What are Large Learning Models? (LLMs)

Large Language Models are like super-smart computers that try to understand and talk like humans.

Super-Smart Computer Robots: Think of them as a computer program that's really good at using words, reading stories, and even writing like a person does.

Built Like a Brain: Inside, they are built using something called neural networks. This is a fancy way of saying they're designed like a human brain, using connections called "artificial neurons."

Learning from Everything: They learn by consuming tons of stuff like books, websites, and even what people are saying online. The more they read, the smarter they get.

Image LLMs are fed billions of images. Video LLM are fed billions of videos

Practice Makes Perfect: Just like you might practice a sport to get better, these computer programs keep learning and practicing with more and more information. They keep getting better at understanding and using content the more they practice.

What is Generative AI?

Generative AI refers to a type of artificial intelligence that has the ability to **generate** new data that is similar to the data it was trained on.

It can create original content, such as images, text, audio, or even videos, without direct human input.

Generative AI uses advanced algorithms, typically based on deep learning models to understand patterns and relationships in the training data.

During the training process, the model learns to generate new data that resembles the examples it has seen. For example, if it was trained on a dataset of cat images, it could produce new images of cats that look similar to real cats.

One of the fascinating aspects of generative AI is its ability to create content that didn't exist before. It can be used in various creative applications, like generating artwork, music, or even writing stories.

Many of the tools in this course are both an LLM and generative AI

Chat GPT, Dalle, Midjourney and other tools we will cover falls under the category of both a large learning model and generative AI, combining its extensive language, image or videos understanding with the ability to generate content

Midjourney

Midjourney is the best image generation tool but it is also the most un user friendly.

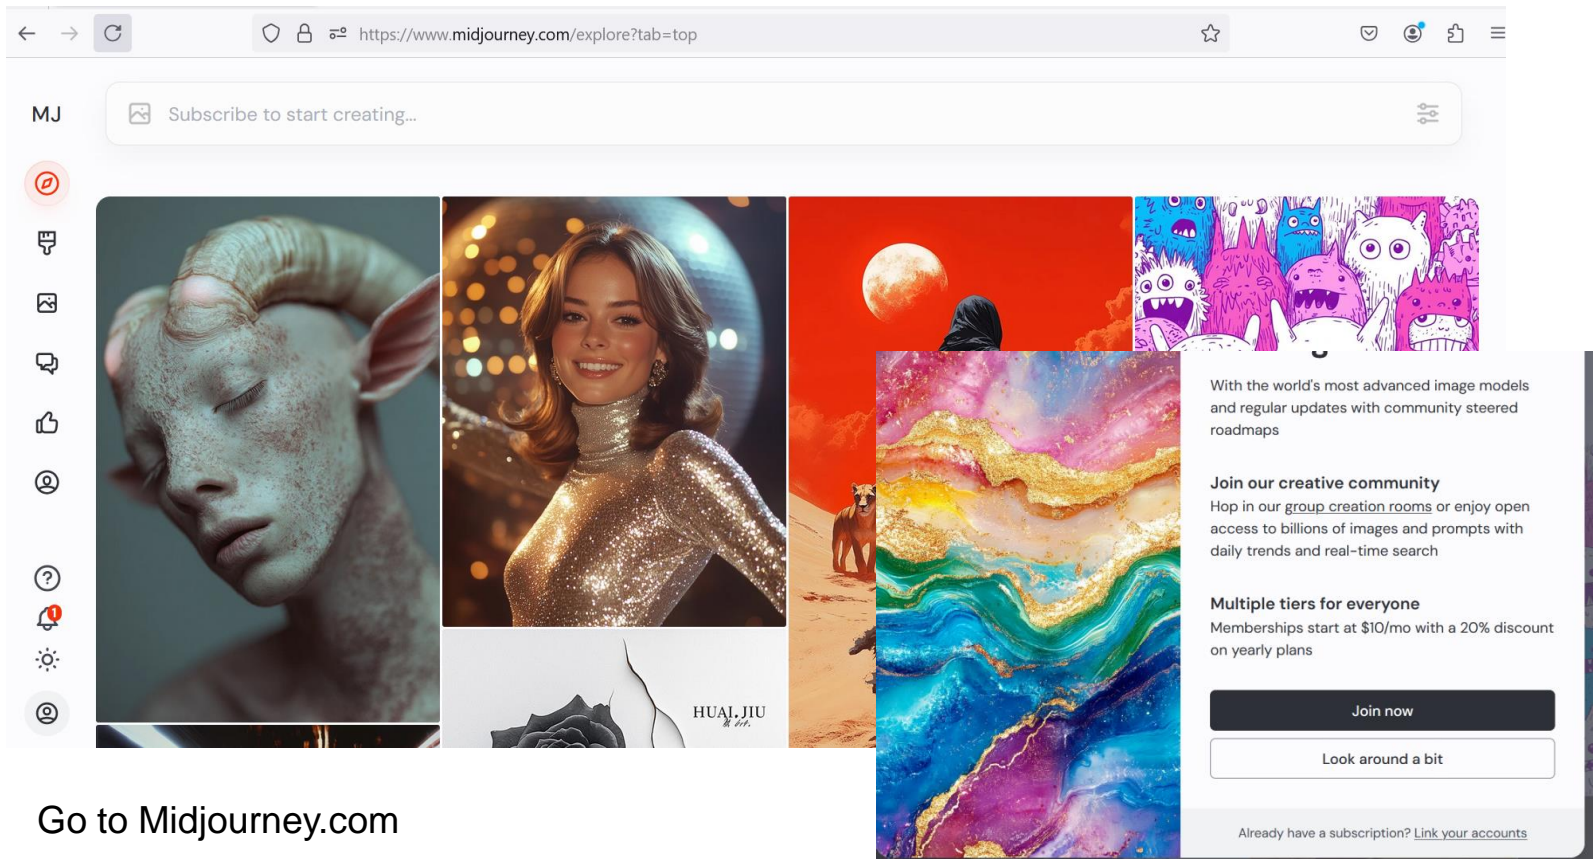

1.. It is not free to use. The cheapest plan is \$12 a month

2. It is complicated to use – you need to have a discord account and create your images on a discord server.

Faked images of Donal trump and the pope circulated widely on social media last year. These were created using Midjourney

How to use Midjourney

1. Go to Midjourney.com

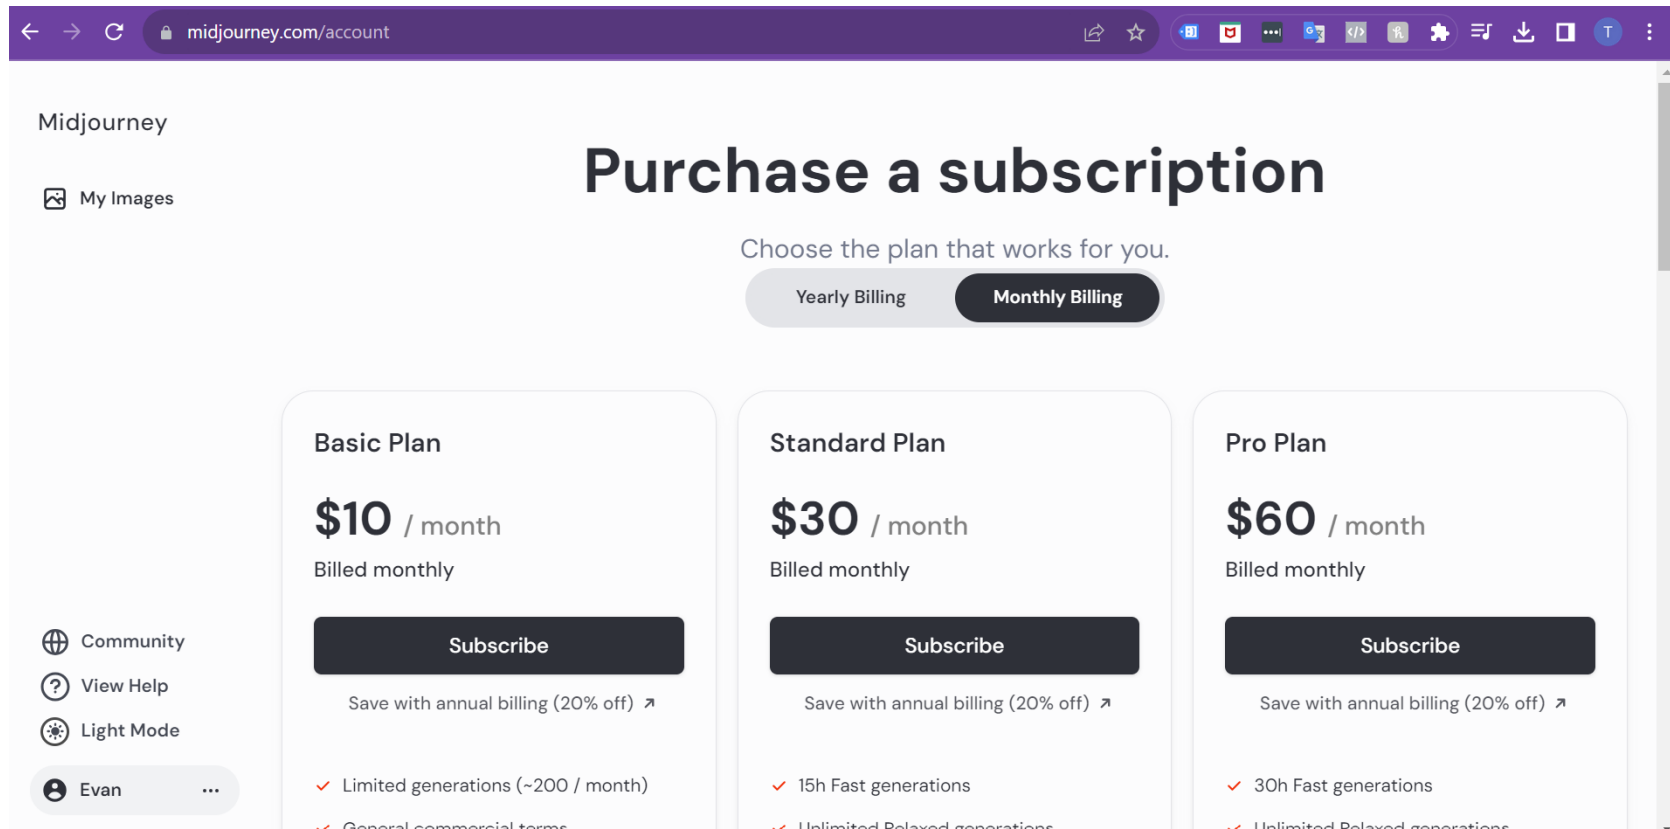

You cannot create images for free. You need to sign up for a paid account

How to use Midjourney

1. Go to [Midjourney.com](https://midjourney.com)

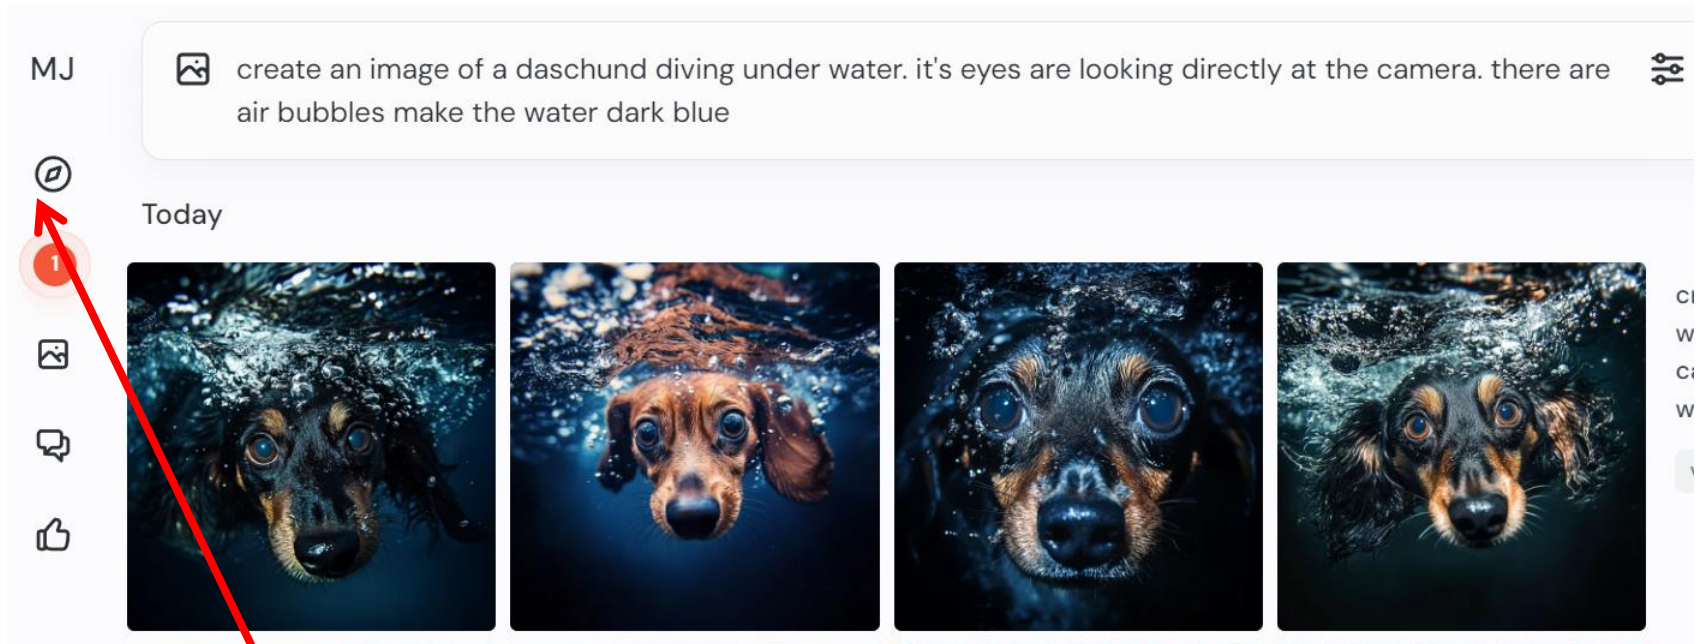

You cannot create images for free. You need to sign up for a paid account

How to use Midjourney

6. You now have to choose a payment plan in order to use Midjourney

How to use Midjourney

On the left hand menu click create

Then type in your prompt and it will generate 4 options for you

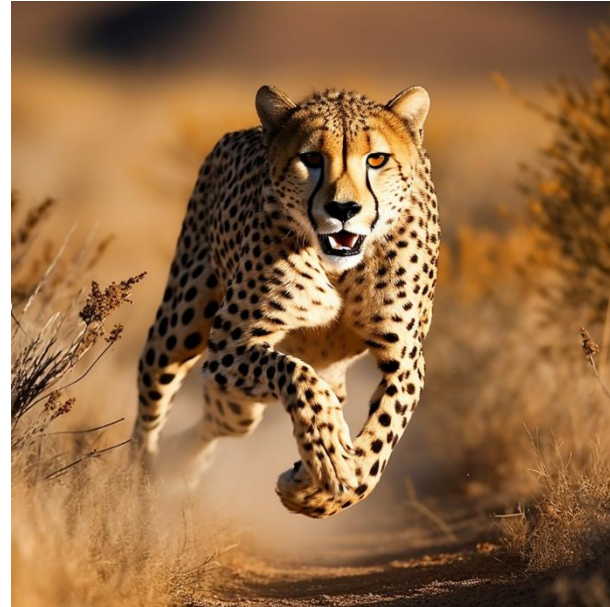

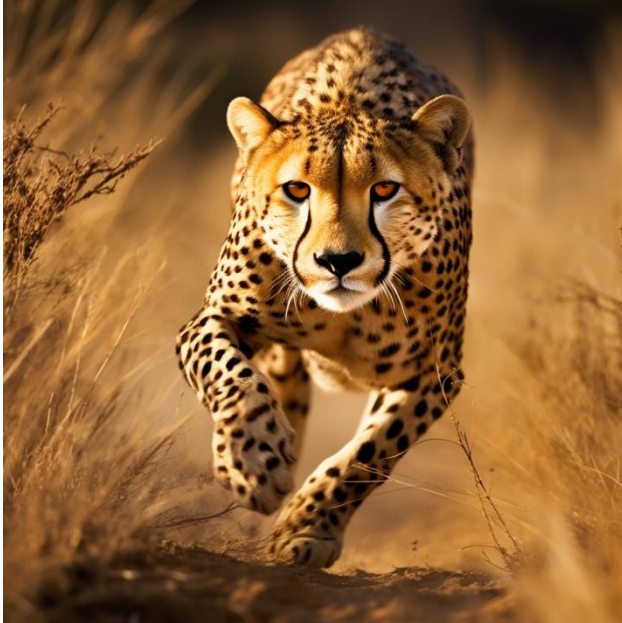

What Midjourney produced for an easy request

A Blue Ceramic Vase with Yellow Tulips

Create an image of a beautifully crafted blue ceramic vase, standing tall and elegant on a smooth, reflective surface. There are yellow tulips in the vase

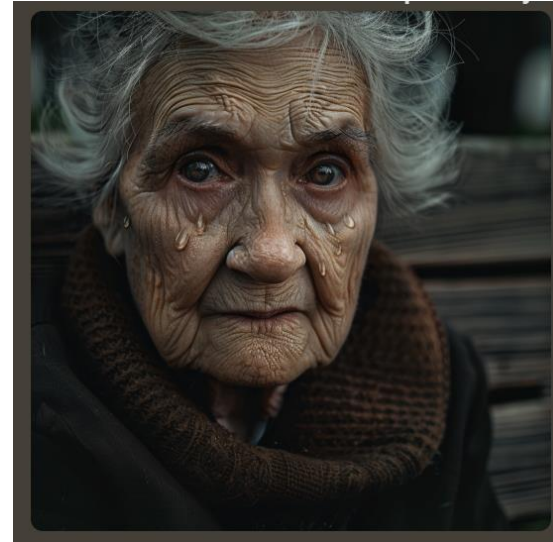

What Midjourney produced for a difficult detailed request

A Cheetah Running Through a Savannah

Envision a scene of a majestic cheetah in full sprint across the vast expanse of the African savannah

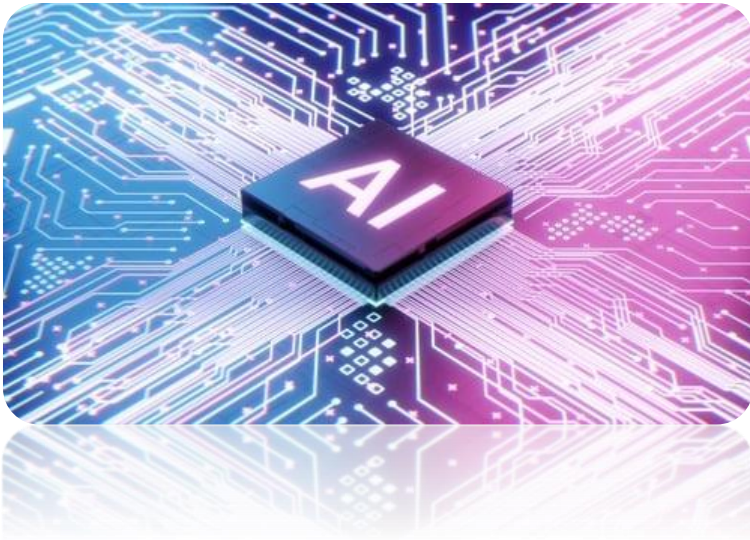

What Midjourney produced for a difficult detailed request

A sad old woman

Create a photo realistic image of an old woman aged around 80

How can text to image creation impact your digital marketing?

Currently when you are looking for stock images for your website, social media posts or as footage in your videos you would go to Pixabay.com or the image library in Canva

1. As these tools become more common and powerful you can easily have image created that perfectly matches what you are trying to convey
2. In 2024 image creation tools will be incorporated directly into Facebook and Instagram so as you are about to create a post you can customise your own images (Meta announced they are working in this

Deep nostalgia - Turn an old photo into a video

The logo for DALL-E 3 is displayed on a black rounded rectangle. The text "DALL-E 3" is in a large, white, bold, sans-serif font. Below it is the OpenAI logo, which consists of a green circular icon with a white knot-like design inside, followed by the text "Open AI" in a white, sans-serif font. The entire logo is reflected below the black rectangle on a light gray gradient background.

DALL-E 3

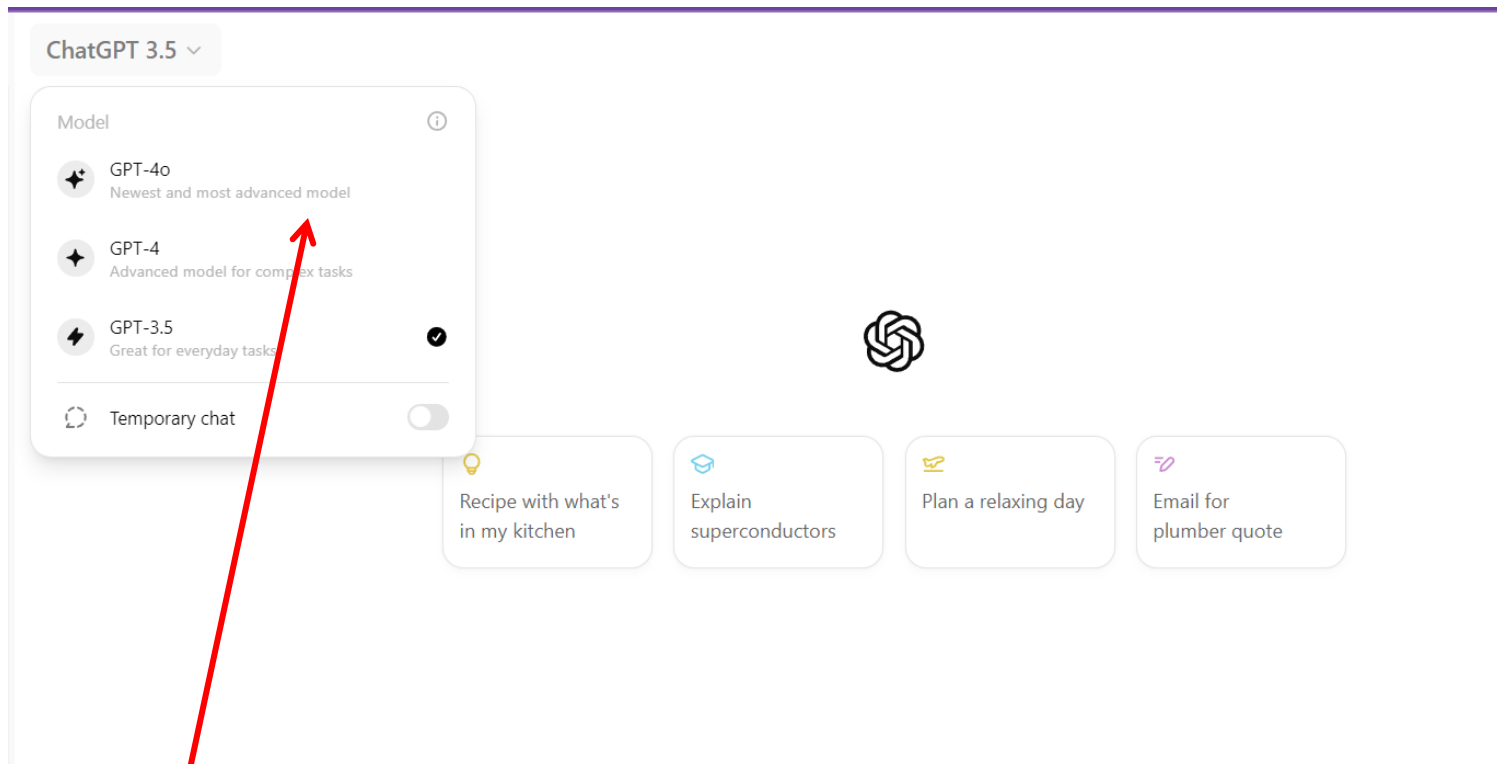

Dalle is the image generator from Open AI, the same company that created Chat GPT

Dalle 3 is the latest and best version.

