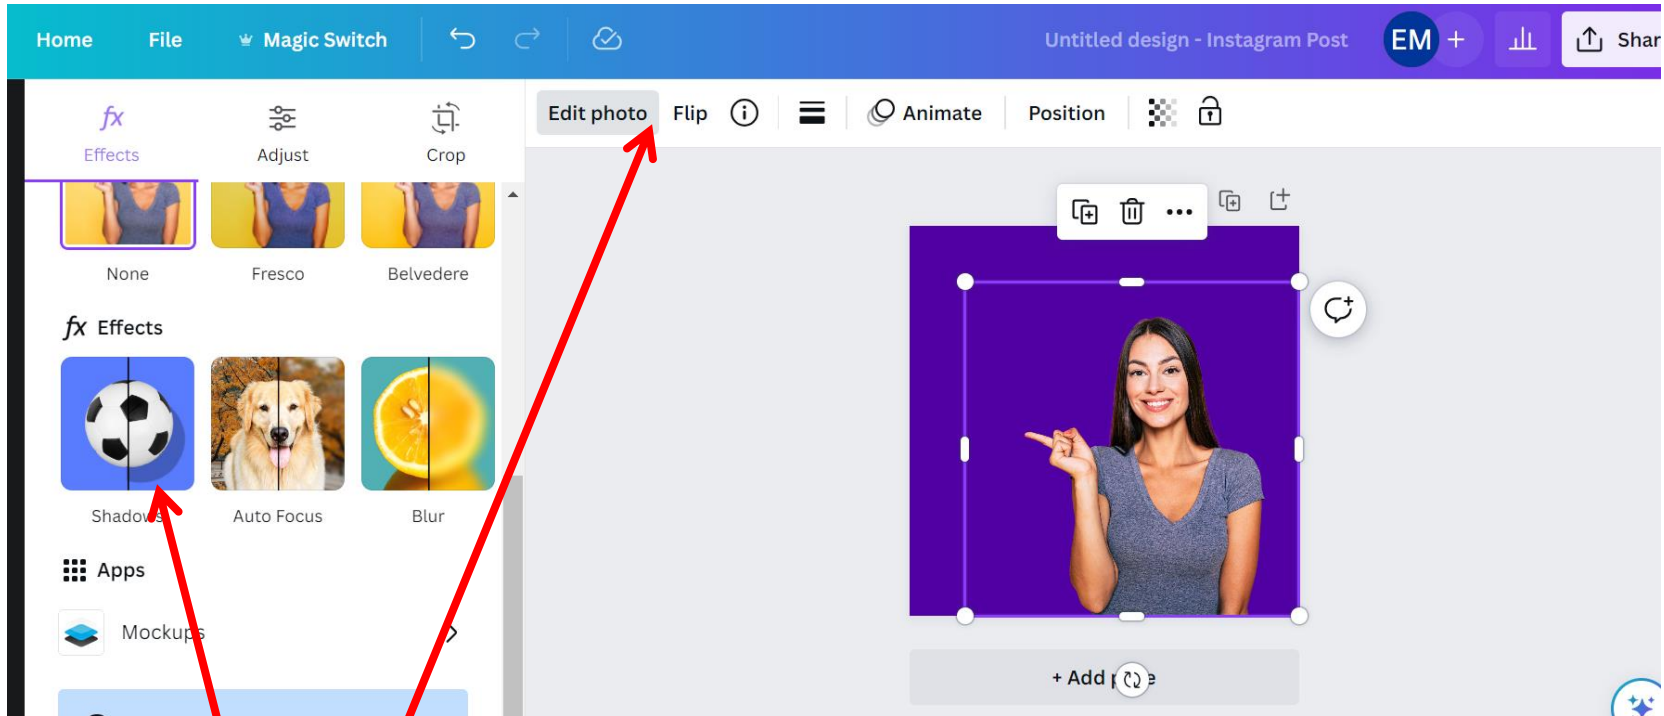

This is a Free feature
It can be used by Free and Pro accounts

How to use the colour gradient tool

1. It will automatically give you a second colour as part of the gradient
2. Click on the 2nd colour to change it to what you want.
3. You can add a 3^d colour if you want.
4. You can also choose different styles e.g. Have the gradient top to bottom or side to side

How to use the photo outline feature

Do you want to have a white outline around a person like you see in YouTube Thumbnail images

Add a transparent image of a person to a coloured background – this will not work if it is simply an image of a person

