Overview of the Key Areas

The main areas are the Feed, Your Network, your profile, groups. Pages, ads
However, I won't be working my way directly across. Instead I'll start in the order that makes sense from a marketing point of view which is

1. Ensure your profile is updated and is the best representation of you
2. Then Connect with other people (customers / potential customers)
3. Then post interesting content into the feed of your network
4. Then move on to groups pages, etc..

Your Profile

The screenshot shows the LinkedIn profile of Evan Mangan. At the top, the navigation bar includes Home, My Network, Jobs, Messaging, Notifications, Me (with a dropdown arrow), For Business, and Advertise. The profile header features a banner image of a pug in a pool with the text 'DIGITAL MARKETING TRAINING' and a circular profile picture of Evan Mangan. Below the profile picture, his name 'Evan Mangan' is displayed with a 'Verify now' badge. His current role is 'Director at The Marketing Crowd | Digital Marketing Consultant & Trainer'. He is also associated with 'The Marketing Crowd' and 'University College Dublin'. The page shows 2,422 followers and 500+ connections. There are buttons for 'Open to', 'Add profile section', 'Enhance profile', and 'More'. A 'Suggested for you' section is visible at the bottom left. On the right, there are sections for 'Profile language' (English), 'Public profile & URL' (www.linkedin.com/in/evanmangan), a 'Valeo Foods Ireland' promotion, and 'Other similar profiles' including Sara Kennedy.

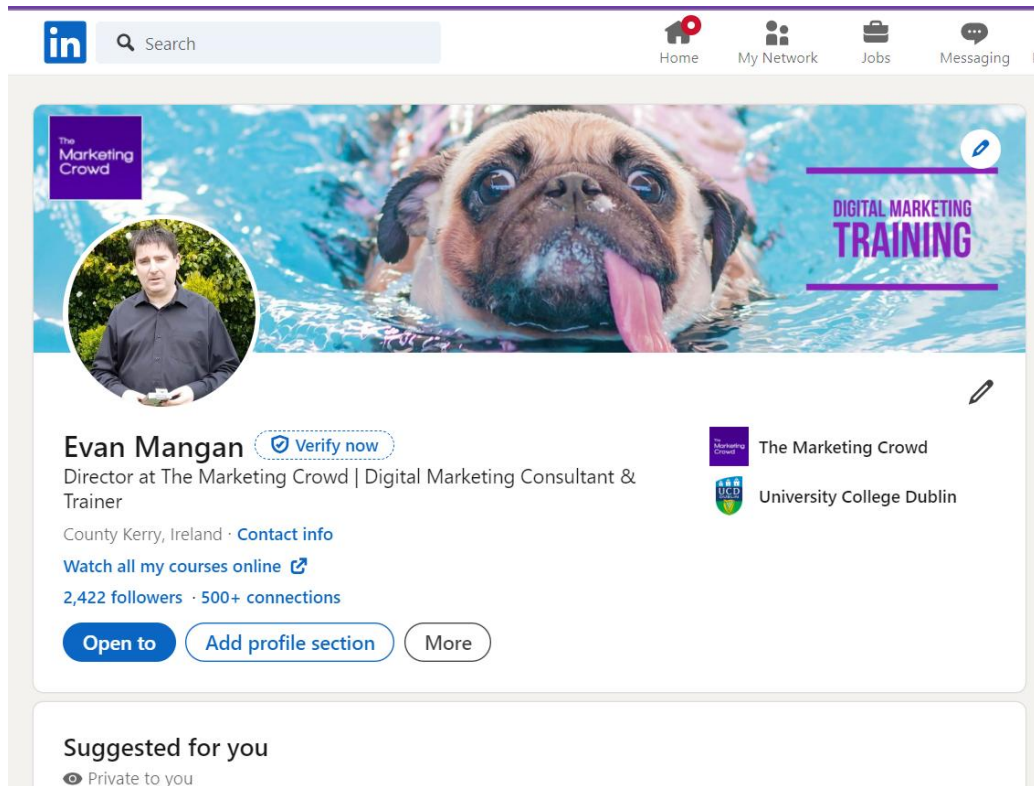

Everyone on LinkedIn has a profile which includes

- Name & Headline (Title)
- Highlights
- Featured
- Activity
- About
- Experience
- Education
- Skills & endorsements
- Interests

- Honors & Awards

To get to your profile click on the dropdown called “Me” and select “My profile”

Your Profile

This is what a profile looks like.

When you join LinkedIn the first thing you do is complete your profile –

I will give you tips on how best to fill in your profile later.

However, at this stage realise ..

1. Your profile is your chance to showcase your skills and your experience
2. A well filled in profile will help you connect to other people and will help you use LinkedIn for marketing.
3. You should also view your profile as a landing page that you will use to drive people to key pages on your website

My Network (Connections)

The screenshot shows the LinkedIn interface. The top navigation bar includes 'Home', 'My Network' (circled in red), 'Jobs', 'Messaging', 'Notifications', 'Me', 'For Business', and 'Advertise'. The left sidebar is titled 'Manage my network' and lists: Connections (2,304), Contacts (406), Following & followers, Groups (29), Events, Pages (53), Newsletters, and Hashtags (7). The main content area is titled 'People you may know based on your recent activity' and shows a grid of profile cards. Each card includes a profile picture, name, title, and a 'Connect' button. The profiles shown are: Brian Commins (CEO at Dublin City FM), Feebee Foran (Herbalist, Green Witch & Owner of multi award...), Sara Kennedy (Digital Marketing Director at Uplift...), Ronan Hickey (Marketing Consultant | Business Consultant |...), Keith Feighery (★ Director of Digital), Irene Feighan, and Stuart Holly (Managing Director at The...).

After you fill in your profile the next step is to connect with other people on LinkedIn e.g. Colleagues, customers, potential customers (prospects)

My Network is an Area where you can manage your contacts & connections

- Search your connections
- You can also review groups you have joined, hashtags you have followed.

Understanding the 3 levels of Connections on Linked

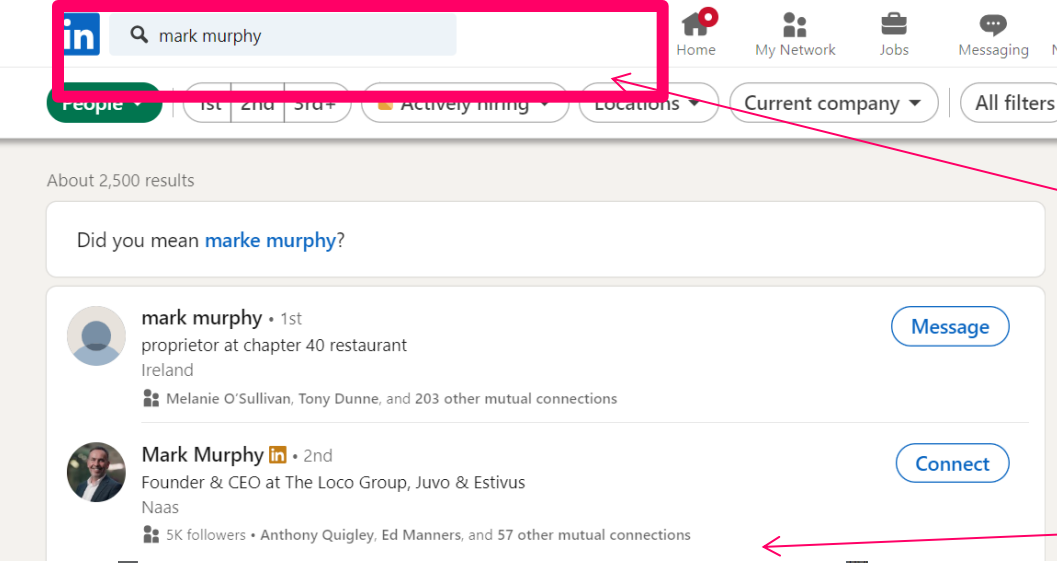

- 1st level connections** are people you have connected with. You can
- message them
 - see their posts and their activity in your feed.
 - Ask for or provide a recommendation

- 2nd level contacts** are the connections of your 1st level connections. It is quite easy to ask them to connect but you cannot
- message them
 - Ask for or provide a recommendation

You can search for and easily find people if they are 2nd level contacts.

