What are Instagram Reels?

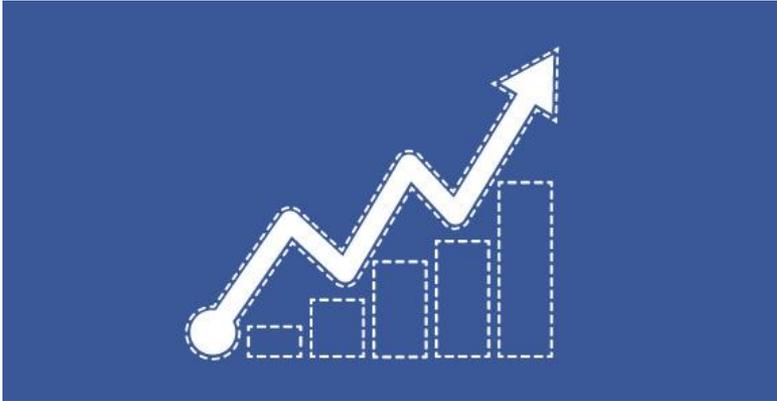

About Reels...

1. It is Instagram's version of TikTok
2. You can create videos up to 3 minutes using Instagram's video creation / editing tool
3. Any video up to 15 minutes long that you want to send out as a post is turned into a Reel
4. You can add any music track to the video using Instagram's music library
5. You can add text, stickers etc just like Stories

Where to they appear?

1. Reels appear in the feeds of your followers
2. There is also a dedicated Reels feed so your Reel can get in front of non followers if Instagram feels it is interesting.
3. Reels also appear in search results
4. You can also share your Reel to your story and users can share your Reel to their stories
5. Your Reels appear in your profile grid and in their own Reels grid

Why businesses are seeing much bigger reach and engagement with Reels

TikTok is a threat to Facebook and Instagram and they don't want people leaving Instagram to post TikToks

So the Instagram Algorithm is really pushing Reels. When you post a Reel ...

- It will reach more of your followers in their newsfeeds so you get more reach
- People enjoy the music and fun element of Reels so they tend to get more engagement
- If the Algorithm thinks your Reel is interesting it might choose to show your Reel to non followers in the dedicated Reels feed so your can reach a lot more non followers that you can with posts or Stories. This can result in more followers.

Therefore, Reels can get you more reach, engagement and followers.

How to find Reels that a specific account has posted

Go to an Instagram profile of an account within your industry

Next to the grid icon, tap on the Reel icon

You can now browse through the Reels in their Reel grid

How to ensure you get the best music library for your Reels

Music is central to most Reels.

However, if you have a business account you do not get the best music library. You get a library of copyright free music.

The only accounts that get the full library of music (containing all the latest songs) are personal and creator accounts.

Therefore, many businesses have switched to a Creator account.

