Mobile app Video editor – CapCut

 CapCut

Go to the app store or play store on your phone.
Search for and download CapCut

Over 400 million people use Inshot

It is made by Bytedance - the same company that owns TikTok so there is a lot of integration with TikTok

You can use the app for free and there won't be a watermark on your video

However, they have lots of Pro features and to use those you would need to buy a license

What is the main alternative to CapCut?

Title	Duration	Price
InShot Pro - Monthly	Monthly	\$3.99
InShot Pro - Yearly	Annual	\$17.99
Remove ads	One-Time	\$3.99
InShot Pro - Lifetime	One-Time	\$39.99

Inshot is a brilliant video editing app and there is a full course showing you to use it on the members website

Inshot has everything you need to make very high quality marketing videos

But If you want to use it for free, there will be a watermark on your video.

However, the cost of a license is very reasonable. You could buy a lifetime license for \$40

Why use CapCut instead of Inshot?

Capcut vs InShot

\$7.99/Monthly

\$9.99/One month

\$74.99/Yearly

Purchase
Will charge \$7.99 in the next period

By tapping "Purchase",
you agree to [Terms of Service](#) and [Privacy Policy](#).

The main benefits of CapCut:

- You can use it for free and there won't be a watermark. You can do for free most of what you can do on Inshot
- They have better free captions and better free text effects than Inshot
- They have extra free features like video templates and Teleprompter, Stock video library that Inshot doesn't have

Plus .. In the Pro version they also have some very eye catching and advanced effects that look way better than Inshot

However, the Pro version of CapCut is more expensive than an Inshot license

Demo 1 : How to edit a video (multiple clips plus voiceover)

Demo 2: How to edit a video where someone is speaking to camera

Extra features that will improve your videos

What are the 4 main types of marketing videos

There are 4 big types of marketing videos

1. Testimonials
2. Company promo
3. Product / service videos
4. “How to” videos

Testimonial and Company promo videos are typically made with someone being interviewed

Product or service videos typically have someone speaking directly to camera

“How To” videos typically have someone speaking to camera

Landscape or vertical?

Ask yourself, why are you creating the video

Is it a “marketing” video created to showcase your business, product, service?

- Examples would be company promo, testimonial, 60 second product or service video
- You would want to have these videos on your website and YouTube ... And also post them on Facebook, LinkedIn and Twitter

Landscape or vertical?

Ask yourself, why are you creating the video.

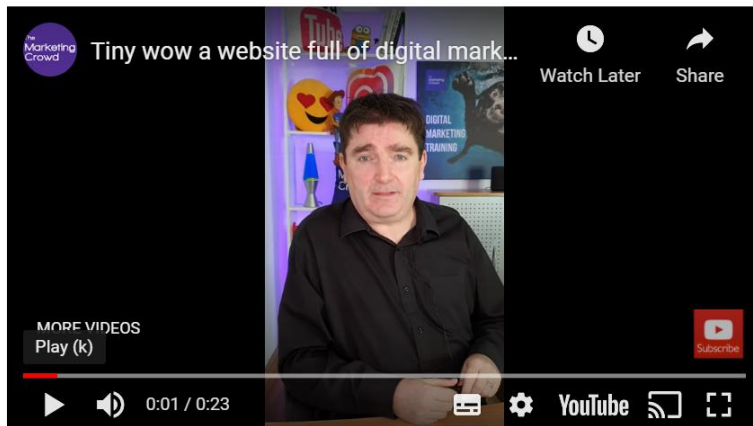

Example of a landscape video

Any important “marketing” videos like these should be shot and edited landscape because that works best on your website and YouTube.

Plus landscape works well on Facebook, Twitter, LinkedIn

Example of a portrait video

Ask yourself, why are you creating the video?

Is it a “social media” video created primarily to be a social media post?

- Examples would be “How to” videos, helpful tips, short videos about a product or promotion, short video about an event or behind the scenes with staff.
- You are really creating this video to post it on Facebook, Instagram, LinkedIn and Twitter and having it on your website is not that important

If this is the case, you need to ask yourself, which is your most important social network – the one you get most reach and engagement on – and then decide the format based on what works best on that social network

If it is Instagram you should make a Reel which is vertical video

Overview of the main navigation

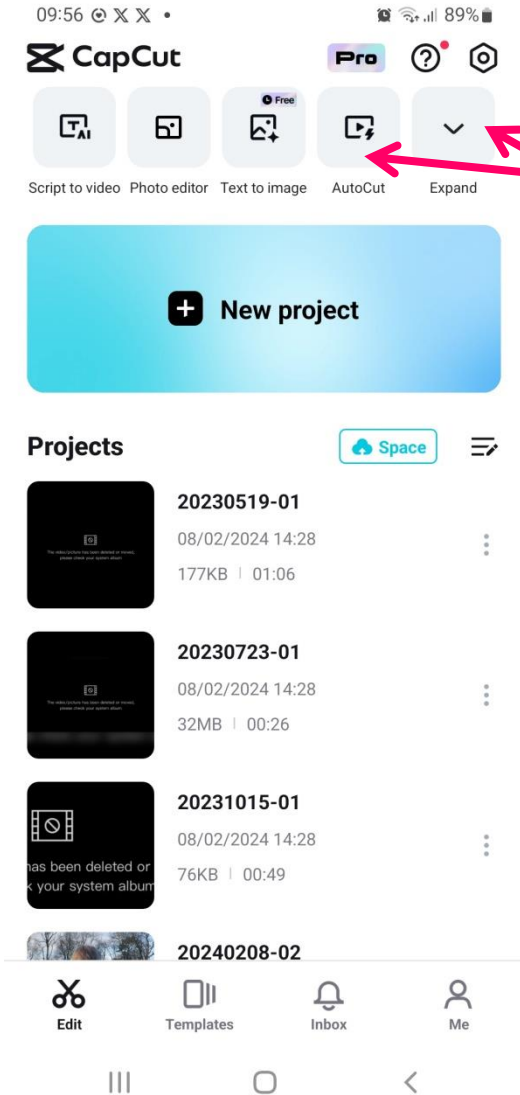

- How to get started editing a video
- Overview of the menu in the editor

Demo 1 : How to edit a video (multiple clips plus voiceover)

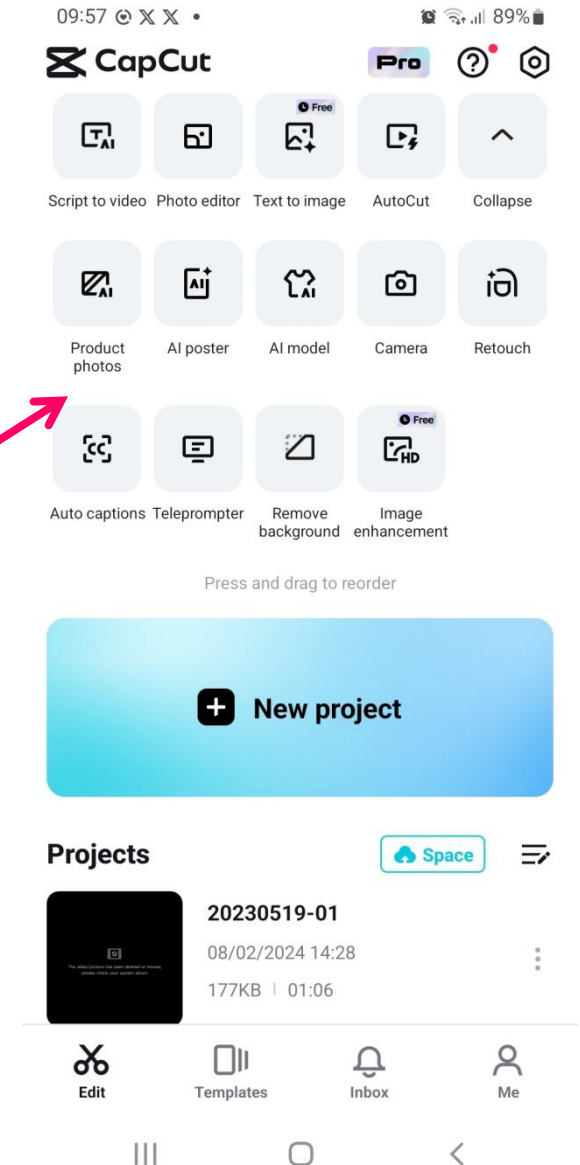

Demo 2: How to edit a video where someone is speaking to camera

Extra features that will improve your videos

Demo 1 : How to edit a video (multiple clips plus voiceover)

- Open the app
 - Tap New project
 - Find the album on your phone
 - Select the clip you want to start the video with
 - Tap HD
 - Tap Add
-
- Your clip is now on the timeline
 - Tap play and pause to choose the part where you want to split the clip
 - To get the split option either tap edit or tap on the clip

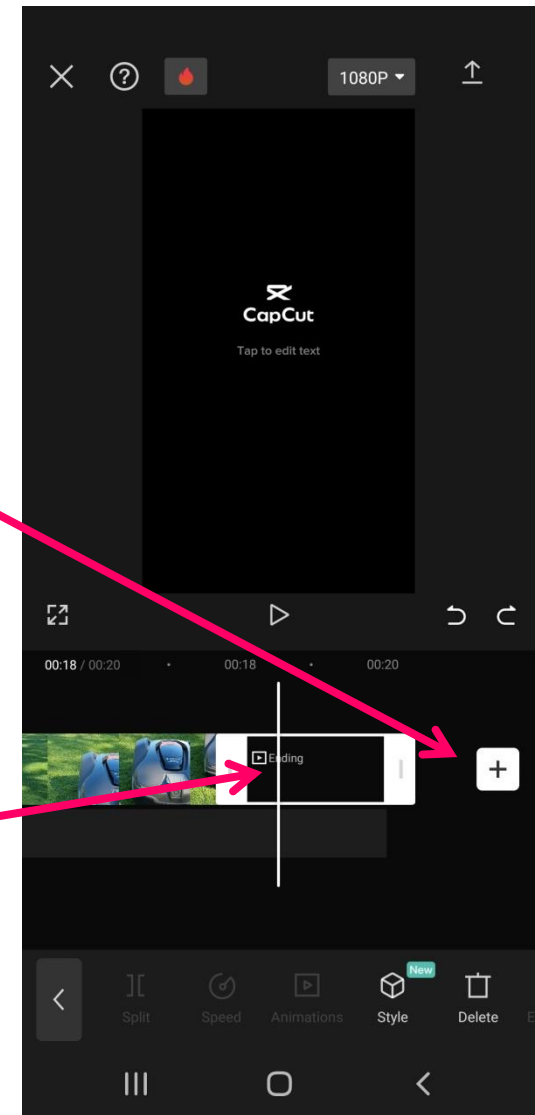

Demo 1 : How to edit a video (multiple clips plus voiceover)