3rd level connections include the connections of all 2nd level Connections

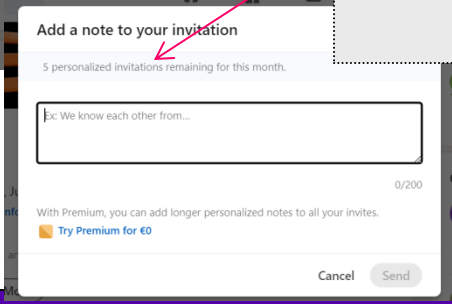

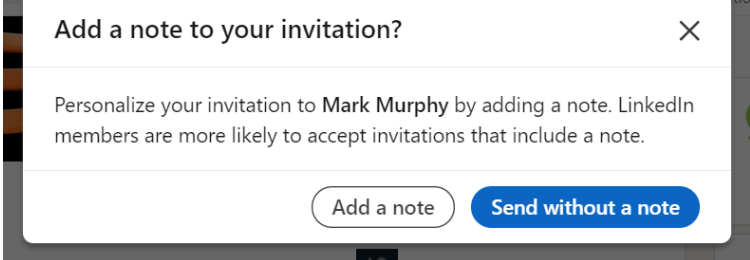

How to Find a connection by searching for their name

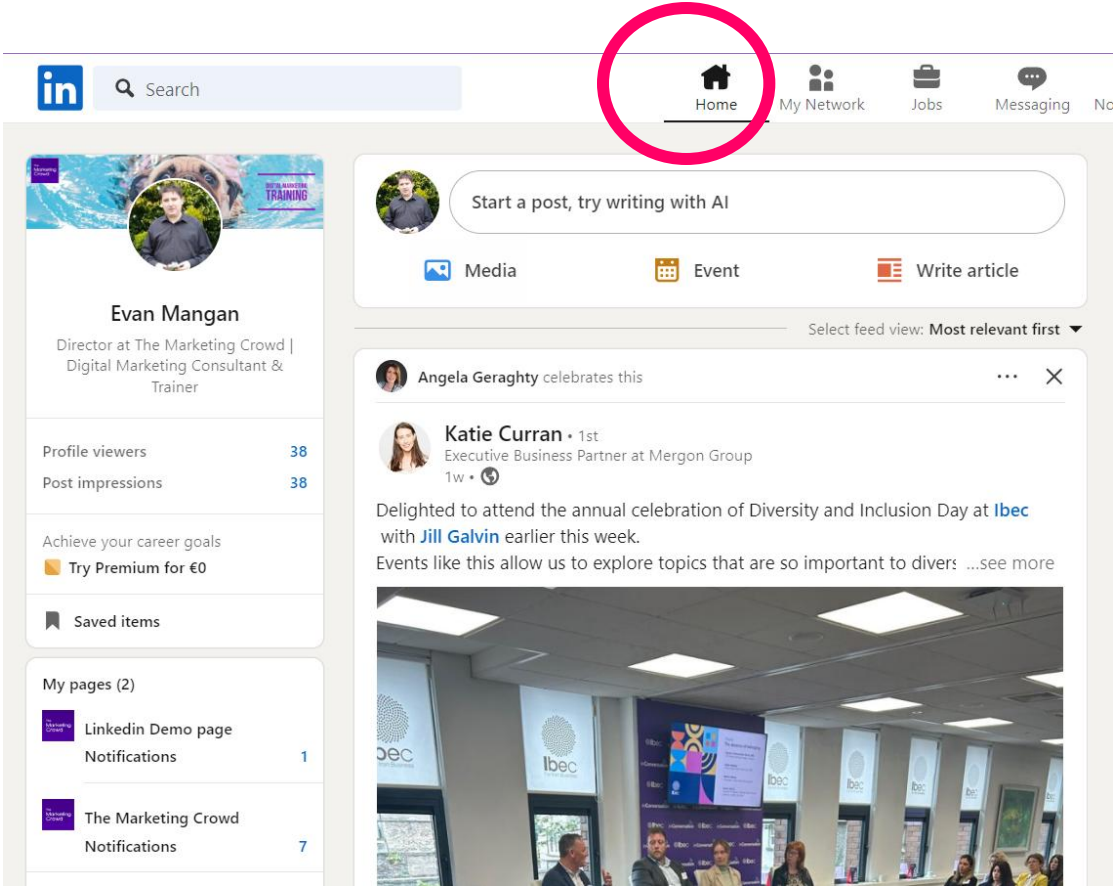

Simply enter a name in the search box
In the search result click on the persons name. Then click on Connect

You will then get an option to write a message

Tip – personalise this message

Home = Your Feed

Once you have connected with other people on LinkedIn your homepage becomes more useful / interesting. It is just like the Facebook feed where you see posts from your connections.

You can send out a post that goes into the feeds of your 1st level connections e.g.

- a link to an interesting blog post
- You can see updates from your network e.g.. connections, updates in groups
- Activities from your connection e.g. posts they have liked or commented on, groups they have joined

Next you might want to join some groups

- Over 1 million groups covering specialist topics
- You can search & join up to 100 groups and you can manage up to 30
- You can create your own group
- You can discuss topics with group members
- You can post “news” items & blog posts
- You can browse member directory & contact members

Groups enable you to ...

1. Position your company as a thought leader / expert
2. Keep up to date with industry developments
3. Improve your expertise
4. Drive traffic to your website

Jobs

The screenshot shows the LinkedIn Jobs interface. At the top, there is a search bar with 'digital marketing' entered and a location filter set to 'Ireland'. Below the search bar, there are several filter buttons: 'Jobs', 'Date posted', 'Experience level', 'Company', 'Remote', 'Easy Apply', and 'All filters'. The search results are displayed in a list format. The first result is for 'Full Time Marketing Lecturer' at Dublin Business School. The second result is for 'Head of Marketing' at Lex Consultancy Recruitment. The third result is for 'Global Digital Marketing Lead' at Atlas. A red arrow points from the 'Jobs' button in the navigation bar to the 'Jobs' section of the search results.

- If you are looking for a Job or you want to recruit someone you should head to the Jobs section
- People can search for jobs & apply for jobs
- You can setup a Job alert and get notified

Company pages

The screenshot shows the LinkedIn profile page for 'The Brehon Hotel & Spa'. At the top, there is a navigation bar with icons for Home, My Network, Jobs, Messaging, and Notifications (with a red badge showing 5). Below this is a search bar and a banner image of the hotel building. The profile picture is a dark blue square with the hotel's logo. The name 'The Brehon Hotel & Spa' is prominently displayed, followed by the tagline 'In Line With Tradition, In Tune With Today.' and details: 'Hospitality · Killarney, Co. Kerry · 3K followers · 51-200 employees'. A notification bell icon is visible. Below the name, it says 'Shane & 88 other connections follow this page'. There are buttons for 'Message', 'Following', and a three-dot menu. At the bottom, there are tabs for 'Home', 'About', 'Posts', 'Jobs', and 'People'. The 'About' tab is currently selected.

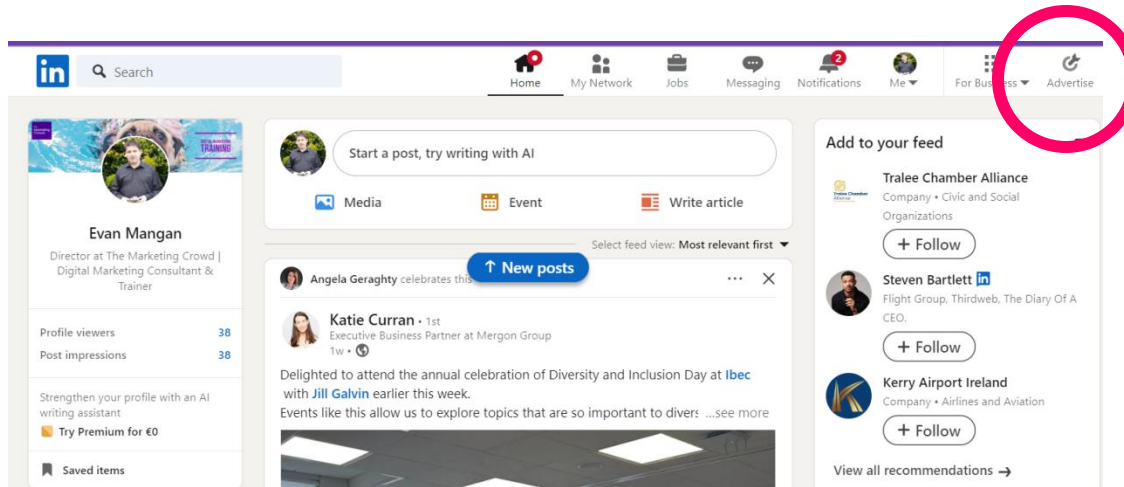

You can create a “Company Page” for your business where you can

- Provide an overview of the company
- List the people working for the company
- List the current vacancies
- Post status updates (links to their content, news etc.)

People can follow companies and keep updated with news / vacancies etc..

