Over 400 million people use Inshot

It is made by Bytedance - the same company that owns TikTok so there is a lot of integration with TikTok

You can use the app for free and there won't be a watermark on your video

However, they have lots of Pro features and to use those you would need to buy a license

What are the 4 main types of marketing videos for your website & social media

There are 4 big types of marketing videos

1. Testimonials
2. Company promo
3. Product / service videos
4. “How to” videos

Testimonial and Company promo videos are typically made with someone being interviewed

Product or service videos typically have someone speaking directly to camera

“How To” videos typically have someone speaking to camera

But there are others types of videos you could make

Use Chat GPT to generate ideas for your social media videos

Go to chatgpt.com and use the prompt below to get ideas for video where you are speaking directly to camera

Act like a video marketing expert and brainstorm 20 videos I can make for Reels or TikTok for my business which is a landscape artist. These videos will involve me speaking directly to camera

Landscape or vertical?

Ask yourself, why are you creating the video

Is it a “marketing” video created to showcase your business, product, service?

- Examples would be company promo, testimonial, 60 second product or service video
- You would want to have these videos on your website and YouTube ... And also post them on Facebook, LinkedIn and Twitter

Landscape or vertical?

Ask yourself, why are you creating the video.

Example of a landscape video

Any important “marketing” videos like these should be shot and edited landscape because that works best on your website and YouTube.

Plus landscape works well on Facebook, Twitter, LinkedIn

Example of a portrait video

Ask yourself, why are you creating the video?

Is it a “social media” video created primarily to be a social media post?

- Examples would be “How to” videos, helpful tips, short videos about a product or promotion, short video about an event or behind the scenes with staff.
- You are really creating this video to post it on Facebook, Instagram, LinkedIn and Twitter and having it on your website is not that important

If this is the case, you need to ask yourself, which is your most important social network – the one you get most reach and engagement on – and then decide the format based on what works best on that social network

If it is Instagram you should make a Reel which is vertical video

Extra features that will improve your videos

Features you should try ...

Very useful editing features to enhance your video

1. Permanently remove the CapCut logo
2. Add eye catching text using text templates
3. Add captions using very eye catching effects
4. Add bilingual captions
5. Add transitions between clips
6. You can overlay their free stock videos as footage on your video
7. You can remove the background of your video
8. You can retouch (improve the look) of the person speaking
9. You can add effects to the person speaking

Permanently remove the CapCut logo

Whenever you create a video CapCut will place the CapCut logo at the end of your video

You can permanently turn this off so it won't add it for future videos

When you open the app, tap on settings icon top right

Next to Add default ending toggle to switch this off

Add eye catching text using text templates

- Tap on Text in the bottom menu
- If you tap on Add text you can type your text, choose font, colour etc.
- But if you tap on Text templates, you can choose from lots of very eye catching text combinations

Add eye catching text using text templates

- They have different categories of templates – trending, social media etc
- Tap one and it will appear on your video
- Tap a word to then edit the text
- You can then choose where you want it to start and end on your video

Add captions using very eye catching effects

- Tap on text in the bottom menu
- Then tap on auto captions
- Then browse through the captions effects
- Then tap on generate

The captions will then appear on the timeline

Tap on any of the boxed and you can correct the text. You can also adjust the size, font, font colour

Tap on Batch edit and you can see all of the text boxes for easy editing

Add bilingual captions

- You can have a second set of captions appear in a different language
- Tap Bilingual captions
- Choose the language e.g. Spanish
- Tap generate
- The second set of captions will then appear below the first

Add transitions between clips

- You can add transition effects between 2 videos
- Tap the line in between the clips

Then choose a transition effect. You will see a preview of how it looks

- You can also adjust the time length to make the effect last longer or shorter
- You can apply to all clips if you want.

You can overlay their free stock videos as footage on your video

To overlay stock videos on top of your video tap on overlay in the bottom menu

On the top right tap stock videos

You can then search for the type of video you want

You can also choose whether you want videos or images to do with that topic

Select your video

Tap HD

Then add

Then pinch to make your video fill the screen as per previous lesson

You can remove the background of your video

- Tap on your clip in the timeline
- In the bottom menu tap on remove BG
- Then tap auto removal

The background is now removed

Try doing this when you overlay a video of someone speaking on top of another video or image. The background for the person will not be the main video or image

You can retouch (improve the look) of the person speaking

- Tap on a clip on the timeline
- Then tap on retouch
- Then decide if you want to retouch the persons face or body
- When you choose face or body then browse through the various retouching you can do
- When you find one you like you then apply to all clips

You can add effects to the person speaking

- In the bottom menu tap on effects
- Then tap body effects

You can add effects to the person speaking

- Browse through the various categories of effects
- Tap an effect and it will preview it

Try video templates

There are lots of video templates you can try

In the main screen when you open the app tap on templates in the bottom menu

Browse through the different categories.

Tap on a template to view it

Tap use template in order to select your files which will then be added to the template