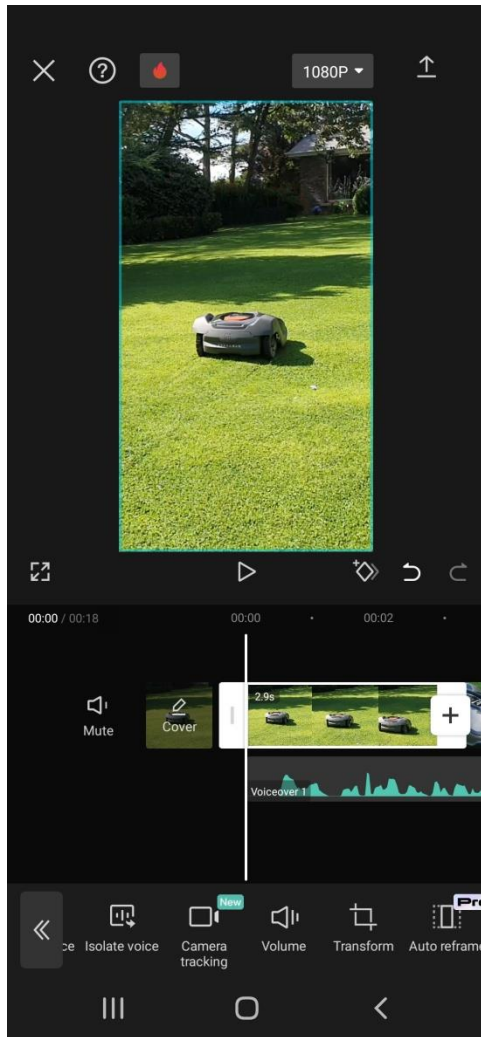

- Tap split
- Then select the part you want to delete
- Then tap on delete
- Then Tap on + in order to add the next clip.
- Select the clip and then repeat the process of splitting and deleting the part you don't want.
- Keep repeating until you have added and edited all your clips

Remove the CapCut logo clip at the end

- At the end of your video there will be the CapCut logo. To delete this simply tap on the clip and then tap delete

Demo 1 : How to edit a video (multiple clips plus voiceover)

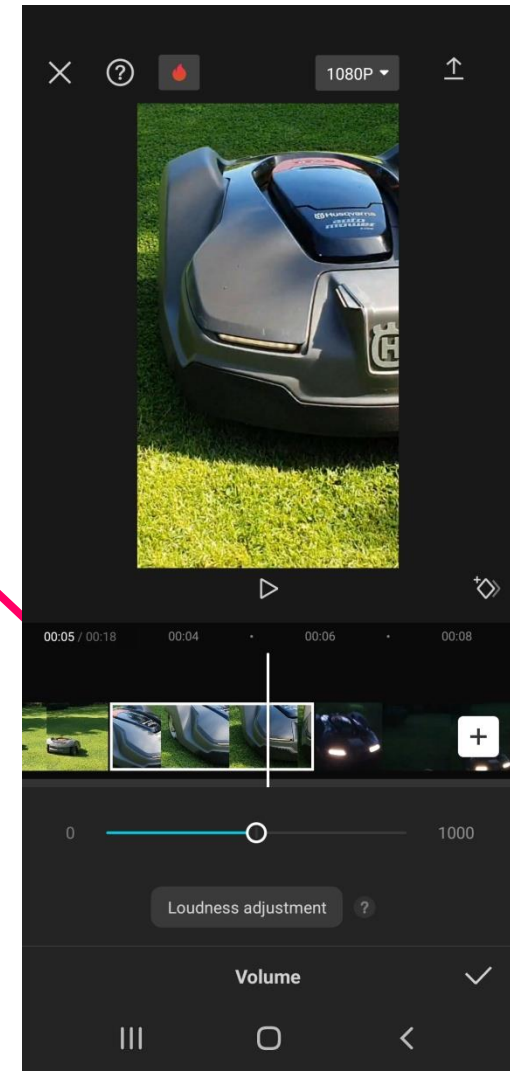

To reduce the volume of your clips

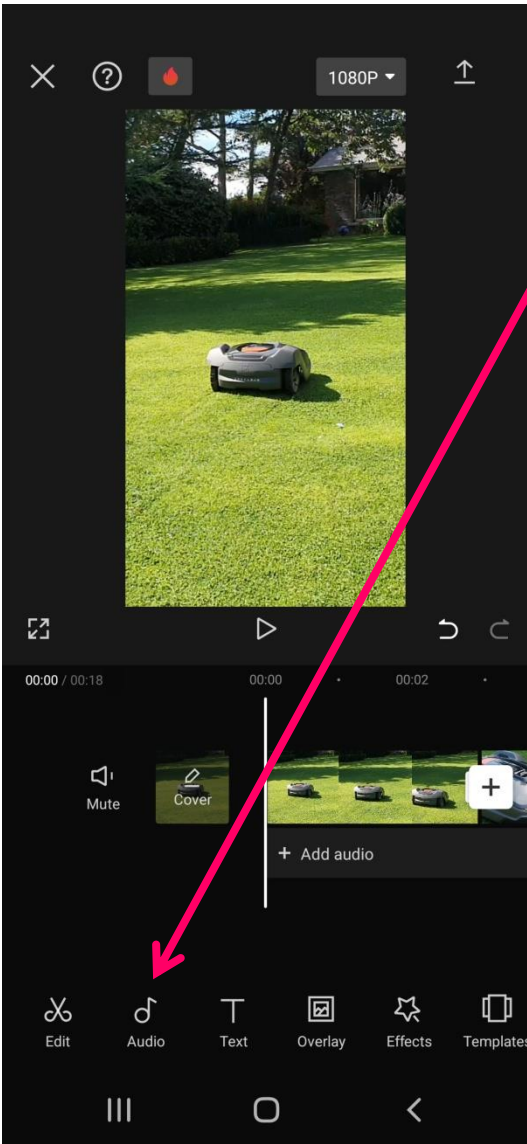

Tap on a clip
Then tap volume

Reduce the volume by dragging
the slider to the left

To reduce the volume of other
clips simply tap on another clip at
this stage and you can drag the
slider

Demo 1 : How to edit a video (multiple clips plus voiceover)

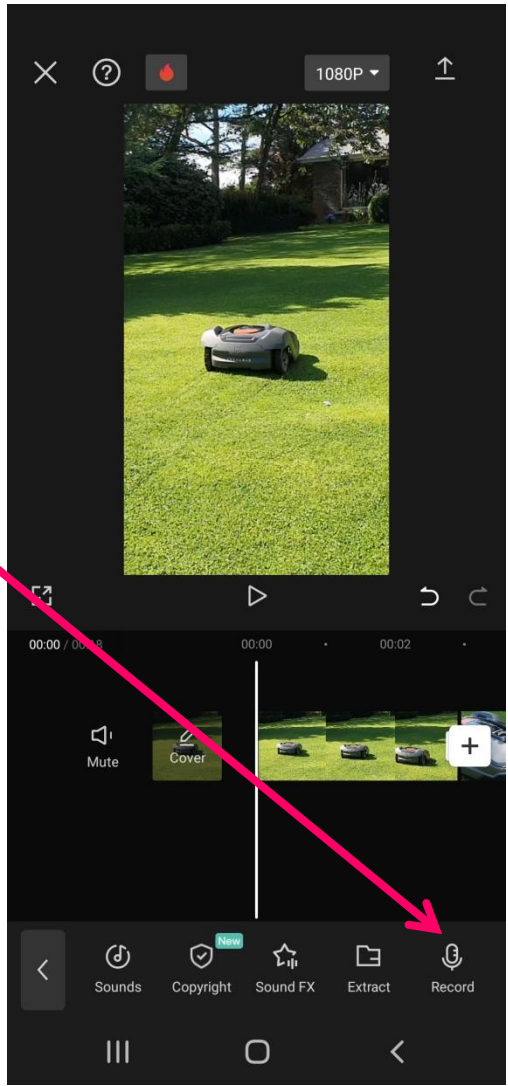

To add a voice over

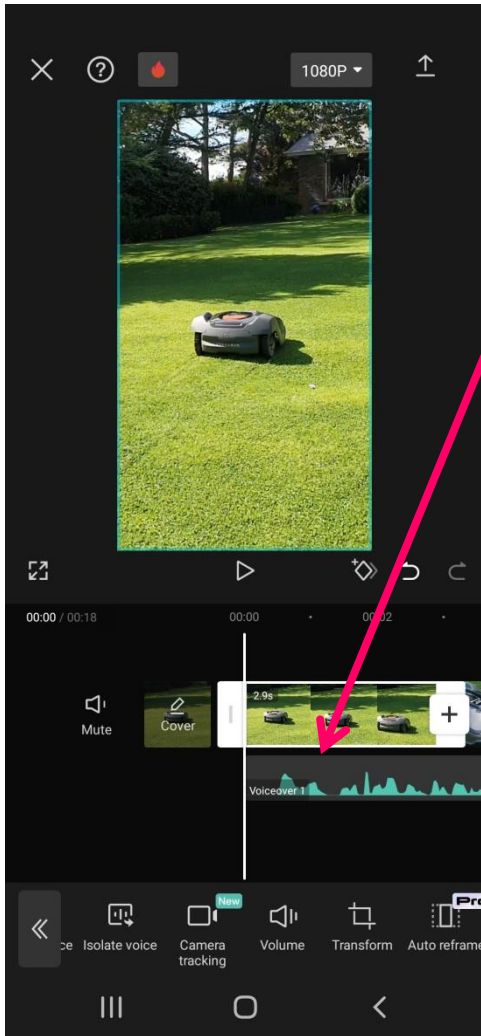

Tap on audio in the bottom menu

Then tap record

Then speak into the phone. (You will get a better result if you use a microphone)

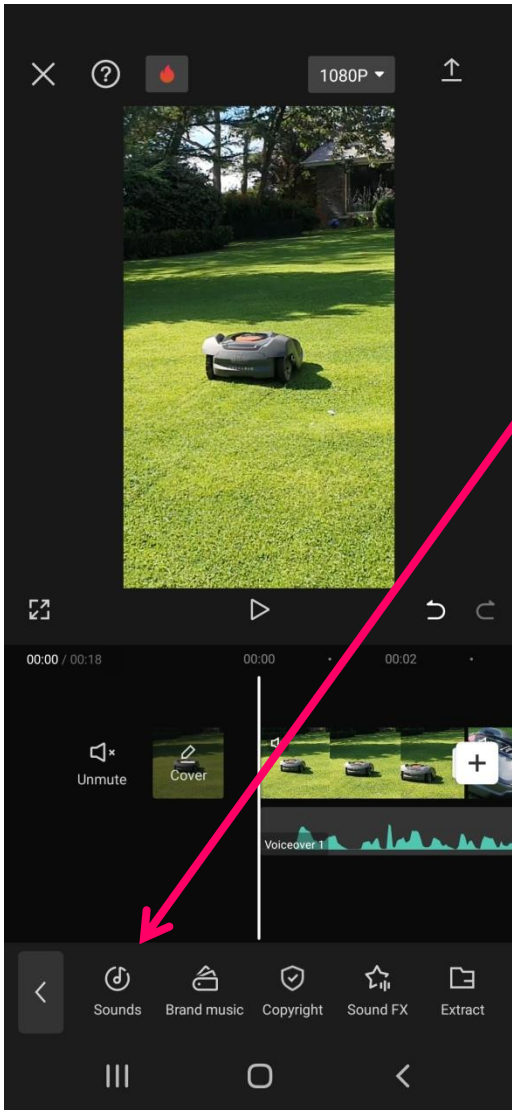

Demo 1 : How to edit a video (multiple clips plus voiceover)

To add a voice over

Your voiceover will now be added to the timeline below your video

Demo 1 : How to edit a video (multiple clips plus voiceover)