There are a variety of ways you can use Dalle, some are paid and some are free

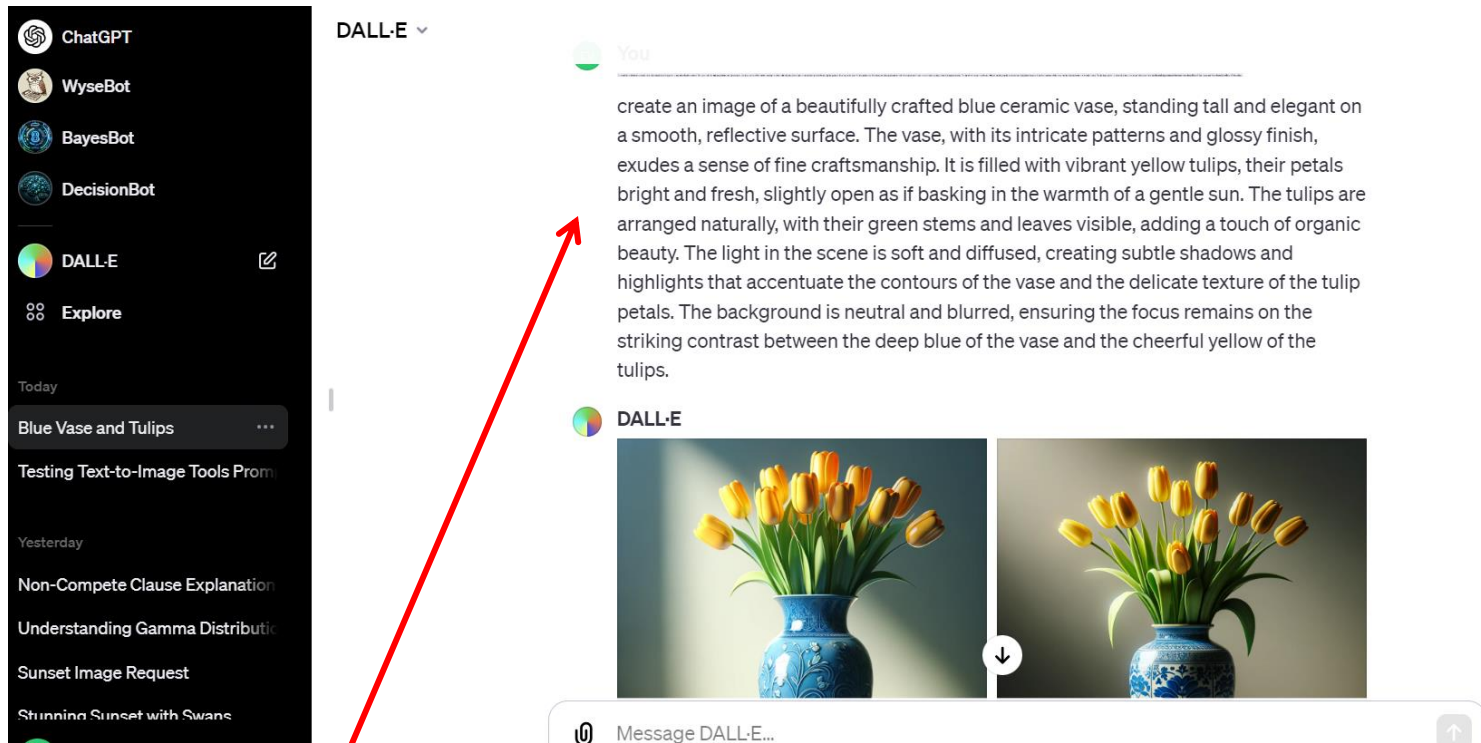

Dalle within Chat GPT 4 and 4o

If you have the free version of Chat GPT you cannot create images using 4

However, you can get a limited number of image creations / hour using chat GPT 4o

Dalle within Chat GPT 4 and 4o

Write your prompt

It will then give you image options.

What Dalle within Chat GPT produced for an easy request

A Blue Ceramic Vase with Yellow Tulips

When I simply asked for an image with a blue ceramic vase with yellow tulips this is what was produced.

What Dalle within Chat GPT produced for an easy request

A Blue Ceramic Vase with Yellow Tulips

Create a photo realistic image of a beautifully crafted blue ceramic vase, standing tall and elegant on a smooth, reflective surface.

What Dalle within Chat GPT produced for a difficult detailed request

A Cheetah Running Through a Savannah

Create a photo realistic image of a majestic cheetah in full sprint across the vast expanse of the African savannah. habitat

I think these more complicated images are good but not as photo realistic as Midjourney

What Dalle within Chat GPT4 produced for a difficult detailed request

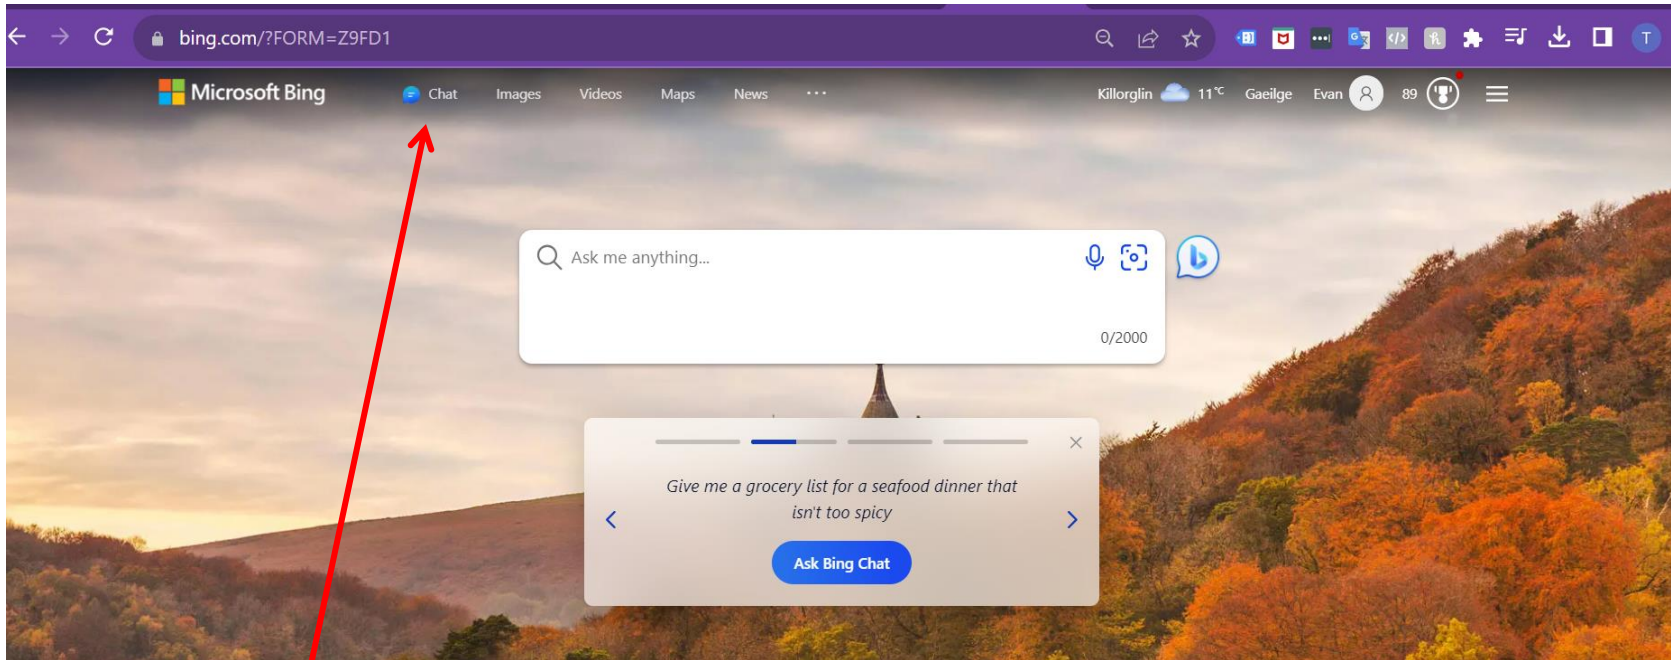

A sad old woman

Create a photo realistic image of an old woman aged around 80.

I think these more complicated images are good but not as photo realistic as Midjourney

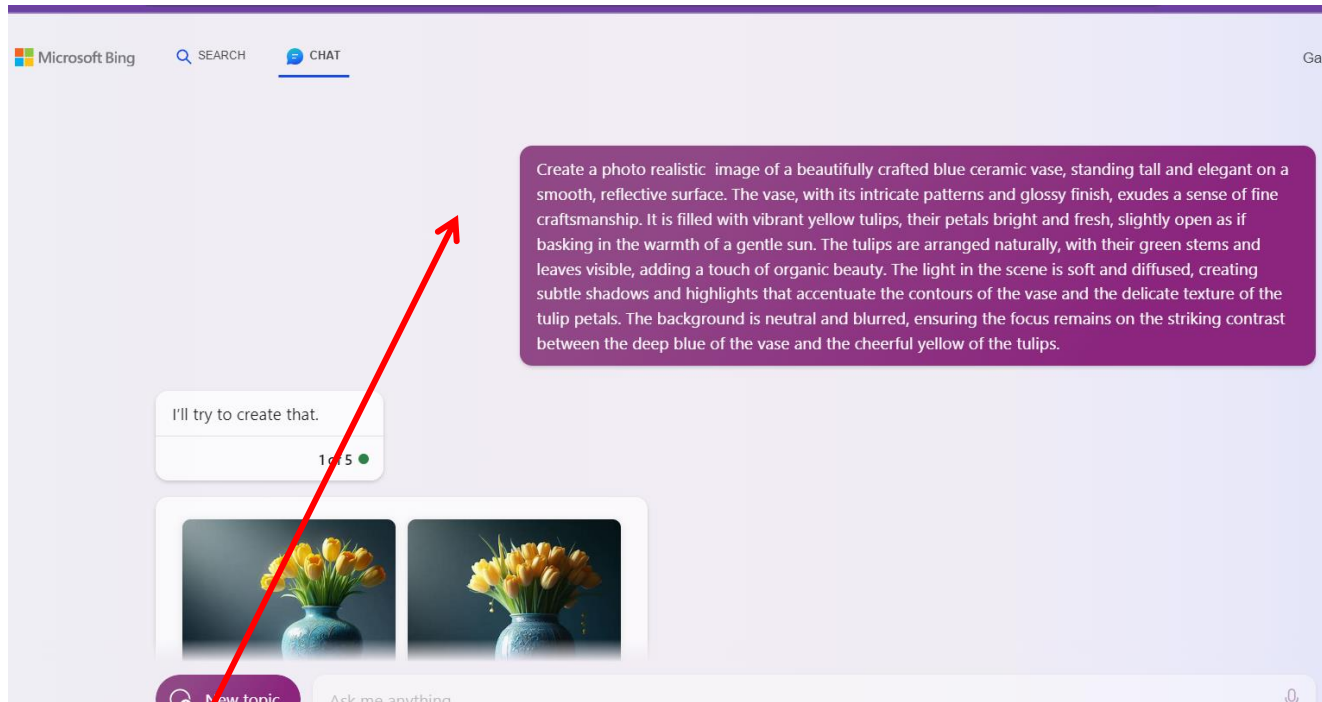

Dalle within Co Pilot

To use Dalle within Bing AI chat go to Bing.com
Then click on CoPilot

Then type in your image prompt

Dalle within CoPilot

Type your prompt
It will generate 4 images within 60 seconds
Click on one and you can then download it

What Dalle within CoPilot produced for an easy request

A Blue Ceramic Vase with Yellow Tulips

Create a photo realistic image of a beautifully crafted blue ceramic vase, standing tall and elegant on a smooth, reflective surface. The vase, with its intricate patterns and glossy finish, exudes a sense of fine craftsmanship. It is filled with vibrant yellow tulips, their petals bright and fresh, slightly open as if basking in the warmth of a gentle sun. The tulips are arranged naturally, with their green stems and leaves visible, adding a touch of organic beauty. The light in the scene is soft and diffused, creating subtle shadows and highlights that accentuate the contours of the vase and the delicate texture of the tulip petals. The background is neutral and blurred, ensuring the focus remains on the striking contrast between the deep blue of the vase and the cheerful yellow of the tulips.

What Dalle within CoPilot produced for a difficult detailed request

A Cheetah Running Through a Savannah

Create a photo realistic image of a majestic cheetah in full sprint across the vast expanse of the African savannah. The cheetah, marked by its distinctive black spots on golden fur, exhibits a powerful and graceful form as it races across the terrain. Its muscles are visibly defined, capturing the essence of speed and agility. The savannah around it is a blend of golden grasses and sparse greenery, stretching out to a horizon under a clear blue sky. The sun is high, casting dynamic shadows that accentuate the cheetah's rapid movement. Dust is kicked up under its swift paws, adding a sense of motion and intensity to the scene. This image encapsulates the raw power and elegance of one of nature's fastest animals in its natural habitat

What Dalle within CoPilot produced for a difficult detailed request

A sad old woman

Create a photo realistic image of an old woman aged around 80. Her eyes, a deep shade of hazel, are filled with tears, reflecting a sense of sadness and vulnerability. Her expression is one of sorrow, with her eyebrows slightly furrowed and her small mouth downturned. She is sitting on a wooden bench in a quiet park, surrounded by greenery, adding to the sombre mood of the scene. The lighting is soft, casting a gentle illumination on her face, highlighting the tears on her cheeks and the emotional depth in her eyes

I think these images are very similar to the Dalle images within Chat GPT

Deep nostalgia - Turn an old photo into a video

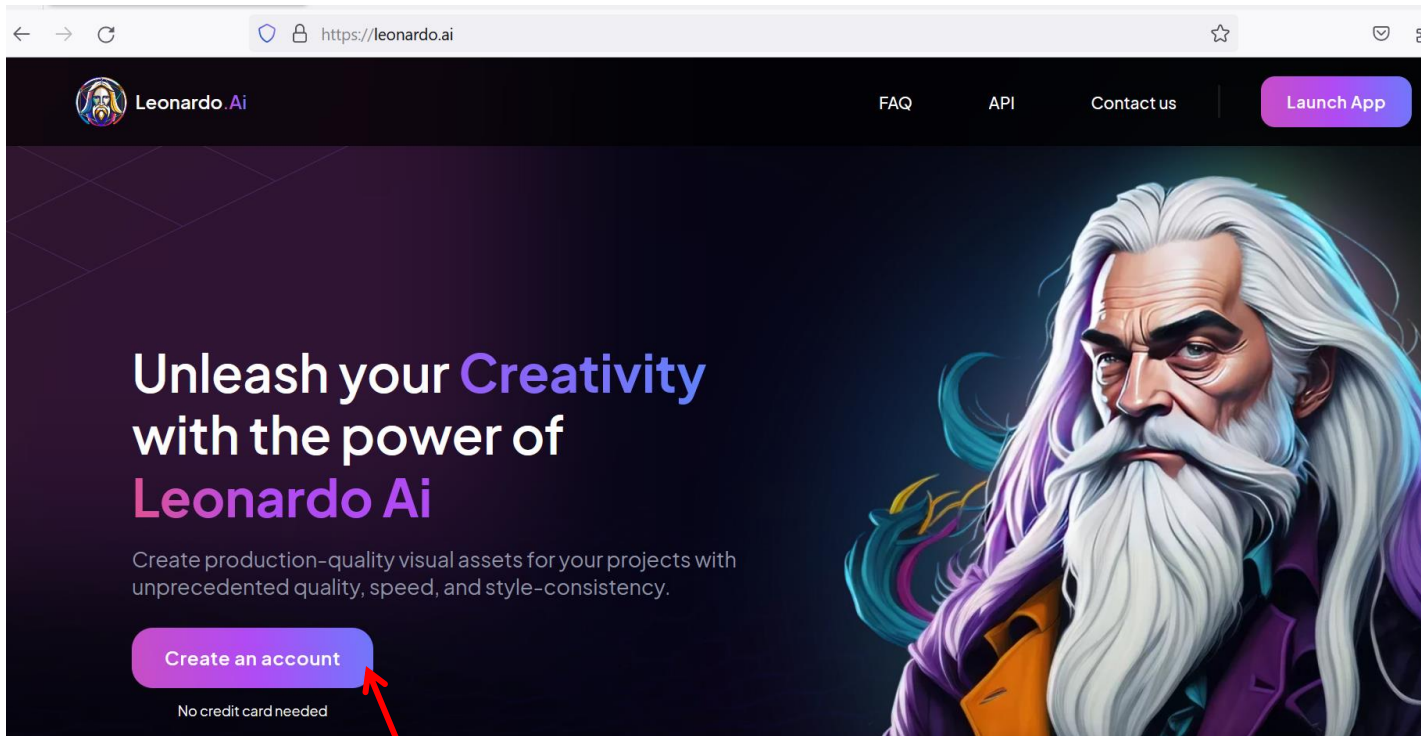

Leonardo

Leonardo is an AI image generation that ...

1. Is easier to use than Midjourney
2. Produces images that are excellent
3. You can create 6-8 free images per day using their best image creation model (alchemy) for a limited period.
4. They make it easy to create different styles of images because they offer different image generation models

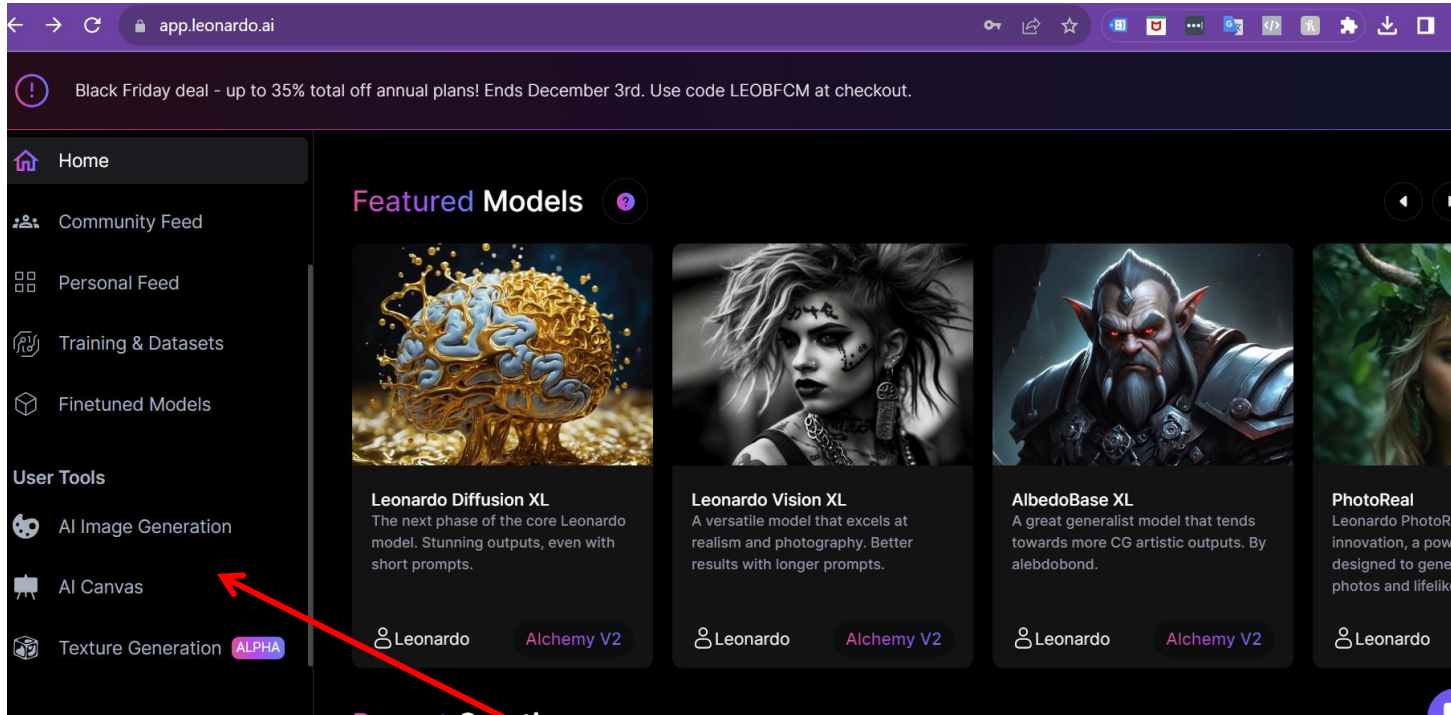

Leonardo

Go to leonardo.ai

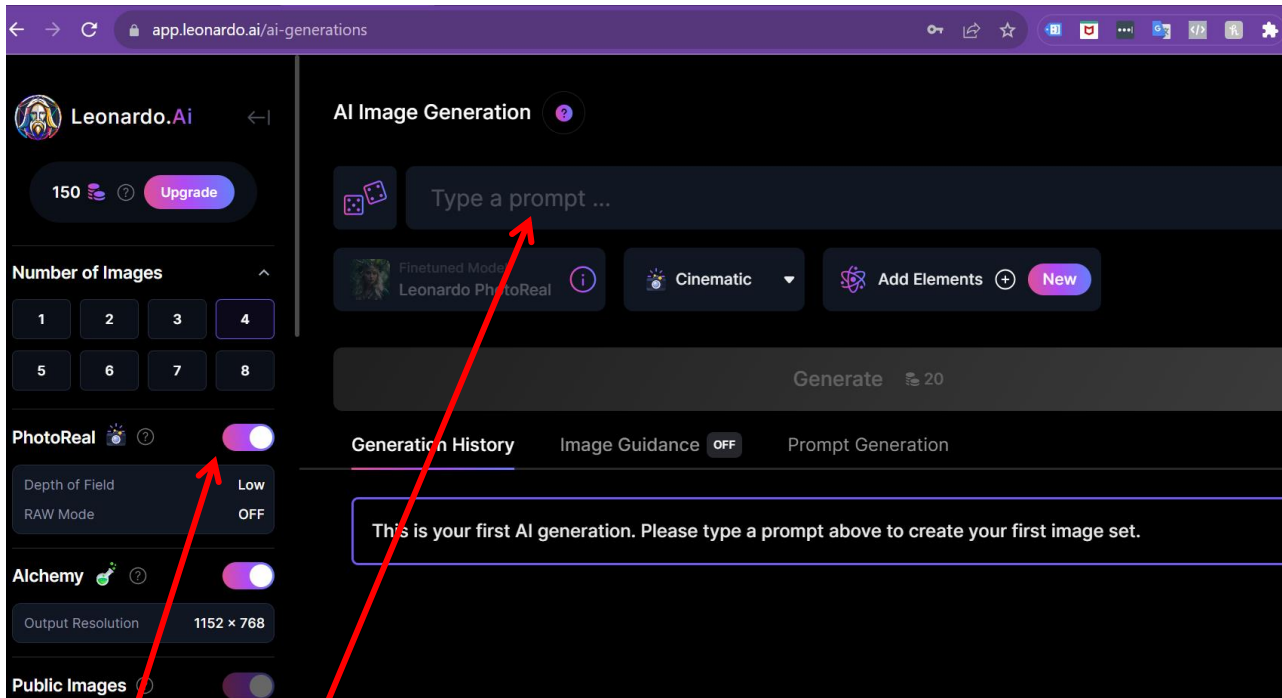

Click create an account and register for a free account

Leonardo

When you login click on AI image generation on the left hand menu

Leonardo

Switch on the option for Photo real to get realistic images
Type you prompt into this box

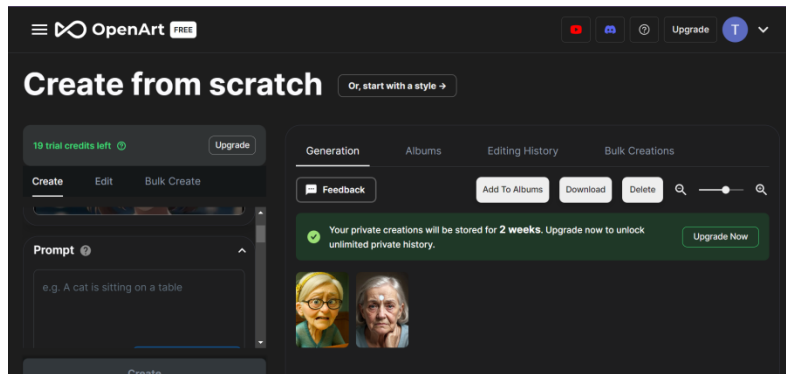

Note – you get 150 credits each day. An image uses 20 credits so you can create around 7 free images a day.