Click on your image

Click edit photo

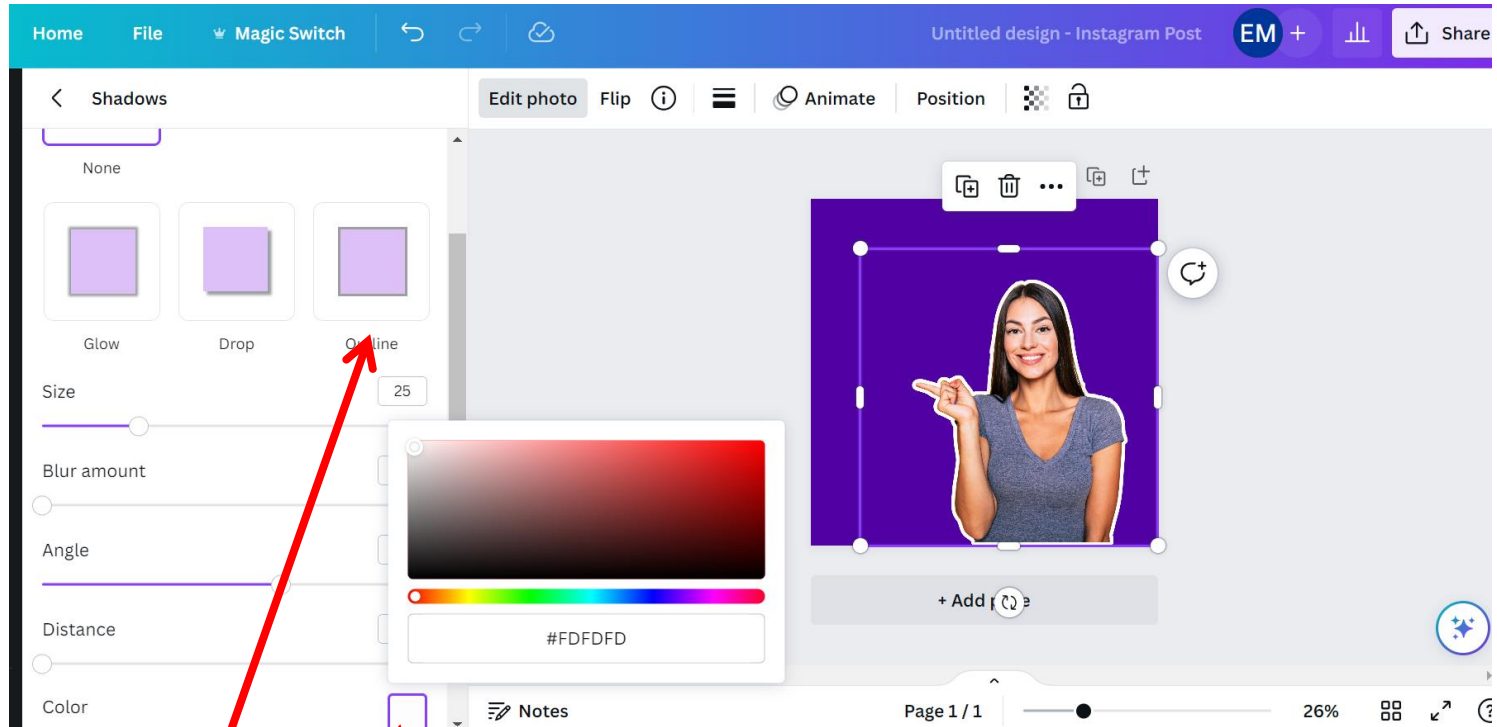

Then click on Shadow

FREE

This is a Free feature

It can be used by Free and Pro accounts

How to use the photo outline feature

Then click on Outline
Then change the colour to white
You can also change the size / thickness