To add music

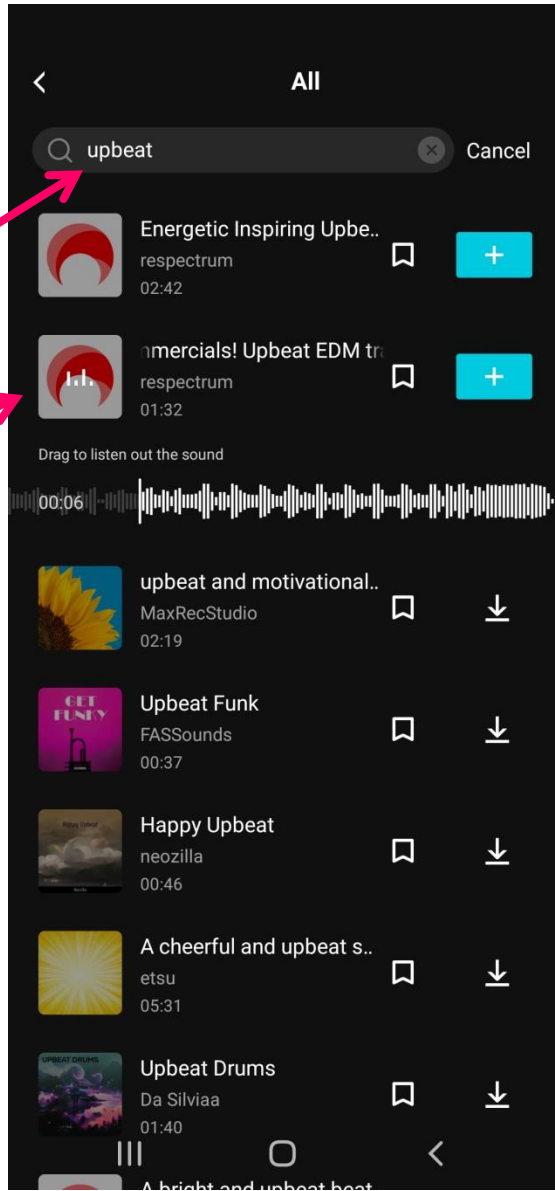

Just like adding a voiceover, tap on audio in the bottom menu

Then tap sounds

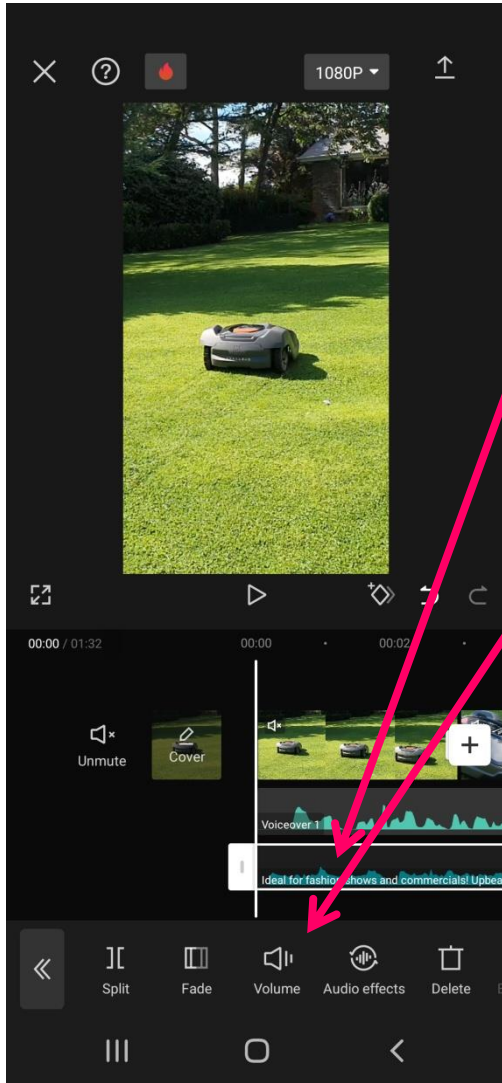

You can then search through their library of music

Tap on the music icon to listen to it

Tap on + to add it

Demo 1 : How to edit a video (multiple clips plus voiceover)

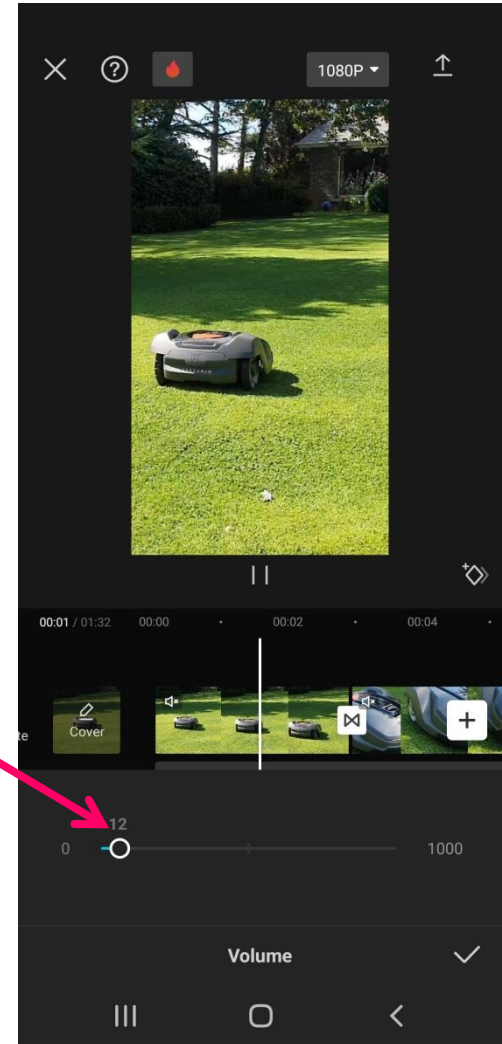

To add music

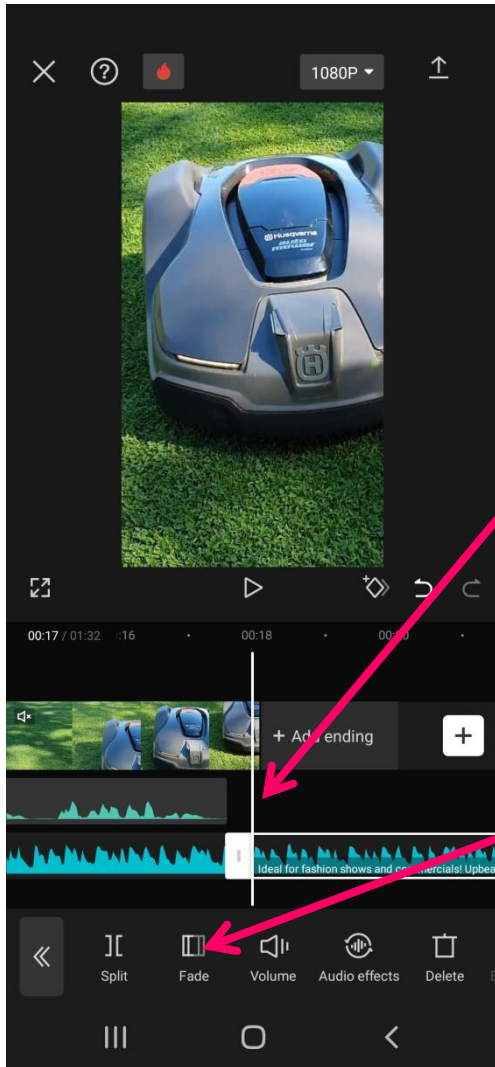

To adjust / reduce the volume of the music, tap on the music in the timeline

Then tap on volume

Then drag the slider to reduce the Volume

Demo 1 : How to edit a video (multiple clips plus voiceover)

To add music

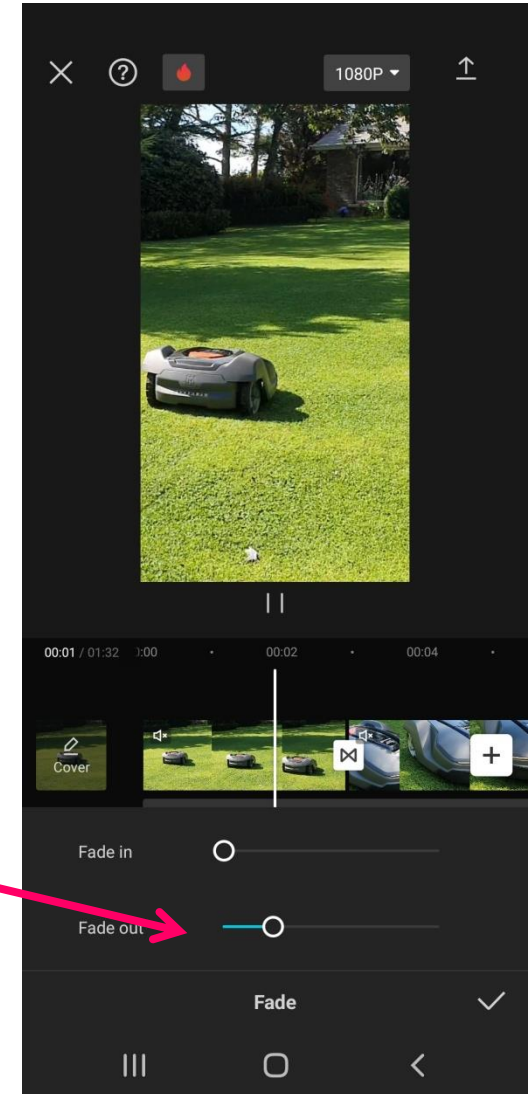

Slide to the end of your video and you will see that the music is longer than your video

Position the line at the point you want to cut the music

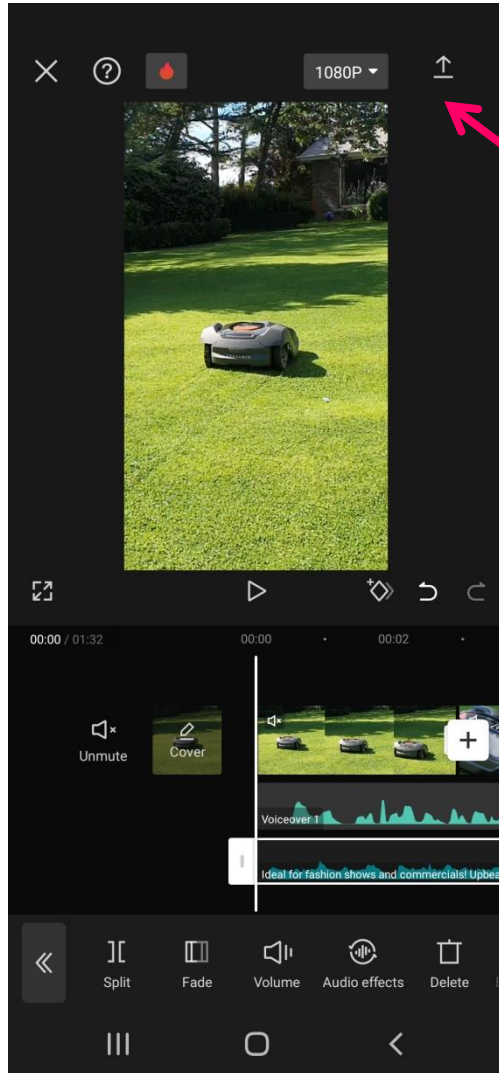

Then tap split and delete the part you don't want

You should now fade out the music

Tap fade and fade out for around 2.5 sec

Demo 1 : How to edit a video (multiple clips plus voiceover)