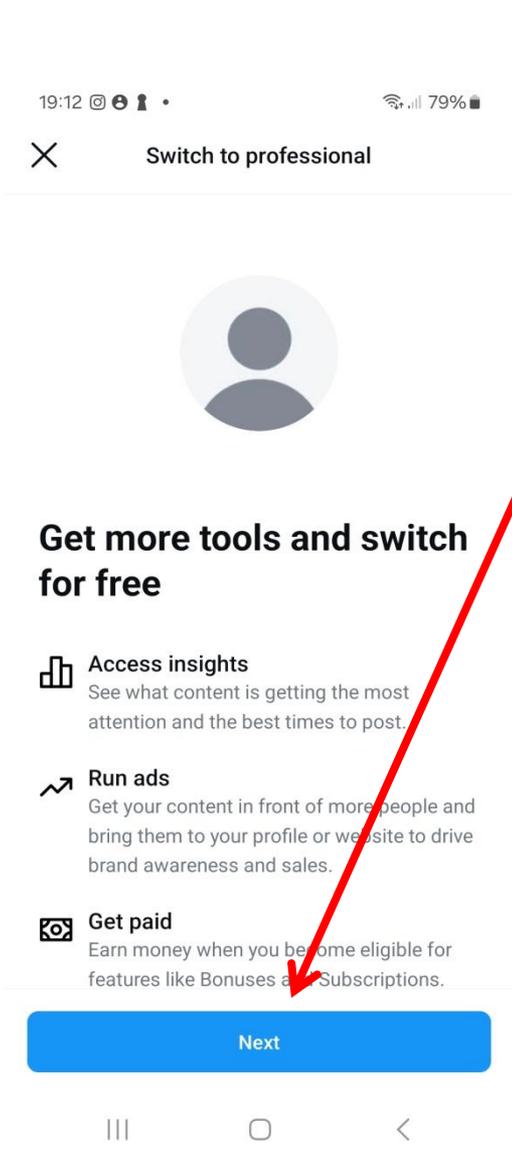

How to migrate – From a personal account

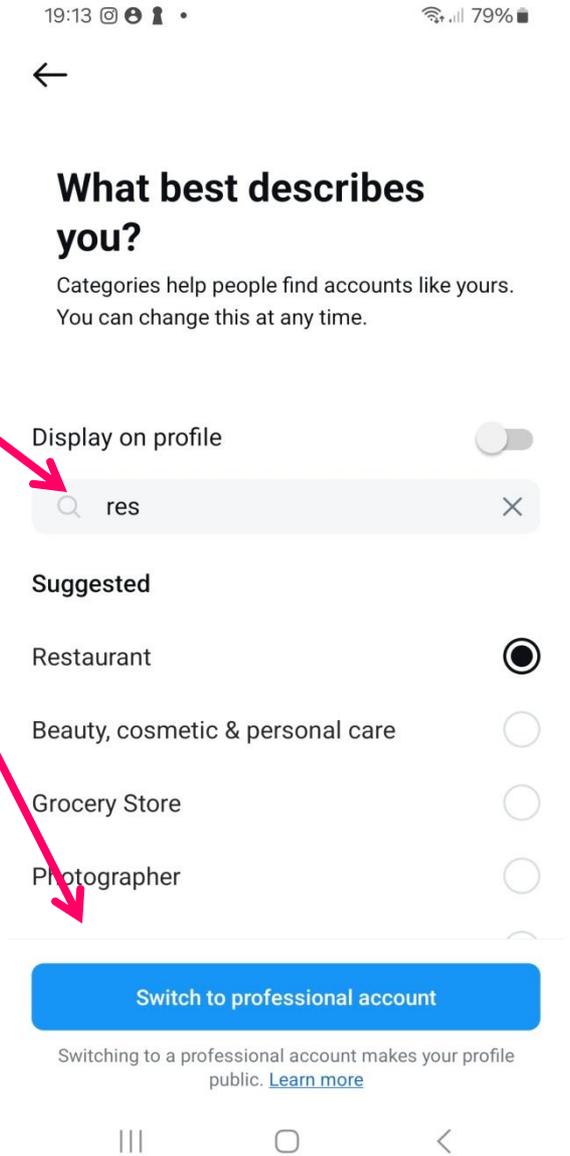

1. Go to your profile
2. Tap edit profile
3. Then tap on switch to professional account

How to migrate – From a personal account

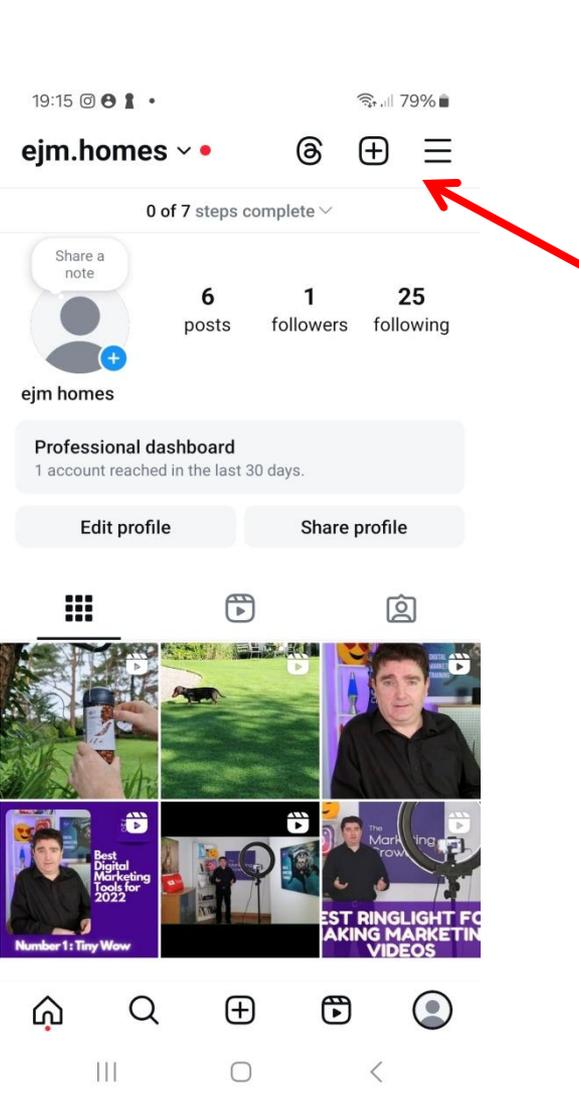

1. Tap next
2. Type in and choose a category that describes your business
3. Tap the blue button

How to migrate from a business to a Creator account

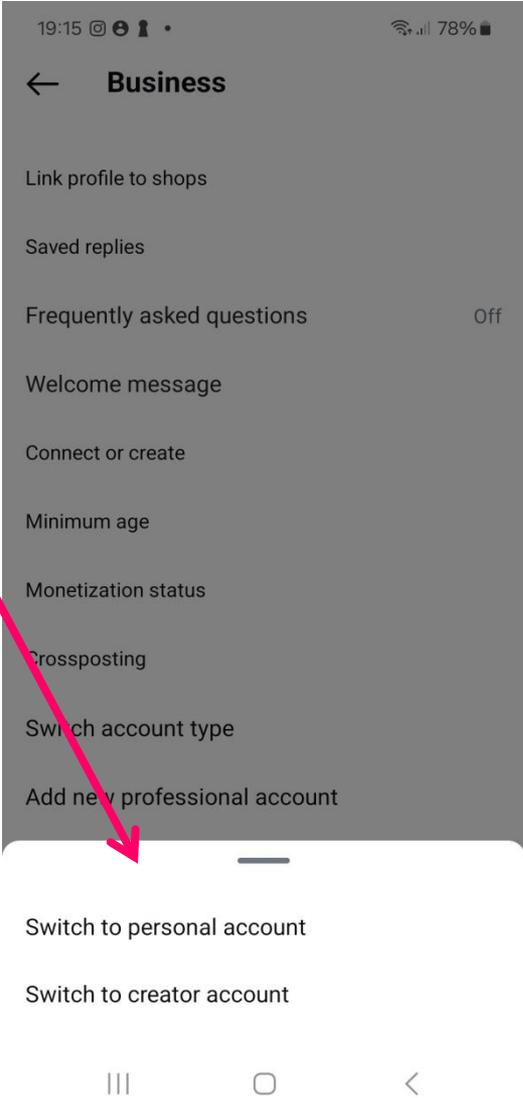

1. Click on your profile icon in the bottom right
2. Then click on menu top right
3. Then scroll down and find Business tools and controls. Tap this

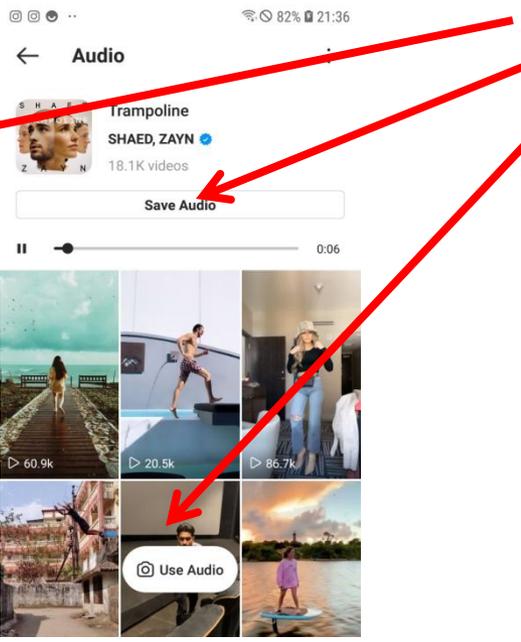

How to migrate

1. Tap switch account type
 2. Then choose which account type you want
- It will then ask which account you want. Select Creator account.

How to save and use music from other Reels that you like

When you are watching a Reel, if you like the music you can save it and then it will be available for you when you go to create a Reel.

1. Tap on the name of the music track
2. Tap Save Audio
3. Or to create a Reel right now using the audio simply tap Use Audio

Ways businesses use Reels for marketing

You could use Reels to ...

1. Showcase your products – product demonstrations, how to use your product
2. Showcase your service
3. Share Educational content – Advice and “How To”
4. Inspire people – beautiful scenery if you are a tour guide, fitness if you own a gym
5. Show behind the scenes activity at work
6. Show your personality – Reels is a great way to show your sense of humour and your fun side

Why use Edits instead of the Instagram app?