To search for a company type the name in search and click on the company name in the search result

LinkedIn Ads

In the top right menu select Work and then “Advertise”

You can run an advertising campaign on LinkedIn

- Text adverts
- Pay per click you can control your budget
- Ability to target specific functions, title, sector, companies, members of specific groups

A Marketing Framework For LinkedIn

**How to use
LinkedIn for
marketing**

Understand important settings before updating your profile and visiting other people's profiles

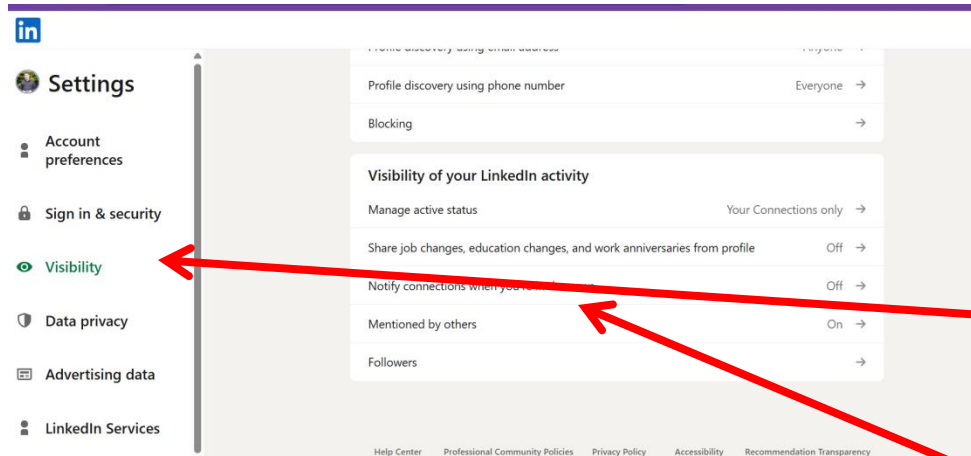

The image shows two screenshots of the LinkedIn interface. The top screenshot is the homepage, where the 'Me' icon in the top navigation bar is circled in red. Below the navigation bar, there's a search bar, a home button, and navigation icons for My Network, Jobs, Messaging, and Notifications. The main content area features a post by Evan Mangan, a post by Pamela Clancy, and a sidebar with 'Add to your feed' options. The bottom screenshot shows the 'Settings' page, which is divided into several sections: 'Verify for free', 'Profile information', 'Display', and 'General preferences'. The 'Settings' page is highlighted with a light blue background.

Very important section where you can change the settings in your account such as

Click the drop-down menu under your Me in the top of the page, then select “settings & privacy”. In here you can ...

- Upgrade your account
- Decide
 - How strangers can see your profile info
 - Whether others can browse your list of connections
 - Plus lots more

Decide whether you want your connections to be told when you update your profile

When you update your profile your connection can get notifications in their newsfeed / and in a LinkedIn update email that you have update your profile image and other section of your profile

If you don't want that to happen ...

In Privacy settings go to "Visibility"

Then "Share job changes etc. with your network"

Then change it to OFF

If you don't want people to see that you have visited their profile, make yourself "anonymous"

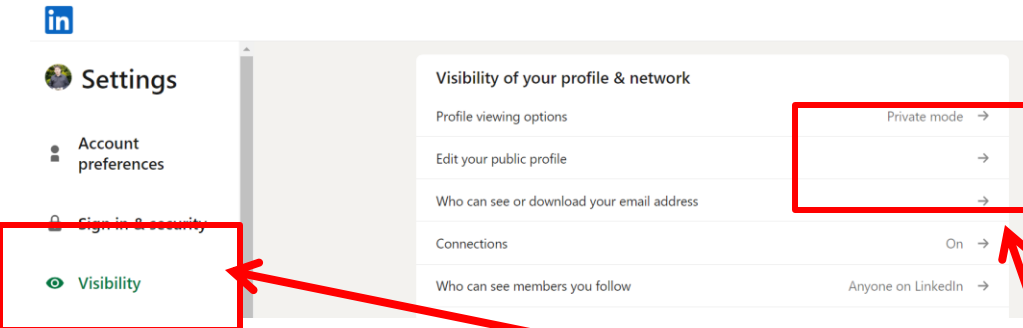

The screenshot shows the LinkedIn account preferences page. On the left, a sidebar menu has 'Visibility' highlighted with a red box. The main content area is titled 'Visibility of your profile & network' and contains three sections: 'Profile viewing options', 'Story viewing options', and 'Edit your public profile'. Each section has a 'Change' button, with the 'Profile viewing options' button also highlighted by a red box. Below this, a modal window is open, showing the 'Profile viewing options' settings. It includes a 'Close' button and a 'Private mode' toggle. Under 'Select what others see when you've viewed their profile', there are three radio button options: 'Your name and headline' (selected), 'Private profile characteristics', and 'Private mode'. The 'Private mode' option is currently selected, indicated by a green dot.

If you don't like the idea of people knowing that have viewed their profile you may want to switch your profile setting to anonymous so that individuals and companies can't tell that you've been looking at their profiles.

To make your profile anonymous, choose

- Visibility
- Then Profile viewing options
- From there, you have three options: Display your name and headline; Display an anonymous profile with some characteristics identified such as industry and title, or totally private mode.

Decide what Strangers will see when they visit your profile

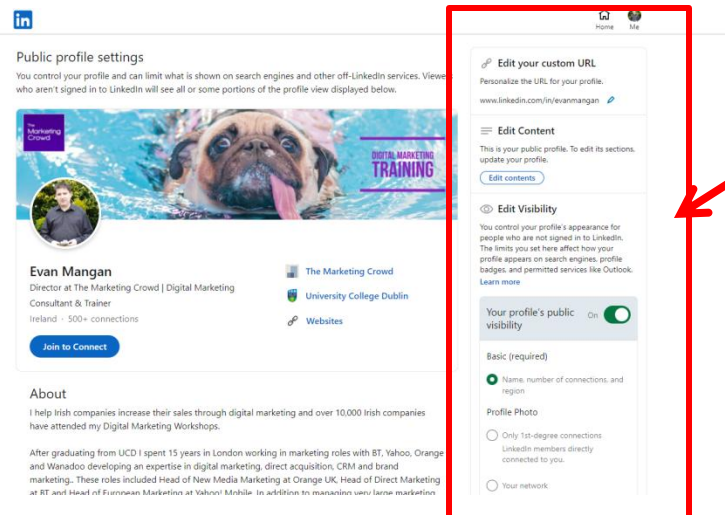

Decide what Strangers will see when they visit your profile

Google favours LinkedIn for people searches. With that in mind, make sure your profile is as complete and clean as possible.

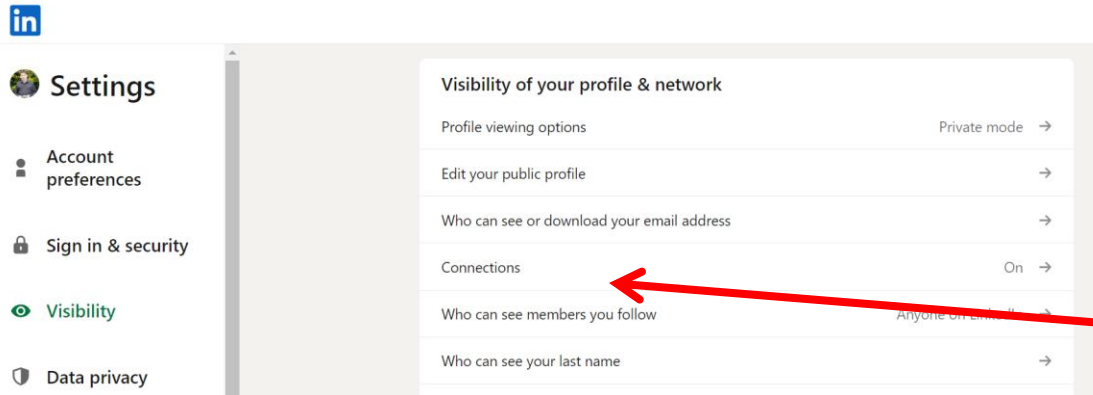

How to select what strangers will see?

Go to settings and Visibility select Visibility of your profile and then edit your public profile

Click on this and in the new page click the box next to the sections that you wish to appear on your public profile

If you don't want people to see your connections you can switch this off

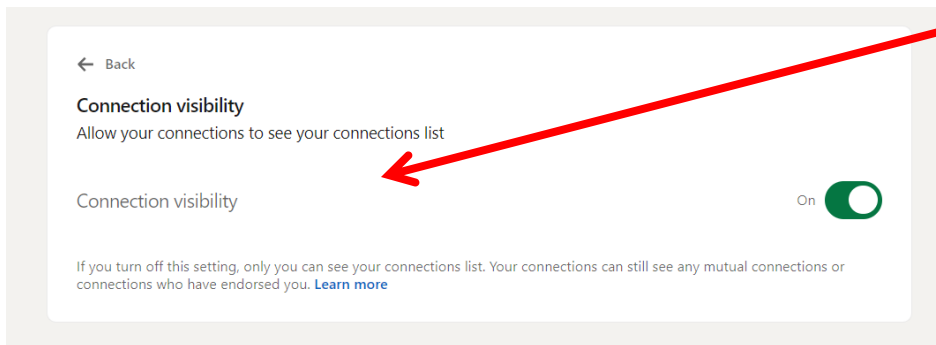

If you think your list of connections is business critical e.g. if you were a recruitment firm – you can switch this off

Go to Visibility of your LinkedIn activity

Then click connections

Then choose if you want to switch it off

Profile Setup – Be 100% clear about what you want to achieve using LinkedIn and factor that into the content on your profile

For example, if I appear in search results and people click through or if someone sees my content and clicks through to my profile, there are two main services I want to promote to them