What Leonardo.ai produced

The quality of these images is excellent and is comparable to Midjourney

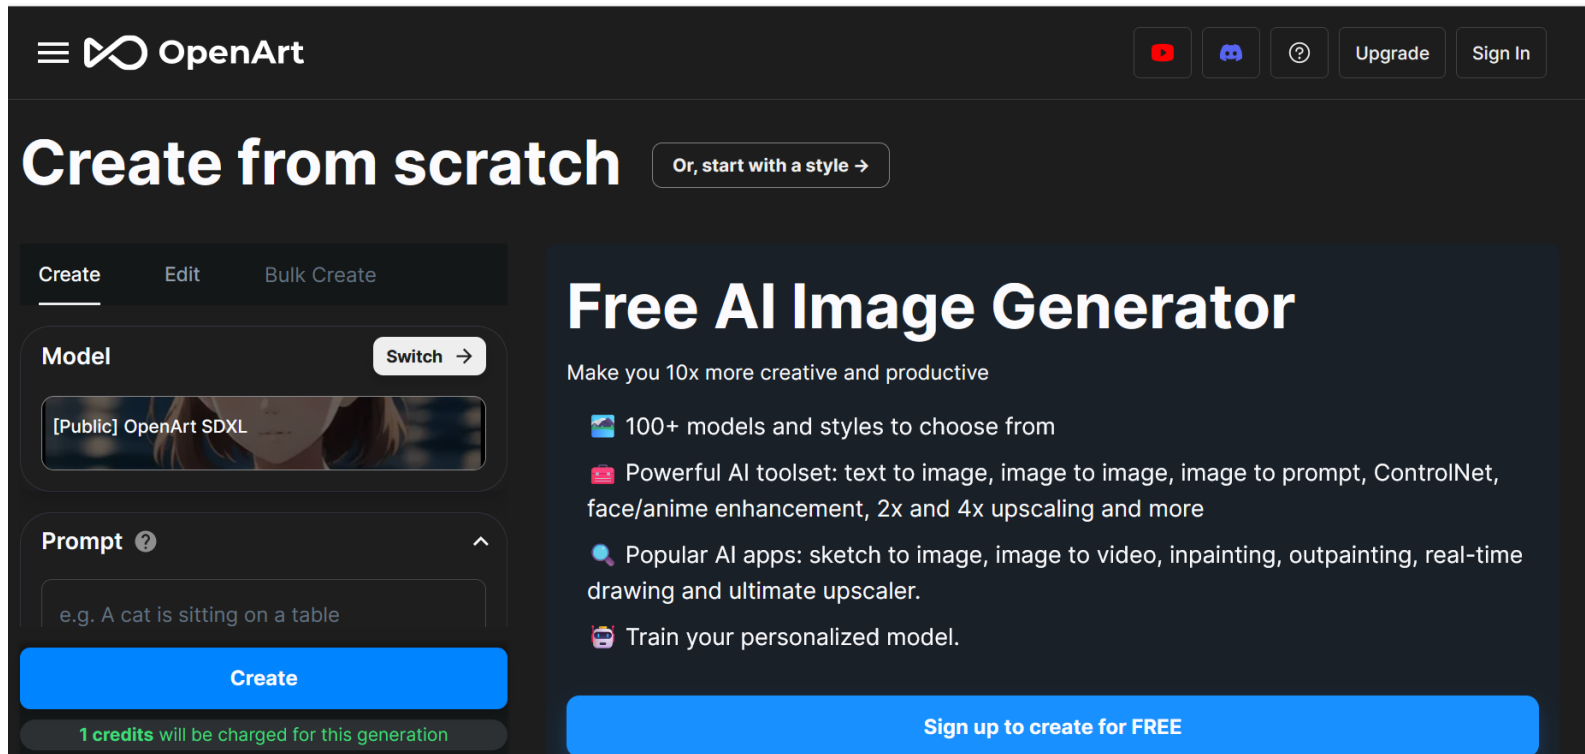

Open Art

Open Art is an AI image generation that ...

1. Is easier to use than Midjourney
2. Produces images that are excellent
3. You can create 20 images for free when you setup and account
4. They make it easy to create different styles of images eg. Pixar style, photo realistic, comic book because they offer different image generation models

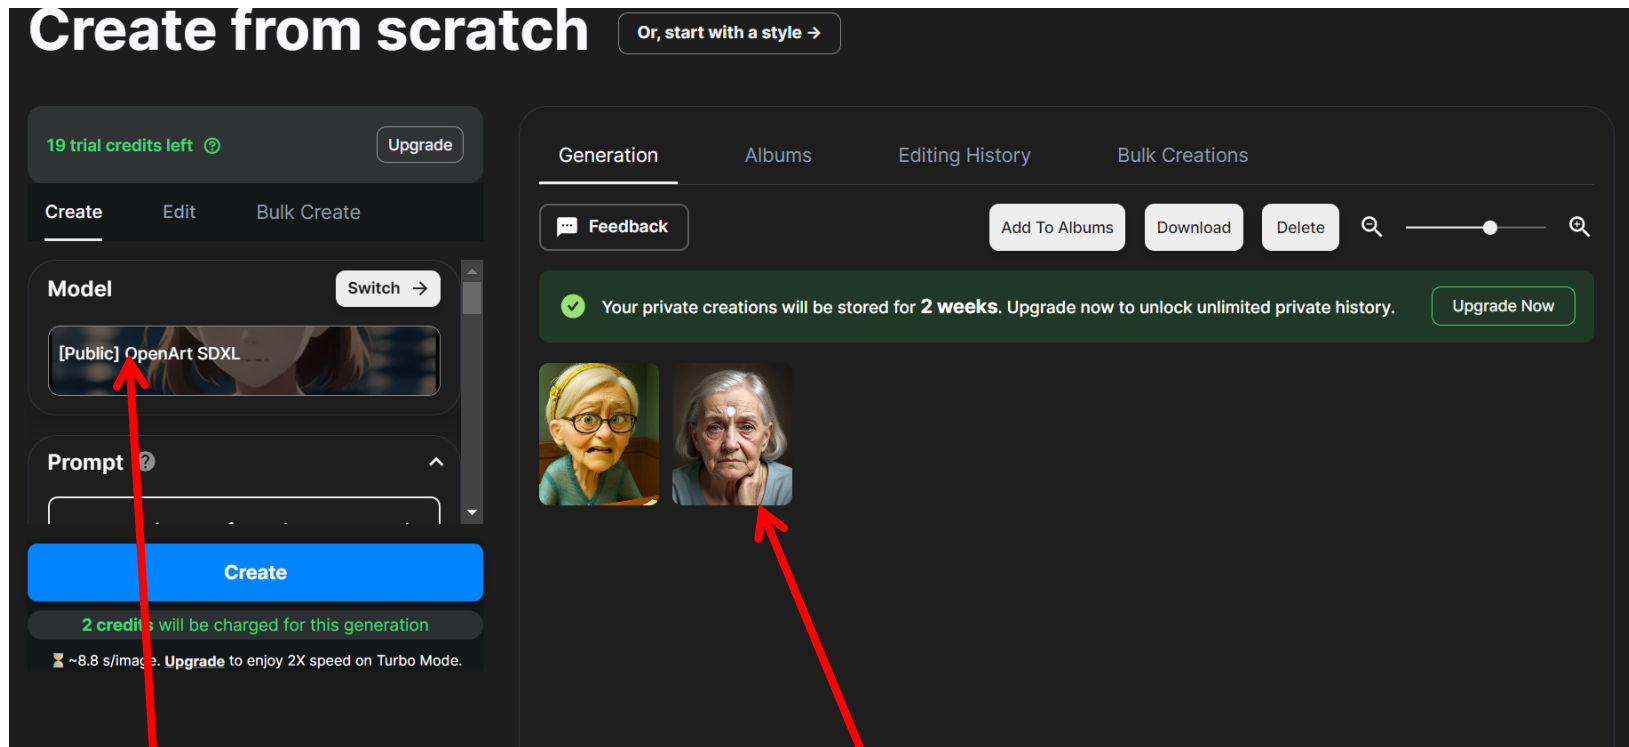

Open Art

Go to <https://openart.ai/create>

Create a free account – you can create one using your Gmail

Open Art

Tap here to choose a style of image generation

Then enter your prompt

Your image will appear on the right hand side where you can either edit it or download it

My view - Which are the best image generation tools in rank order

1. MidJourney

Quality of image – Excellent
Cost: €10 per month
Able to use commercially? Yes

2. Leonardo

Really good
Limited trial 8 free images
Yes

3. Dalle in Chat GPT

Good
Part of Chat GPT Pro (€20/ m)
Yes

Meta.ai – not yet available in Ireland

Meta has had it's own Large Learning Model equivalent of Chat GPT since last year called Llama but it was only available for developers. Last week they launched the latest version, Llama 3, in the US and 12 other countries (but not the EU) and it will establish them as one of the leading AI players, alongside Chat GPT, Gemini and Microsoft CoPilot. Here are the main points:

- 🎯 They have a standalone website at meta.ai (similar to Chat GPT or Google Gemini) where you can enter your prompts and revisit previous chats. When I tested it I found it to be as good and often better than Chat GPT for Digital Marketing related questions.

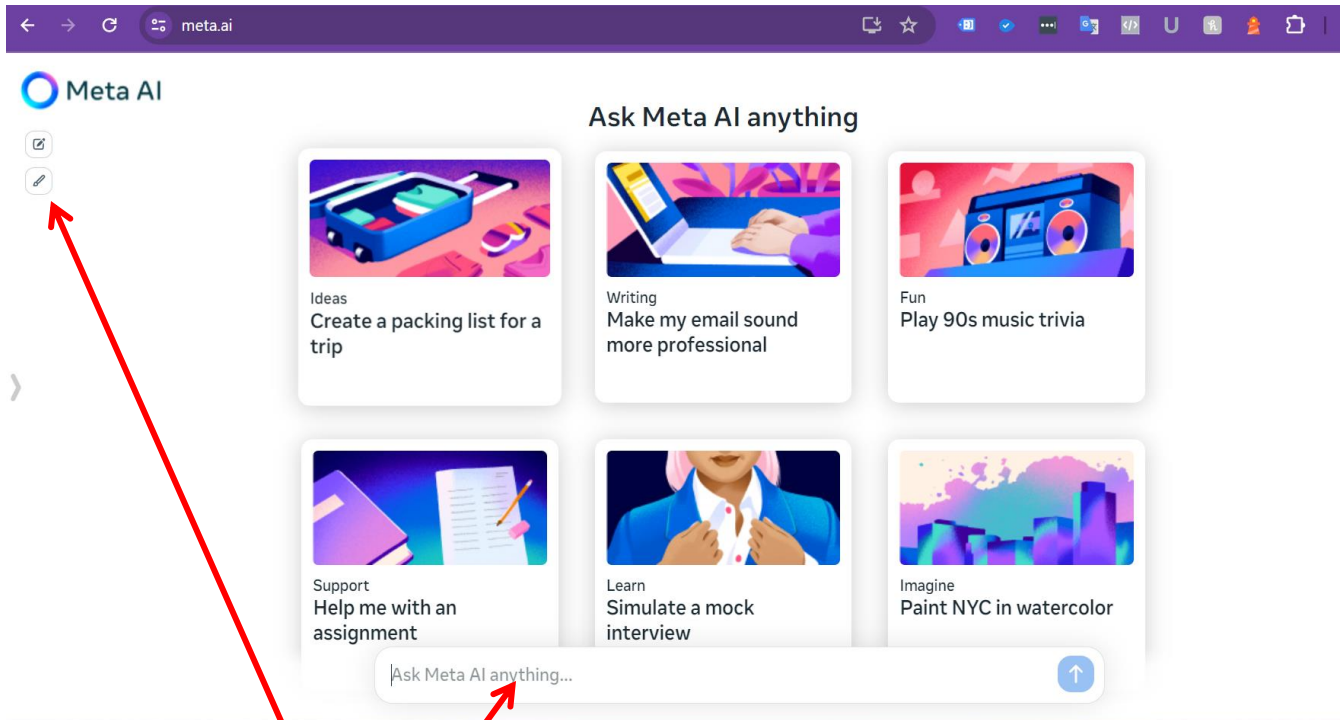

- 🎯 On meta.ai they have an image generation tool that will create the image in real time as you type each word. It's pretty amazing to see.

🎯 It has also been integrated into the search areas on Facebook, Instagram, Messenger and WhatsApp so you can ask the same type of prompts you would ask by going to Chat GPT / Gemini but now within your WhatsApp.

🎯 In the future it will be integrated into the box where you write your posts or Reels on Facebook and Instagram. So you will be able to use it to generate ideas for your posts and it will write a draft of the post for you and it will create the image for you - just like Chat GPT would except it's right there in the post creation box.

Meta.ai

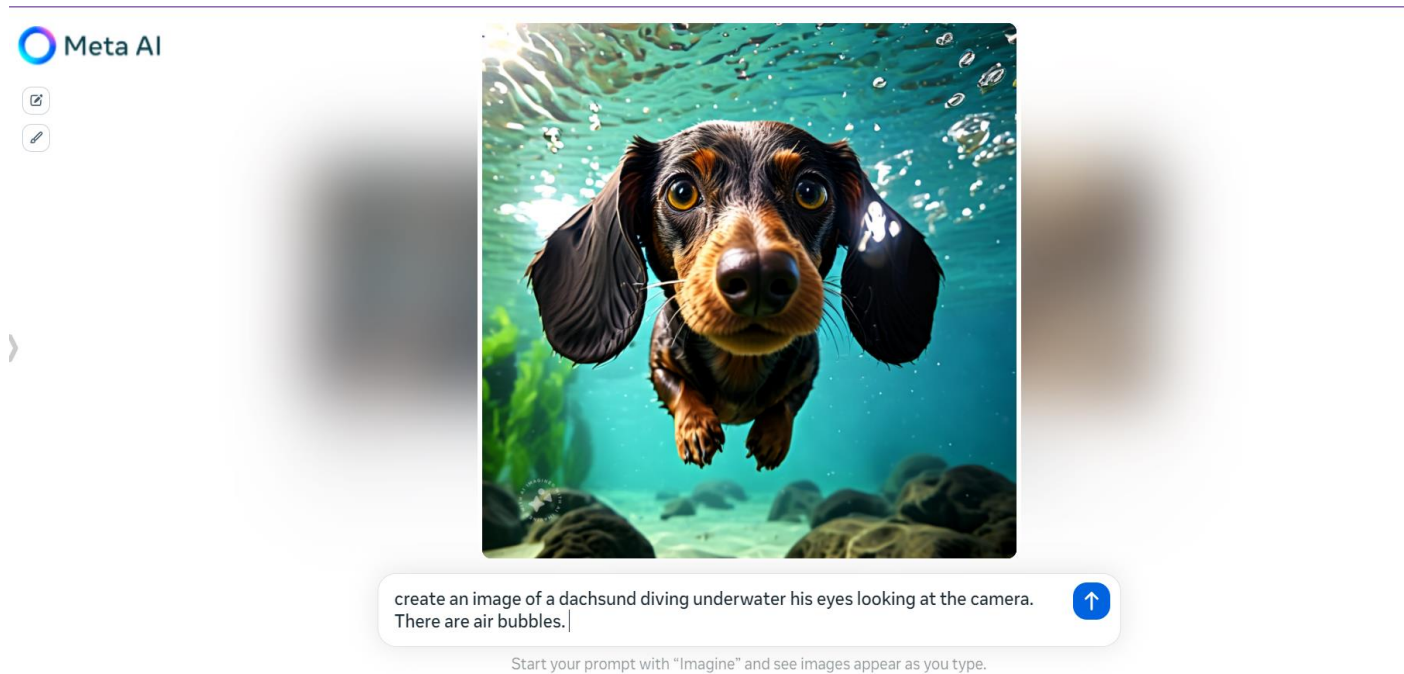

This is what it looks like

This is the box where you type your prompts

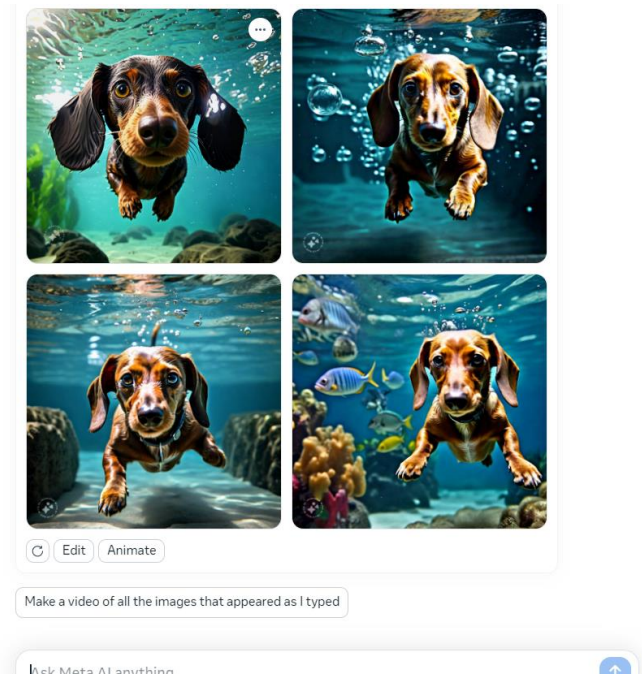

You can write prompt such as Create an image

Or you can click on the pencil icon to go to the image creation section called Imagine

What is brilliant about this tool is that the image appears in front of you with every word that you type

Hit enter and you will receive 4 options

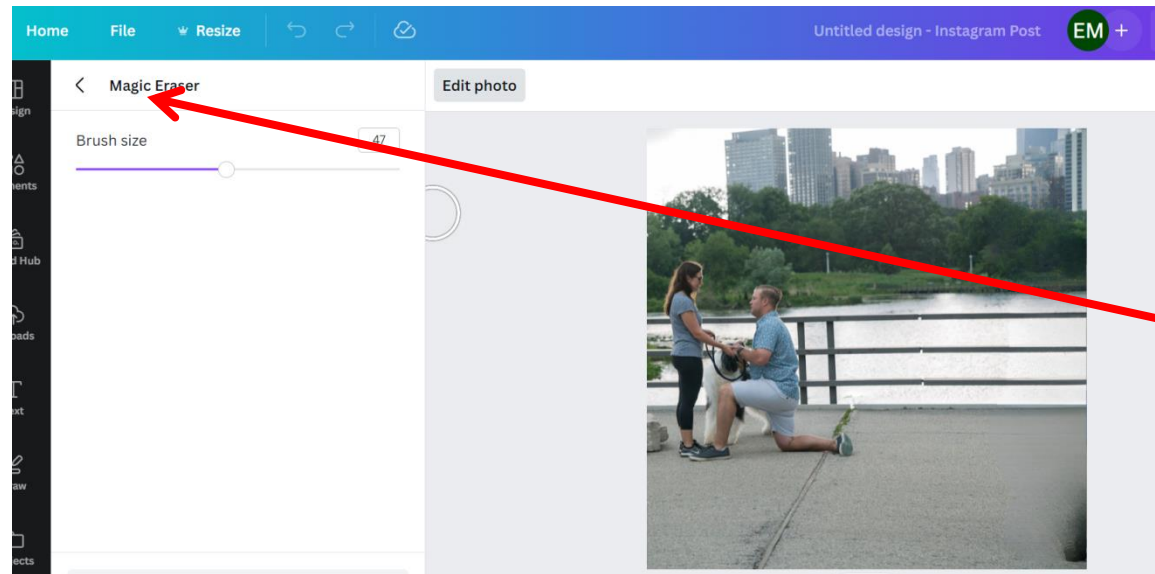

You can then click edit to make changes to an image (cu currently it will just generate anew image)

You can also animate the image

Canva Magic eraser:

Highlight people or objects in an image and it will erase it

It will now be erased

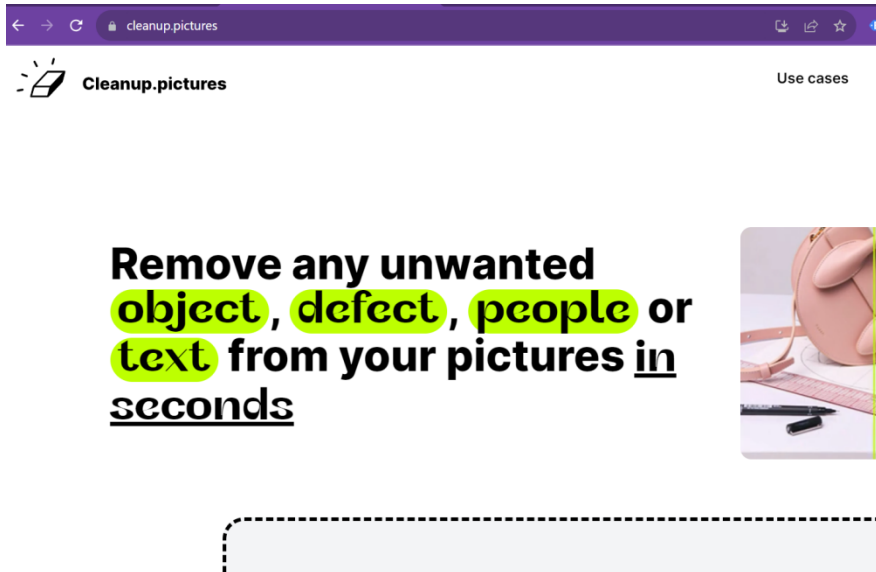

If you are not happy with the results
click reset erasings

Try a larger or smaller brush –
depending on how big or small the
object is

Then click on the arrow to progress

Magic eraser:

Highlight people or objects in an image and it will erase it

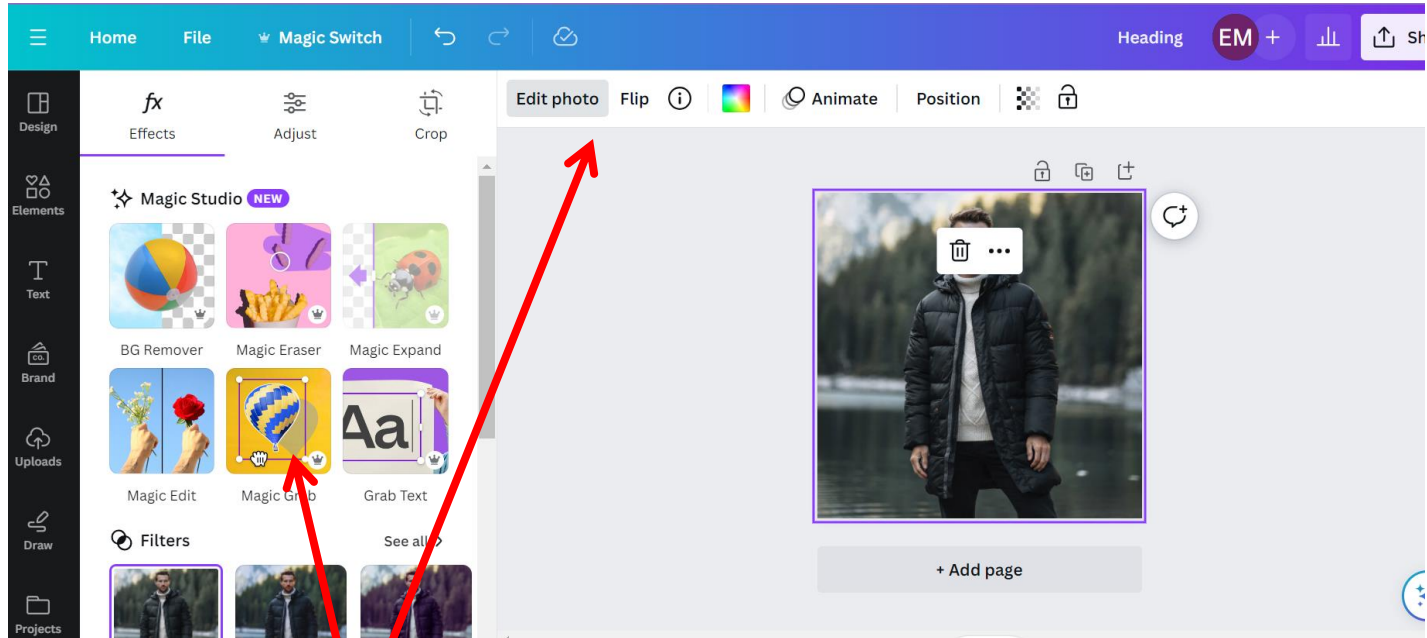

A free alternative to this eraser tool is the website

Cleanup.pictures

Click this link to view my demo

Magic grab – isolate and move anything within an image

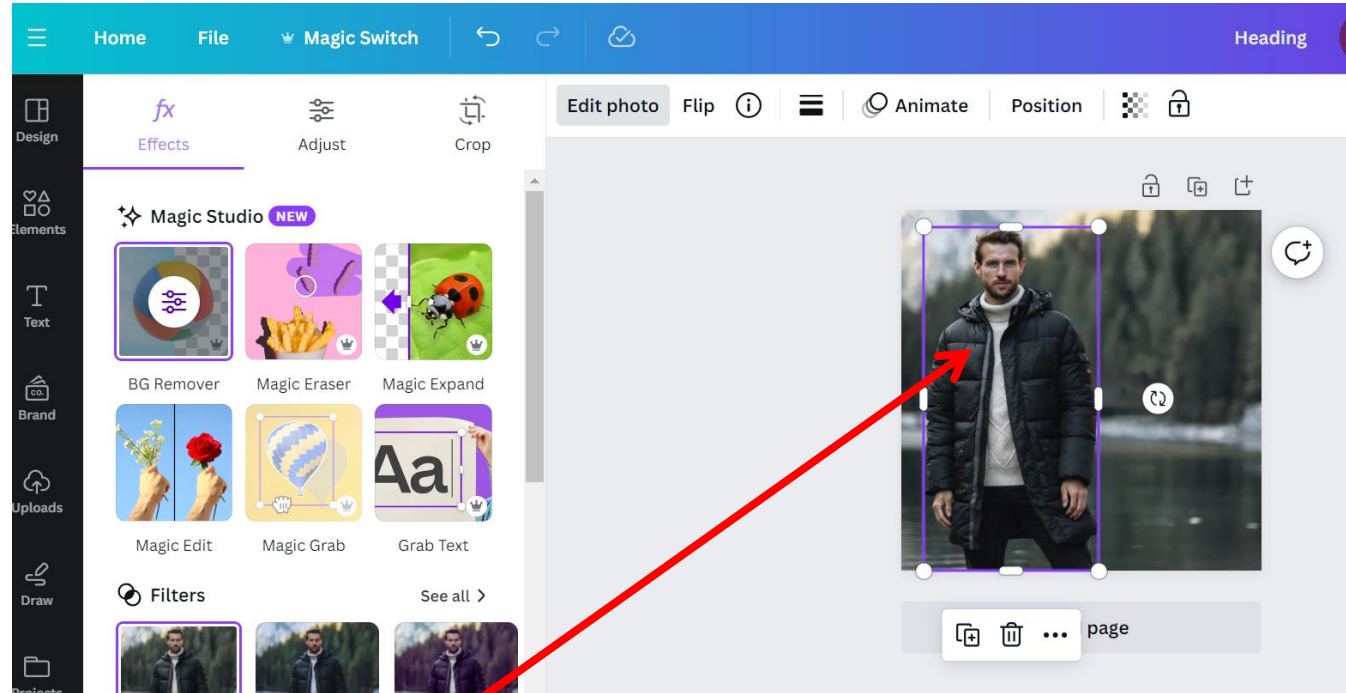

Add your image to your design
Click on your image
Click edit photo
Then click on Magic Grab

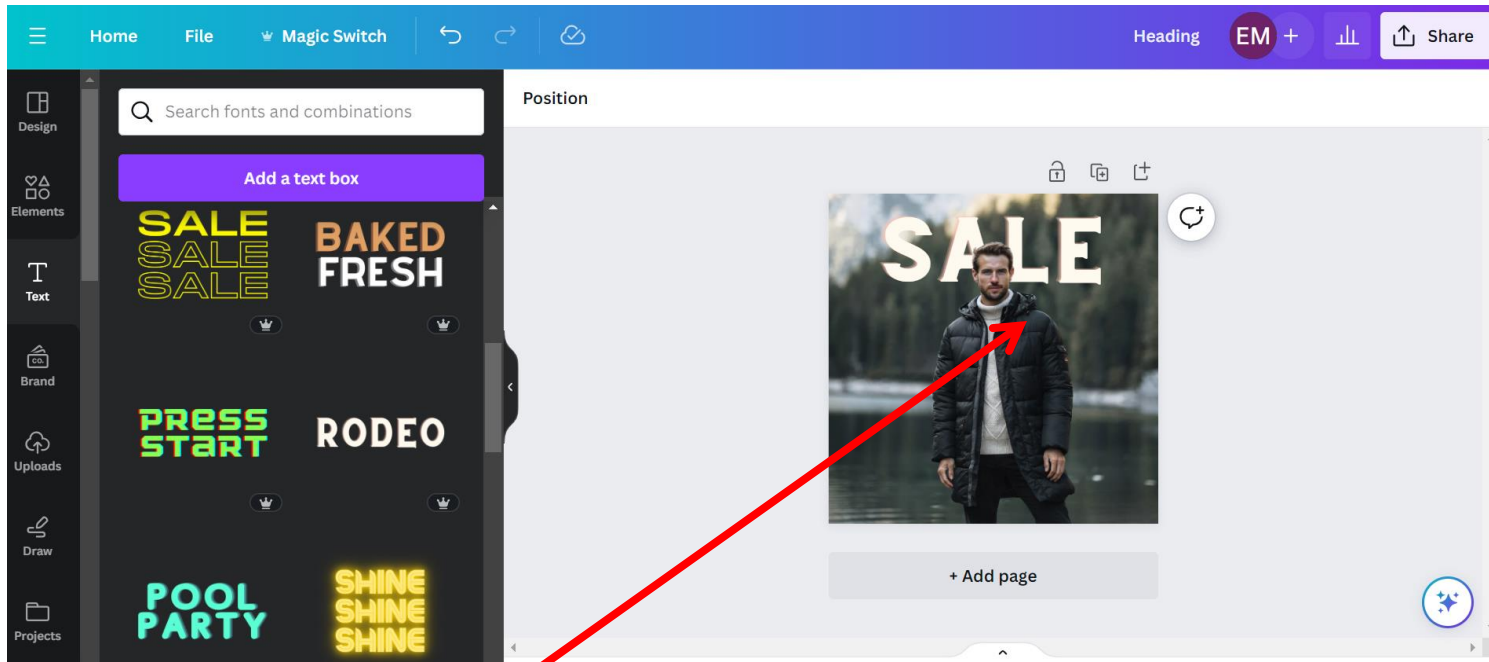

This is a Pro feature
It cannot be used by Free
accounts

Magic grab – isolate and move anything within an image

It then identifies the main element in the image
You can then move that element left or right or make it bigger or smaller— ideal if you want to add text beside a person

Magic grab – isolate and move anything within an image

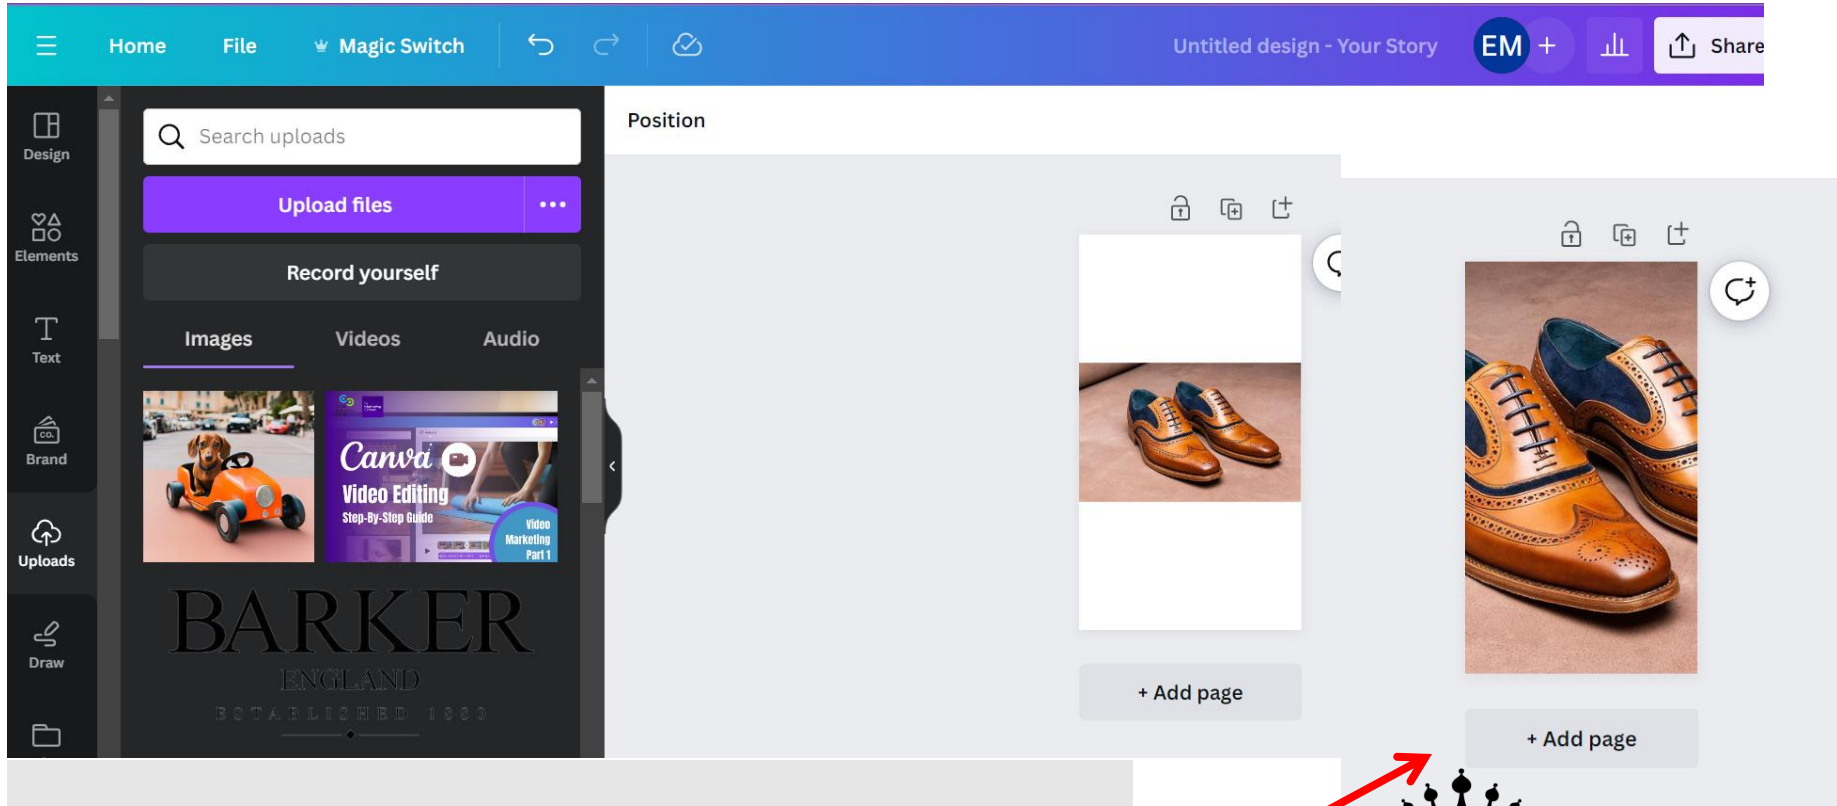

It also means that you can easily place text behind the person or object which is an eye catching effect

1. Add text
2. Right click on the text and select layer – send backward

Or click on the option for “Position” above the image and then drag the text under the person or object in the list of elements

Magic expand:

Ask Canva to recreate parts of an image to make it wider or taller

Choose your canvas shape eg. Portrait
Choose your image – e.g. it is square

If you make the image fill the area it will simply zoom / crop in

If you want to keep the main object the same size you can use magic expand

Click on image, click on edit photo and select magic expand

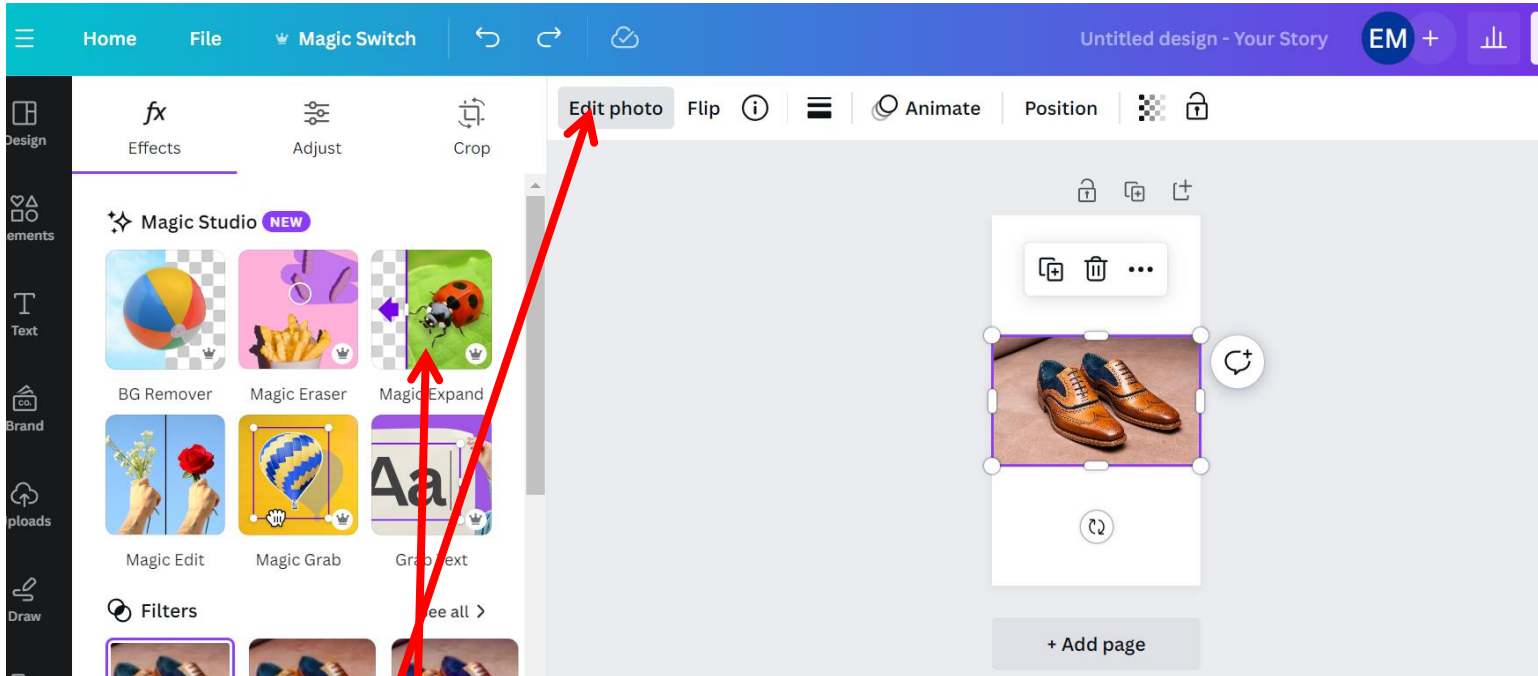

This is a Pro feature

It cannot be used by Free accounts

Magic expand:

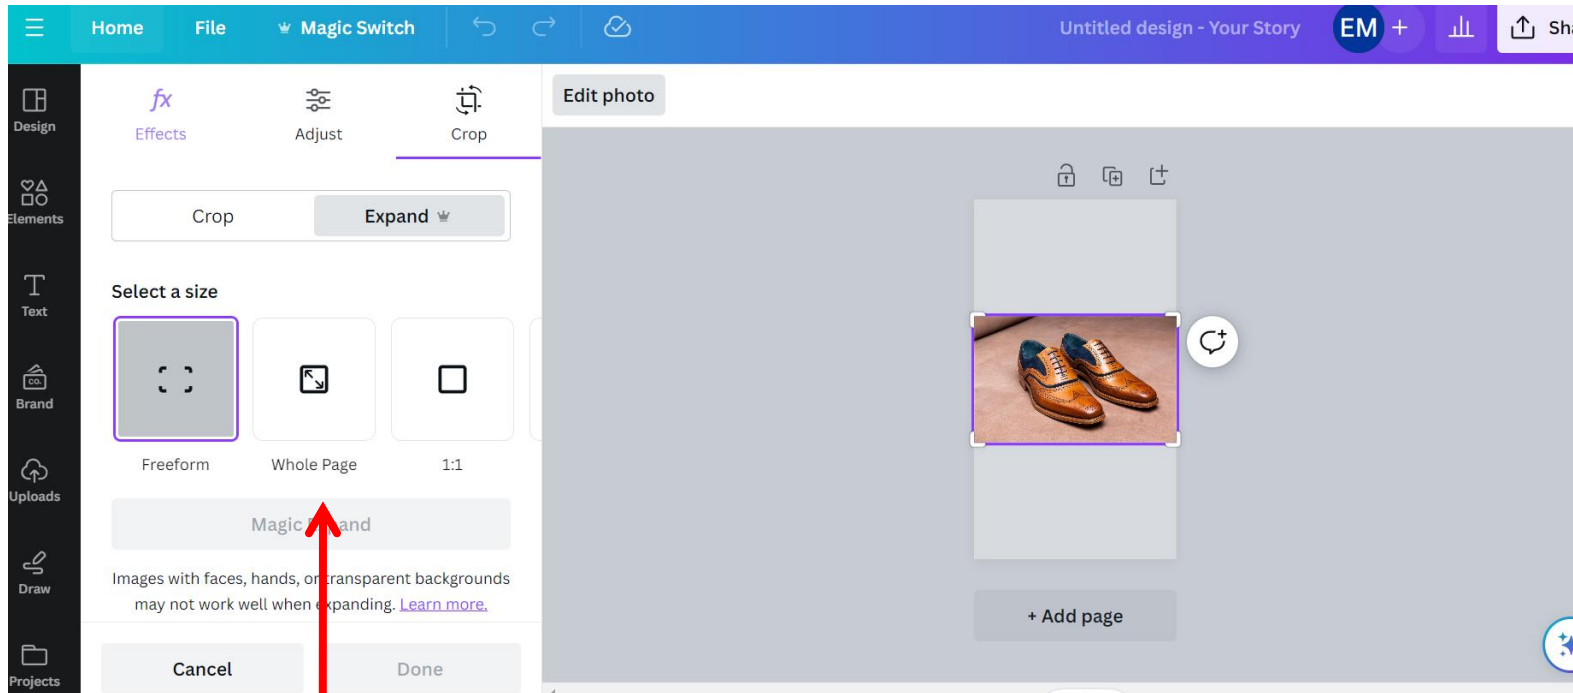

Ask Canva to recreate parts of an image to make it wider or taller

If you want to keep the main object the same size you can use magic expand
Click on image
Click on edit photo
and select magic expand