Edits is a more powerful editor with more features. These include

- Overlay footage
- Much better text options
- Much better captions
- Ability to go back to a previous project and continue editing it
- Can save your video without a watermark and with music so you can use it anywhere else
- Mirror your video if shot with a selfie camera
- Import your own music (extract from a video)

Why use Edits instead of the free version of CapCut?

Free:

If you use the free version of CapCut, a lot of features have been moved into the Pro version

Edits doesn't yet have all of the features CapCut has but it is 100% free

No Watermark

If you use the free version of CapCut, they have started add a little watermark in the corner of the video.

In edits there isn't a watermark

If you have the paid version of CapCut, it is far better and more powerful than edit.

If you already have the Pro version of CapCut and you want all the latest and best features CapCut is still a much better editing app

1. Better caption effects
2. More advanced video effects
3. Better image animations
4. Better text option
5. Better Ai tools

If you use a lot of these and if they are worth €12 month, continue using CapCut. However,

Edits will be adding a lot more features in the coming months,

Cost: Approx €35

The image shows an Amazon product listing for a 12-inch ring light. The main image is a collage of six photos showing the ring light in use for various purposes: a woman posing for a photo, a couple sitting on a couch, a woman recording a video, a woman sitting on the floor for a camera, a woman sitting at a desk for video recording, and a woman sitting at a desk with a ring light. The text on the right side of the listing reads: "12" Ring Light with Tripod Stand & Phone Holder Tall 177cm/70", GerTong LED Selfie Circle Ringlight with Remote for Makeup YouTube Tiktok, Floor/Desk USB Halo Lamp with 40 RGB Modes 13 Brightness". Below this, it says "Visit the GerTong Store", "4.4 ★★★★★ 5,898 ratings", "#1 Best Seller in Cell Phone Selfie Lights", and "2K+ bought in past month". The price is listed as "-26% EUR33.08" with "RRP: EUR44.91" crossed out. There is a "prime" logo and "Exclusive Prime price". A "Voucher" section shows a checkbox for "Apply 10% voucher" and a link to "Shop items". At the bottom, it says "Save up to 10% with business pricing. Sign up for a free".

How to identify your best performing Reels using Instagram analytics

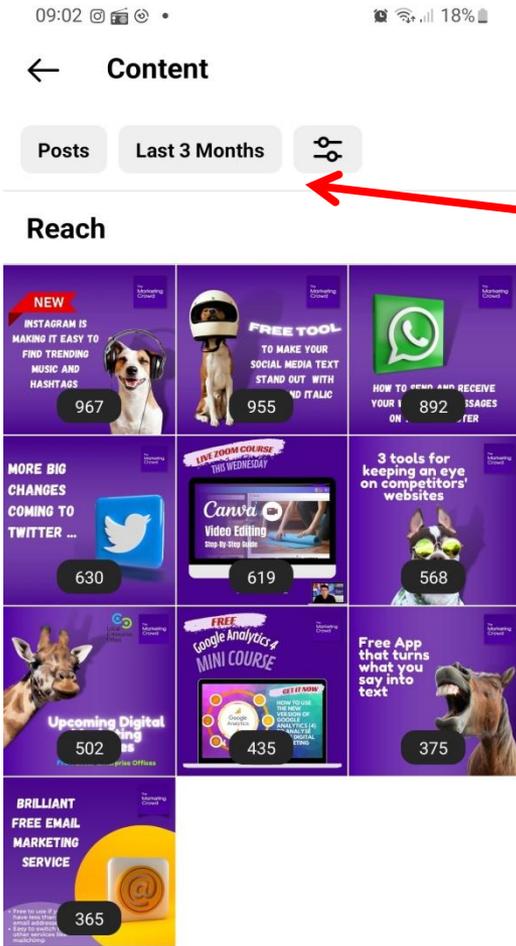

**If you can identify your best and worst performing Reels in terms of engagement you can then ask yourself
What was it about the ones that did well.**

Then do more of those and less of the ones that didn't do well.

1. Once you go to your professional dashboard and tap see all. You will see recent posts, stories and Reels
2. Tap on Posts

How to identify your best performing Reels using Instagram analytics

4. Then sort your previous Reels for the past year by Reach, then Likes, then shares

You will then get a feel for which type of Reels are doing the best for you. Try and send more of those.