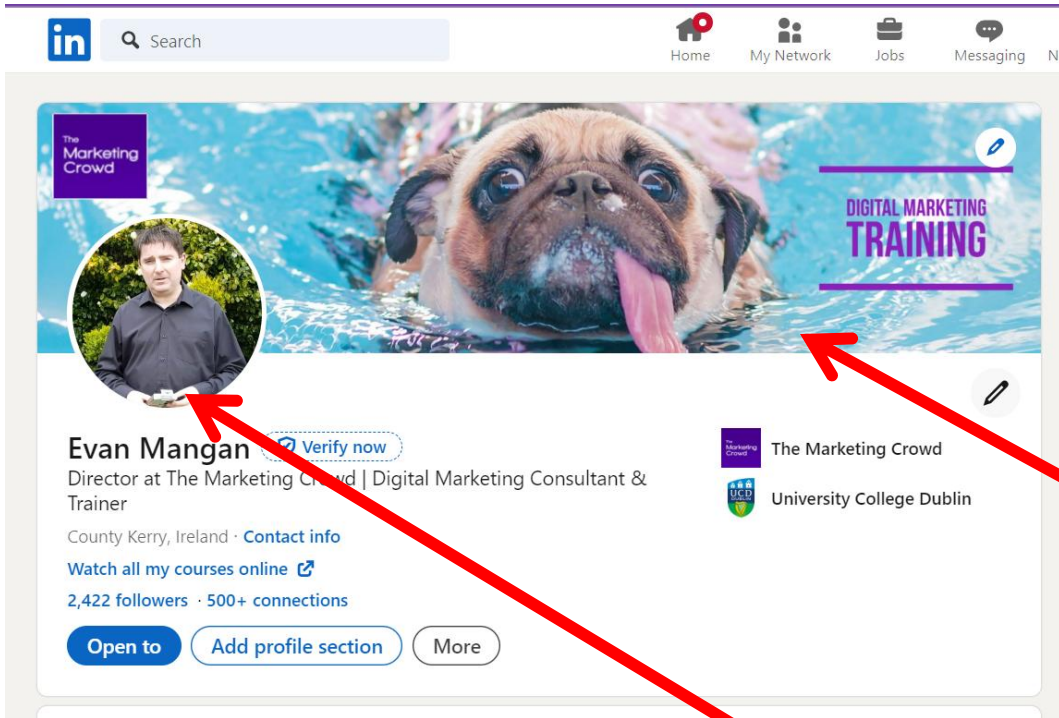

1. Watch all my courses online in our digital marketing school
2. Book a 1-1 digital marketing advice session that is tailored to your business

So I ensure that these two products / services are very prominent and I link to them on the website wherever Possible

What do you mainly want to achieve?

- What 1-2 products / services to you want to generate leads for

Profile Setup - Add a cover & profile image to your profile

To Update your profile images go to your profile. Click on "me" in the top menu and then my profile

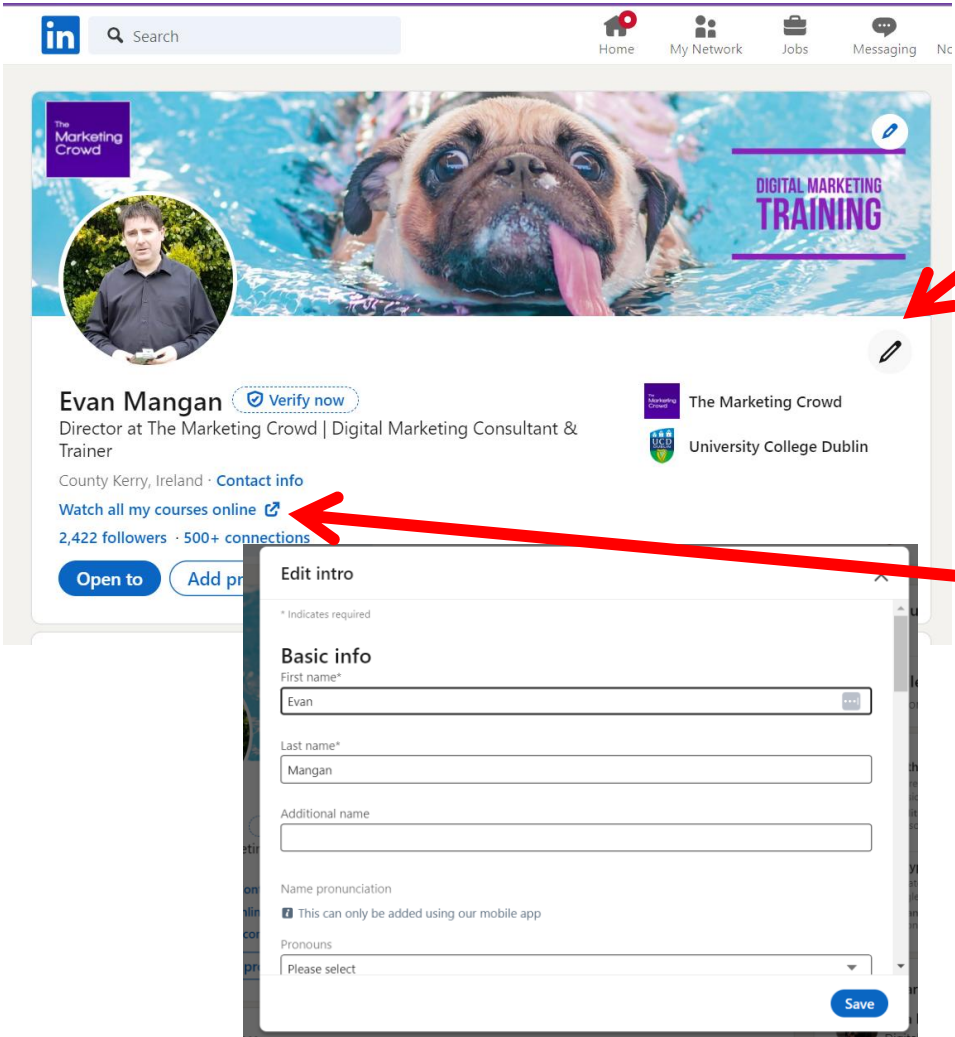

The main cover image is a chance to make an impression when people land on your Profile

Specs

- 1,584 x 396 pixels is the recommended cover photo size
- Cover photos have a maximum file size of 8mb
- LinkedIn accepts PNG, JPG, and GIF file types for cover photos

Ensure your Profile pic is a business related image

Profile Setup – Fill in the “Intro” section

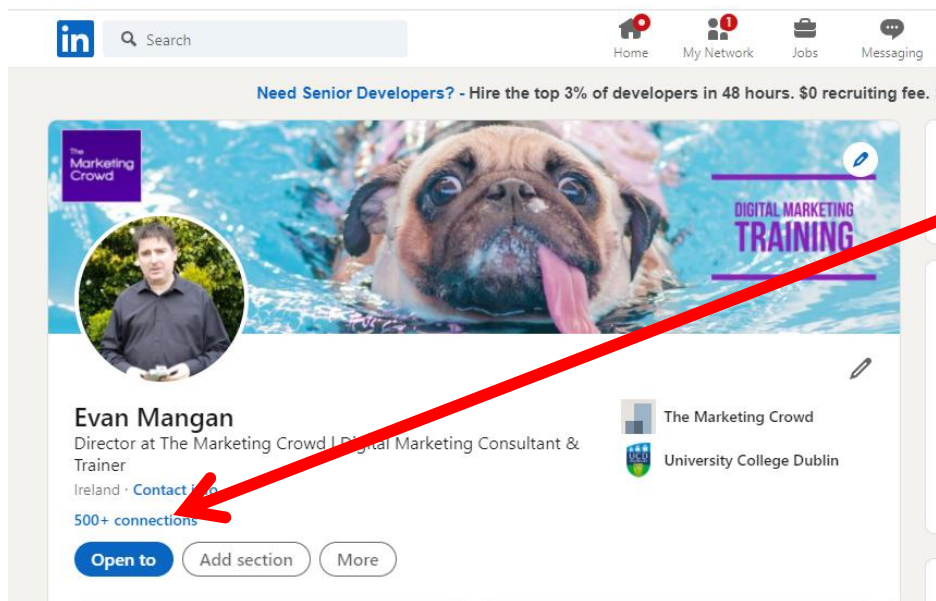

When you click on the pencil icon you can then ...

- Edit your name
- Add a headline which is visible whenever you appear on LinkedIn
- Location
- Contact information
- Your current position

Add a prominent link to a page on Your site that promotes one of your main objectives

Profile Setup - Fill in the "Open To" section

When you click the button "Open To" you can indicate whether you are open to

- Finding a new Job (**it is NOT advisable to say this**)
- Providing service
- Hiring candidates

Profile Setup - Fill in the "Core" sections and recommended sections

Need Senior Developers? - Hire the top 3% of developers in 48 hours. \$0 recruiting fee. !

Recommendations provide a lot of depth to your profile and greatly increase your credibility.

Request recommendations from your first level connections that you have worked with. It is very natural to request these.

Go to a 1st level connection, click on More and select Request a recommendations

Always

- Specify the work that you are requesting the recommendation for
- Personalise your request.

