

# HOW TO USE **CHAT GPT** TO IMPROVE YOUR DIGITAL MARKETING

# What we will cover

## Understanding the terminology around AI

### How to get the best results from Chat GPT using prompts

- Effective prompts such as Act As, Summarise, Teach me, Write like me
- What you should know about copyright
- About Memories and how to check what Chat GPT remembers about you
- How to protect your privacy
- How to tailor Chat GPT to you using custom instructions

### Step by Step demo of how to use Chat GPT for different aspects of your digital marketing

- Video marketing – generate topics and scripts you can work to for Reels / TikTok
- Social media posts – get ideas and initial drafts of posts
- Marketing emails – generate email marketing topics, initial drafts and subject lines
- Website content – generate headlines, call to actions, different options for page text
- Search GPT

### How to access Chat GPT on mobile

#### Demo of Chat GPT 4 (Plus)

- GPT vision – interact with images
- GPT Video vision – it can see through your camera and ask real time questions
- Attach files – it will become an expert in the file and you can ask questions
- Image creation - describe an image and it will create it for you
- Deep research
- Projects
- Custom GPTs

# What are Large Learning Models? (LLMs)

Large Language Models are like super-smart computers that try to understand and talk like humans.

**Super-Smart Computer Robots:** Think of them as a computer program that's really good at using words, reading stories, and even writing like a person does.

**Built Like a Brain:** Inside, they are built using something called neural networks. This is a fancy way of saying they're designed like a human brain, using connections called "artificial neurons."

**Learning from Everything:** They learn by reading tons of stuff like books, websites, and even what people are saying online. The more they read, the smarter they get.

**Practice Makes Perfect:** Just like you might practice a sport to get better, these computer programs keep learning and practicing with more and more information. They keep getting better at understanding and using words the more they practice.

# What is Generative AI?

Generative AI refers to a type of artificial intelligence that has the ability to **generate** new data that is similar to the data it was trained on.

It can create original content, such as images, text, audio, or even videos, without direct human input.

Generative AI uses advanced algorithms, typically based on deep learning models to understand patterns and relationships in the training data.

During the training process, the model learns to generate new data that resembles the examples it has seen. For example, if it was trained on a dataset of cat images, it could produce new images of cats that look similar to real cats.

One of the fascinating aspects of generative AI is its ability to create content that didn't exist before. It can be used in various creative applications, like generating artwork, music, or even writing stories.

# Chat GPT is both an LLM and generative AI

**Chat GPT falls under the category of both a large learning model and generative AI, combining its extensive language understanding with the ability to generate text.**

**Large Learning Model:** GPT is a large learning model . Which has 175 billion parameters, making it one of the largest language models in existence. This vast number of parameters allows GPT to process and understand language with remarkable complexity and accuracy.

**Generative AI:** GPT is also an example of generative AI because it can generate new and original text based on the patterns it learned during training. When you interact with GPT and ask it questions or provide prompts, it generates responses that are not pre-programmed but rather generated on the spot by the model.

# Chat GPT launched in November 2022

When it launched in November 2022, Chat GPT3.5 became the first Generative AI tool that

1. Was very easy for consumers to interact with. It has a simple interface and it's easy to ask and receive information
2. Chat GPT 3.5 was trained on 175 billion parameters making it the most sophisticated generative ai tool

Consumers had never experienced an AI tool that was humanlike in the quality of its answers

The free version is now Chat GPT 4

# Example – Very useful things you can ask Chat GPT to do

EV please summarise the main points in the book how to win friends and influence people

"How to Win Friends and Influence People" by Dale Carnegie is a timeless self-help classic that provides practical advice on improving social interactions, building relationships, and enhancing communication skills. Here are the main points from the book:

## 1. Fundamental Techniques in Handling People:

- Avoid criticism and condemnation, and instead offer genuine appreciation and praise.
- Give people a sense of importance and let them feel valued.

## 2. Six Ways to Make People Like You:

- Show genuine interest in others and actively listen to them.
- Smile and create a pleasant atmosphere.
- Remember and use people's names.
- Be a good listener and encourage others to talk about themselves.
- Talk in terms of the other person's interests.
- Make the other person feel important and respected.