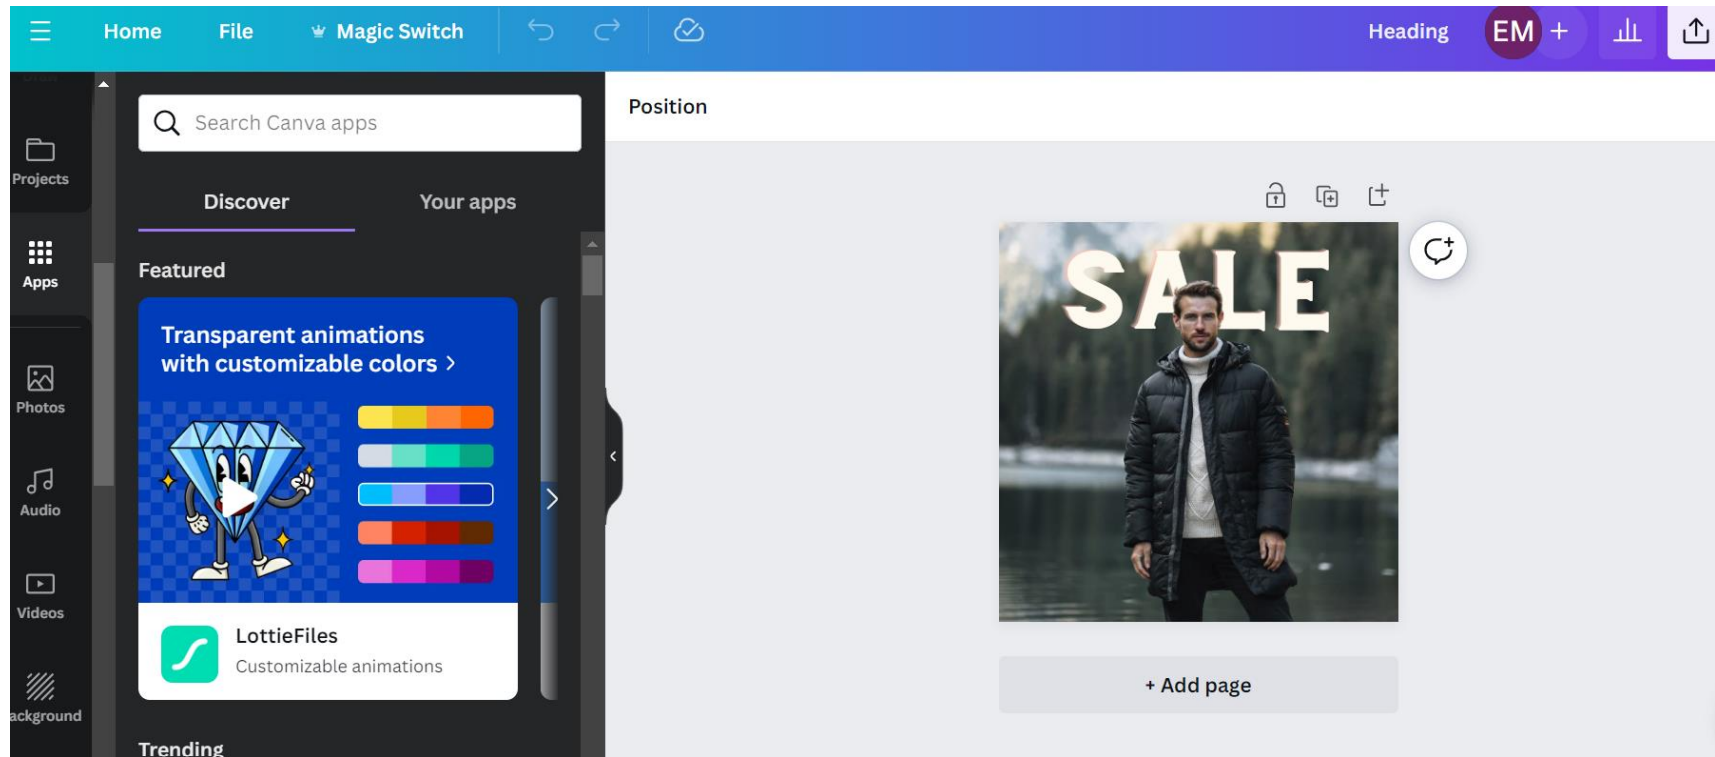

Overview of the new Apps area: What you need to know about apps

The screenshot shows the Canva user interface. At the top, there's a navigation bar with the Canva logo, menu items like 'Design spotlight', 'Business', 'Education', 'Plans and pricing', and 'Learn', and a 'Create a design' button. On the left, a sidebar shows the user's profile 'EM Personal Pro • 81' and a list of recommended apps: Content Planner, Mockups, Product Photos, Create a team, and Trash. The main area is titled 'Trending apps' and features a search bar and filter buttons for 'For you', 'AI-powered', 'Productivity', 'Design essentials', and 'Share and publish'. Below the search bar, there are four app cards: 1. 'Generate realistic images and art using AI >' by DALL-E (AI Image Generator by OpenAI), showing a teddy bear on a skateboard. 2. 'Turn your text into photorealistic AI images >' by Imagen (AI image generator by Google), with a search input containing 'Farmland art Tuscany' and two landscape images. 3. 'Create dynamic palettes to enhance your designs >' by Shade (Generate color palettes), showing a color palette. 4. 'Dream it words tu...' by M..., showing a landscape image and a search input with 'A rover experi...'. A purple question mark icon is visible in the bottom right corner of the app cards area.