Profile Setup: How Chat GPT or Google Gemini can assist you

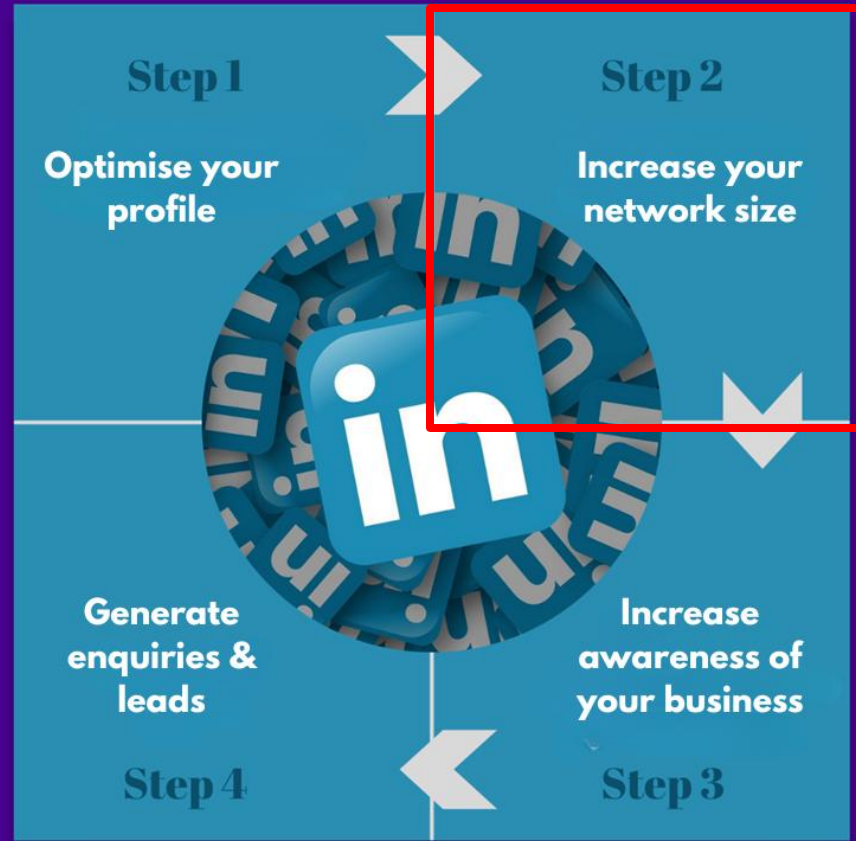

You could use Chat GPT or Gemini to help you with writing some initial draft content for your LinkedIn profile

1. Step 1 – tell the Ai about your career history, what you did in each job and what your current company and role is.
2. Then tell the AI that you want it to act like a LinkedIn expert and answer the following questions
 - Brainstorm 5 headlines for my LinkedIn profile
 - Write an about section for my profile
 - Write a brief summary for each of the roles I worked in.

View the answers as a draft that you can then work on. You should write your own LinkedIn content.

A Marketing Framework For LinkedIn

The
Marketing
Crowd

How to use LinkedIn for marketing

Step 1: Grow your network: The difference between open and closed networkers

What is a closed networker?

- Most people on LinkedIn simply connect with the people that they know very well
- They do not aim to connect with people that they do not know well i.e.. They do not send out requests to connect or they do not accept invitations from people they do not know.
- They want their network to be small and tight. Therefore, their 1st level network is small

Should you have a small network or a large network?

What is an Open networker?

- An open networker believes that LinkedIn provides an amazing opportunity to find business opportunities, to get introduced and to be found by potential customers.
- They want to expand their network as wide as possible in order to increase the potential business opportunities. The more people in their network, the greater the opportunity.

Aim to have a network of min 750 – 1,000 + connections

The marketing advantages of being an open Networker

1. Your connections see your posts, articles, newsletters and upcoming live events. Therefore, a larger network is getting exposed to your expertise and your messages.
2. You can search for and more easily connect with people if they are 2nd level contacts. Therefore, the more 1st level contacts you have, the more diverse they are and the more connected they are, the larger the opportunity to be to find an connect with people in specific companies, industries etc..

Ways to Grow your network: Invite people you interact with in business to connect

Invite people you interact with in business

Whenever you meet new contacts through business – Either prospects or new clients immediately send them a LinkedIn invitation.

Make it a habit

Ensure you always rewrite the template invite text – send a personalised message

When you invite people to connect never send the template message. It implies that you want to connect but you can't be bothered to take the time to ask.

Writing a short message make an impression and make you / your LEO look professional....

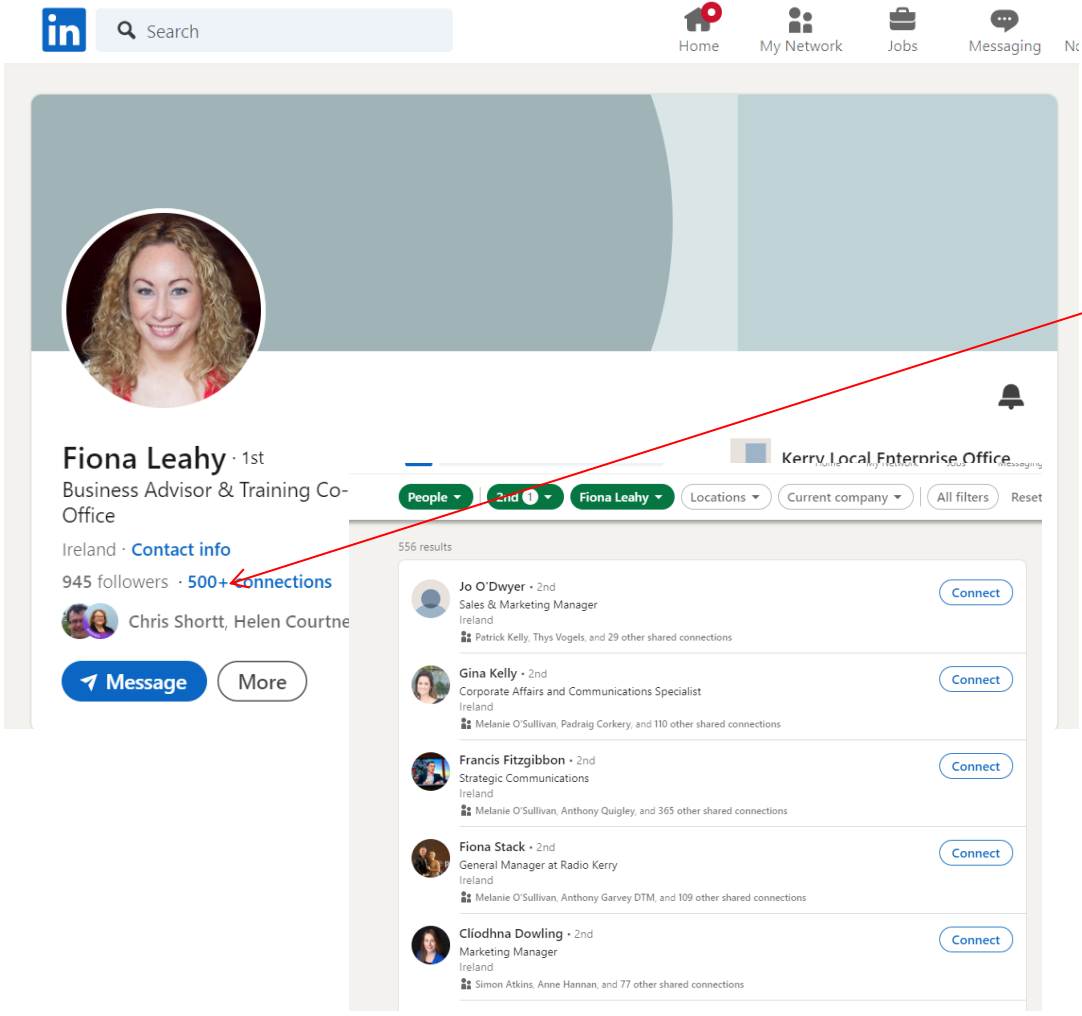

Hi John

Hope you're well. I thought we could connect on LinkedIn to help broaden each other's networks.