Magic expand:

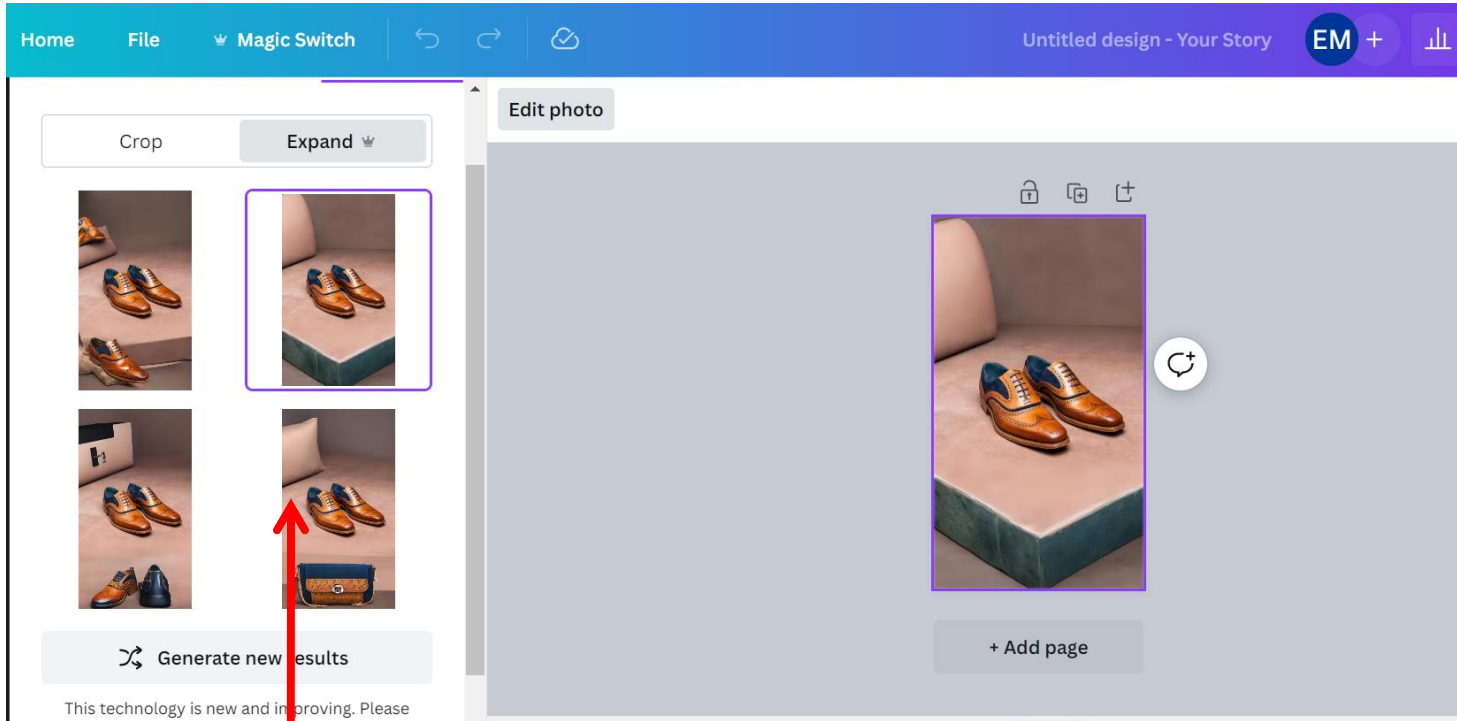

Ask Canva to recreate parts of an image to make it wider or taller

You can now choose whether you want the image to expand to fill the area in page or a different size.

Magic expand:

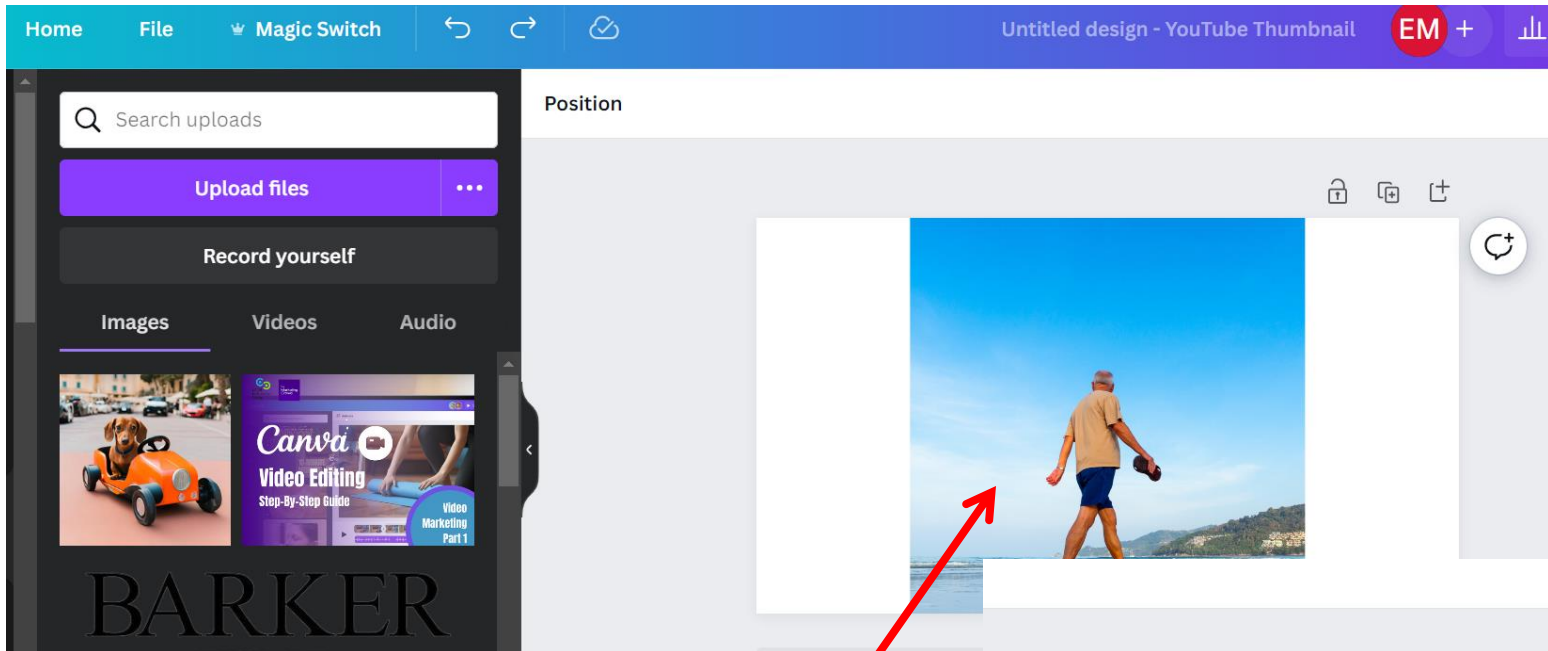

Ask Canva to recreate parts of an image to make it wider or taller

It now gives you 4 options to choose from

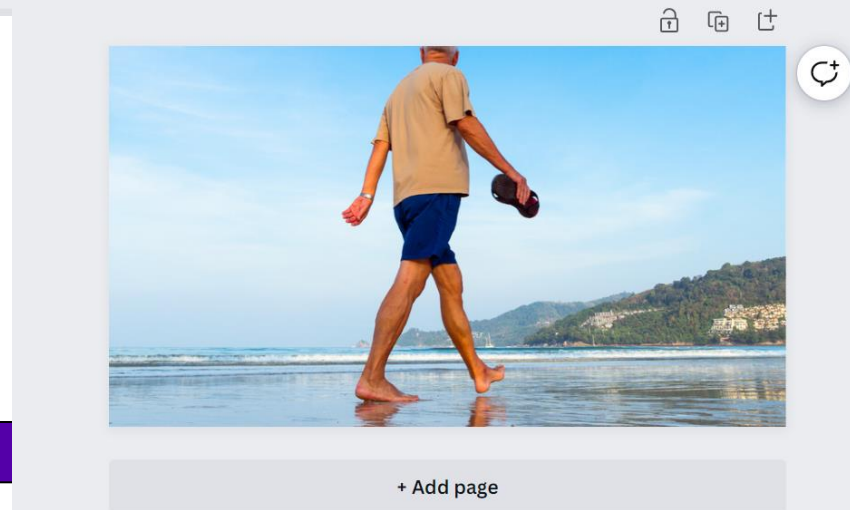

Magic expand:

Ask Canva to recreate parts of an image to make it wider or taller

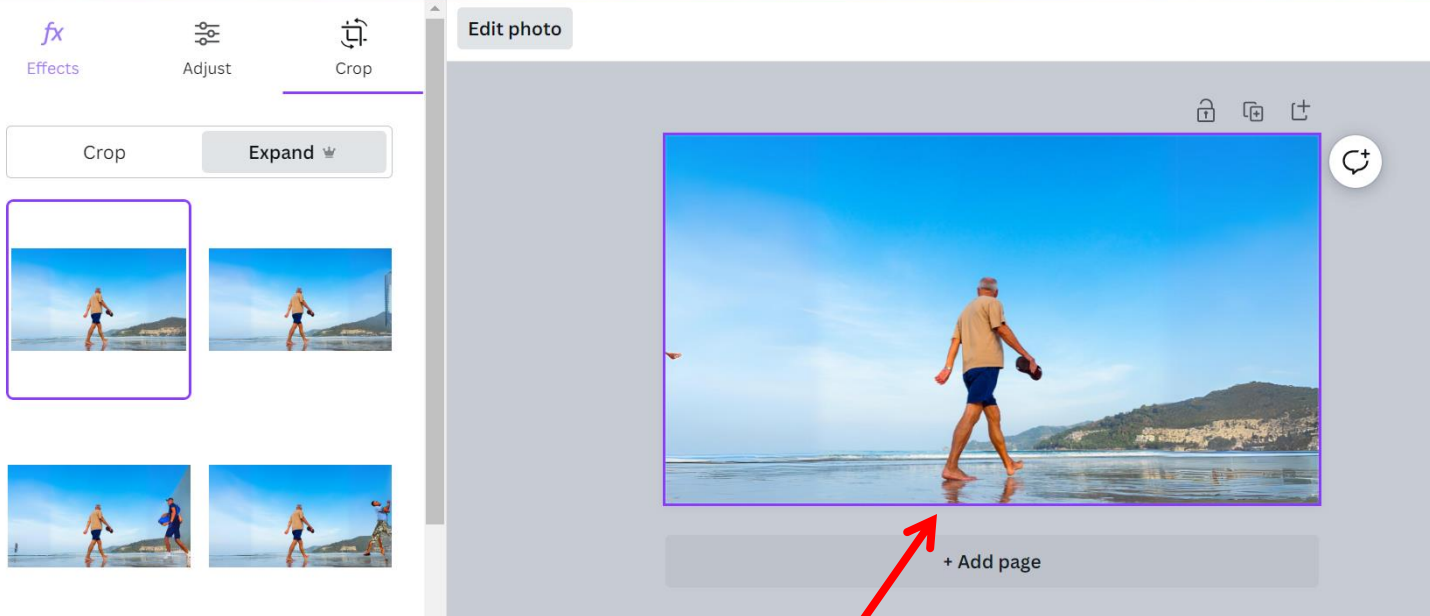

Similarly, you might have a square image that you want to expand to fit a wider area eg. 16:9

If you simply set the image as background it becomes too cropped in

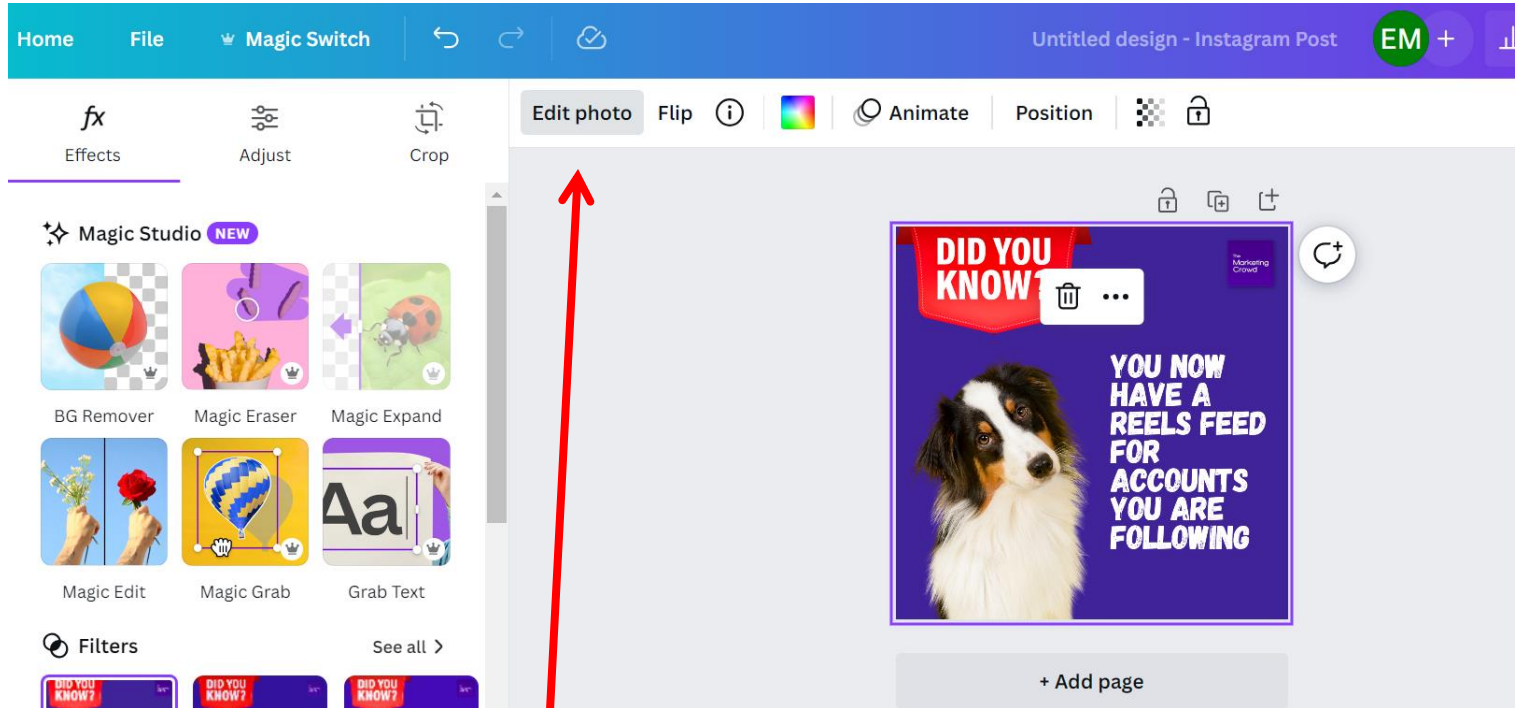

Magic expand:

Ask Canva to recreate parts of an image to make it wider or taller

Using magic expand it e.g. is now a landscape image with everything in proportion

Grab text – isolate and manipulate any text that is in an image

Perhaps you have an image that was designed for you in the past and you now want to reuse it and change some of the text. Normally you cannot edit / change text in an image unless you have the original design file

Now with Canva Grab text you can.

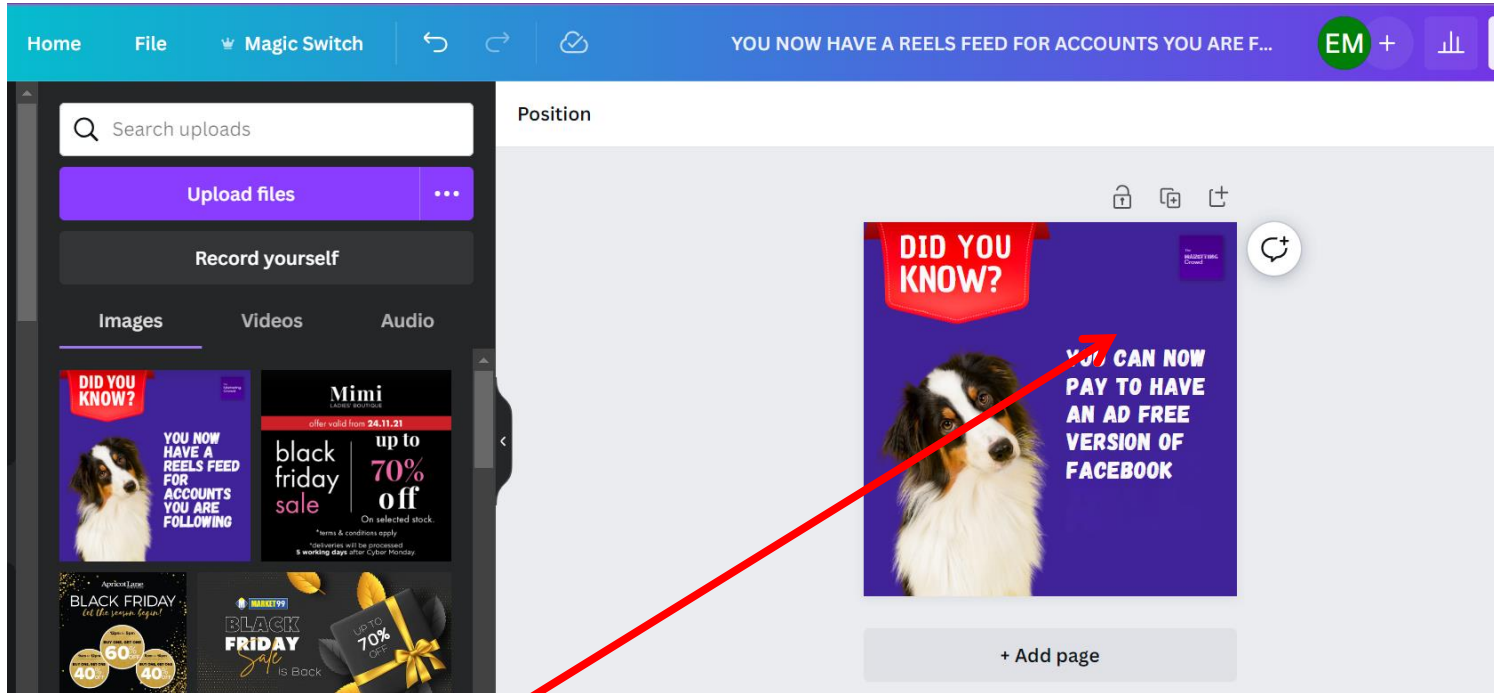

Click on your image, then click edit photo and then Grab text

This is a Pro feature

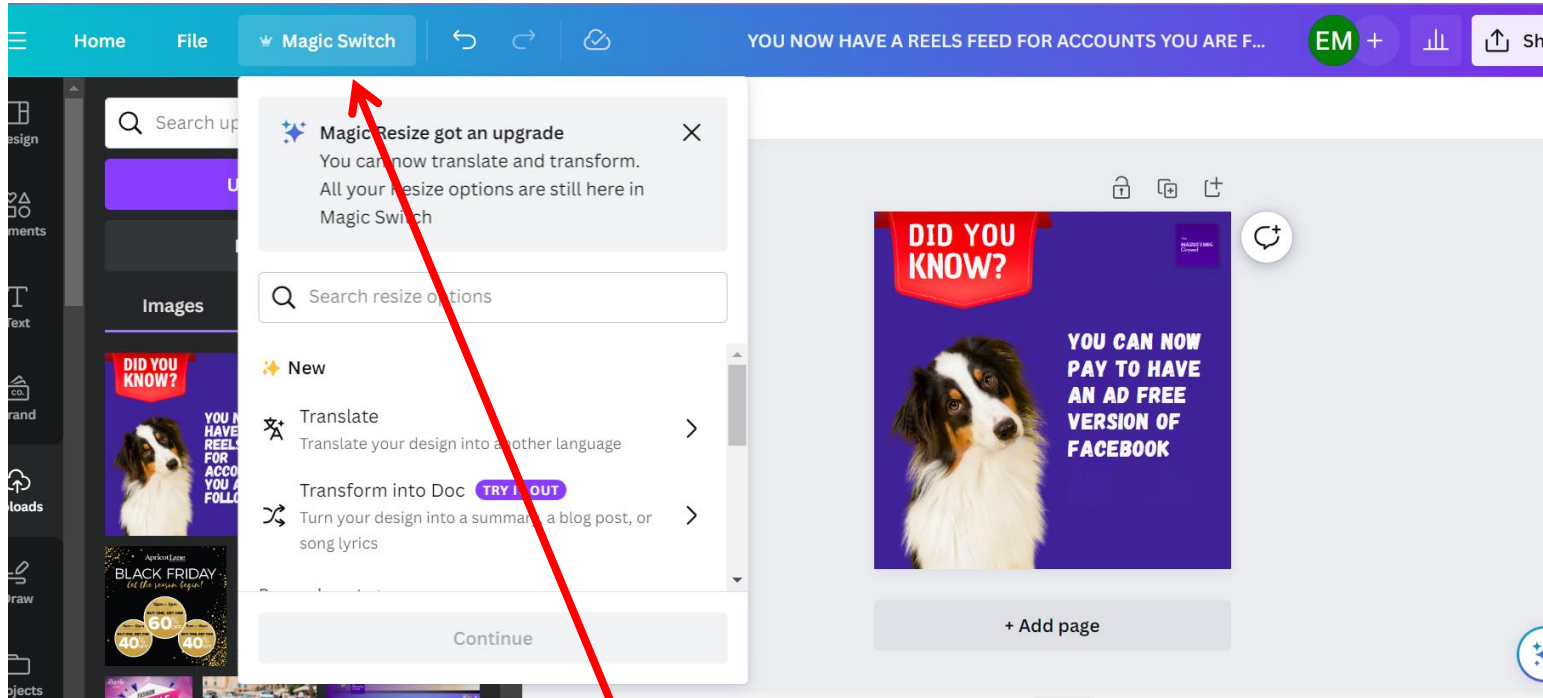

It cannot be used by Free accounts

Grab text – isolate and manipulate any text that is in an image

You can now edit the text boxes, change font, colour etc.