- Apps allow you to do a lot more with Canva. They are like extra tools you can use
- Recently Canva opened up its API to 3rd party companies so now you can use 3rd party apps as well as Canva's own apps

There are 2 ways to find apps. The first is to click on Apps on the left menu of homepage and then browse through the latest apps, trending apps etc

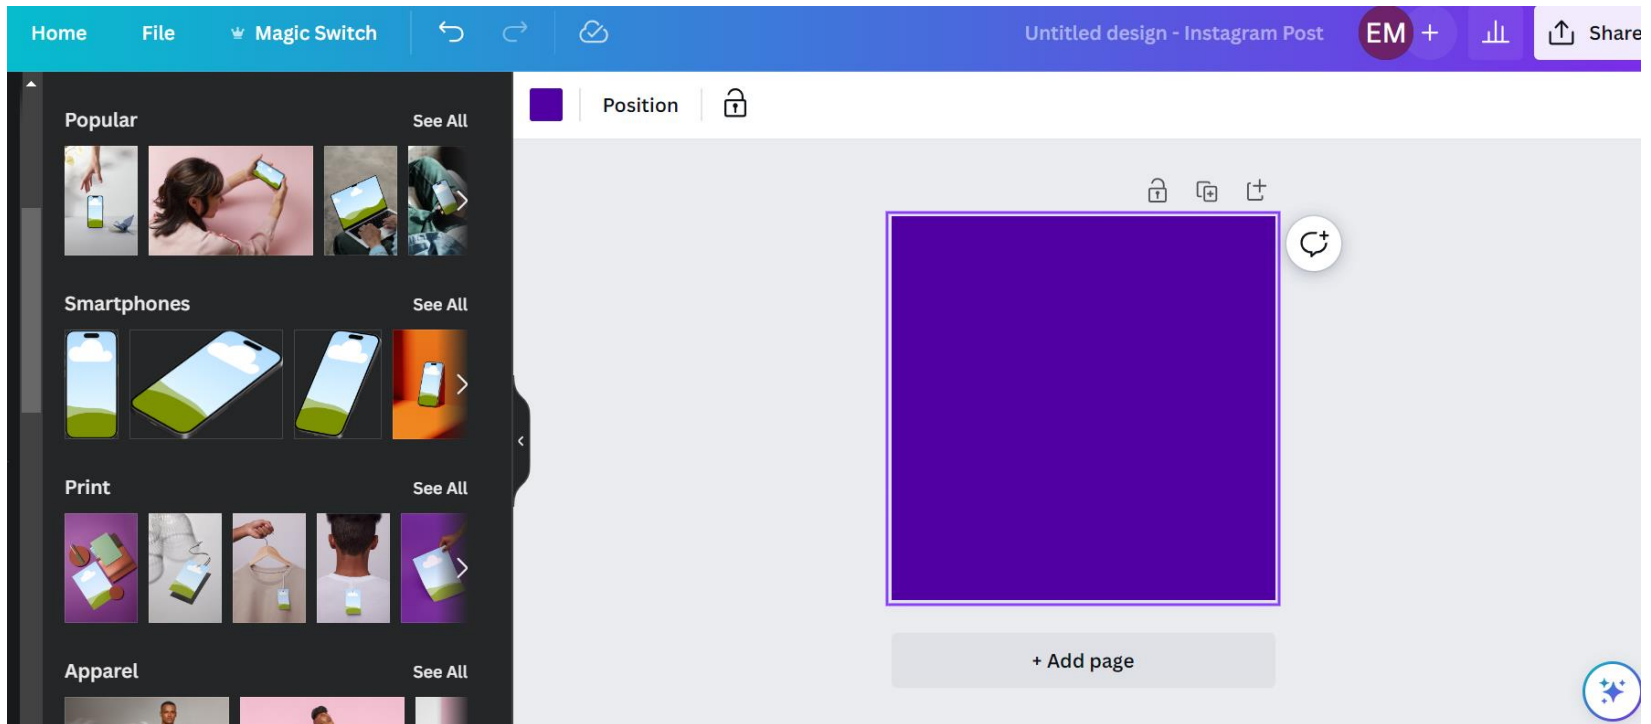

Overview of the new Apps area: What you need to know about apps

The 2nd way to access apps is when you are creating a design
Click on apps on the left hand menu
Then browse through the apps