Regenerate

## 3. How to Win People to Your Way of Thinking:

Ask chat GPT to

Provide a travel itinerary for an upcoming trip

eg. I am visiting Dublin on a 4-day trip spending 3 nights in a city centre hotel. Can you provide me with an itinerary recommending the best places to visit and eat - I have an interest in food, music and history

# Example – Very useful things you can ask Chat GPT to do

Absolutely! With those ingredients, you can whip up some delicious and quick meals. Here are a few ideas for meals you can make in around 20 minutes:

- 1. Cheesy Ham and Tomato Omelette:**
  - Whisk 2-3 eggs with a splash of milk.
  - In a non-stick pan, sauté diced ham, chopped tomato, and finely chopped onion until they're slightly softened.
  - Pour the egg mixture over the sautéed ingredients and cook until the edges set.
  - Sprinkle grated cheese over one half of the omelette, fold the other half over the cheese, and cook until the cheese melts.
- 2. Tuna Pasta Salad:**
  - Cook pasta according to package instructions and drain.
  - In a bowl, mix together drained tuna, chopped tomato, diced onion, and cooked pasta.
  - Drizzle with olive oil and a splash of milk for creaminess.
  - Season with salt, pepper, and any herbs or spices you like. Mix well and serve.
- 3. Creamy Ham and Cheese Pasta:**
  - Cook pasta according to package instructions and drain.
  - In a pan, sauté diced ham and finely chopped onion until the onion is translucent.

Ask chat GPT to

Provide a list of jobs that your child who is going to college could consider after they graduate

Eg. My son is in his final year of a maths degree. He would like to get a job with a big company but doesn't know what type of job he can get as a maths graduate. Can you suggest 20 great jobs for maths graduates? Can you also explain 3 pros and cons of each job, 5 things someone would do a typical day and the usual starting salary for a graduate in Ireland

Then:

Can you now rank / prioritise these? He wants a job where what he does is measurable, where he can work in any country and pays well after 5 years. Include the typical salary after 5 years

# Ways people are using Chat GPT

## People are using Chat GPT to ...

- Generate a meal plan
- Generate a best man wedding speech
- List and explain the pros and cons of a big decision you have to make
- Generate song lyrics
- Learn new skills
- Learn a language
- Get birthday gift suggestions eg. for an uncle or a 5 year old girl
- Prepare for a trip
- Generate recipes
- Write a job application for a specific type of job
- Understand what interview questions you could be asked for a specific job
- Learn how to answer specific interview questions for a job
- Summarise books
- Write a story or the outline of a story-based elements that you specify

# Ways businesses and marketers are using Chat GPT

## **Businesses are using Chat GPT to**

- Write blog posts
- Review / summarise and improve website text
- Generate call to action ideas
- Generate special offer ideas
- Create advertising headlines and slogans
- Generate legal-style letters
- Write emails for customers and prospects promoting your product or service
- Generate Google ad copy
- Generate video scripts
- Analyse competitors reviews
- Analyse your own reviews to see what your perceived strengths and weaknesses are

# There is a free and paid version of Chat GPT

## Chat GPT 4 which is free

- It has no knowledge of events after August 2023
- It can access web pages to get more up to date info

Chat GPT 4 Plus which costs €20 / month

## Chat GPT 4 plus gives you ...

- The data it was trained on is much larger so results are more comprehensive.
- It can create images using Dalle
- You can attach images and ask questions about the images
- You can attach a file eg. Pdf, word doc, image and it ask it to analyse / summarise it
- You can create custom GPTs

# There are 4 versions of Chat GPT 4 Plus

Within Chat GPT 4 (Plus) there are 4 versions

**GPT-4o** : Labelled as "Best for complex tasks." This is a version of GPT-4 optimized for more complex queries and tasks.

**GPT-4o mini**: This is described as "Faster for everyday tasks," – it offers quicker responses suitable for less complex or more routine tasks.

**GPT-4 (Legacy model)**: This is the original version of GPT-4, - it is an older version and is the free version

GPT 4o1 – most recent model which they say uses advanced reasoning for maths, programming

GPT 4o mini – most recent model which they say uses advanced reasoning for maths, programming but its a quicker version

# There are 5-6 important prompts you should use

When you ask Chat GPT something it is a prompt

If your prompts are poor you won't get as much out of Chat GPT

A prompt can be a question, a phrase, or several paragraphs. The more specific the prompt is, the better the response.