Magic switch – an upgrade to the resize feature for Pro users

- After you create a design you might want a version of it in a different size eg. You want a portrait version for Stories.
- The resize tool has been rebranded as “magic switch” and it has new features such as translate.
- To convert to a story simply choose the option for social media and then story

This is a Pro feature
It cannot be used by Free accounts

AI Video Generation tools

Canva - Text to video tool

Runway – text to video tool

Pika

Sora (coming soon)

Deep nostalgia - Turn an old photo into a video

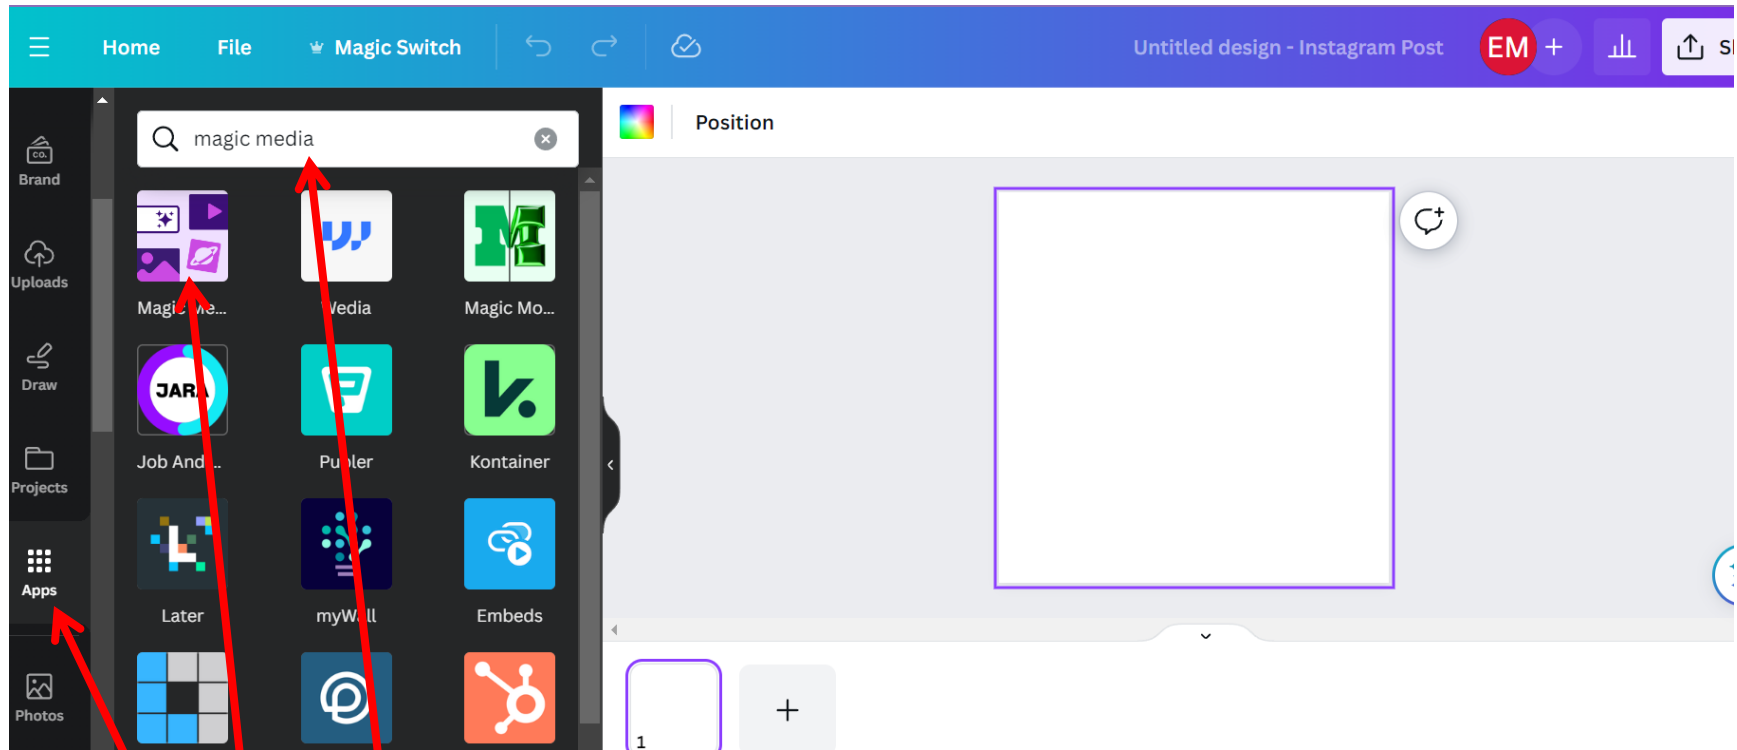

How can text to video creation impact your digital marketing?

Currently when you are looking for stock videos you would go to Pixabay.com or the video library in Canva

1. As these tools become more common and powerful you can easily have short footage videos created that perfectly match what you are trying to convey. You can then overlay these footage videos onto your main video.
2. In 2024 video creation tools are very likely to be incorporated directly into TikTok and Reels and so as you are about to create a video you can customise your own videos

Canva Magic media – Text to video generator

Create a short video by describing it

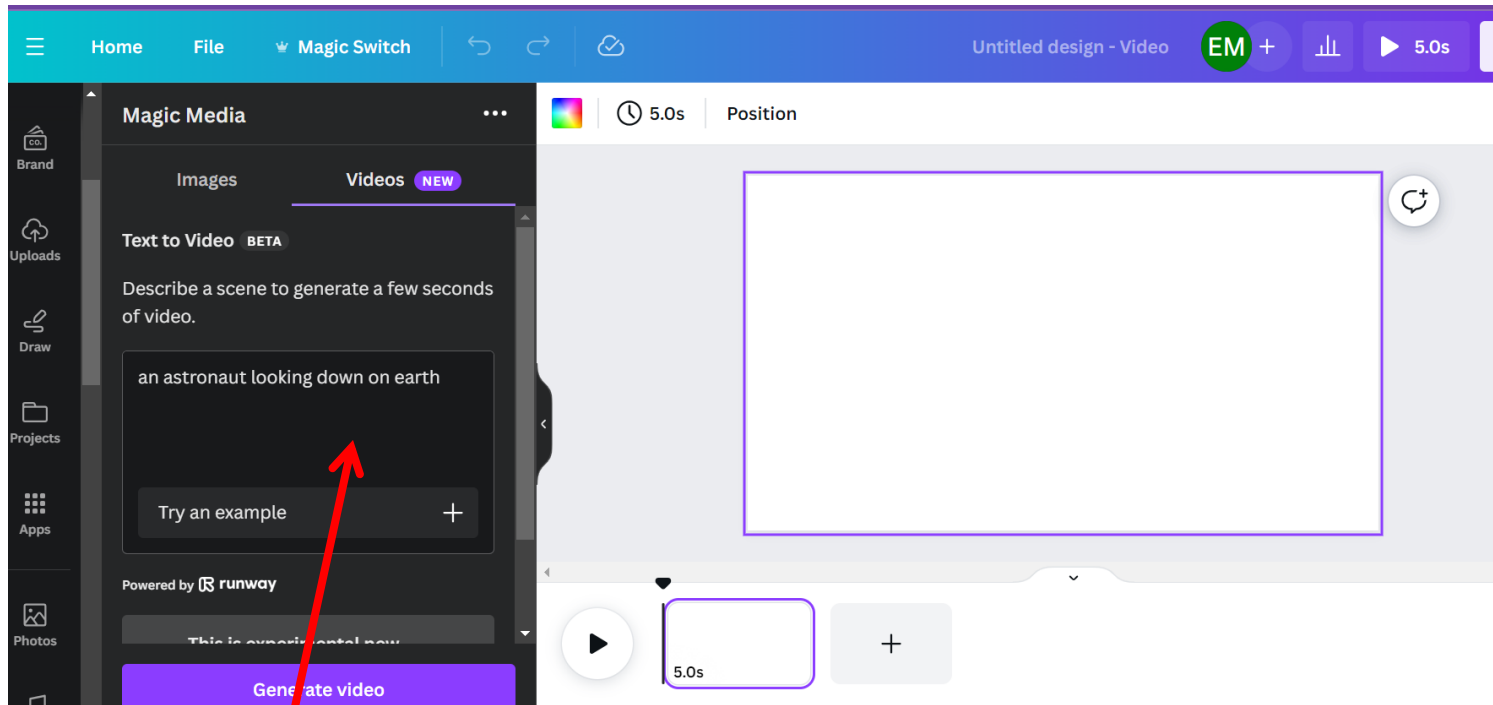

- Select your canvas shape
- On the left menu click on Apps
- Search for Magic Media
- Click on Magic media

This is a Pro feature

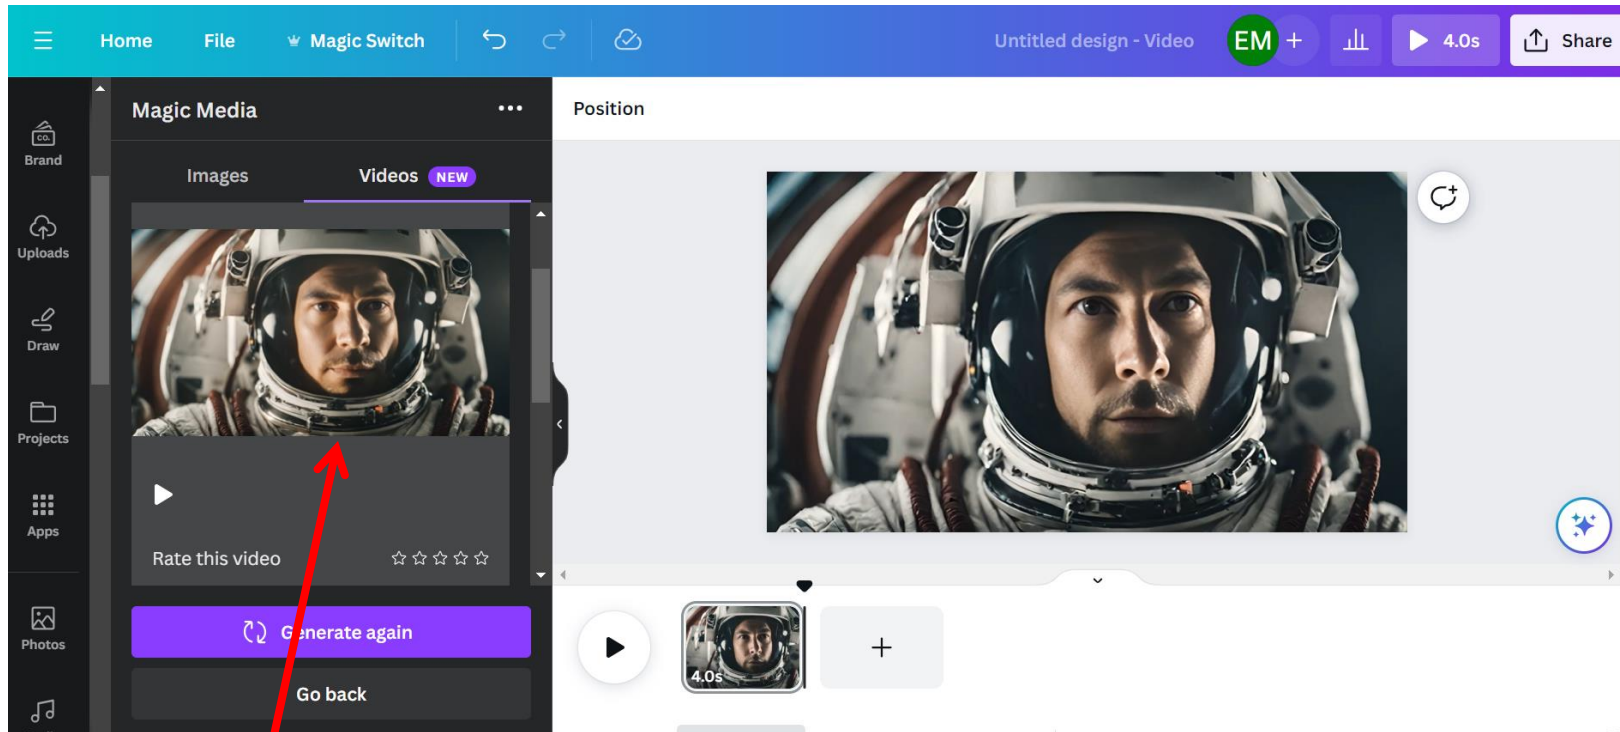

However, free accounts can use it 5 times for free

Magic media – Text to video generator

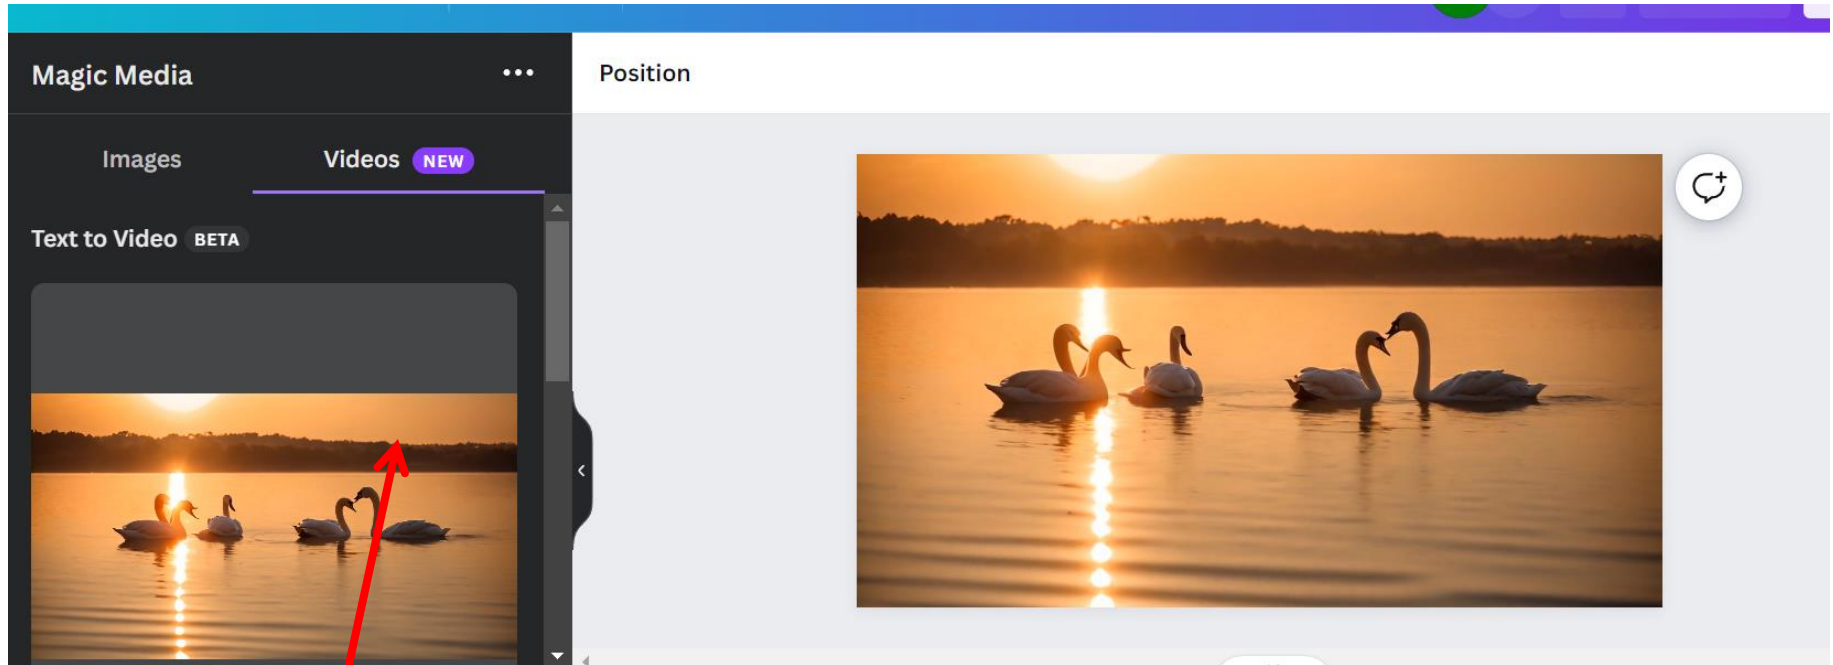

Click on Video to indicate you want to create a video
Type in your description. Be as descriptive as possible
Click generate

Magic media – Text to video generator

When your video is generated simply drag it down onto the timeline
Your video will be 5 seconds long
Click generate again if you want a different version. When you do it uses one of your credits

Magic media – Text to video generator

Based on the prompt:

Create a video of a beautiful sunset on a lake. There are swans on the lake

I do not think the quality of the videos created on Canva is currently good enough for your marketing. However, they will be improving it so check it every now and then

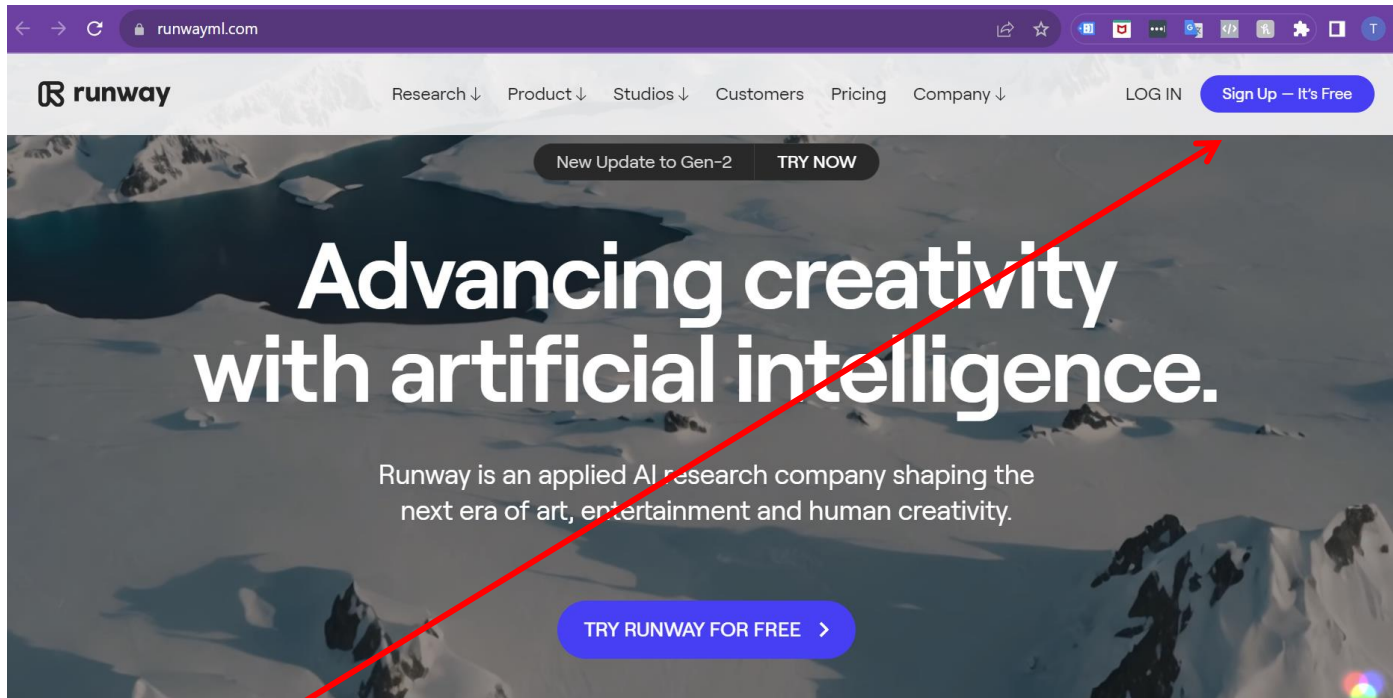

Runway

Runway is the leading AI video creation tool and I would definitely use this rather than Canva

You receive free credits to try making videos using Runway

Runway

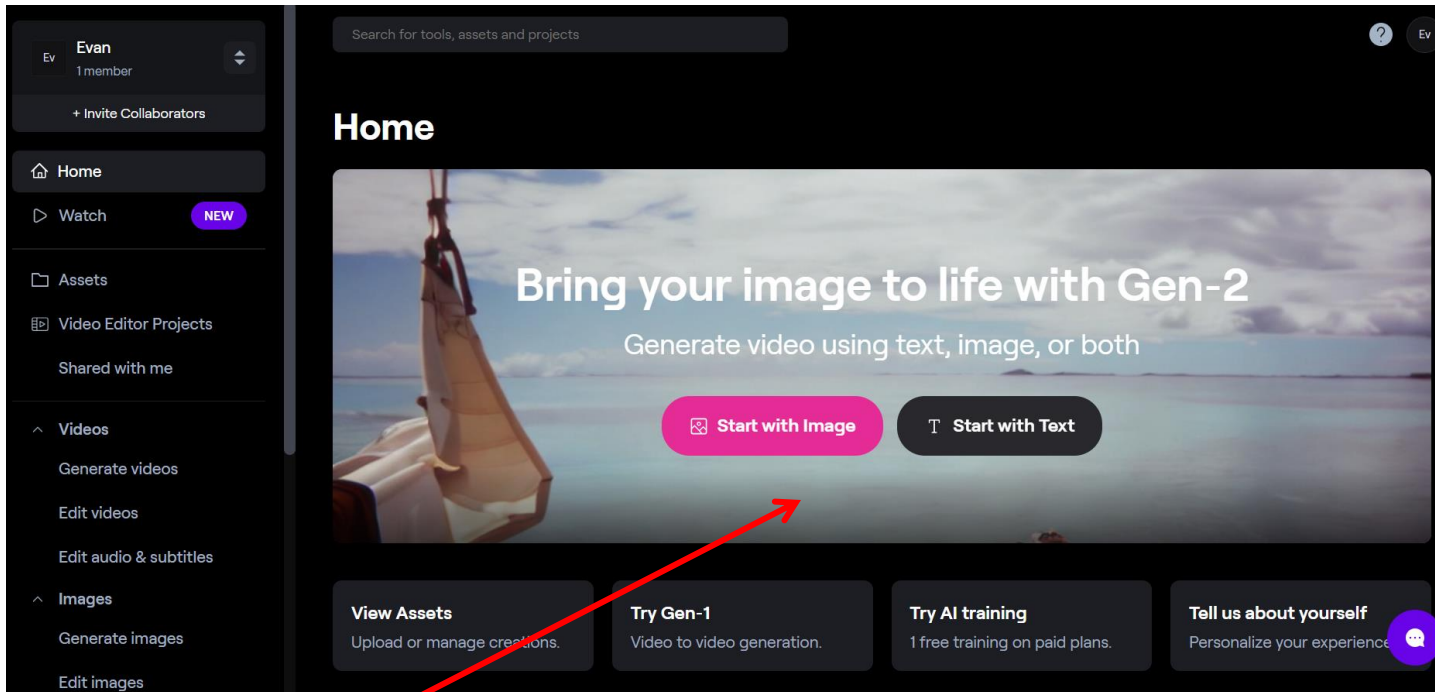

Go to runwayml.com or search for Runway ML in Google
Sign up for a free account and you will be able to test their tools for free
Then login

The screenshot displays the Runway pricing page with a navigation bar at the top. The navigation bar includes the Runway logo, links for Research, Product, Studios, Customers, Pricing, and Company, a LOG IN link, and a Sign Up button labeled 'It's Free'. Below the navigation bar, there are four pricing plans presented in a grid. The first plan, 'Free Forever', is highlighted with a red arrow pointing to its 'Sign up' button. The other three plans are paid subscriptions: '\$12 per user per month', '\$28 per user per month', and '\$76 per user per month'. Each plan lists its features, including the number of credits provided, reset frequency, and resolution capabilities. The Free Forever plan includes 125 credits, while the paid plans offer 625, 2250, and unlimited credits respectively. The \$76 plan also includes unlimited video generations and all Pro Plan features.