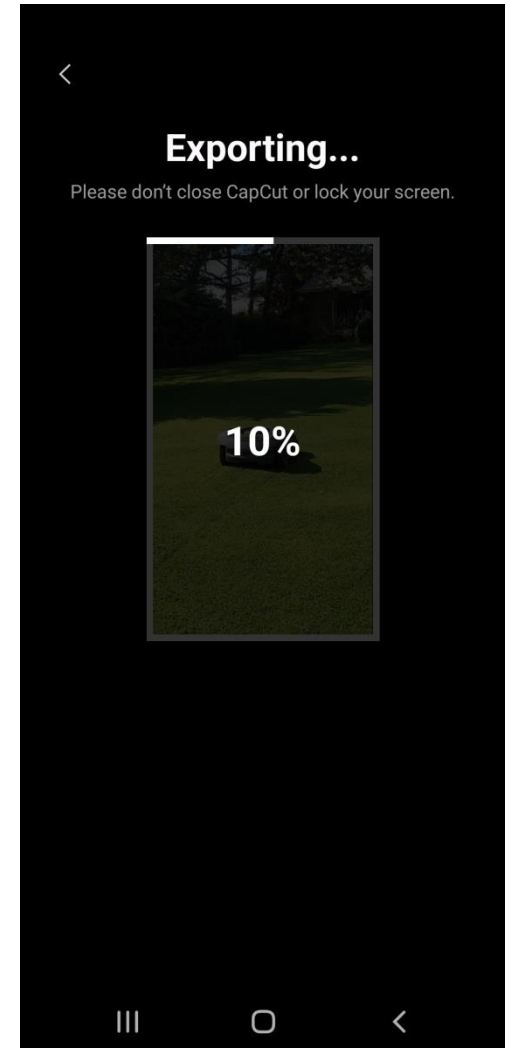

To export your video

Tap the arrow in the top right of the screen

Your video will export

It will be placed in your camera folder

Demo 1 : How to edit a video (multiple clips plus voiceover)

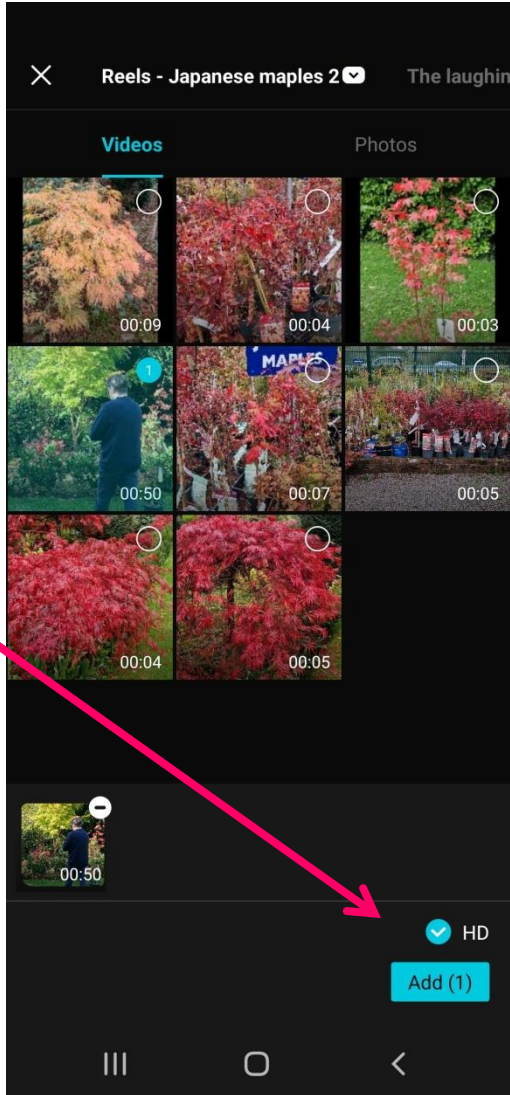

Demo 2: How to edit a video where someone is speaking to camera

Extra features that will improve your videos

Features you should try ...

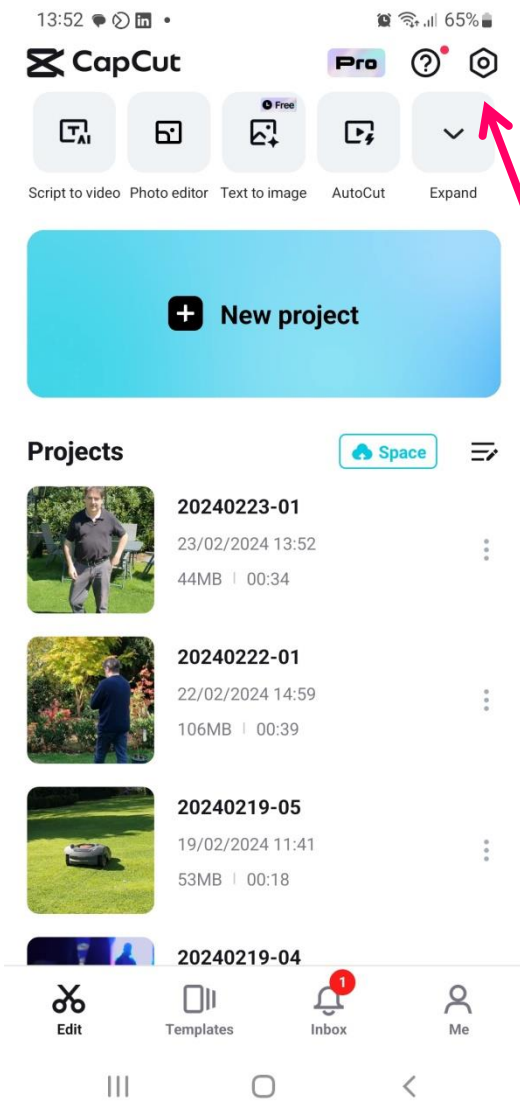

Very useful editing features to enhance your video

1. Permanently remove the CapCut logo
2. Add eye catching text using text templates
3. Add a sound effect when your text appears / disappears
4. Add captions using very eye catching effects
5. Add bilingual captions
6. Add transitions between clips
7. You can overlay their free stock videos as footage on your video
8. You can add some zoom using keyframes
9. You can remove the background of your video
10. You can retouch (improve the look) of the person speaking
11. You can add effects to the person speaking

Other very useful video creation features you should try

1. Try video templates
2. Try teleprompter
3. Brand Kit

Permanently remove the CapCut logo

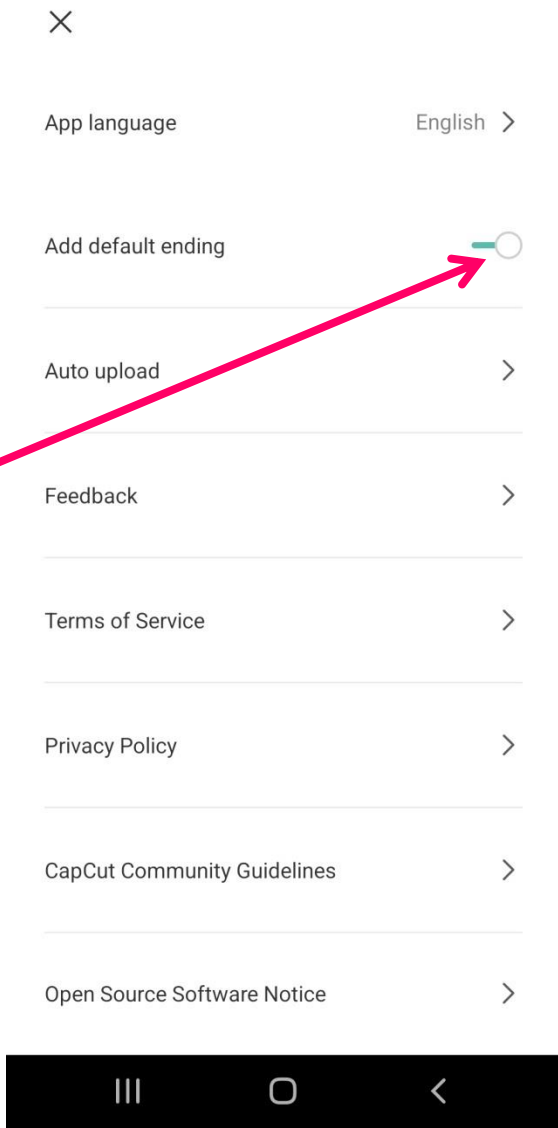

Whenever you create a video CapCut will place the CapCut logo at the end of your video