Writing the perfect prompt — prompt engineering — is critical to ensure the Chat GPT response is not only factually correct but crafted exactly as you intended to best deliver information to a specific target audience.

# So, what are the main types of prompts you should be aware of

## Act as

In this type of prompt, you instruct ChatGPT to respond as if it were a specific person, character, or entity.

Example: “Act as a recruitment expert and explain 10 pitfalls to avoid when hiring a social media manager”

The content will be written in a more expert voice and will have more detailed expertise

Example: Act as Donald trump and explain to me how to be successful in business “

The content will be in Donald Trump’s tone and language

EV

Act as Donald trump and explain to me how to be successful in Business

Look, let me tell you, being successful in business, it's really something tremendous. Believe me, I've done tremendous things in business, okay? So, here's what you gotta do to be successful, just like me, Donald Trump:

1. **Think Big, Always Big:**

You've got to think big, I mean really big. No small potatoes here. You want to build a business empire, right? So dream big, set your sights on the top, and never settle for less

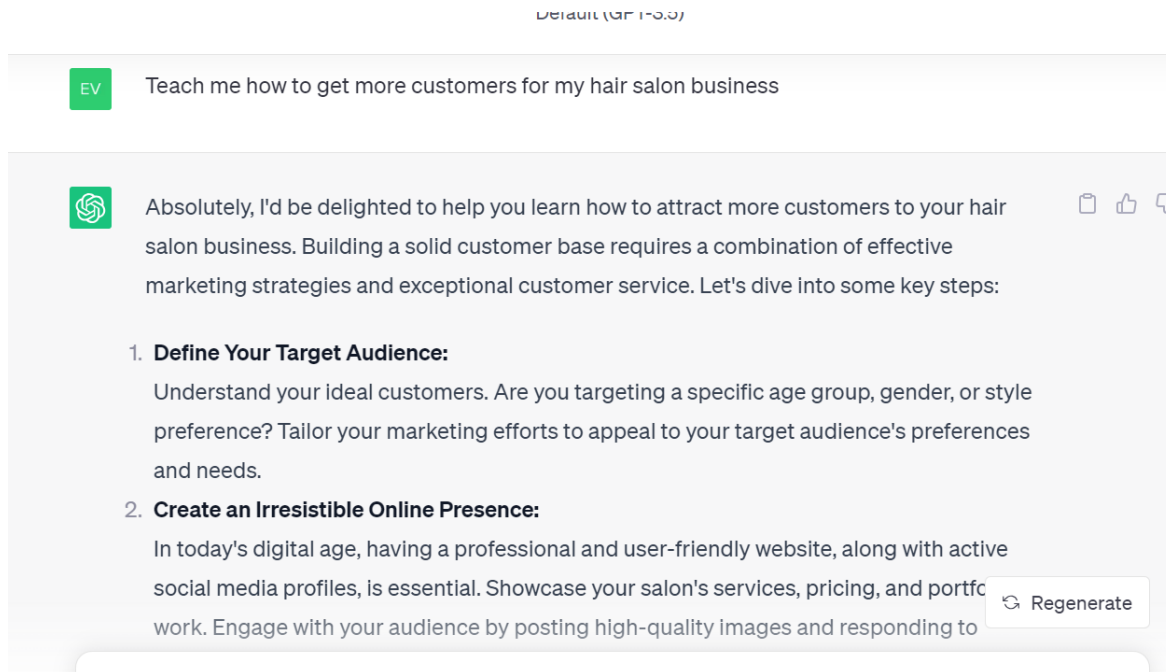

2. **Dealmaker Extraordinaire:**

I'm a master of the art of the deal, and you should be too. Negotiation is key. Always be

Delve deeper into one of the points Chat GPT has given you. For example

Can you give me a step-by-step guide to building an irresistible online presence for my hair salon business?

Then ask it about other points and you will get more detail.

# So, what are the main types of prompts you should be aware of

## Brainstorm Ideas:

Explanation: Ask ChatGPT to brainstorm ideas on a given topic.

Example: “Brainstorm unique business ideas for a startup in gardening industry.”

Then delve deeper. Eg.

“Can you explore the idea of gardening workshops for kids. Can you give me a list of 10 topics I could cover in the workshops?”