All the best

Evan

How to Find a connection by browsing others connections

Go to one of your first level connections

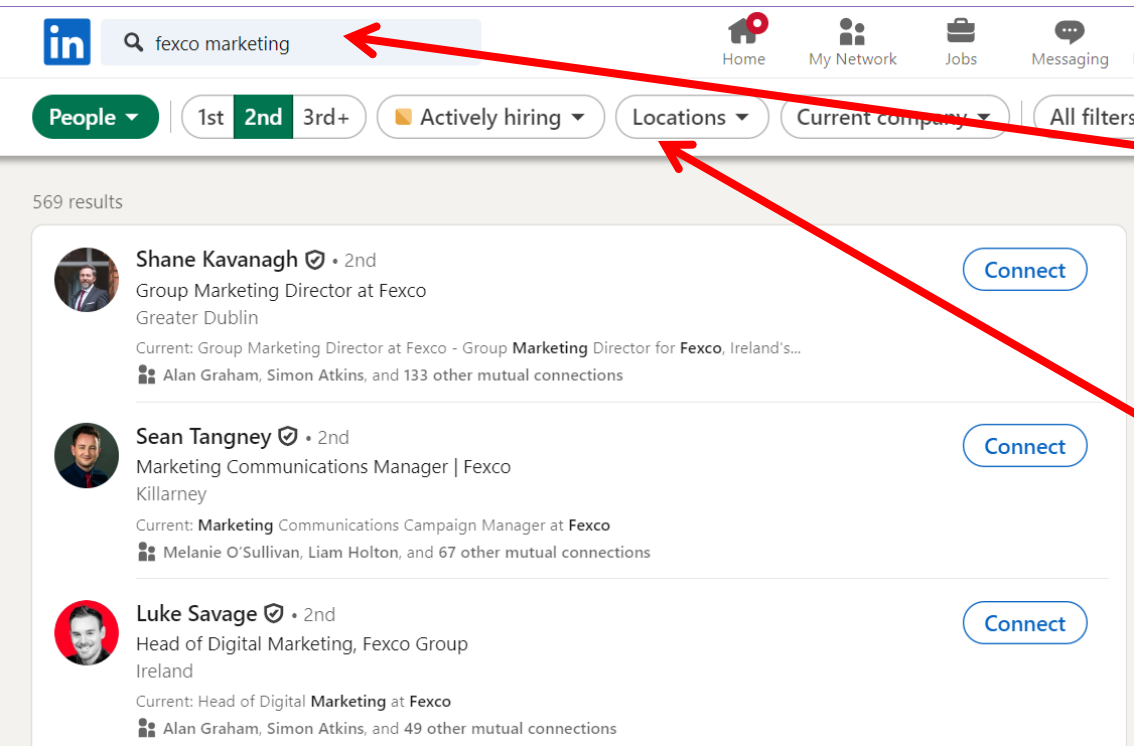

Click on “connections”

You will then be able to browse through a list of all of their connections and invite them to connect.

You can filter and select “2nd connections” - now you only see the people that you are not connected to

This is a very useful way of discovering people (and potential business leads)

How to find a connection by searching for company name & function

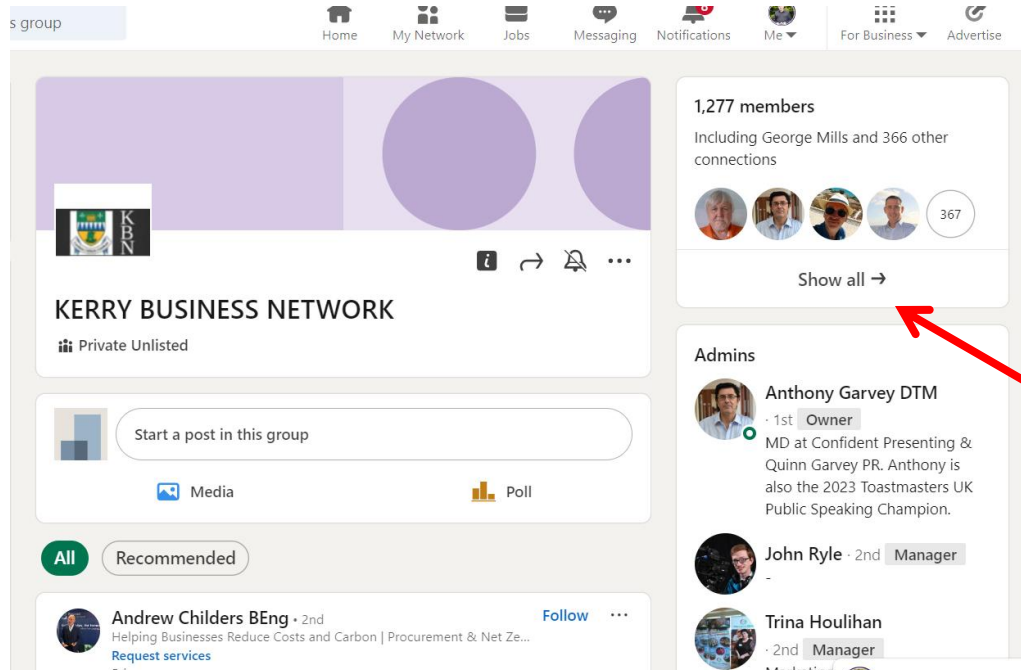

In this example I am searching for “Fexco Marketing” and in the search results I am shown everyone in the company Fexco who works in marketing

You can then filter these results by ..

1. Whether someone is a 1st, 2nd, 3rd level connection
2. Their location
3. Their current company

Ways to Grow your network: Join relevant groups and then connect with members

Use LinkedIn Groups to connect

You can join up to 100 groups and you can send a connection invite to any member of the groups you are in.

Go to a group you are a member of
Click Show all

Also, you can get active in the group and connect with people you interact with a lot.

A Marketing Framework For LinkedIn

The
Marketing
Crowd

How to use LinkedIn for marketing

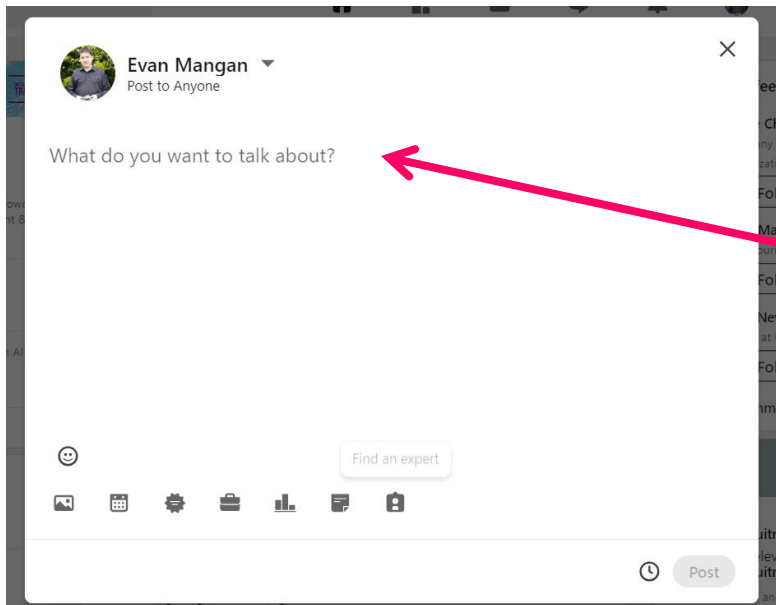

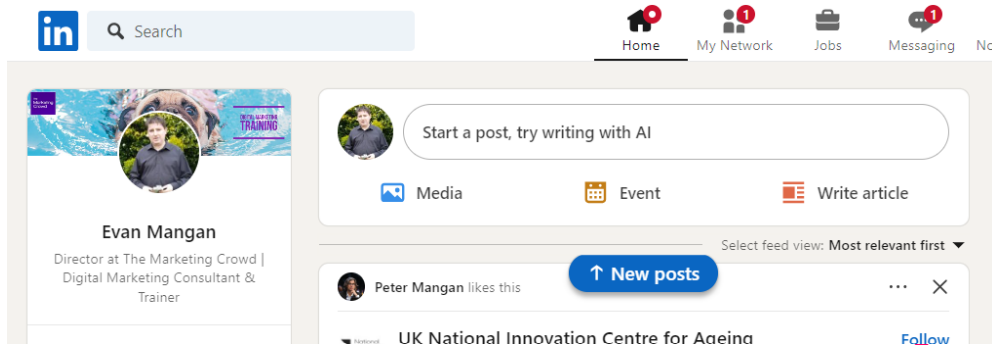

Increase awareness of your business, products, expertise: Post regularly. Position yourself and business as experts in your area

Post status updates

- You can post a status update which can be anything from a link to a blog post on your website, a PR announcement, some company news etc.. You can post an update from your feed
- Your updates are seen by your connections when they login to their LinkedIn homepage. People can click on the links in your updates and are taken to your website where they are exposed to your marketing messages / incentivised to download an ebook (therefore joining your e-marketing list)
- Therefore, it is an excellent way of getting your news and your expertise in front of your connections. The larger your network, the more people are exposed to your updates