Plan	Price	Users	Credits	Reset Frequency	Upscale Resolution	Remove Watermarks	Other Features
Free Forever	Free	Unlimited	125	Never	Yes (up to 4 sec)	Yes	Can't buy more credits, Can't upscale resolution or remove watermarks on Gen-1 and Gen-2
\$12	\$12	max. 5	625	Every month	Yes	Yes	Credits reset to 625 every month starting from your subscription date. Buy more as needed
\$28	\$28	max. 10	2250	Every month	Yes	Yes	Credits reset to 2250 every month starting from your subscription date. Buy more as needed
\$76	\$76	max. 10	Unlimited	Never	Yes	Yes	Unlimited video generations, Includes all Pro Plan features, plus: Unlimited generations of Gen-1 and Gen-2 in Explore Mode at relaxed rate, Credits (with no rate)

With the free account you receive 125 credits
This gives you approx. 6 four second videos

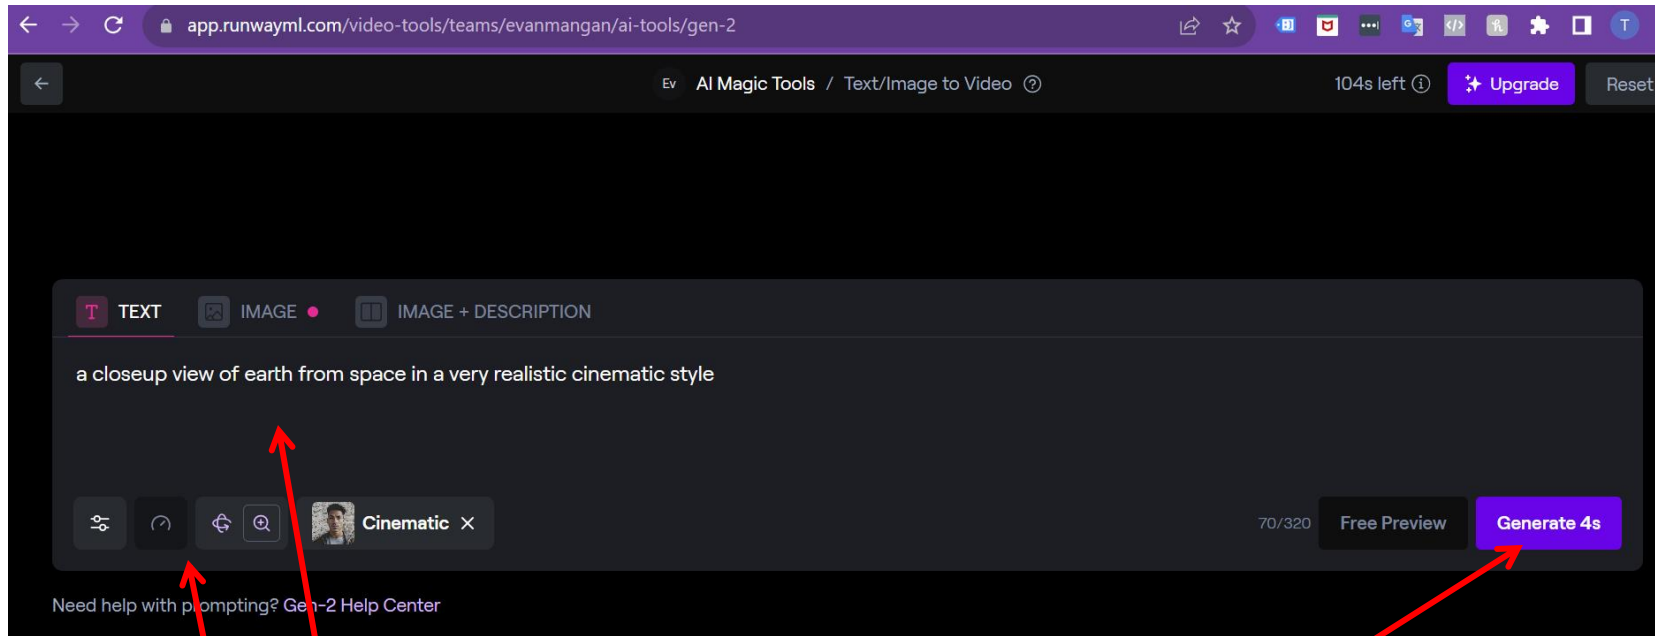

Runway

You can create a video based on an image or based on a text prompt

Note – you have 125 free credits. Each second of a video uses 5 credits

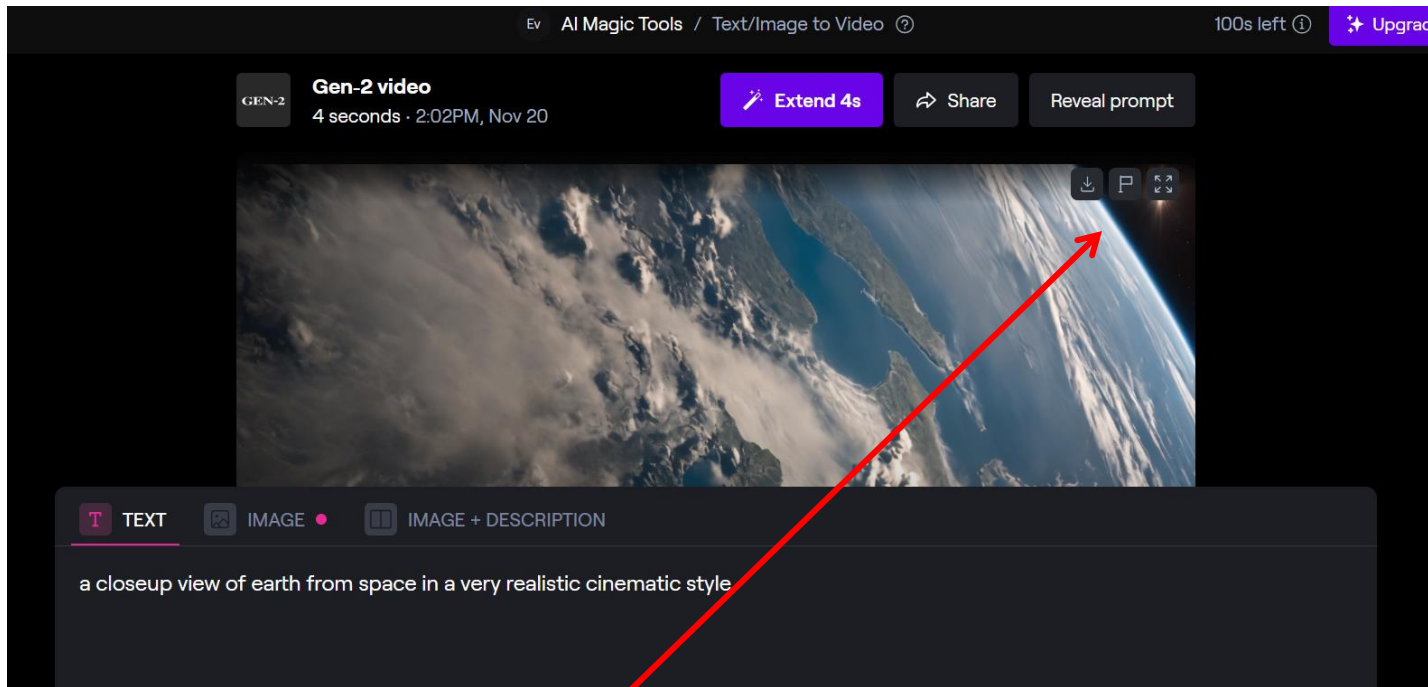

Runway

Write a detailed prompt. Start with what you want to see and then add detail about style eg. Cinematic or 3 d cartoon

You can choose to have the camera pan or zoom in your video. You can also specify the style from a drop down. Also try free preview and it might show you a free image before generating the video (depending on how busy the servers are)

Runway

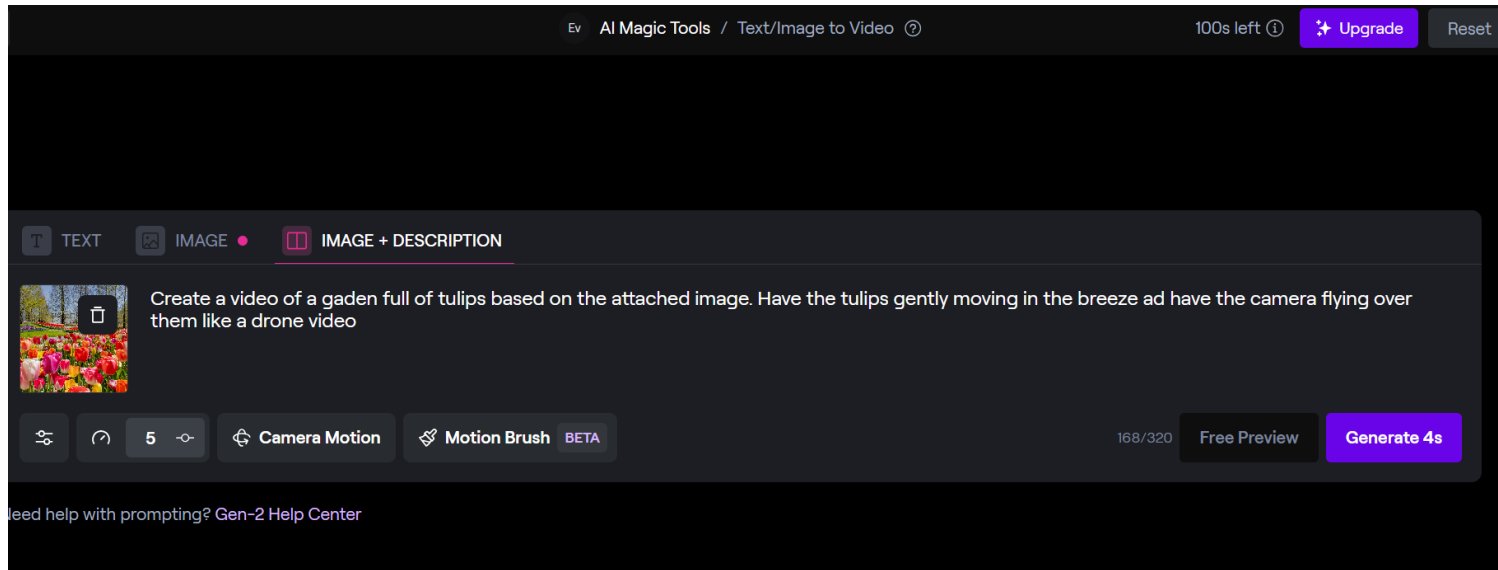

It creates a 4 second video within a minute or two

You can expand to view the video full screen

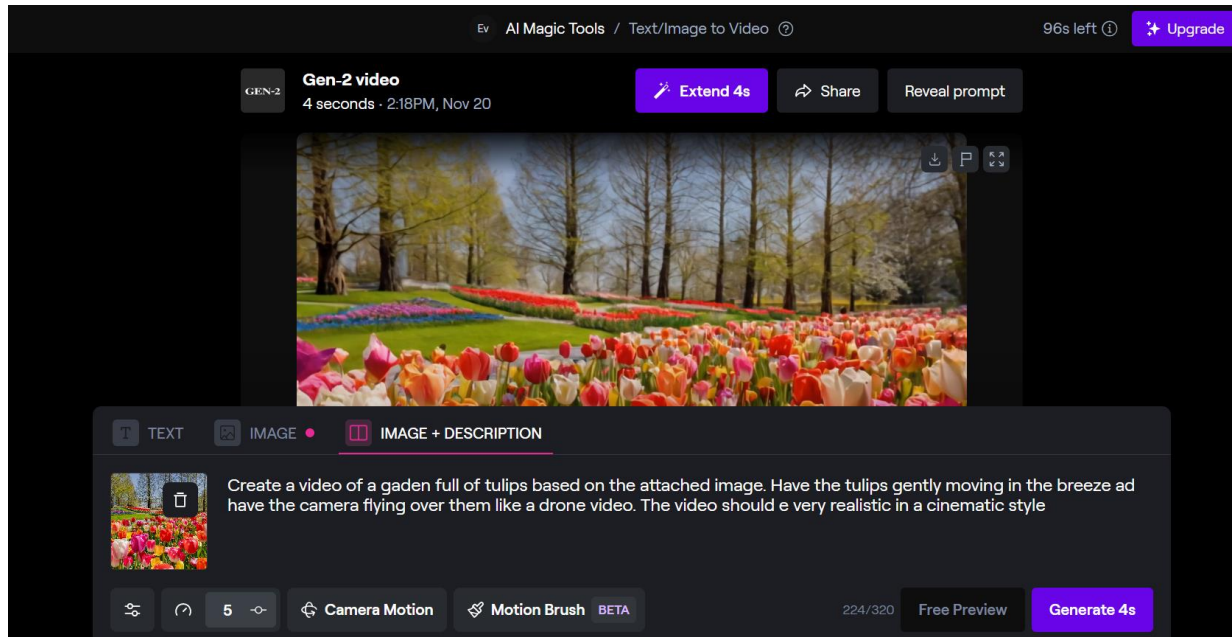

You can download your video

Runway

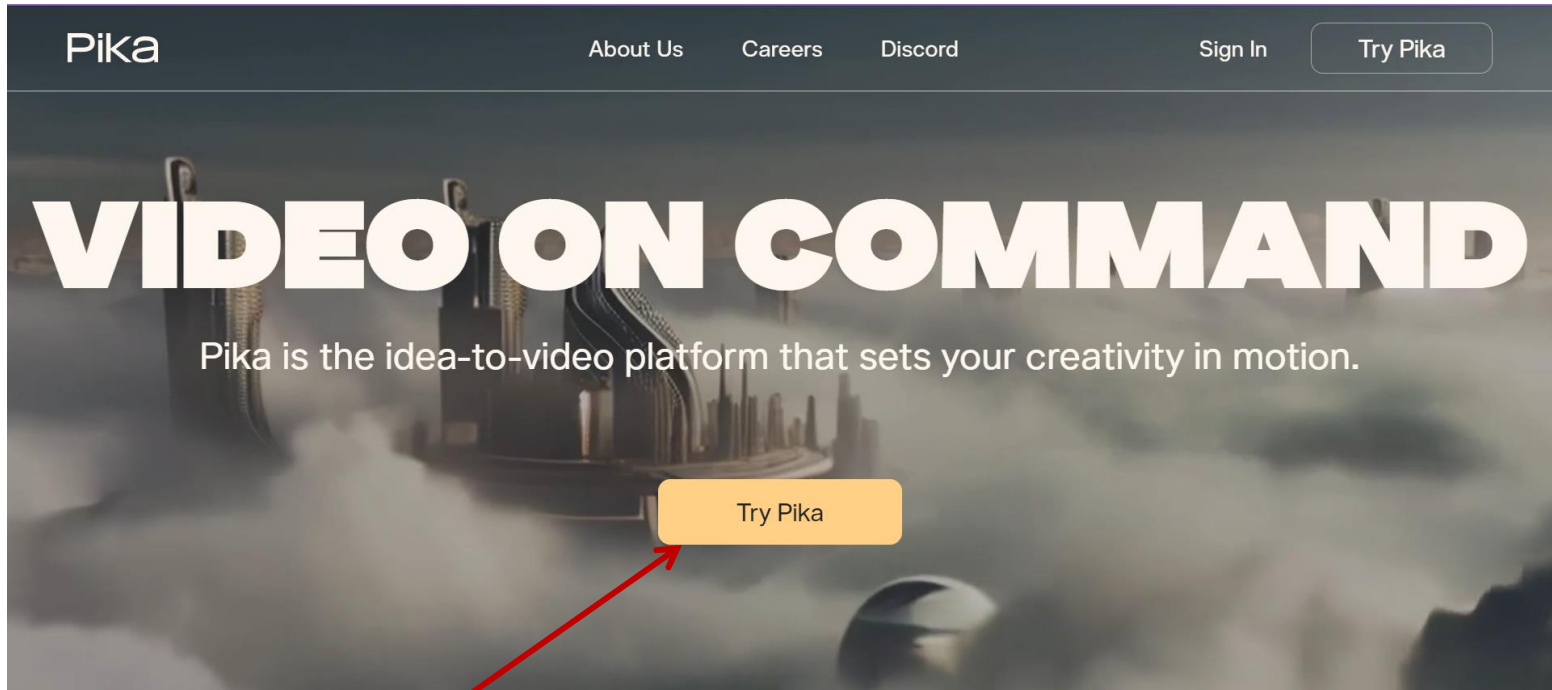

You can also create a video based on an image and text prompt
Select the option for create video based on image
Attach the image
Add your detailed text prompt

Runway

Your video will be created and you can download it.

11 labs - for AI voice overs

How can AI video avatars impact your digital marketing?

Perhaps you want to make ...

- **Educational / training videos**
- **Customer service videos explaining how your product works.**
- **Website videos that explain how your product works**

Currently if you want a person speaking in your video you need have all of the equipment and then shoot the video, including lots of takes

With an AI video Avatar you can choose the person that you would like to speak in your video and provide the text. That AI person will then speak it in the video – no need for recording equipment etc.

The person can also speak it in any language you want.

Synthesia – Create an AI video Avatar who will say what you type

#1 AI VIDEO GENERATION PLATFORM

Turn your text into videos in minutes

- Get natural sounding AI voices in 120+ languages
- Make your videos more engaging with 140+ AI Avatars
- Edit as simply as a slide-deck, no experience required

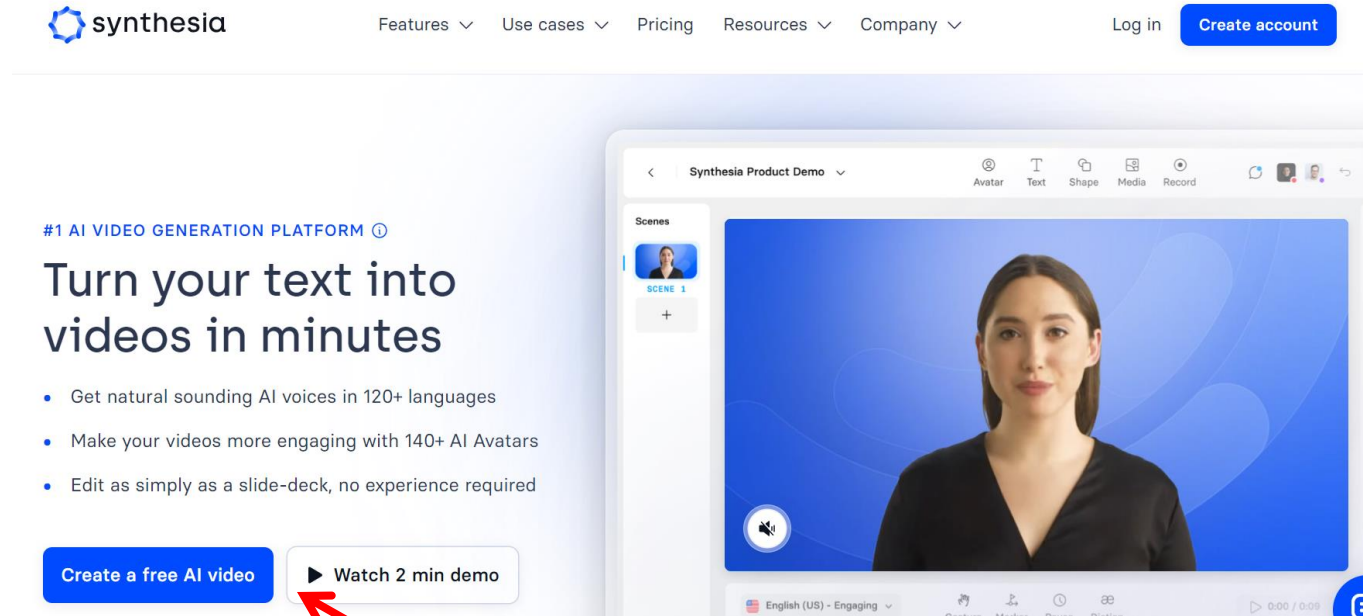

[Create a free AI video](#) [▶ Watch 2 min demo](#)

Would you like someone speaking in your video but you don't want to hire someone or even shoot the video? You can have an AI person (avatar) say what you want in a video

Search for Synthesia.io or click on this link <https://www.synthesia.io/>

AI tools to generate Avatars

Synthesia.io

AI Voice generation tools

11 labs - for AI voice overs

How can AI voices impact your digital marketing?

I think AI Voice creation will lag behind image and video generation but you will start hearing more about it.

1. If you want a professional voiceover for a video

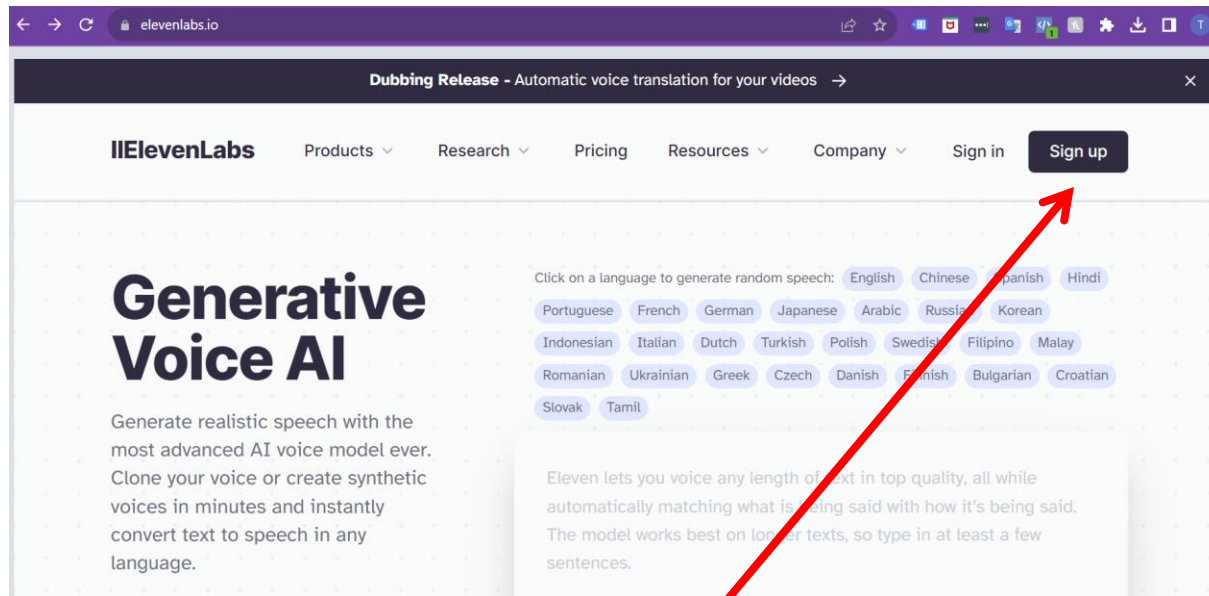

Currently you would either record your own voice and add it as a voiceover in a video or you would commission a voice over artist.