# So, what are the main types of prompts you should be aware of

## Summarize:

Prompt ChatGPT to condense a larger piece of content into a shorter, concise summary.

Example:

summarise the top 10 points in this article summarise the main points in this article:  
<https://www.un.org/en/climatechange/science/climate-issues/biodiversity>

# So, what are the main types of prompts you should be aware of

Here are some example of blog posts I have written. I am adding these so you can understand my writing style: Example blog posts I have written – for write like me

Did you know that Instagram has been quietly removing some accounts' Posts and Reels from appearing in hashtag results or in the Explore Page. Basically, it stops the content being recommended to non-followers if it thinks that you have not followed their guidelines. An example of not following guidelines would be using popular but not relevant hashtags. The process was called 'shadow banning' – you wouldn't be told by Instagram but you might notice less reach or

Free Research Preview. ChatGPT may produce inaccurate information about people, places, or facts. ChatGPT August 3 Version

Based on the examples you've provided, your writing style is informative, concise, and straightforward. You provide practical tips and advice in a step-by-step manner. Here's a summary of your writing style based on the examples:

1. **Informative and Actionable:** You provide valuable information that readers can use to enhance their social media presence and marketing strategies.
2. **Step-by-Step Guidance:** Your blog posts often include clear and easy-to-follow steps or instructions, making it simple for readers to implement your suggestions.
3. **Highlighting New Features:** You alert readers to new features or tools on platforms like Instagram, Facebook, and LinkedIn that can benefit their marketing efforts.
4. **Use of Examples:** You illustrate your points with examples, such as mentioning specific tools or apps, which helps readers understand how to apply the information.
5. **Benefits Emphasis:** You emphasize the benefits of the tools or strategies you discuss, explaining how they can save time, enhance content quality, or improve engagement.

# Chat GPT

Free and paid users have Memory activated on their account

ChatGPT's memory feature allows it to store and recall information across multiple conversations, enhancing personalization and continuity in interactions.

ChatGPT can automatically add memories when it deems information relevant. It stores about 1,200-1,400 words of memories in total, organized chronologically. The AI can recall these memories in future conversations, eliminating the need to repeat information

This means

- Something you told it in a previous chat will be remembered in this new chat
- You can give it examples of your writing, ask it to describe the style and then tell it to remember that this is your writing style
- You can tell it to remember that whenever you ask for recipes that you do not eat meat

# Chat GPT

Free and paid users have Memory activated on their account

## You can manage this memory feature

Users have control over ChatGPT's memory: You can explicitly tell ChatGPT to remember or forget specific information<sup>3</sup>

Memories can be viewed, edited, or deleted in Settings > Personalization > Memory > Manage<sup>1</sup>