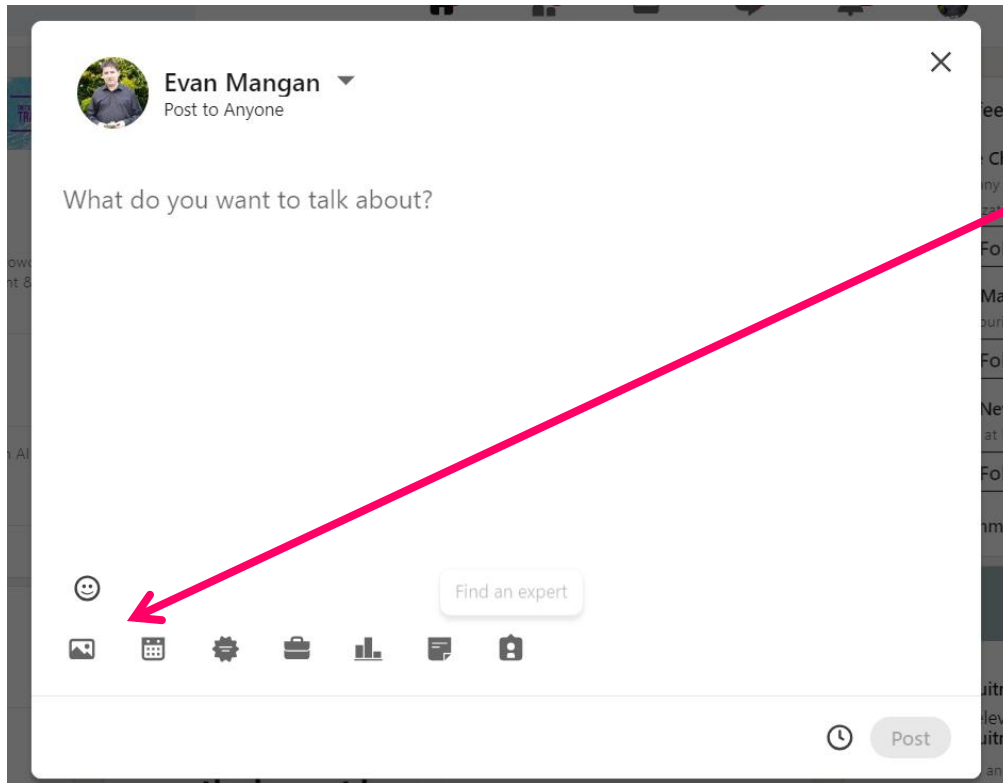

How to post

- You can post an image (s) , a link to an interesting article or blog post, or a video that your connections would be interested in.
- It is the same principle as posting an update on your Facebook business page or Instagram profile
- Click on the box that says start a post. Then a larger box pops up
- Simply type your update in the box

You can also add Hashtags to your post.

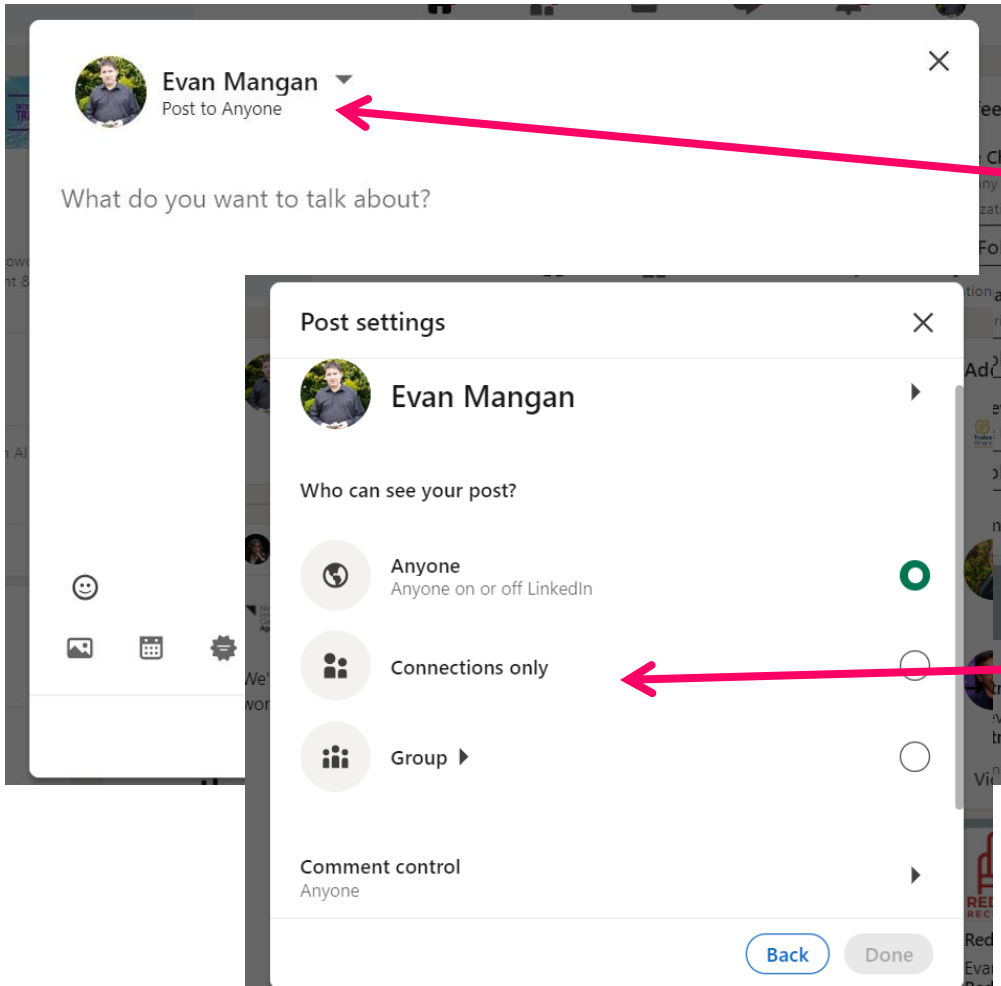

How to post

Be aware that the options at the bottom allow you to

1. Add media (images or video)
2. Create an event
3. Celebrate an occasion e.g. you have completed a project, got a new job
4. Share that you are hiring and post details of the job
5. Create a Poll
6. Indicate that you are looking for an expert and provide details

How to post

Also, by clicking “post to everyone” in the top you can

- Share with all on LinkedIn (visible to your connections and non connections)
- Or choose to share with your connections only (on their homepage feed)
- Or you can choose a group to send this post to

You can also restrict comments to either your connections or switch comments off

Use Hashtags

Hashtags increase the discoverability and reach of your post

Add hashtags to your posts just like you would on Facebook or Instagram

There is No limit but the optimum is 3 - 6

How can hashtags help you get discovered?

1. When someone clicks on a hashtag, your post will appear in the search results
2. Is someone searches for content, if those search words are in your post (in a hashtag_ your content will appear in the search results

Increase awareness of your business, products, expertise: Post Videos

Video has become very important on LinkedIn like on any social network

Post more videos where possible

Videos can be anywhere from three seconds to 10 minutes in length, with a maximum file size of 5GB. LinkedIn allows you to upload square, landscape and vertical videos,

Square or vertical are better than landscape. Vertical is quickly becoming the norm in LinkedIn.

Increase awareness of your business, products, expertise: Post Carousels

Just like there are carousel posts on Instagram (multiple images that you can swipe through) you can also post Carousels on LinkedIn

But it's not obvious how you do it

Essentially you need to attach a pdf.

- 1. Go to Canva and create the first image as a square*
- 2. Then add a 2nd page and add your 2nd image*
- 3. Repeat with as many images as you want.*
- 4. Then when you are downloading it from Canva ensure you save as a pdf*

Increase awareness of your business, products, expertise: Consider posting longer articles

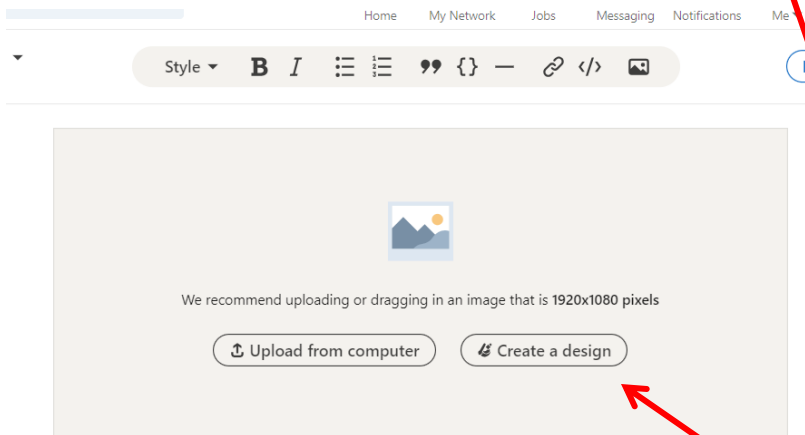

View articles as like LinkedIn Blog posts that allow you to provide a lot more information. These articles allow you to share your expertise and helpful content.

Your LinkedIn articles can be seen by:
Your connections: People who are connected to you on LinkedIn will see your articles in their feed.

People who follow you: If someone follows your company page or your personal profile, they will see your articles.

People who search for relevant topics: LinkedIn's search algorithm can help your article reach a wider audience based on its content and keywords.

Click on Write article
Then add an image and your content. You can add images or embed videos into your article

Title

Write here. You can also include @mentions.

Increase awareness of your business, products, expertise: Consider creating an event (Physical or Live event)

You could promote an upcoming Live (online) event or a physical event

LinkedIn
Events.