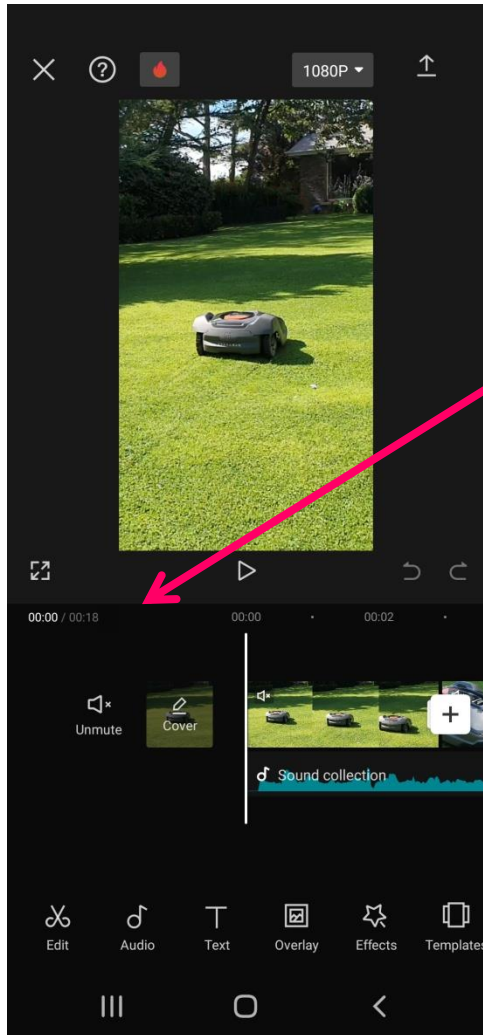

You can permanently turn this off so it won't add it for future videos

When you open the app, tap on settings icon top right

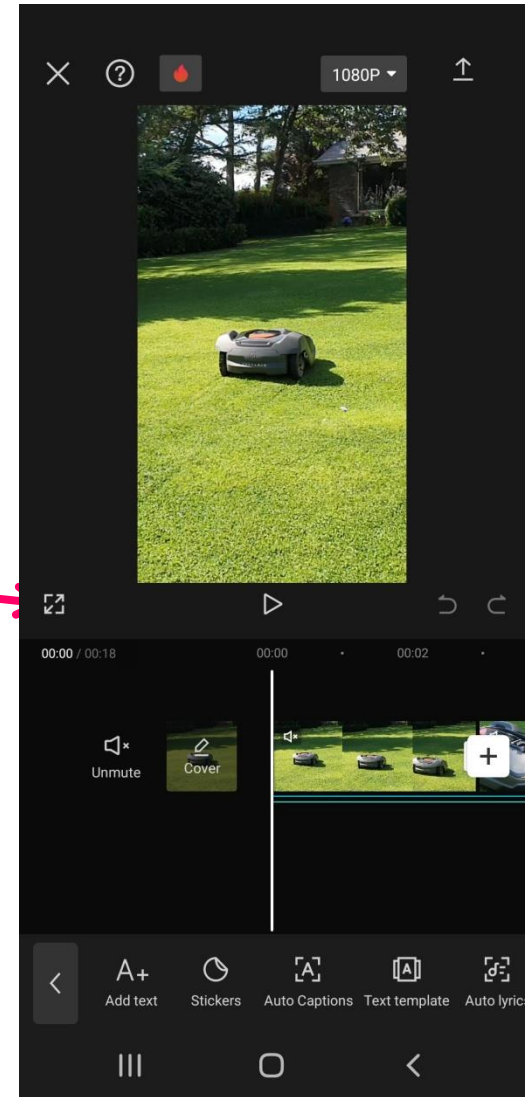

Next to Add default ending toggle to switch this off

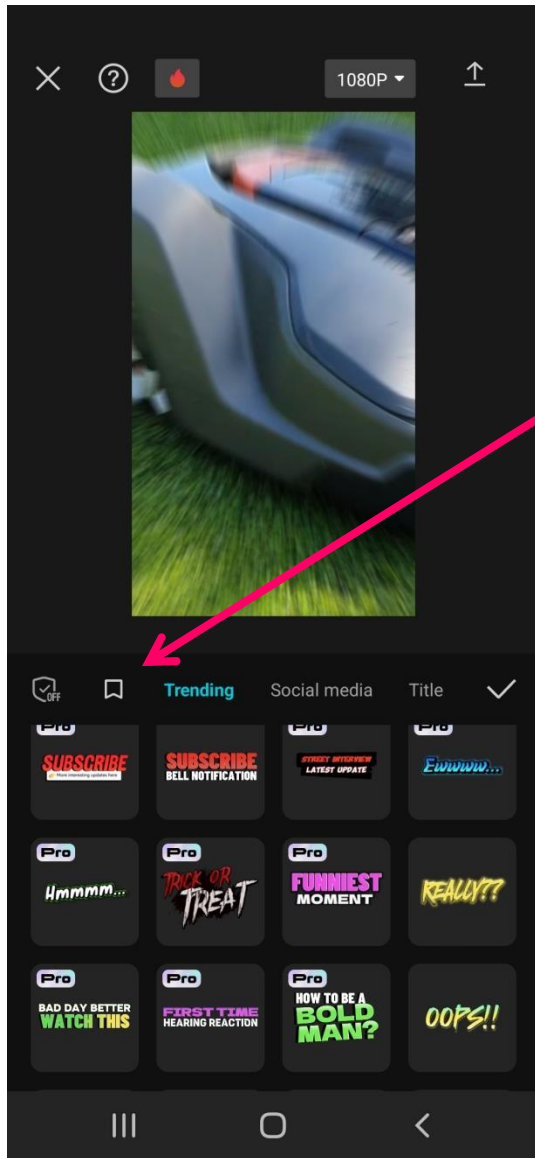

Add eye catching text using text templates

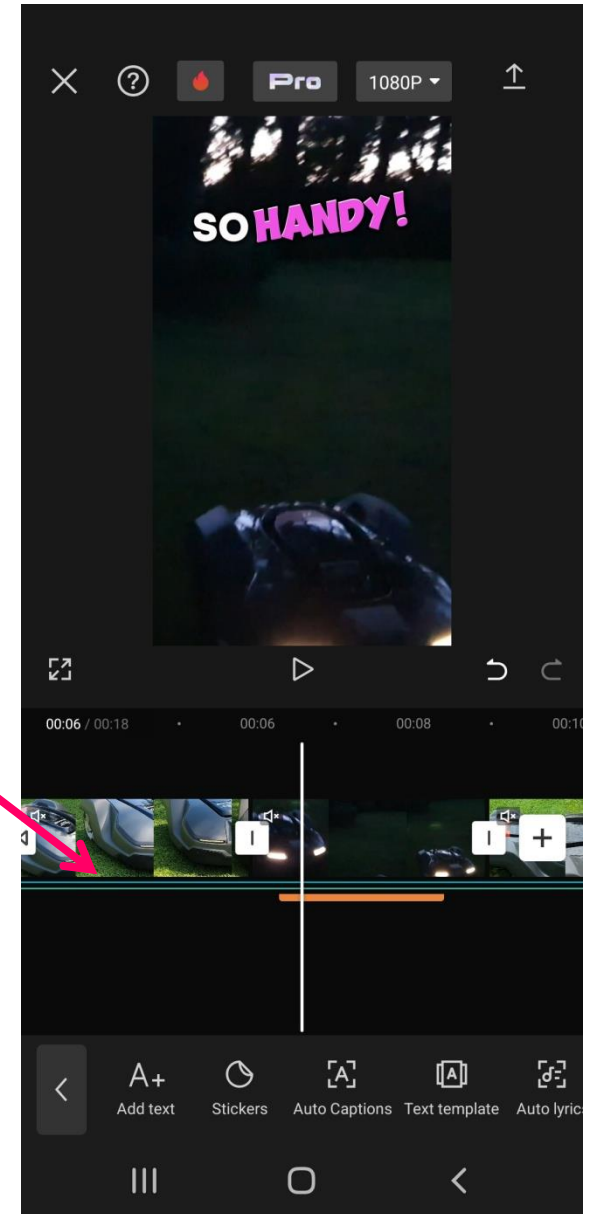

- Tap on Text in the bottom menu
- If you tap on Add text you can type your text, choose font, colour etc.
- But if you tap on Text templates, you can choose from lots of very eye catching text combinations

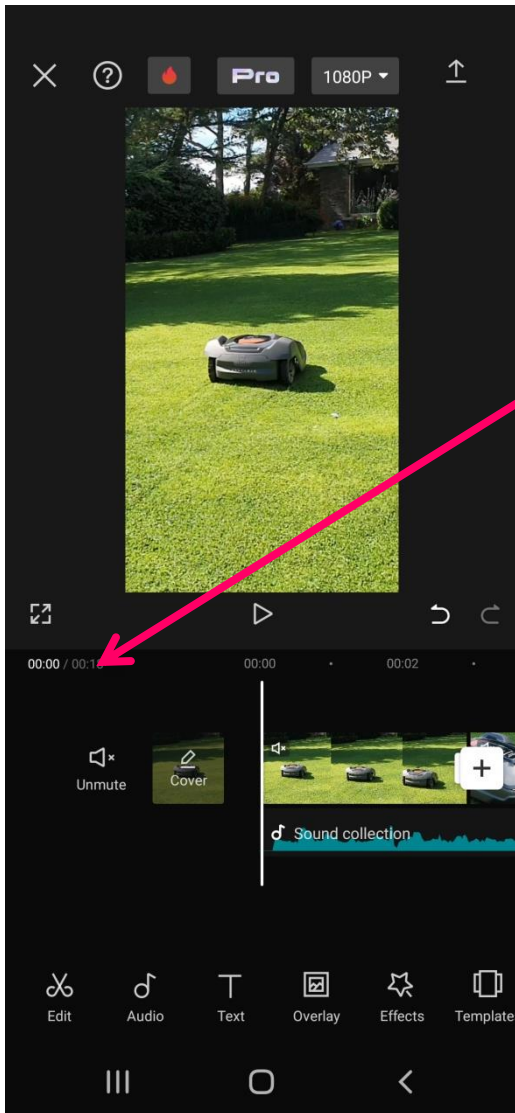

Add eye catching text using text templates

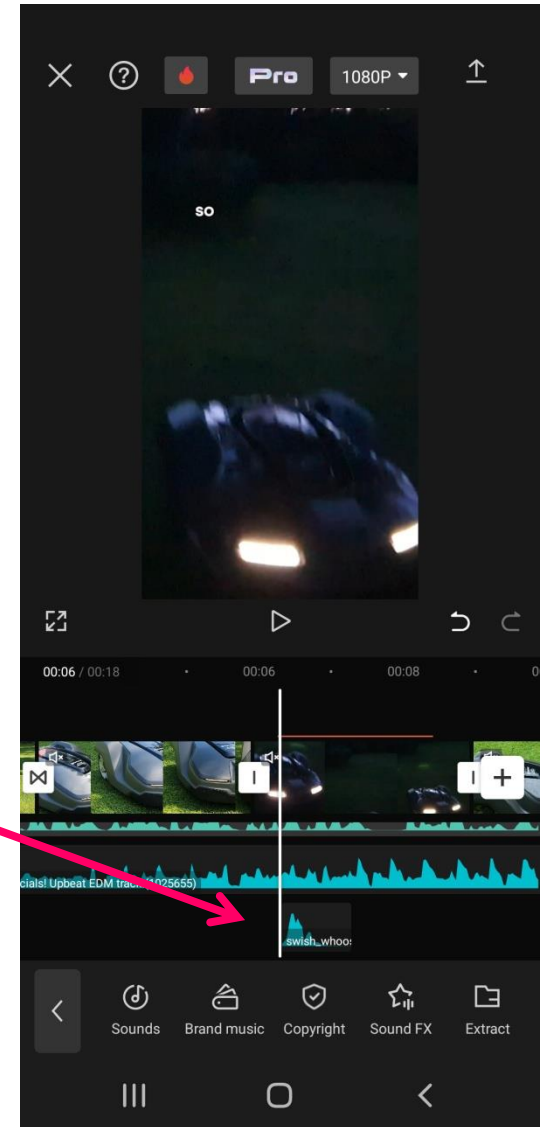

- They have different categories of templates – trending, social media etc
- Tap one and it will appear on your video
- Tap a word to then edit the text
- You can then choose where you want it to start and end on your video

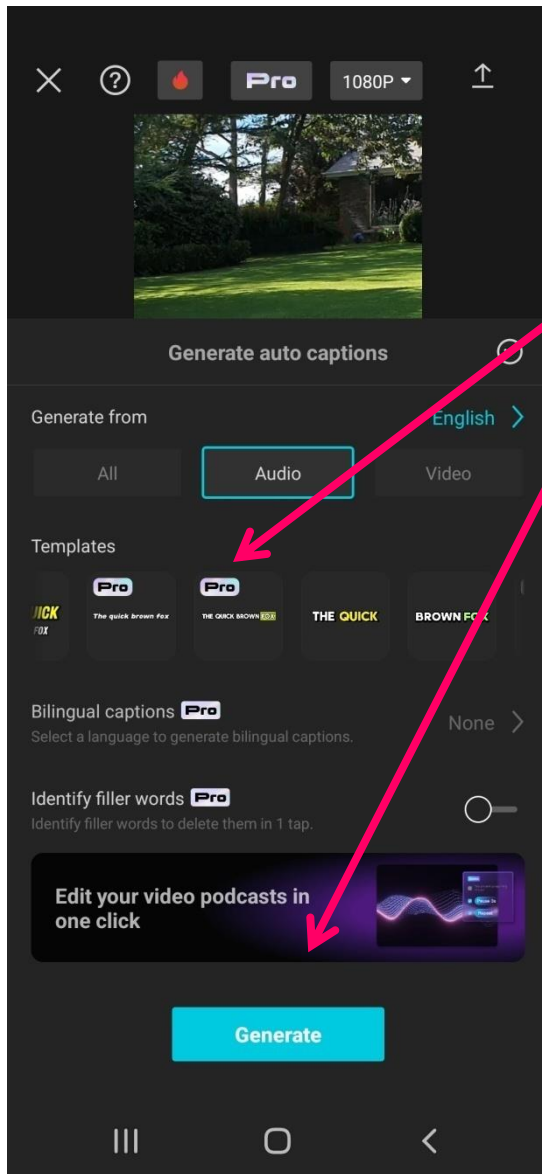

Add a sound effect when your text appears

- You could add sound effects. For example you could have a whoosh sound when your text appears on the screen
- Tap on Audio
- Search through sounds for whoosh
- Choose one and add to your video
- The sound will then be added to the timeline
- You can then position the sound on the timeline to line up with the text appearing