You can then review all the memories and delete any that you don't want

The memory feature can be toggled on or off in settings<sup>2</sup>

# Chat GPT

## Launch of Search GPT

ChatGPT 4o ▾

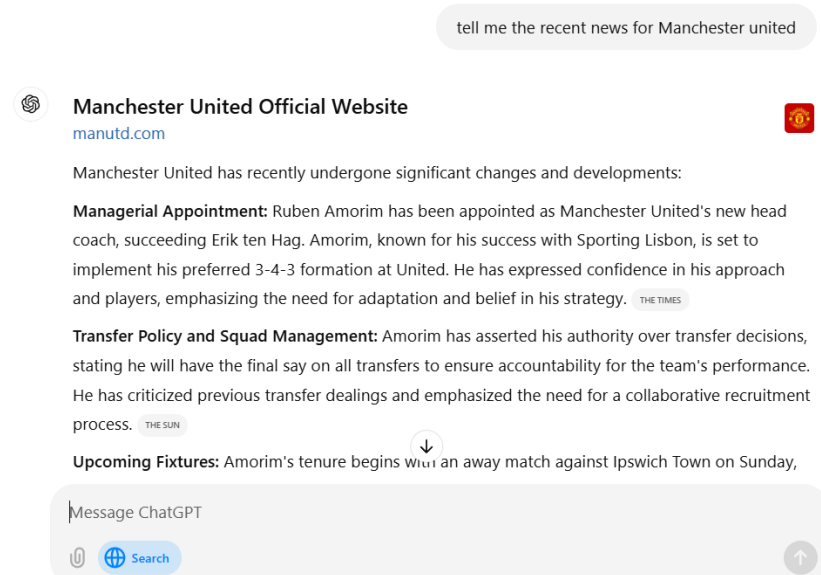

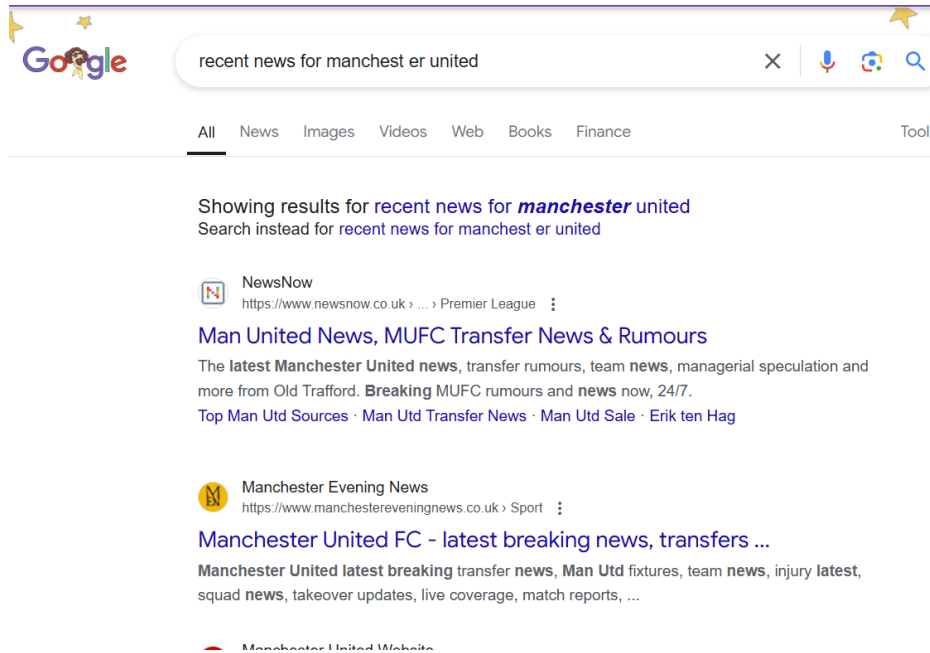

What can I help with?

When you click the Globe icon you are now using Search GPT

# Chat GPT

## How Search GPT compares to Google search

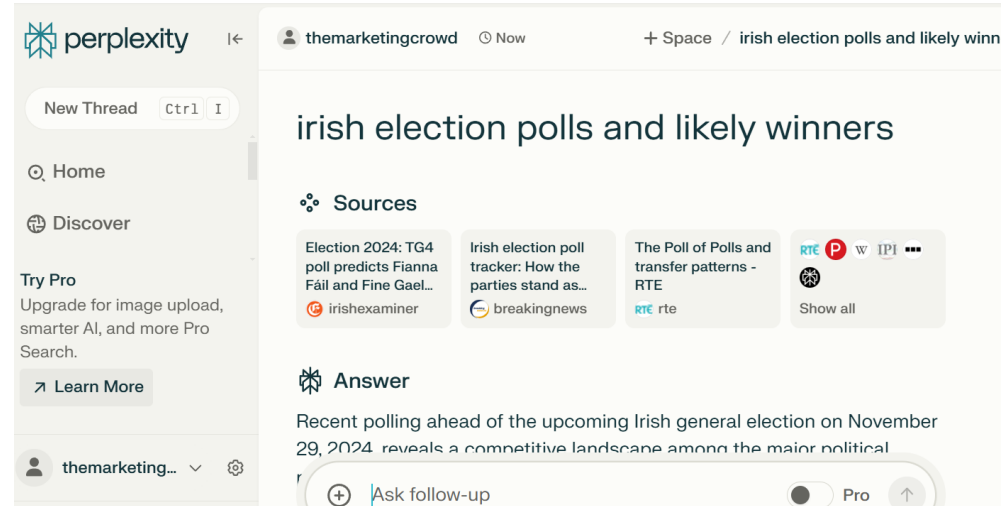

### When I ask Google or search GPT for the latest news on Manchester United

Google – gives me lots of links to articles that I have to read myself

Search GPT goes off, synthesises all the information into an answer and gives me links if I want to read them. **This is a MUCH better experience**

# Chat GPT

Search GPT is similar to Perplexity but not as advanced as Perplexity yet

**When I ask search GPT or Perplexity.ai for “Irish election polls and likely winners”**

Search GPT goes off, synthesises all the information into an answer and gives me links if I want to read them.