To use one simply click on one and then Install

Demo of the new Mock-ups app

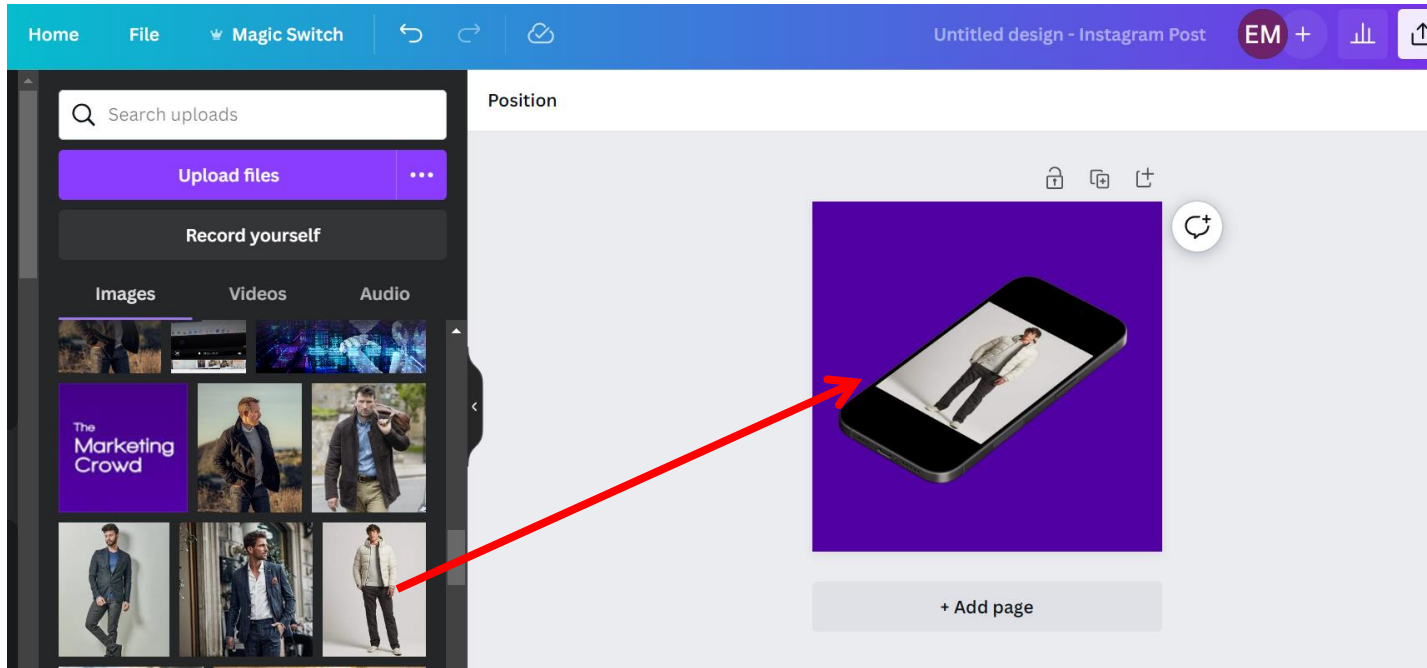

Would you like to have your image appear in a phone. Computer screen, T shirt etc?

Go to apps
Search for Mock-ups
Then browse through all the options. Click on the one you want