With either of these you would need to re record it in a foreign language if you wanted to

With AI voices you can simply choose a voice that you like, type what you want and it will say it. You can add it to your video

And if you want that voice saying it in a different language it will translate it and say it in any language you want. .

Eleven Labs – Create AI voiceovers

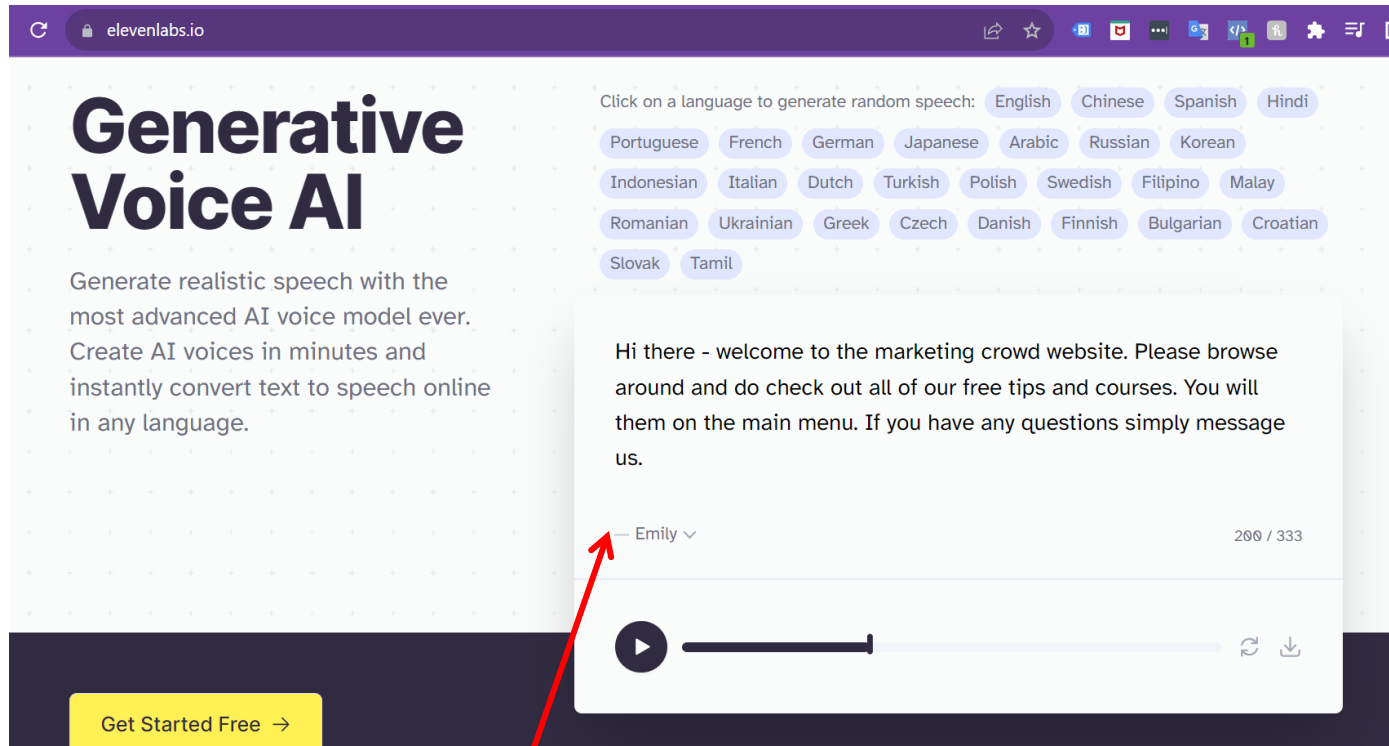

Do you want to generate a professional voiceover for a video?
Or would you like to clone your own voice?

Search for Elevenlabs.io or click on this link <https://elevenlabs.io/>

Signup for a free account and then sign in

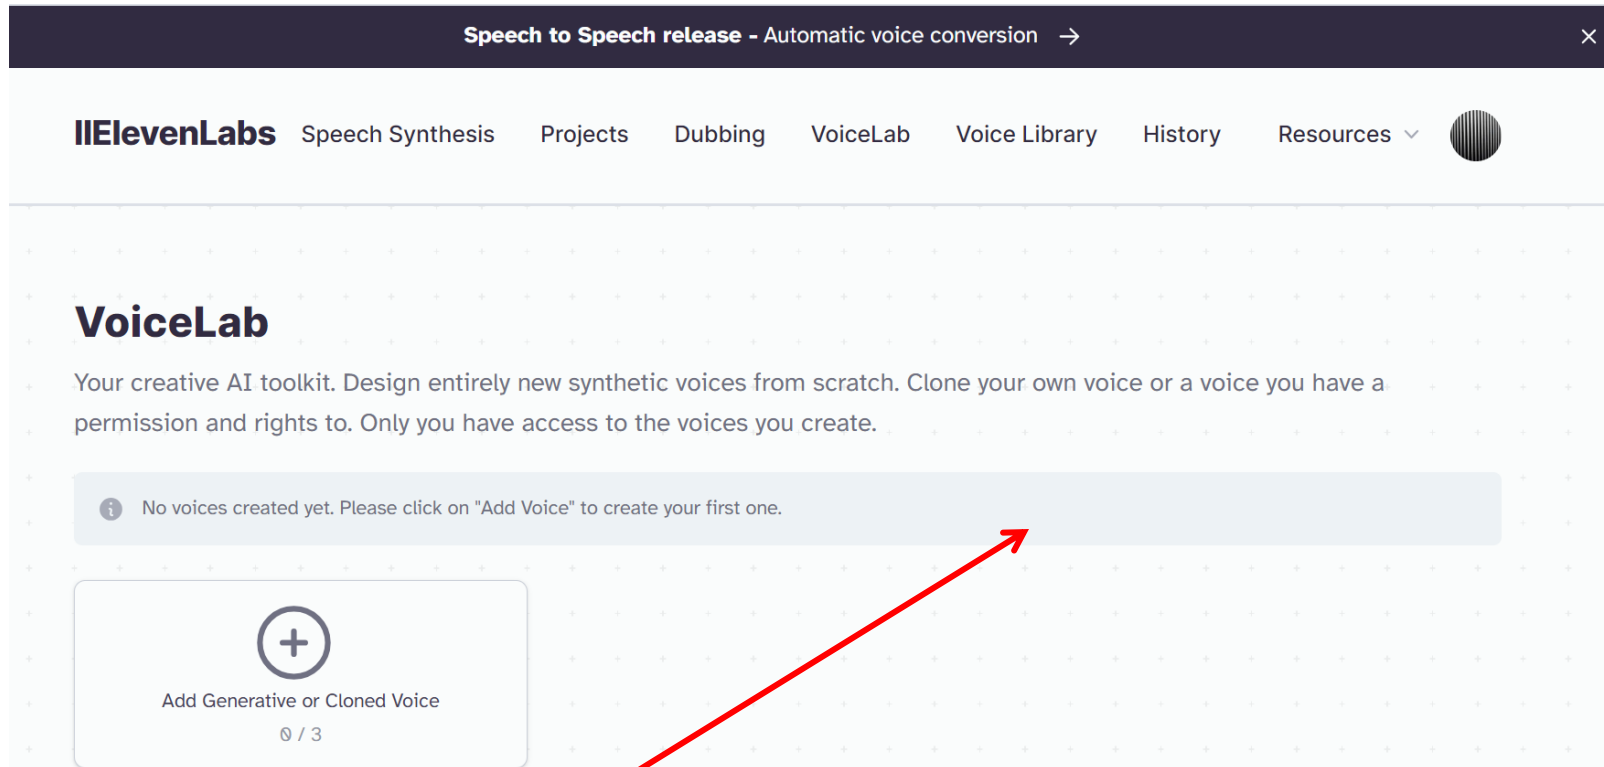

Eleven Labs – Create an AI voiceover

On the homepage you can get a feel for what their AI voices could do for you in terms of a voiceover

1. Choose your language
2. Type what you would like said
3. Then choose a voice from the dropdown and click play.

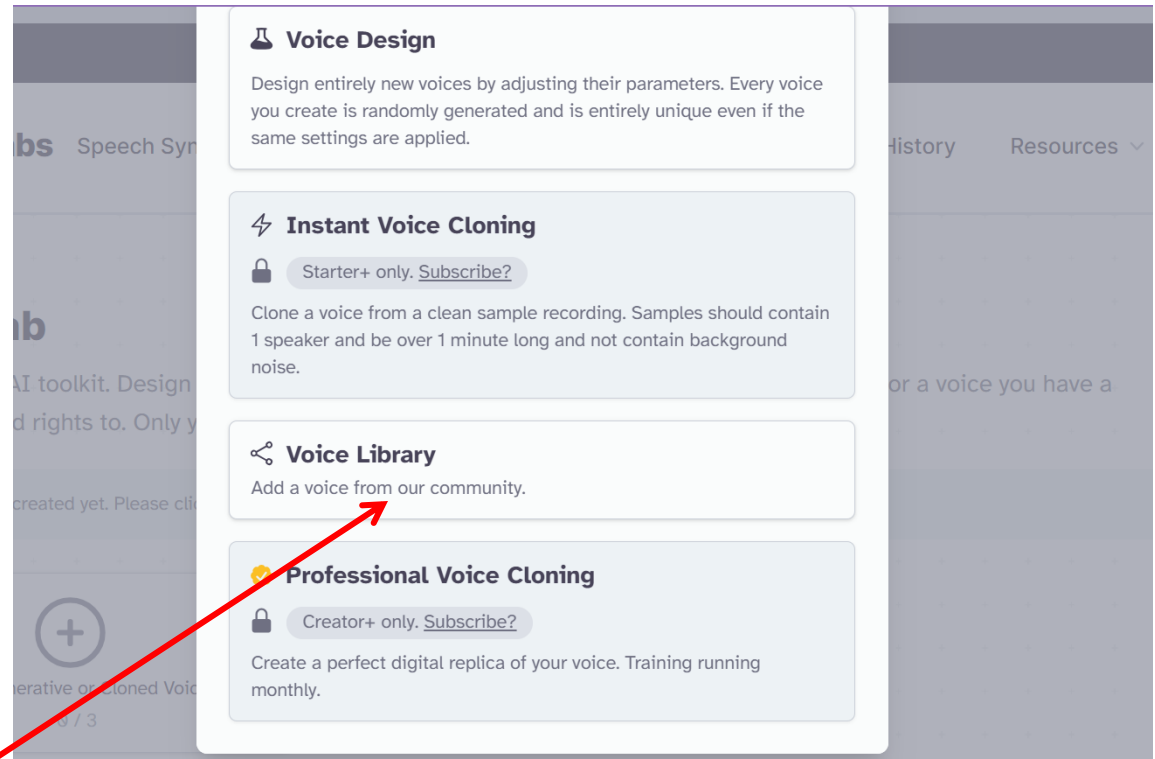

Eleven Labs – Create AI voiceovers

To create a free voiceover ... When you are logged in click on Voice Lab
Click on the +

(note – your free plan allows you to create a voiceover using 10,000 characters per month)

Eleven Labs – Create AI voiceovers

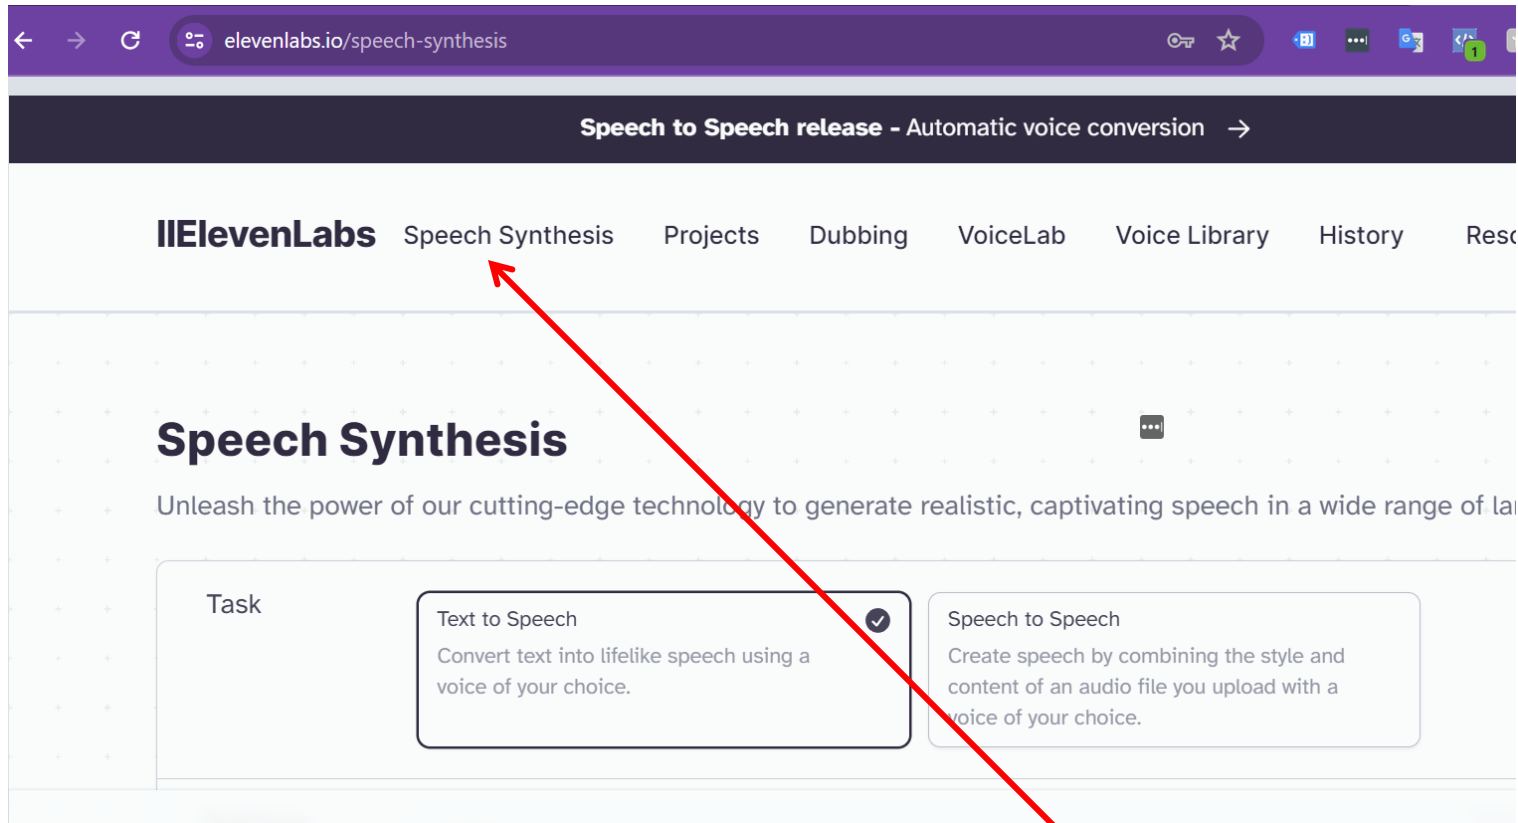

If you are on the free plan you can browse the voice library and create a voice over based on their AI voices

However, you cannot clone your voice using the free plan.

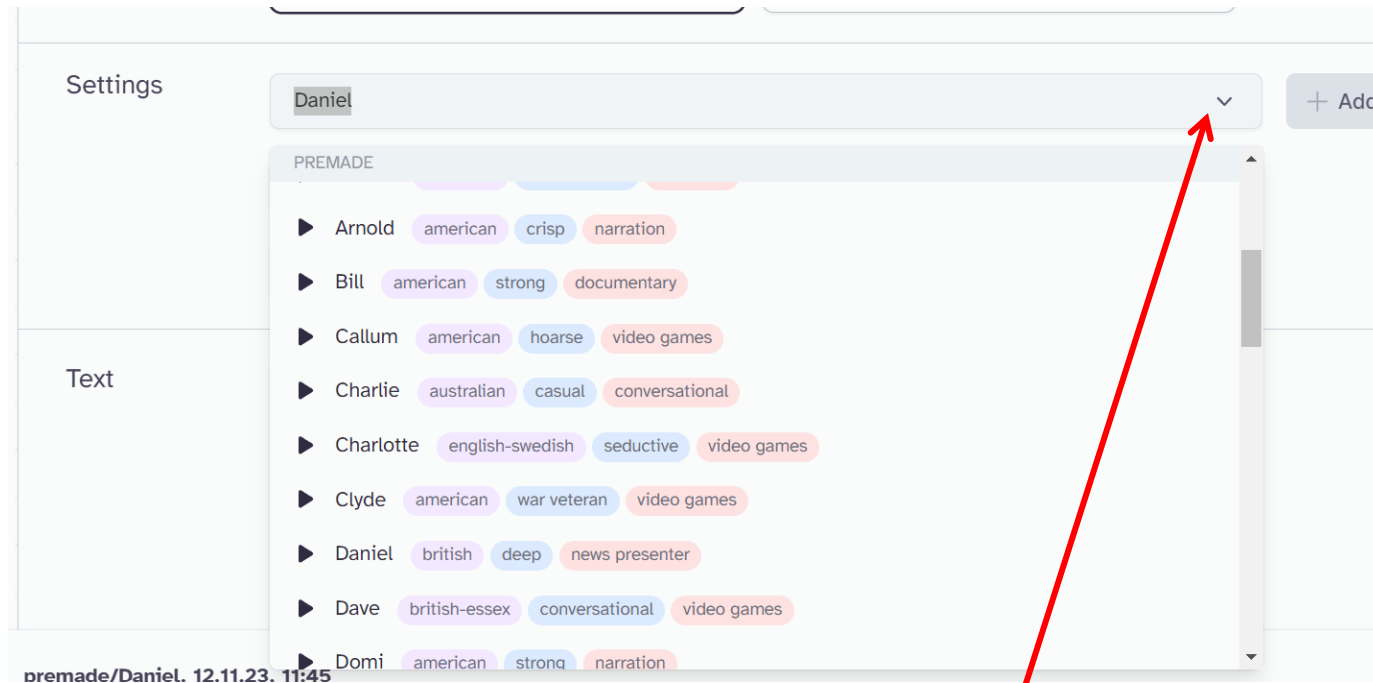

The Starter + plan is \$5 a month and you can clone your voice and use it for 40,000 character a month

Eleven Labs – How to create an AI voice over

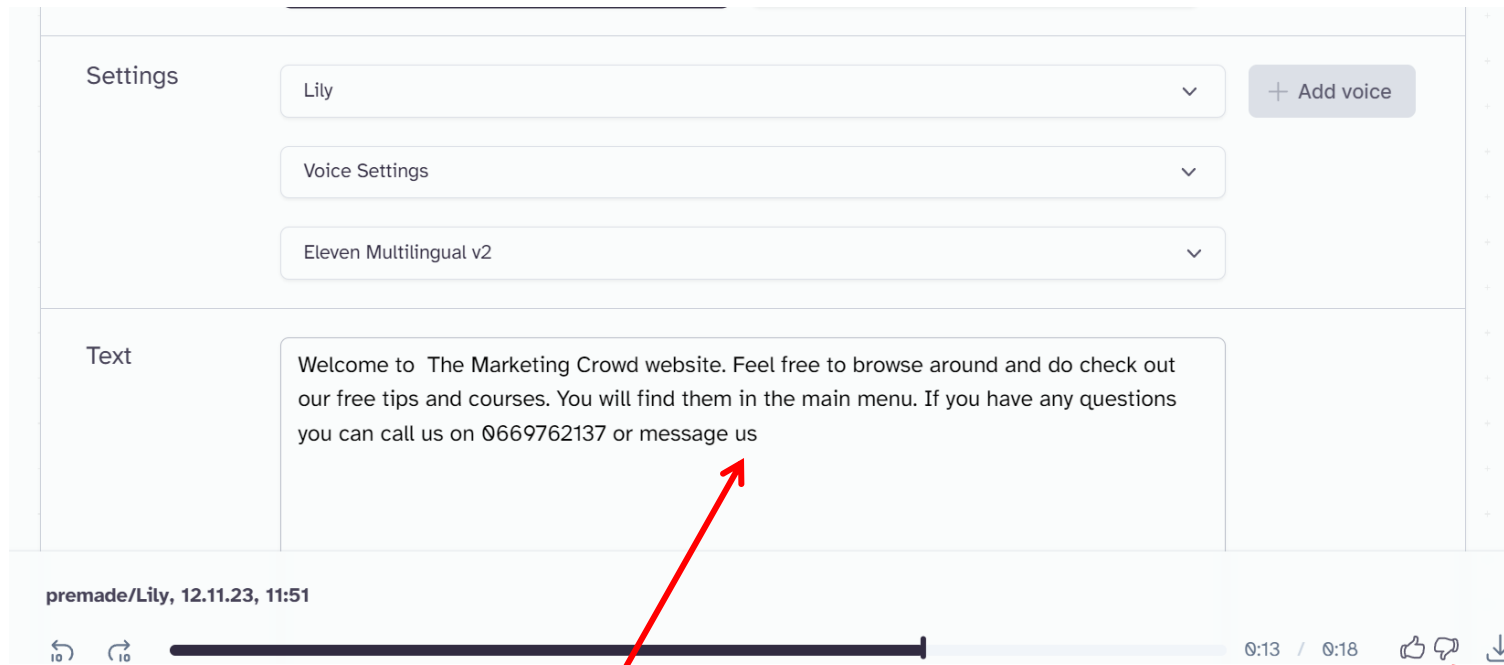

In order to create a Voiceover, login to your account and click Speech Synthesis

Eleven Labs – How to create an AI voice over

Click the dropdown and you can choose a voice based on gender and country

Eleven Labs – How to create an AI voice over

Type in your text and click generate

Then click play to listen to your Voice Over
You can also download it by clicking the download icon