Perplexity does the same but it's a better answer the way it is structured and the follow-up questions it suggests

# Chat GPT

## How Search GPT compares to a normal Chat GPT search

### Irish election polls and likely winners

As of November 23, 2024, Ireland is approaching its general election scheduled for November 29. Recent opinion polls indicate the following standings among major political parties:

- **Fine Gael (FG):** Approximately 24% support, maintaining a lead over other parties.
- **Fianna Fáil (FF):** Around 20% support, closely trailing Fine Gael.
- **Sinn Féin (SF):** Approximately 18% support, experiencing a decline from previous highs.

BREAKING NEWS

These figures suggest a competitive race, with Fine Gael holding a slight advantage. However, the fragmented support indicates that forming a majority government may require coalition negotiations among parties.

It's important to note that opinion polls are snapshots of current voter intentions and can change as the election approaches. The actual election outcome will depend on various factors, including voter turnout and final campaign efforts.

Message ChatGPT

ChatGPT can make mistakes. Check important info.

If you are using the paid version of Chat GPT and you ask a question, if it thinks it would be better answered using Search GPT it will.

Therefore you don't actually need to click the globe icon

For example, I asked the same question about the Irish election in the normal prompt box but it gave me the search GPT answer with links to the relevant sources

# Chat GPT

## Chat GPT versus Search GPT – the best way to think about it

### A generative AI tool like free Chat GPT / Gemini ..

#### Is great for

- Brainstorming ideas
- Creative writing
- Summarising lots of information
- Researching a topic that isn't very latest news
- Getting expert level advice eg. How to grow your sales, how to use Instagram

#### However ...

Sometimes hallucinates

Doesn't always access up to date information

Not that good for latest news developments

### An AI search tool like Search GPT or Perplexity

#### Is great for

- Up to date news and information eg. Current affairs, sport, finance, business, digital marketing. Any type of news information
- It will synthesise all the information across websites into an excellent summary answer and then you can read sources if you wish
- Getting recommendations for products or services and then following up with questions

# What we will cover

## Understanding the terminology around AI

### How to get the best results from Chat GPT using prompts

- Effective prompts such as Act As, Summarise, Teach me, Write like me
- What you should know about copyright
- About Memories and how to check what Chat GPT remembers about you
- How to protect your privacy
- How to tailor Chat GPT to you using custom instructions

### Step by Step demo of how to use Chat GPT for different aspects of your digital marketing

- Video marketing – generate topics and scripts you can work to for Reels / TikTok
- Social media posts – get ideas and initial drafts of posts
- Marketing emails – generate email marketing topics, initial drafts and subject lines
- Website content – generate headlines, call to actions, different options for page text
- Search GPT

### How to access Chat GPT on mobile

#### Demo of Chat GPT 4 (Plus)

- GPT vision – interact with images
- GPT Video vision – it can see through your camera and ask real time questions
- Attach files – it will become an expert in the file and you can ask questions
- Image creation - describe an image and it will create it for you
- Deep research
- Projects
- Custom GPTs

# How to access Chat GPT using a mobile app

**However, when using Chat GPT on your phone it is much better to install the app.**

There is now an app for both iPhone and android phones.

A major advantage when using the mobile app is that you can speak your prompts rather than have to type them

Simply tap the microphone and speak.

If you have the paid version of Chat GPT you also get enhanced voice

# Demo of Chat GPT 4 plus (Paid version)

Chat GPT 4 is free

Chat GPT 4 Plus costs €20 / month

**What do you get if you upgrade? ...**

# You can interact with images using GPT vision using GPT pro

ChatGPT 4 ▾

Just over half of the recommended daily calorie intake for an average adult.

You

what is this and where is it?