Add captions using very eye catching effects

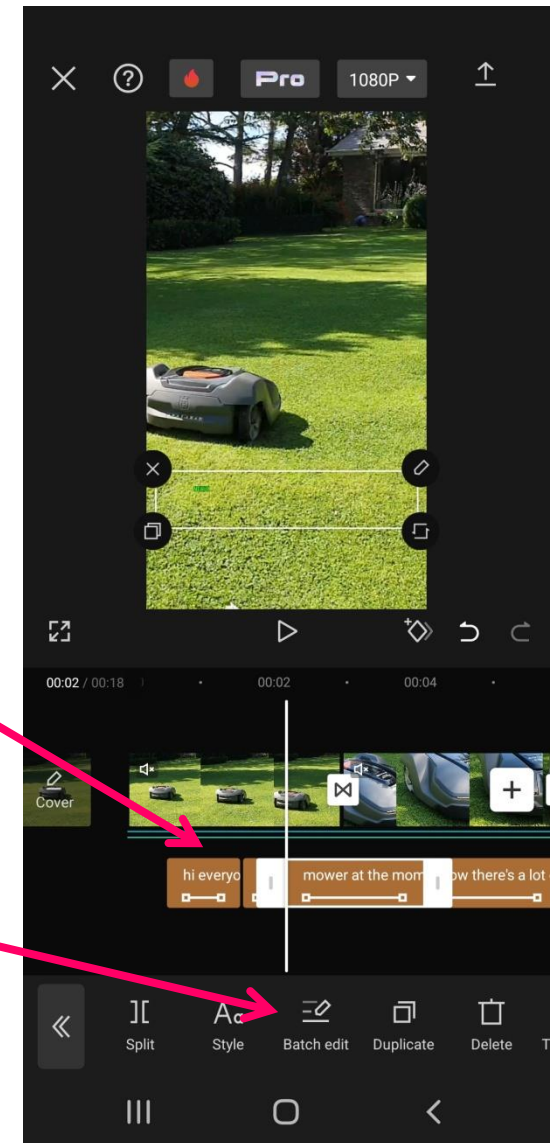

- Tap on text in the bottom menu
- Then tap on auto captions
- Then browse through the captions effects
- Then tap on generate

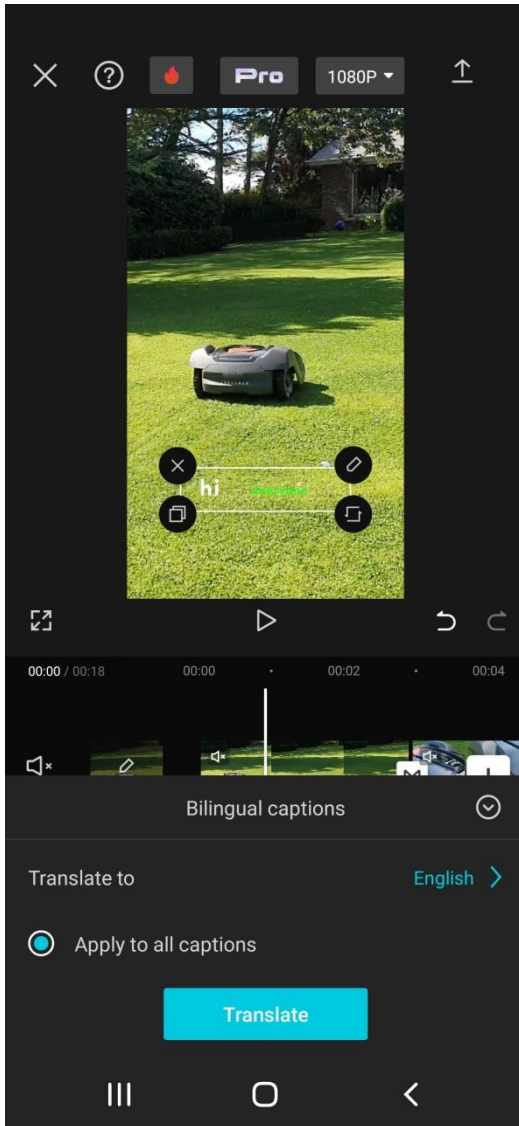

The captions will then appear on the timeline

Tap on any of the boxed and you can correct the text. You can also adjust the size, font, font colour

Tap on Batch edit and you can see all of the text boxes for easy editing

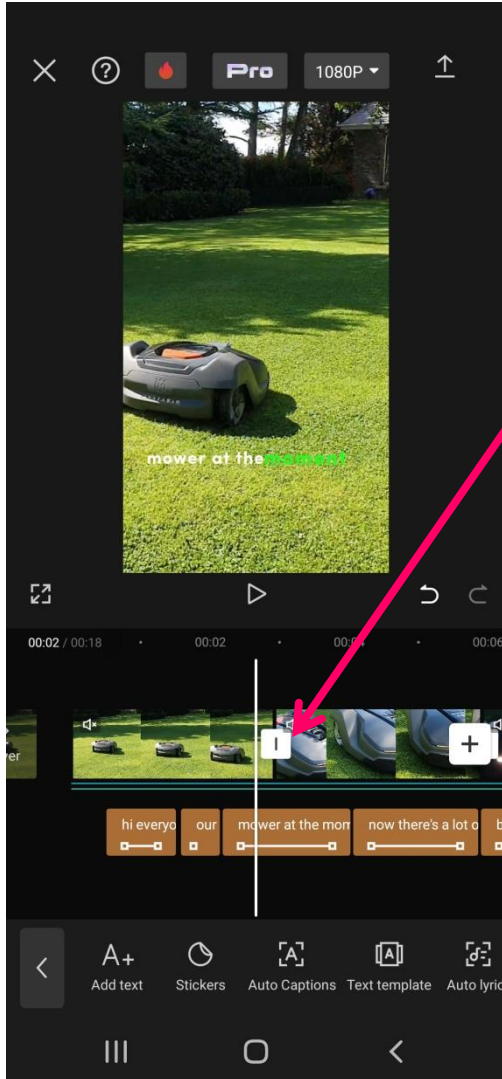

Add bilingual captions

- You can have a second set of captions appear in a different language
- Tap Bilingual captions
- Choose the language e.g. Spanish
- Tap generate
- The second set of captions will then appear below the first

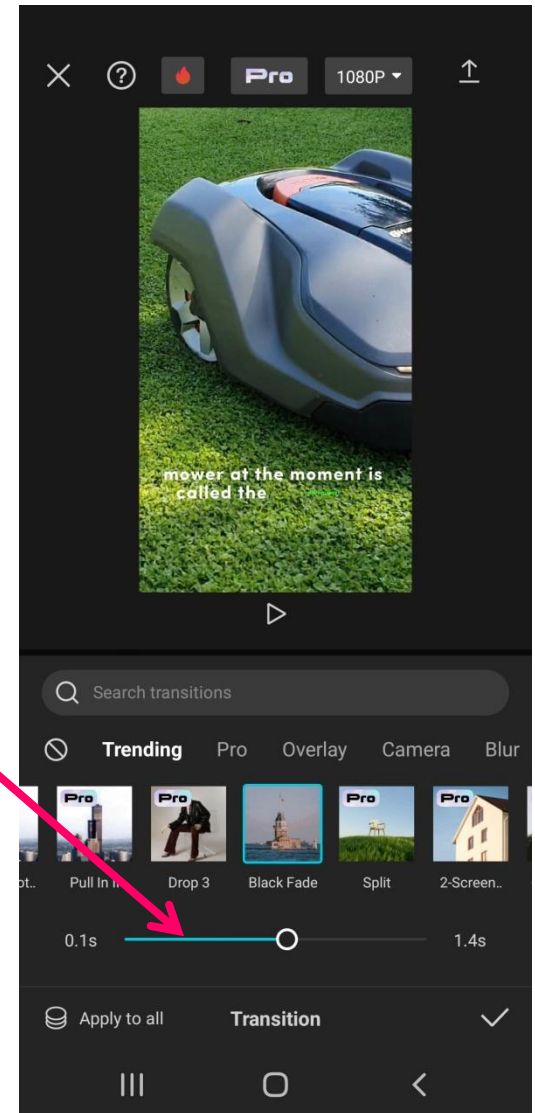

Add transitions between clips

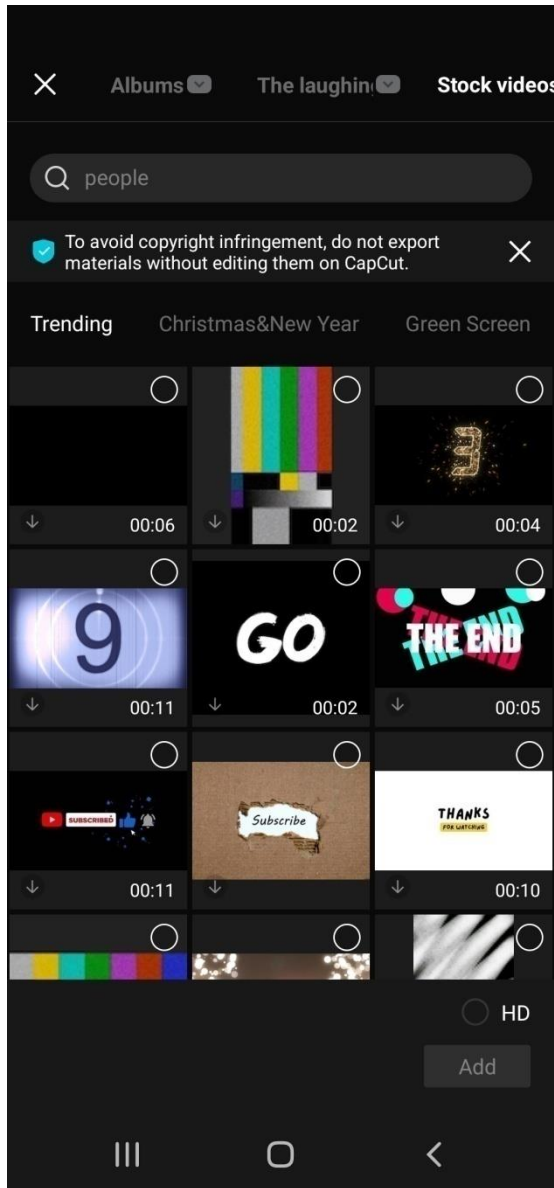

- You can add transition effects between 2 videos
- Tap the line in between the clips

Then choose a transition effect. You will see a preview of how it looks

- You can also adjust the time length to make the effect last longer or shorter
- You can apply to all clips is you want.

