To use Google Gemini on mobile ...

There is a Gemini app in the US but not yet released in Ireland. For now You need to use it a browser

1. Do a search on Google for Google Gemini
2. Or go to a browser on your phone and enter the address gemini.google.com

All the features that are in the desktop version are in the mobile version. It's the exact same layout.

Useful features about Gemini (free) – All of this is free

1. You can speak your questions / prompts
2. You can listen to the answers
3. Exporting an answer to a doc or email is very handy if you are creating marketing content
4. Having some images in the answer can be useful
5. You can attach images to the prompt
6. You can create an image
7. You can use multi step reasoning
8. You can integrate with YouTube and Google

Which should you use? Chat GPT or Gemini?

Which?

If you are using the free version of Chat GPT

Use Chat GPT because of custom instructions (they will save you time and you will get more tailored replies)

But if you then want ...

- Ability to analyse an image for your marketing
- Create an image for your marketing
- Speak your prompts on desktop and mobile
- Use multi step reasoning
- Ask questions regarding YouTube videos

I would use Gemini

But for everything else, because of the custom instructions feature I would use Chat GPT more

If you are using the Paid version of Chat GPT

Continue using the paid version of Chat GPT.

Chat GPT Plus is much better because of Custom GPTs . This one feature is worth the money because of the quality of answers it will give you for your digital marketing questions.

But if you want advanced multi step reasoning or integration with YouTube head to Gemini

Microsoft Copilot - Bing AI chat bot

Open AI is the company that created Chat GPT

Microsoft invested \$30 billion in Open AI in order to be able to integrate Chat GPT into all of its products.

Microsoft owns the Bing search engine and in early 2023 it integrated chat GPT into its Bing search engine.

Throughout 2023 the Bing AI chat bot was a version of Chat GPT

In February 2024 it rebranded it to CoPilot

Microsoft Copilot - Bing AI chat bot

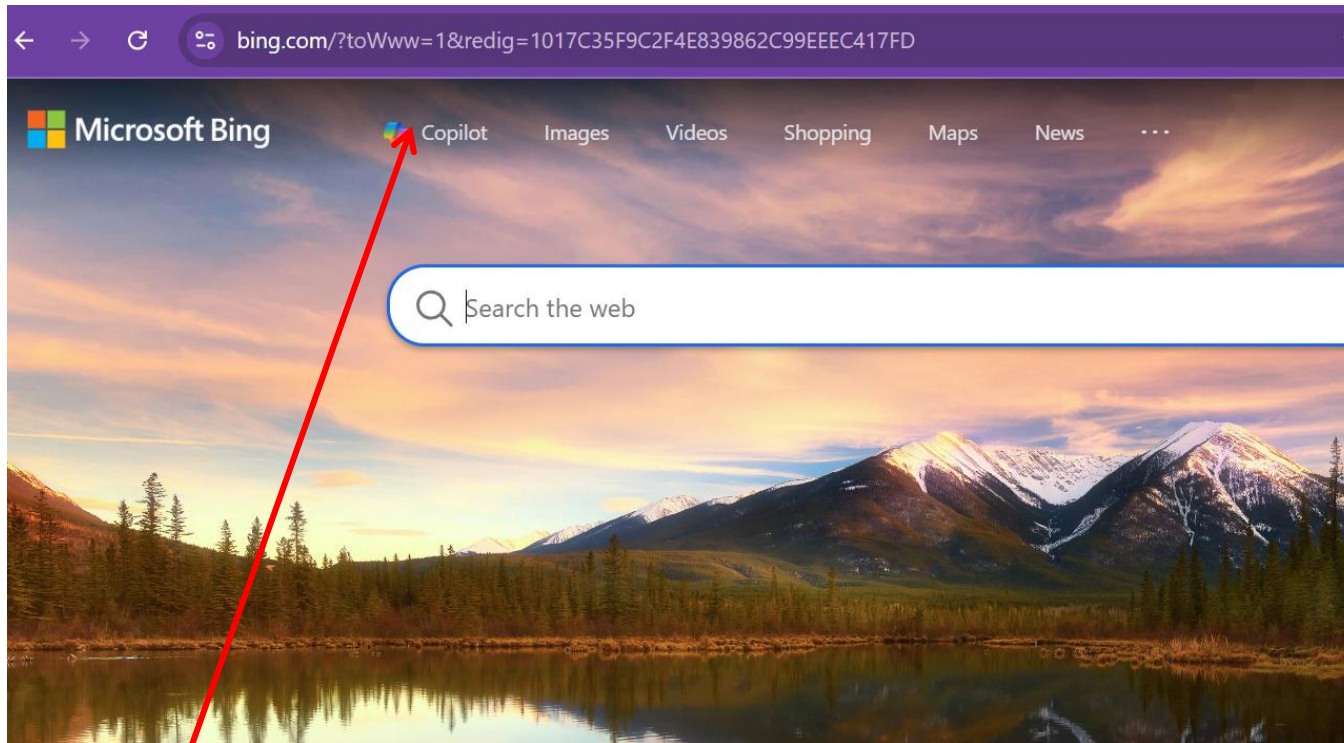

ChatGPT and CoPilot both use OpenAI's tools to work, so they often give very similar answers.

But, CoPilot has something extra - it uses Microsoft's Prometheus system. This system helps it work with Bing Search to find and use information from the internet.

CoPilot is like a helpful buddy for using the web. It can quickly find the newest info from different places on the web and make it easy to understand when you ask it something. It also tells you where it got the info from and gives you a list of useful links and pictures.