ChatGPT

The image shows a statue of a goat with the inscription "KING PUCK" on the base. This statue is located in Killarney, County Kerry, Ireland. It represents King Puck, the symbol

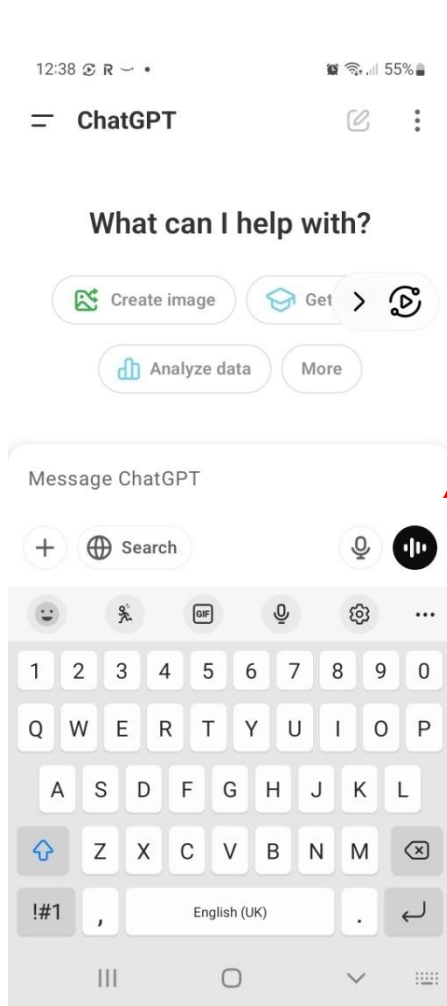

Message ChatGPT...

You can attach an image to your prompt and ask GPT questions about it. For example ..

- A photo that you take on holiday – tell me about this place
- A photo of a cable you find a drawer – what is this and what is it used for?
- A photo you take ask for it to be critiqued and how could you improve the composition
- A drawing you made – ask GPT to analyse it
- A maths problem to solve
- A photo of your dinner – how many calories in this
- A photo of items in your fridge – what could you make for dinner

# On mobile only you can use enhanced voice with Video

When you are using the app tap on the enhanced voice icon

Then tap on the video icon

Chat GPT can now see what your camera can see and you can ask it questions in real time and you can get feedback form Chat GPT

For example: Ask it for advice on

- a maths problem
- The lighting setup for a marketing video you are recording
- The new layout of your shop window
- How to use some new equipment (Gimbal / Microphone) you have bought

# You can attach files and ask GPT to analyse the contents

You can attach a pdf, word or excel and ask it to analyse the contents. For example ...

- Attach a transcript from a Zoom meeting and ask it to summarise the main points
- Attach a CV and ask it to highlight the strengths and weakness of the CV
- Attach a spreadsheet and ask it questions about the data

# Create images using text prompts

Image creation is built into Chat GPT so when you are using the paid version you simply ask it to create an image

If you have the free version, you can ask it to create 3 images per day

What Dalle within Chat GPT produced for an easy request

## **A Blue Ceramic Vase with Yellow Tulips**

When I simply asked for an image with a blue ceramic vase with yellow tulips this is what was produced.

# Sora – create videos just by describing them

Chat GPT launched Sora in the US and many other countries just before Christmas and it rolled out to Ireland last week.

It is so much better than any of the other text to video tools I have used. It is currently only available to paid users and to use it you have to go to [www.sora.com](https://www.sora.com) and login with your Chat GPT login.

You can then type in your prompt describing the type of video you want. You can choose the shape (landscape / portrait / square) , the length (currently 10 seconds max) and how many versions you want (up to 4). You can also attach an image and it will turn the image into a video and that feature is excellent.

# Scheduled tasks

If you have the paid version of Chat GPT, click on the dropdown to choose the AI model and you will see GPT 4 with scheduled tasks (beta). In the prompt box you can then ask it to do a task at a specific time and whether it is recurring. For example,

I have currently setup these scheduled tasks.

- Every evening at 9pm update me on all the news from that day about Open ai, Gemini, Microsoft Copilot, Anthropic, Meta ai, Deepseek, Runway, Pika labs.
- Every Friday at 9PM update me on all the news from that week about Instagram, Google Search, Facebook, TikTok, LinkedIn

I then get an email at that time and when I click the link it takes me into the update on Chat GPT

# Scheduled tasks

You could use this in lots of ways personally and for your business. Here are some suggested tasks you could ask it to do to help your digital marketing

- Give me 3 social media post ideas for my hair salon every morning at 8 AM.
- Every Friday morning at 9AM remind me to email this weeks customers asking them to leave a review on our Google profile
- Every Monday morning at 9AM send me an update on any of my competitors who have been in the news in the past week (list all your competitors)

# Deep research

This is available to paid users and is Chat GPTs equivalent of Deep Research by Perplexity.