You can overlay their free stock videos as footage on your video

To overlay stock videos on top of your video tap on overlay in the bottom menu

On the top right tap stock videos

You can then search for the type of video you want

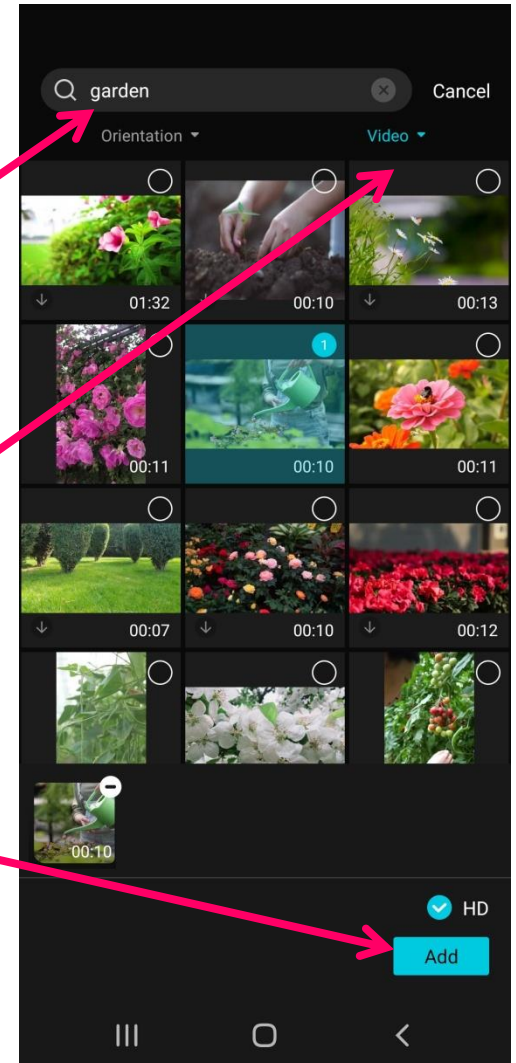

You can also choose whether you want videos or images to do with that topic

Select your video

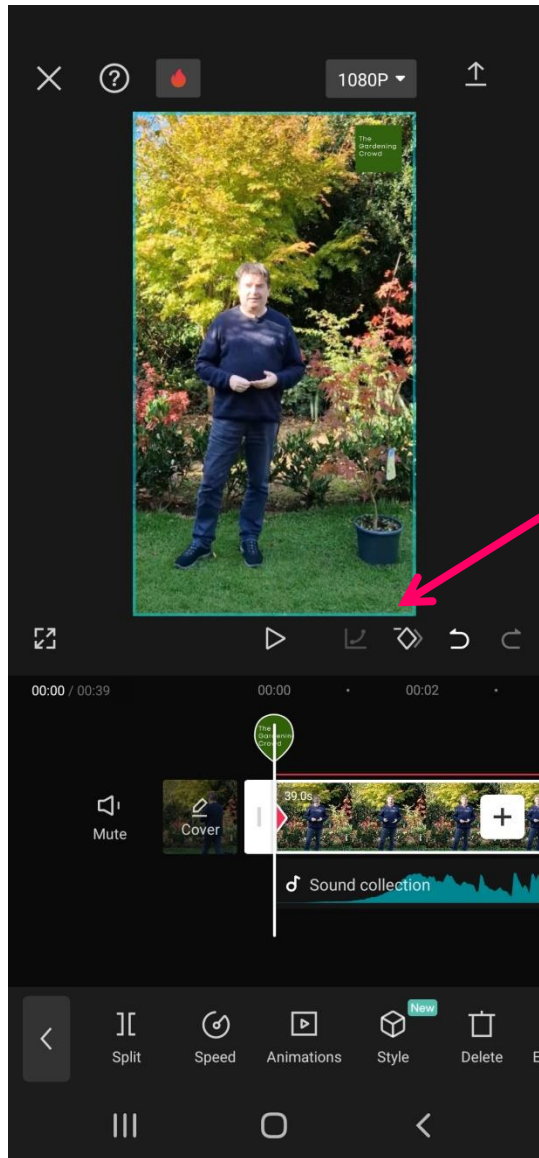

Tap HD

Then add

Then pinch to make your video fill the screen as per previous lesson

You can add some zoom using keyframes

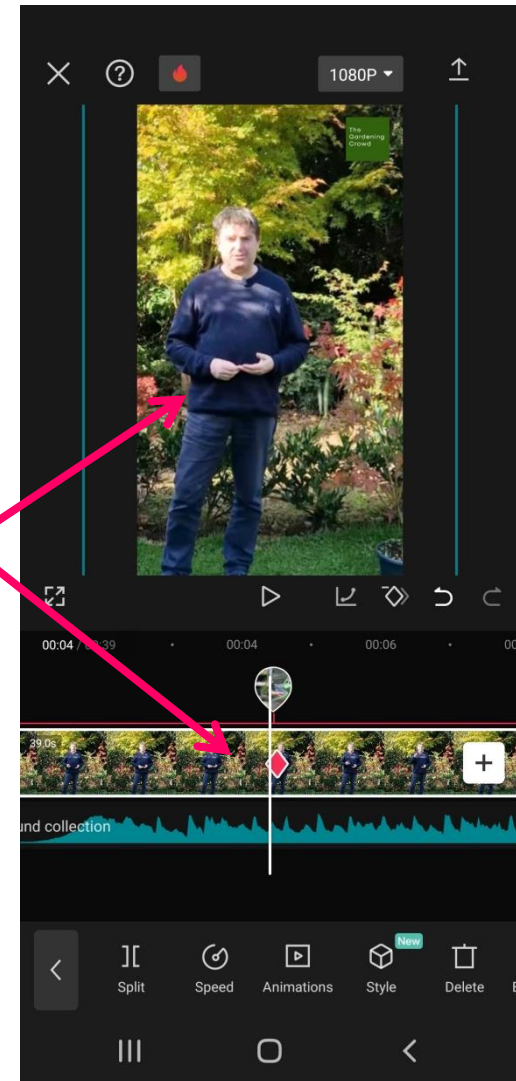

To add zoom you can use Keyframes

Stop at the point where you would like to start some zoom. Tap on the diamond icon to drop a keyframe

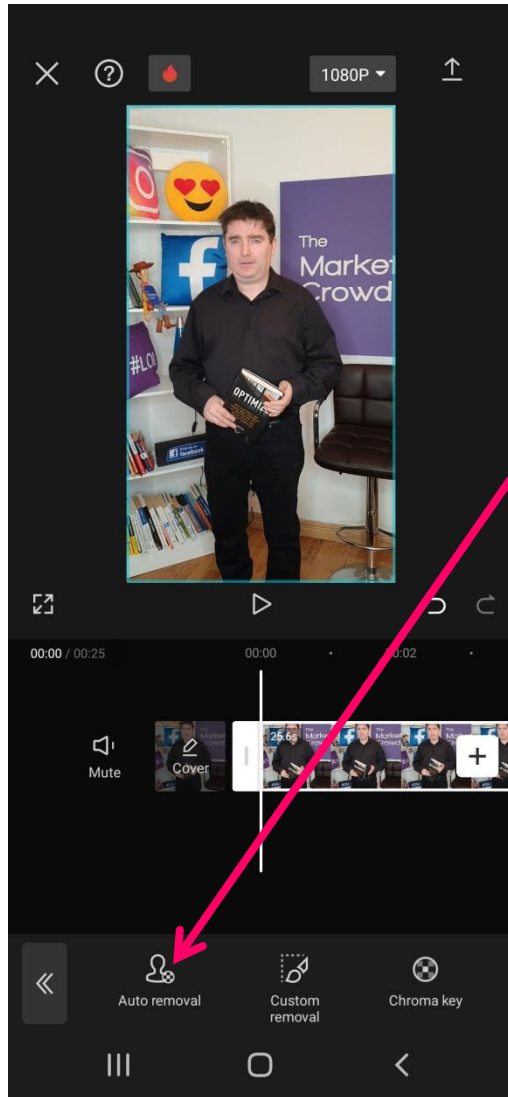

Then go to the point where you would like the zoom to stop. Add another keyframe and then split your clip.

With 2 fingers pinch the video to zoom in at the point where you want maximum zoom

Now when you play the clip it will gently zoom in between keyframe 1 and keyframe 2

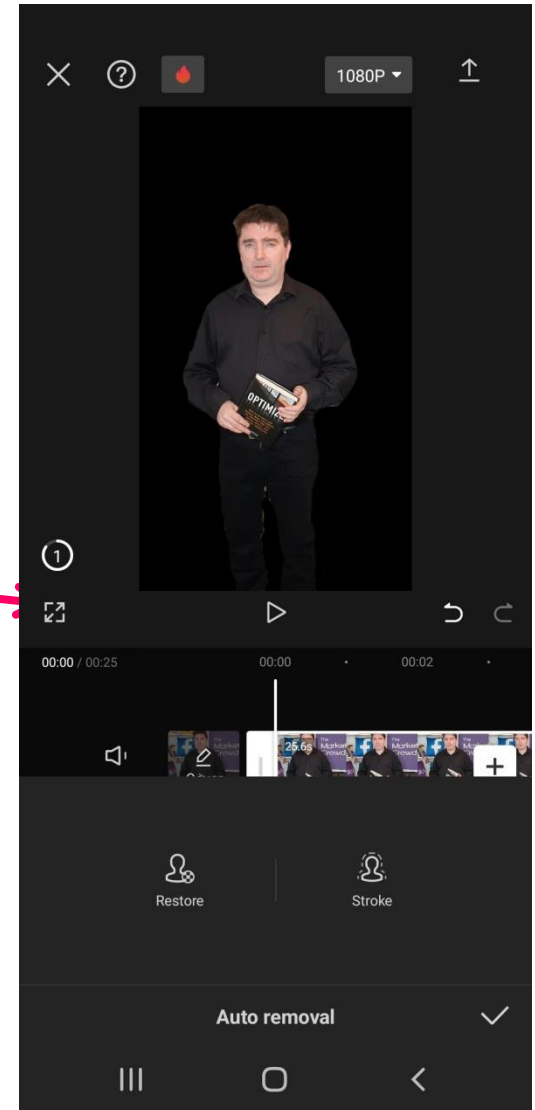

You can remove the background of your video

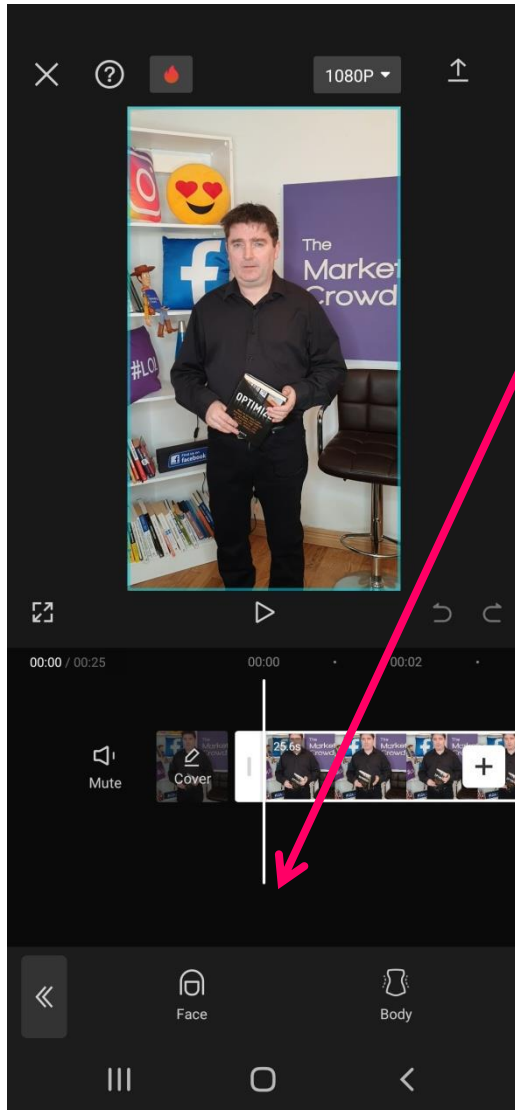

- Tap on your clip in the timeline
- In the bottom menu tap on remove BG
- Then tap auto removal