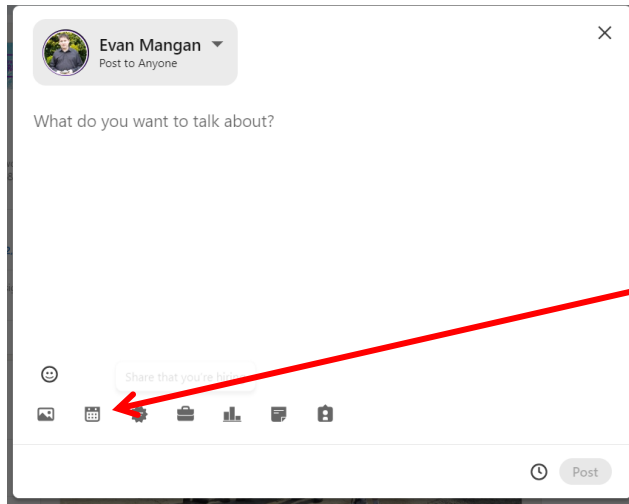

This could be

- Interviewing someone within your company or industry about an interesting topic
- Sharing an update about industry news / trends
- Sharing tips / advice on a topic

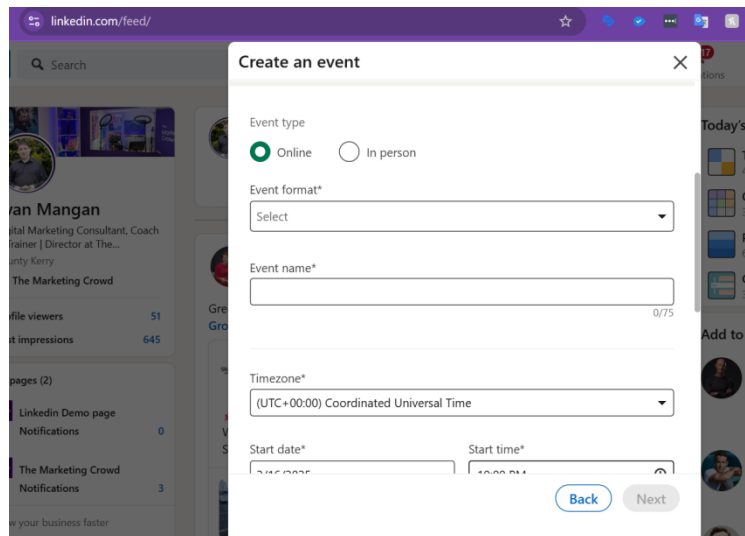

Note: People can search for and find events. Also, LinkedIn will recommend events to users. So it's a good way to get discovered.

Increase awareness of your business, products, expertise: Consider creating an event

How to create an event

1. In the create a post box click on the icon for Create Event
2. Upload an image for your event – you could design one in Canva that has the name of the event. (A 16:9 landscape image e.g. YouTube thumbnail)
3. Select Online
4. From the dropdown select “LinkedIn Live” or Physical event
5. Choose the time of the event

Increase awareness of your business, products, expertise: Consider creating an event

What happens once you create the Audio event?

1. It will go out as a post into the feeds of followers and they will be able to indicate that they want to attend. If they do, they will get a reminder just before the event
2. You can invite people to the event and they can indicate that they want to attend

Increase awareness of your business, products, expertise: About Going Live

However, you cannot broadcast live within LinkedIn. You have to use a 3rd party live streaming service

These are Restream, Socialive, StreamYard, Switcher Studio, Videom or Zoom

E.g.

1. Go to restream and setup an account
2. Create a live event
3. Connect to your LinkedIn account
4. When it is time to go live login to your restream account and go Live.
5. It will then appear on LinkedIn and people on LinkedIn can view it.

What is a Showcase page?

Examples of showcase pages

<https://www.LinkedIn.com/showcase/adobe-creative-cloud/>

<https://www.LinkedIn.com/showcase/appexchange/>

LinkedIn Showcase Pages are essentially sub-pages of your main company LinkedIn page. They allow you to focus on specific products, services, brands, or initiatives within your company. Think of them as micro-pages within your overall company profile.

Benefits of Showcase Pages:

Targeted content: Deliver specific content to specific audiences.

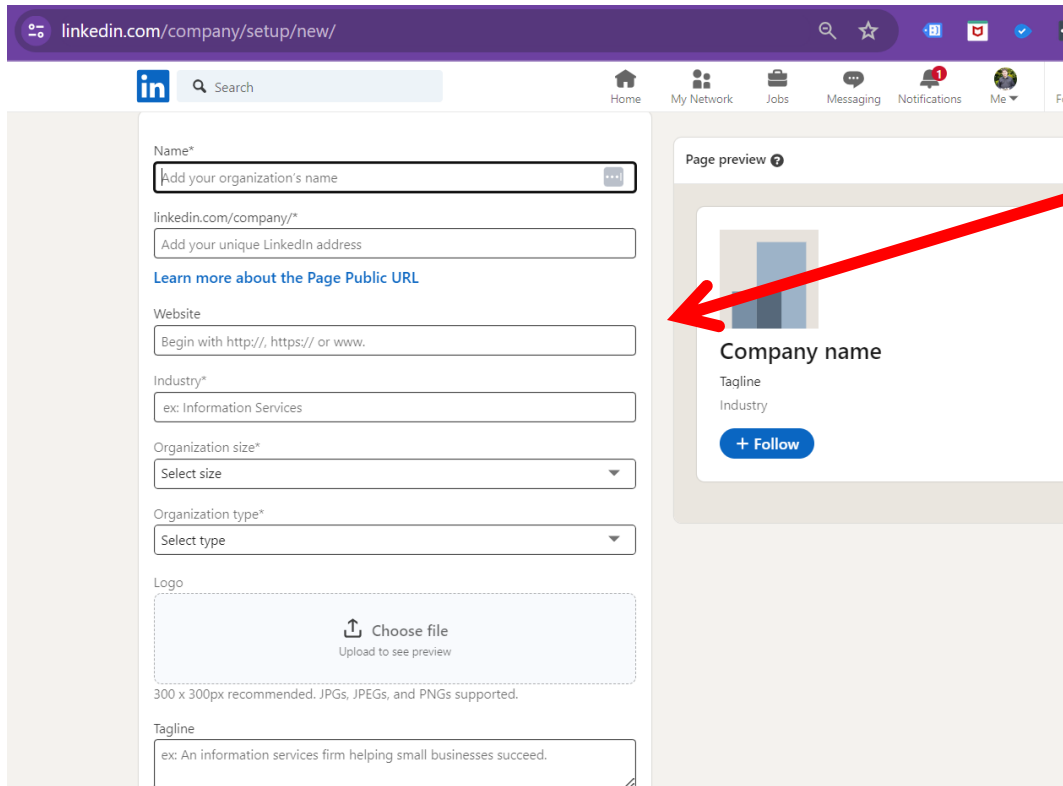

Increased engagement: Build dedicated communities around particular products or services.

Improved analytics: Track performance of individual product lines or campaigns.

Enhanced brand awareness: Highlight specific aspects of your company.

For example: A car manufacturer might have Showcase Pages for different car models, while a tech company might have Showcase Pages for various software products.

How to use LinkedIn for marketing

Generate Leads: Ensure that your profile is fully focused on promoting your 1-2 main products or services

As covered in the optimise your profile section

...

1. Decide what are the 1-2 main products of services you want to generate leads for
2. The add a prominent link to one of them at the top of your profile
3. Add an image link for each in the featured section
4. Add an image and links for each in the current employment section of your profile

So, whenever people check out your profile having searched, viewed a post, article, newsletter, Live event, they will be prompted to check out your main services products.

Generate Leads: Post occasional links to pages on your website about your products / services which go out to connections in their feeds

Most of the content you send out should be useful, interesting and helpful.

However, you should also post occasional updates about your products / services and ideally link back to your website

These could be image, video or Carousel posts.

Generate Leads: Post occasional links to lead magnets on your website

Do you use email for marketing? If so, have you created downloadable guides or in depth videos that people can access when they signup with their email?

If so, you should then share a link to these in a post. You could send this out ..

1. From your personal profile
2. From your business page
3. On any relevant groups

Generate Leads: Post articles about topics that potential customers might be searching. Establish credibility and then link back to your site.

Recap: What type of a marketing tool is LinkedIn?

What kind of marketing tool is LinkedIn

Essentially, LinkedIn provides a unique blend of social interaction, lead generation, content marketing, and advertising capabilities, making it a powerful tool for businesses to connect with their target audience and achieve marketing goals.

Social network: Building and nurturing relationships with professionals in your industry.

Lead generation platform: Identifying and connecting with potential customers.

Content distribution channel: Sharing valuable content to position your business as an industry expert.

Employer branding tool: Attracting and retaining top talent.

Advertising platform: Reaching a targeted audience through paid advertising.

What kind of marketing tool is LinkedIn

It is not a hard selling tool.

- Most businesses are on LinkedIn in order to help further their business. But don't fall into the trap of being seen as a hard sell salesman. Therefore;
 - Don't build up a connections list and then start sending out direct messages about your products / services
 - Don't send out "thanks for connecting" messages which contain a sales message. It comes across as crass.
 - Don't go for the heavy sell.
- You can do occasional selling

What kind of marketing tool is LinkedIn

But even though it isn't a "hard Selling environment you can definitely use LinkedIn to generate leads / enquiries

- It's a platform for building relationships, establishing credibility, and positioning your business as a solution provider.
- While you might not make a direct sale through a LinkedIn post, it's an excellent place to start a conversation, generate interest, and ultimately guide prospects towards a purchase.
- Essentially, LinkedIn is a key component of the sales funnel, helping you move leads from awareness to consideration and eventually to conversion.