FREE

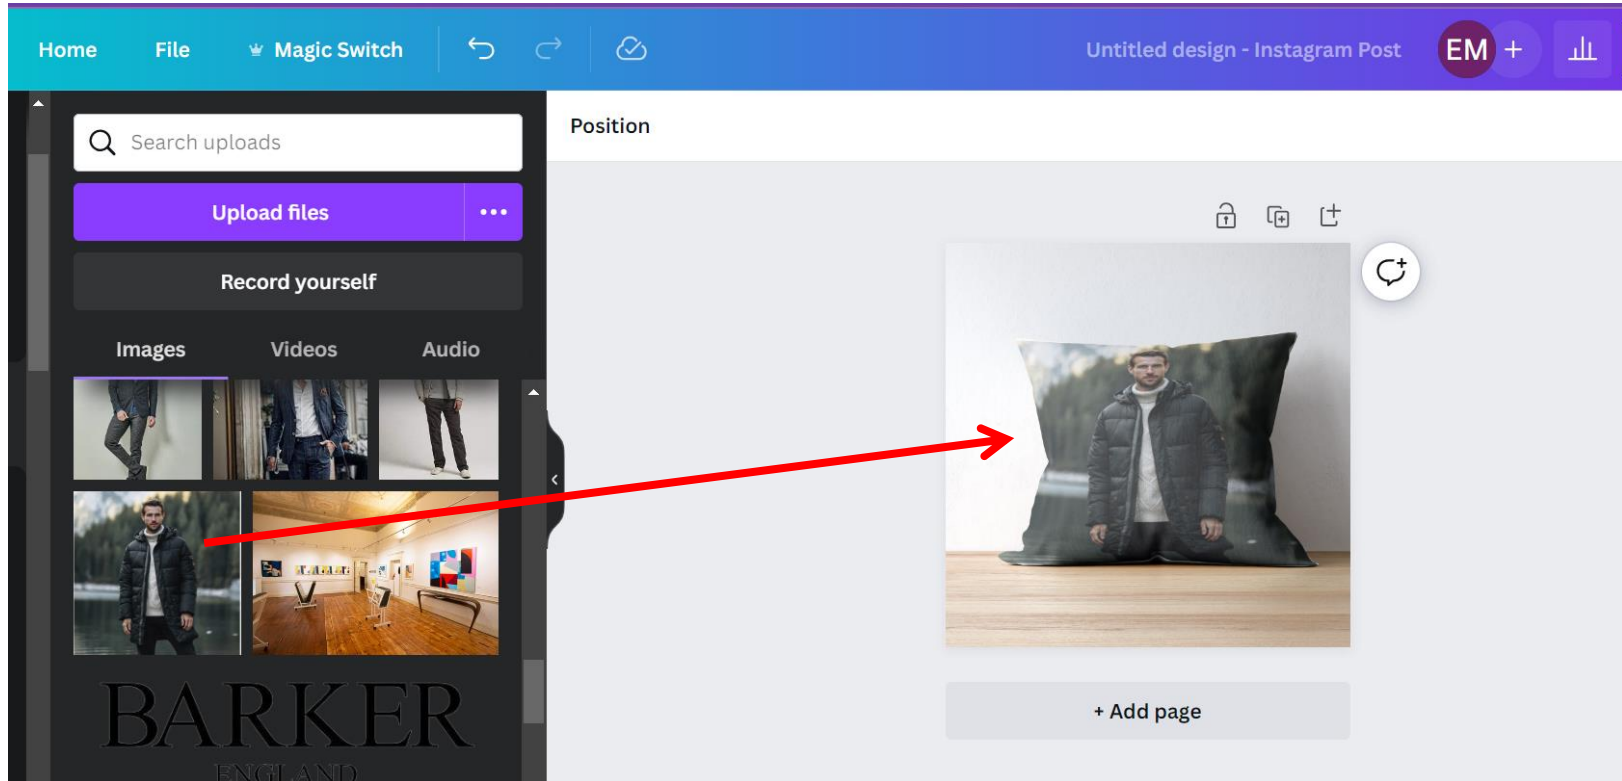

This is a Free feature
It can be used by Free and Pro accounts

Demo of the new Mock-ups app

Then drag a photo from your upload into the mock-up and it will appear

Demo of the new Mock-ups app

Then drag a photo from your upload into the mock-up and it will appear

Demo of the translate app

You can easily translate any text into any language

Go to apps and search for Translate
Then click Translate To and choose your language

FREE

This is a Free feature
It can be used by Free and
Pro accounts

Demo of the Instagram app

Would you like to pull your Instagram Reels and photos into Canva? You could then use them in your designs

Go to apps and search for Instagram
Click on it and then click connect – you will need to give permission

FREE

This is a Free feature
It can be used by Free and Pro accounts

Demo of the Instagram app

All your Instagram photos and videos are now in the a gallery on the left

You can add any of these to your designs

Note – when you install an app it will then appear on the left hand menu near the bottom. In the future simply scroll down, click on Instagram and all the files will be in that gallery