You can ask it to research anything and it will do some initial research and then go off and do more research based on that. Whatever it learns will trigger more research until it is finally happy that it has all the information it needs. It then provides a very detailed report. I asked it ...

***“Develop a comprehensive content strategy for a ladies boutique ecommerce website including topics and formats “***

This is a brilliant tool for getting a very detailed report on a digital marketing plan for your business, how to do SEO for your business, an analysis of your competitors or industry trends.

# Projects

This is another new feature for paid users and I think it is very useful. You could create a project for a topic – for example “SEO for my boutique” .

Instead of having lots of different chats scattered around in your account, you would now save / add them to this project. Chat GPT will then reference all of the previous chats and things you have told it about SEO when answering future questions.

Also within a project you can add custom instructions (tell it you have a hair salon, what your level of knowledge about SEO is, what level of assistance you want etc). Any question you ask within the project will factor in those custom instructions. Each project can have different instructions.

When you attach a file in Chat GPT it doesn't remember the contents if you ask it about it again. But within projects, if you attach a file it will. So you can attach documents with all the keywords you are using, ranking reports showing how you are doing etc. Chat GPT will then always refer back to those documents when answering questions.

The result is that you can ask ongoing questions about a topic and Chat GPT will always build on previous chats / documents / advice. It would be like having an expert marketing advisor that never forgets anything, tailored to your business. You could have different projects for your email marketing, social media posts, SEO etc.

# Custom Chat GPTs – create many GPTs tailored to your specific needs

You can now create a GPT specifically for your needs. For example you could

1. **Create one that is an expert consultant in how to increase sales for your type of business**
  - Tell it details (non personal) about your business – your challenges etc.
  - Ask it to provide recommendation tailored to your type of business

Then ask it lots of questions.

You never have to give it the background or context again

# Custom Chat GPTs – create many GPTs tailored to your specific needs

## 2. Create one that is based purely on your data

Are you a coach / consultant? Do you have lots of content in text format eg. Transcripts, ebooks, etc

You could create a GPT based on your knowledge that your customers could ask questions to

In the future there will be a GPT store and creators will be able to monetise their GPTs

# Custom Chat GPTs – create many GPTs tailored to your specific needs

## 3. Create one for a personal interest eg. cooking

Tell the GPT the type of air fryer you have the types of food you would like to cook in it eg. Bacon, steak, chicken fish

Tell it what type of things you do not like eating

Tell it that you always want to immediately see the temp and cooking time at the top of the answers

Then whenever you ask the GPT it will give you recipes tailored to your taste and your fryer

# How to create a Custom GPT

- On the left menu click Explore GPTS
- Then click create

# How to create a Custom GPT

- **Type into the prompt box. Tell it what you would like the GPT to be about**

# How to create a Custom GPT

- It will suggest a name (you can change this any time)
- It will create a logo for your GPT (you can change this at any time)

# How to create a Custom GPT

- Then provide some direction on what you would like the GPT to factor in – treat it like custom instructions
- It will also ask you what tone of voice you want the GPT to use

# How to create a Custom GPT

- You can now test the GPT by asking it questions on the right hand side
- Then add more instructions on the left if you want to refine it
- Click configure if you want to change name, logo and whether you want to base the GPT on files you upload
- Click save top right to publish it (keep it private to only you if you don't want others to see it)

# Comparison of the features and which are important for digital marketing

## Chat GPT - Free

## Chat GPT - Paid

- Specify Custom Instructions
- Up to date search (Search GPT)
- Can generate images
- Add an image to your prompt
- Add a file as part of the prompt
- Can analyse content on a web page
- Deep research
- Projects
- Multi Step reasoning
- Speak your prompts on desktop
- Speak your prompts on mobile
- Enhanced voice
- Create custom GPTs
- Can analyse live video through your camera
- Create videos by describing them