The background is now removed

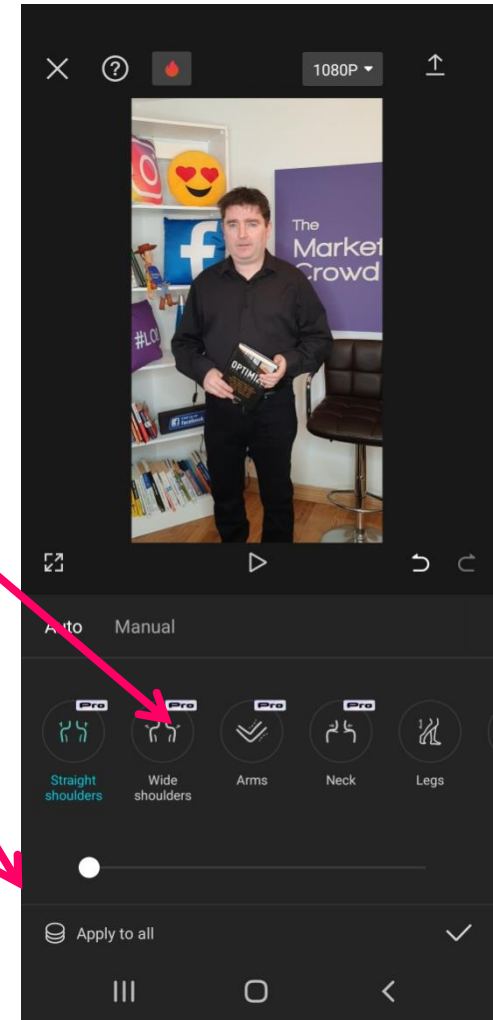

Try doing this when you overlay a video of someone speaking on top of another video or image. The background for the person will not be the main video or image

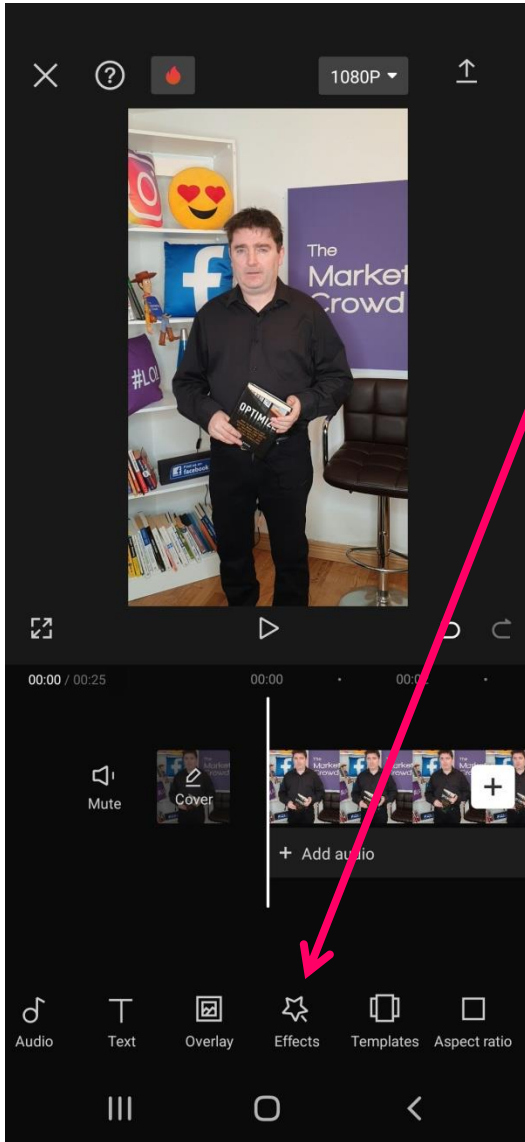

You can retouch (improve the look) of the person speaking

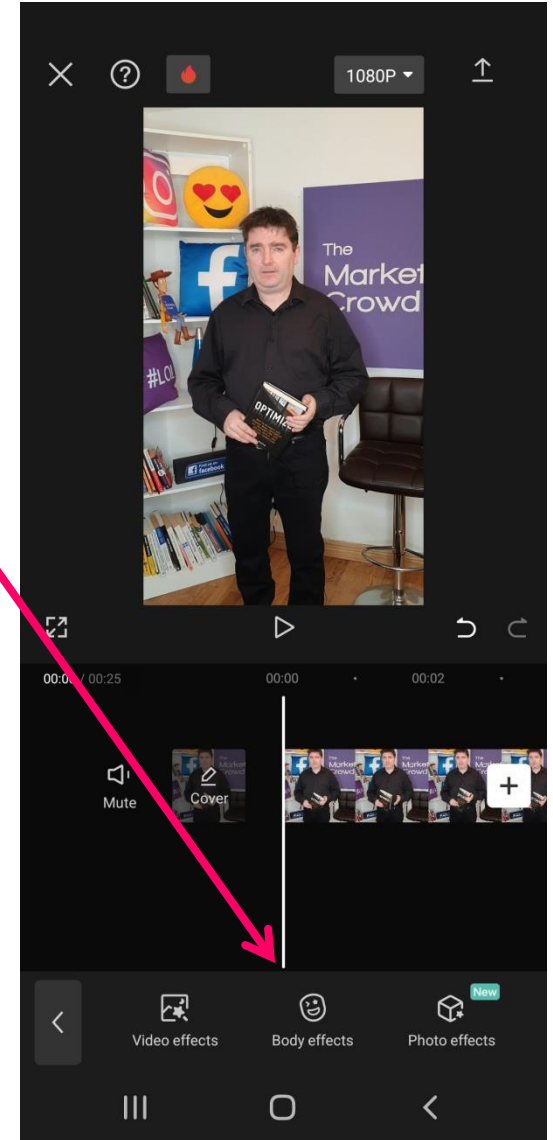

- Tap on a clip on the timeline
- Then tap on retouch
- Then decide if you want to retouch the persons face or body
- When you choose face or body then brose through the various retouching you can do
- When you find one you like you then apply to all clips

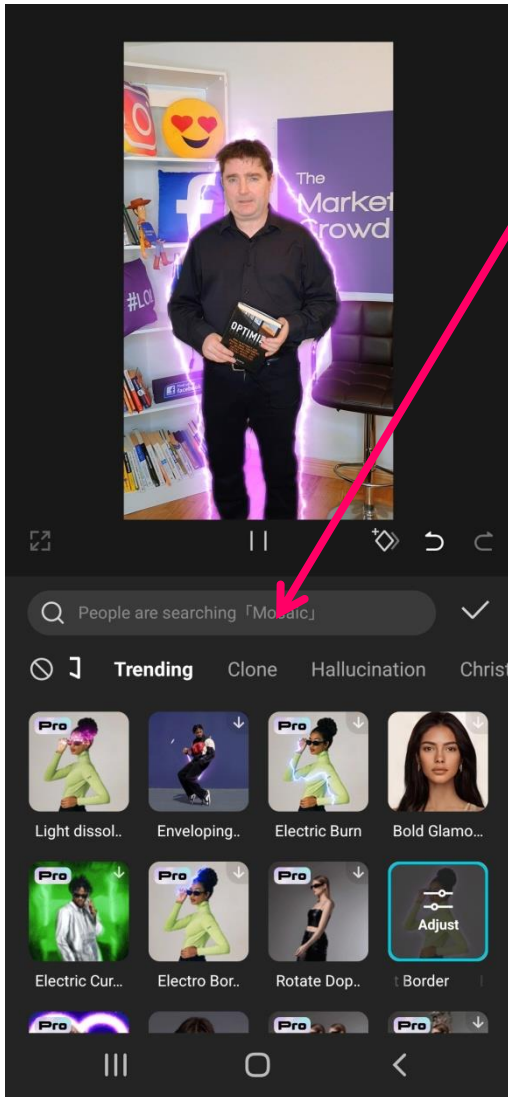

You can add effects to the person speaking

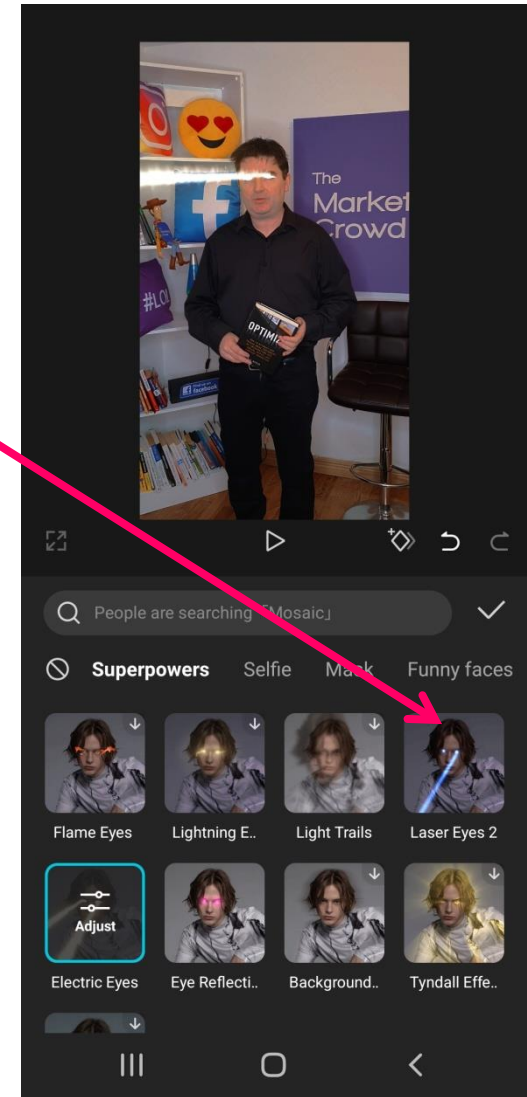

- In the bottom menu tap on effects
- Then tap body effects

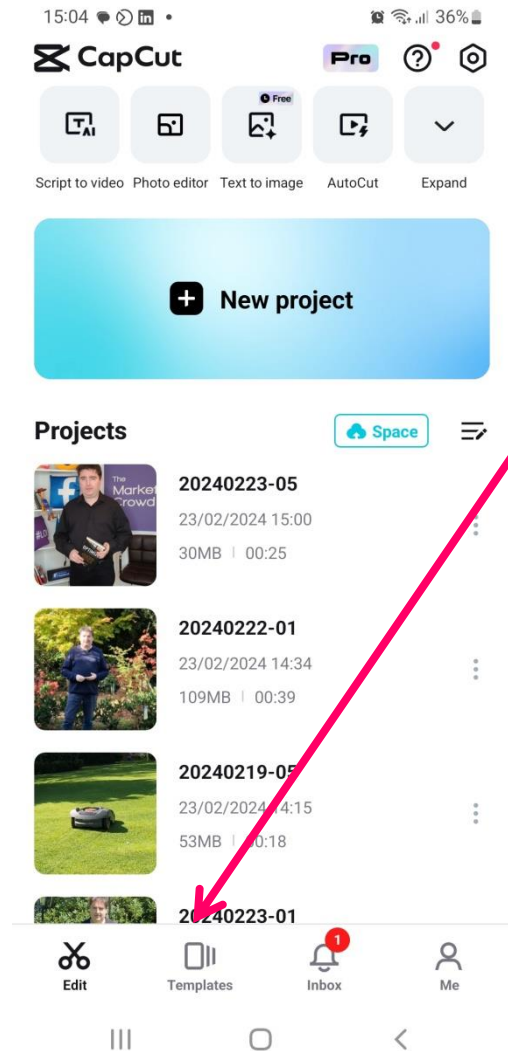

You can add effects to the person speaking

- Browse through the various categories of effects
- Tap an effect and it will preview it

Try video templates

There are lots of video templates you can try

In the main screen when you open the app tap on templates in the bottom menu

Browse through the different categories.

Tap on a template to view it

Tap use template in order to select your files which will then be added to the template
